Bank Deposits and The Victory Loan

November Statement Shows Decrease of Over Hundred Million in Savings Deposits, but Gain of Twenty-three Million in Demand Deposits—Current Loans, Call Loans and Circulation all Show Increase for the Month—Substantial Increases in Subscribed and Paid-up Capital and in Reserve.

	November, 1918.	October, 1919.	November, 1919.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$ 666,366,359	$ 705,280,241	$ 728.657,589	+ 9.4	+ 3.3
Deposits after notice	939,329,271	1,262.746,984	1,137,858.277	+21.1	— 9.9
Current loans in Canada	1,082.709,655	1,104,940,160	1,189,408,523	+ 9.1	+ 7.7
Current loans elsewhere	110,010,815	160,713,386	149,302.293	+35.4	— 6.9
Loans to municipalities	40,865,358	56,116,897	52,703,363	+30.0	— 7.1
Call loans in Canada	85,675,063	100,549.390	121,754,469	+42.4	+21.0
Call loans elsewhere	171,035,732	158,194,085	169,626,880	— 1.7	+ 6.9
Circulation	242,309,082	242,509.573	248,073,385	+ 2.4	+ 2.3

The above are the changes in the principal accounts of the chartered banks in Canada, according to the statement of the finance department for November, compared with October, 1919, and with November, 1918. There was no change in authorized capital during the month. Subscribed capital, paid-up capital and reserve were added to as follows:—

	Capital subscribed.	Capital paid-up.	Reserve.
Merchants	....	$ 12,223	....
Provinciale	....	850	....
Union	$1,302,100	1,333,190	$1,018,744
Royal	88,900	124,150	112,075
Hamilton	....	5,020	2,510
Hochelaga	....	....	100,000
Home	....	11,011	....
Sterling	....	391	....
	$1,391,000	$1,486,835	$1,233,329

Circulation continues to grow, although the increase in November was just about half what it was in October. The maximum circulation is usually attained about this season of the year. The balances due to Dominion government have jumped from $121,028,537 to $350,381,389 during the month, representing Victory Loan proceeds remaining on deposit to the credit of the government. Balances due to the provincial government have also increased by $3,000,000. The effects of the Victory Loan on deposits was very similar to the effects last year, as the following table shows:—

	Deposits payable on demand.	Deposits payable after notice.
1918—October	$644,220,998	$1,076,514,627
November	666,366,359	939,329,271
December	711,034,060	958,473,557
1919—January	623,919,410	990,000,085
February	566,775,434	1,018,184,512
March	566,797,268	1,037,851,766
April	571,412,857	1,070,985,080
May	568,730,118	1,107,983,072
June	605,927,027	1,139,569,570
July	584,176,765	1,175,092,155
August	$584,300,855	$1,196,632,931
September	650,743,015	1,277,437,715
October	705,280,241	1,262,746,984
November	728,657,589	1,137,858,277

Deposits outside of Canada increased from $253,965,203 to $259,047,187. Those from other banks also increased by over $3,000,000. Balances due to banks in the United Kingdom are up by about $1,000,000, but those due to banks elsewhere decreased by over $3,000,000.

The course of deposits account during the past six years is shown in the following table:—

Nov.	On demand.	After notice.	Total.
1914	$350,884,153	$ 625,994,852	$ 976,879,005
1915	406,735,171	714,219,286	1,120,954,457
1916	459,277,454	836,593,269	1,295,870,723
1917	538,869,362	1,008,657,874	1,547,527,236
1918	666,366,359	939,329,271	1,605,695,630
1919	728,657,589	1,137,858,277	1,866,515,866

Turning to the assets side of the statement, we find considerable increases in the holdings of coin and Dominion notes, as follows:—

Gold and sub. coin in Canada	+	$ 1,671,503
Gold and sub. coin elsewhere	+	1,027,661
Total	+	$ 2,699,164
Dominion notes in Canada	+	13,423,398
Dominion notes elsewhere	+	155
Total	+	$13,423,553

Deposits in the central gold reserve, and with the minister of finance for the security of note circulation, were practically unchanged. Holdings of notes and cheques of other banks increased by about $3,000,000 and $11,000,000, respectively, and large advances in the totals due from other banks are also found.

(Continued at foot of page 6)

BANK DEPOSITS AND THE VICTORY LOAN

(Continued from page 5)

Dominion and provincial government securities held by the banks dropped from $361,280,956 to $336,855,869, as many of the treasury bills of the Dominion government, issued for financing capital expenditures, no doubt matured and were paid out of war loan proceeds. Very little change took place in the totals of other securities held.

In the loan accounts we find large increases, except in the current loans and discounts outside of Canada. Advances to municipalities also show a seasonal decrease. The trend of the Canadian loans account for the past thirteen months is shown in the following table:—

Loans.	Current in Canada.	Call in Canada.
1918—November	$1,082,709,655	$ 85,675,063
December	1,075,640,003	89,120,423
1919—January	1,080,340,861	87,598,427
February	1,095,301,791	79,154,121
March	$1,117,197,446	$ 87,601,337
April	1,107,986,523	86,091,844
May	1,071,447,686	89,187,032
June	1,043,712,932	95,852,728
July	1,014,387,206	93,587,497
August	1,011,785,424	95,899,836
September	1,058,572,202	96,912,709
October	1,104,940,160	100,549,390
November	1,189,408,523	121,754,469

The following table shows the course of principal loan accounts during recent years:—

Nov.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1914	$ 794,269,220	$ 42,966,275	$ 69,394,407	$ 74,459,649
1915	777,162,563	55,240,955	83,203,787	135,530,562
1916	813,791,947	76,087,370	89,395,370	183,250,389
1917	868,973,714	95,954,524	72,178,345	139,832,552
1918	1,082,709,655	110,010,815	85,675,063	171,035,732
1919	1,189,408,523	149,302,293	121,754,469	169,626,880

TO MARKET BONDS IN U.S.

The Hew R. Wood Co., bond dealers, Montreal, announce that they have formed a close working arrangement with E. P. Woodbury and Co., Inc., of Burlington, Vt., of which firm Hew R. Wood will be one of the directors. The firm intends to specialize in Vermont securities and Canadian government, municipal and corporation bonds that will appeal to investors in the New England States.

Alberta's dairy products for 1919 will have a value of $31,625,000, or $4,125,000 more than in 1918, according to estimates issued by C. P. Marker, provincial dairy commissioner. The production of butter in 1919 is estimated at 10,500,000 pounds for a value of $5,512,500. This is an increase over 1918 of approximately 1,500,000 pounds and almost $1,500,000 in value.

BANK BRANCH NOTES

The Royal Bank of Canada plans the erection of a branch at a cost of $10,000 at Dodsland, Sask. The manager will be A. Joudsey.

The Canadian Bank of Commerce has decided to proceed with the erection of a new brick building at the corner of Main and Union Streets, Courtenay, B.C. Approximate cost, $30,000.

The main Halifax branch of the Royal Bank of Canada has been removed to the reconstructed building at the corner of George and Hollis Streets. The second floor will be occupied by the Montreal Trust Co., the Royal Securities Co., and the Bedford Construction Co., and the third floor by the Nova Scotia Fertilizer Co. and R. G. Dun and Co.

The Royal Bank of Canada announces the opening of a new branch at Montevideo, Uruguay.

Mr. Bowen, manager of the Sterling Bank at Wadena, Sask., has been granted sick leave, and Mr. F. S. Thompson, who was manager at Kinmount, Ont., has been appointed acting manager at Wadena.

Mr. H. D. Robinson, teller-accountant of the Sterling Bank, at Sudbury, has been appointed acting manager at Courtright. Mr. Kremer, of Courtright, has been granted sick leave.

Mr. C. C. Campbell, a member of the head office staff of the Sterling Bank, has been appointed accountant at Montreal branch.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended December 31st, 1919, compared with the corresponding week last year:—

	Week ending Dec. 31, '19.	Week ending Jan. 2, '19.		Changes.
Montreal	$122,130,601	$99,332,264	+	$22,798,337
Toronto	84,211,630	73,040,355	+	11,171,275
Winnipeg	44,170,822	48,948,302	—	4,777,480
Vancouver	12,425,144	10,352,478	+	2,072,666
Ottawa	9,394,614	6,645,705	+	2,748,909
Calgary	7,370,206	6,706,880	+	663,326
Hamilton	5,894,305	4,603,304	+	1,291,001
Quebec	5,117,255	4,665,682	+	451,573
Edmonton	5,181,156	3,771,022	+	1,410,134
Halifax	3,957,919	4,135,647	—	177,728
London	2,938,653	2,710,164	+	228,489
Regina	3,874,216	3,444,046	+	430,170
St. John	2,995,117	2,487,457	+	507,660
Moose Jaw	1,654,965	1,990,573	—	335,608

Sherbrooke	970,664	816,742	+	153,922
Kitchener	941,415	688,767	+	252,648
Prince Albert	484,999	345,035	+	139,964
Total	$316,608,043	$277,522,760	+	$39,086,283

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.
N.Y. funds	8 9-16 pm	8 13-16 pm	....
Mont. funds	par	par	⅛ to ¼
Sterling—			
Demand	40.750	40.850	....
Cable transfers	40.850	40.950	....

Rate in New York, for sterling demand, $3.75⅝.

Bank of England rate, 6 per cent.

PERSONAL NOTES

Mr. J. Norman Tooke, who has been connected with the Montreal Stock Exchange firm of F. Nash and Company, for several years past, has been admitted to partnership.

Mr. S. W. Jacobs, K.C., a well-known member of the Montreal bar, was recently elected a director of the Travellers' Life Insurance Company of Canada.

Mr. R. L. Nicolson has been appointed manager in Alberta for the Union Casualty Company of Winnipeg. Mr. Nicolson has for some time past been deputy superintendent of insurance in the province, from which position he resigned on January 1st.

Mr. M. J. Haney, president of the Home Bank of Canada, has retired after holding that office for four years. Mr. H. J. Daly, who was director for some time of the Repatriation and Employment Committee at Ottawa, has succeeded Mr. Haney.

Mr. A. C. Campbell, formerly with the British Columbia treasury department staff, has become inspector of trust companies for the province. He succeeds Mr. W. U. Runnells, who has taken over the reorganization and management of the British Columbia Trust Corporation.

Brigadier-General R. P. Clark, C.M.G., D.S.O., an experienced financier, and who has been connected with the London Stock Exchange, has become associated with Messrs. Gillespie, Hart and Todd, Limited, both in Victoria and Vancouver, as manager of the bond department.

Mr. T. Sherman Rogers, K.C., of Halifax, has been elected to the directorate of the Royal Bank of Canada in succession to the late W. Robertson, of Halifax. Mr. Rogers is a member of the law firm of Henry, Rogers, Harris and Stewart, and has for many years been associated with the Royal Bank in a legal capacity.

Mr. T. C. Boville, C.M.G., who for many years has been Deputy Minister of Finance for the Dominion, is leaving shortly on leave of absence. It is understood that when it is completed Mr. Boville will resign his position and accept superannuation. He is one of the oldest officers of the department.

OBITUARIES

Mr. R. B. Hamilton, for twenty years manager of the Packard Electric Company, in St. Catharines, Ont., died in Cleveland, Ohio, last week. Three months ago he left for Cleveland to become production manager of the National Safe Company, of which he was vice-president.

Mr. A. McDonald Robb, died in Montreal last week of pneumonia. Born in Montreal 57 years ago, the second son of the late William Robb, for many years treasurer of the city of Montreal. Mr. Robb was educated at the Montreal High School and spent his early years in San Francisco, returning to Montreal twenty years ago. For the past fifteen years he had been comptroller of the Montreal Water and Power Company.

PRESSED METALS DISTRIBUTION

The committee appointed by the Pressed Metals Co. to handle and distribute among the shareholders of the common stocks the shares and cash held in trust for them by the Toronto Agency Co., Ltd., has sold 128 shares on the market to net $325 per share. The sum realized, together with the cash held by the Toronto Agency Co., and the balance of the shares held by them, will be distributed among the common shareholders as of record January 31. The distribution will be as follows: One share for every 25 shares held, and a cash distribution of 2 per cent.

GOVERNMENT FOR AND BY THE PEOPLE

IT is a well-known truism that political parties, when they come into power, cannot and do not put into effect all the reforms which they advocated when in opposition. This is also the experience of the new farmers' government in Ontario, which already admits being somewhat confused by the multiplicity of demands coming from all parts of the province and from all classes of people. It can at least be said, however, that thus far the government has not been stampeded into hasty action, despite the persuasive arguments which experienced reformers are always able to submit in support of their projects. The farmers have in fact endeavored to establish the name and the reputation of being a people's government. This is rather a naive ambition; for in one sense any government elected under the liberal franchise prevailing in Canada is a people's government, and on the other hand each one comes into power through the organization of a party with a specified platform, which must appeal to the support of one or more class of the voters.

Whatever the exigencies of the next session of the legislature must bring, the twofold character of the Ontario government must continually bring internal difficulties. The farmers and organized labor have more in contrast than in common, because the former are capitalists and landlords to a greater degree than they are manual workers. Thus far a solid front has been displayed, however, and some surprise was expressed at the answer given a few days ago by Hon. W. R. Rollo, the minister of labor and health, to a delegation of labor representatives which presented proposals for legislation, in accordance with the custom for several years past. After referring to the difficulties experienced in framing a program in accordance with the multiplicity of demands, he said:—

"We are going to try and legislate in the interests of the people of the province as a whole, and if we have sufficient time there is no question that most of the matters laid before the government will be acted upon. All classes of people all over the province have to be taken into consideration in dealing with this or any other legislation. My advice to the members of the delegation, who perhaps have not consulted with any other interest than their own, is that they should make an effort to get in touch with the other side of these propositions. Every piece of legislation we ever tried to introduce has met with serious opposition from the employing interest. I think that if some of you who represent different trades could get in touch with your employers and lay these matters before them, get their cooperation and remove as much objection to this kind of legislation as it is possible to remove it it would be a much easier matter to get that legislation through the legislature."

Among the reforms asked for by the delegates were the following: Legislation enacting a minimum wage for all workers; the forty-four-hour week; a six-day week for hotel and restaurant employees; provision for the incorporation of co-operative societies; amendments to the housing scheme to permit loans being made to individual workers or groups of workers; equal representation for workers upon commissions; legislation to check unearned increment; a protest against any legislation that might discourage policemen from organizing as labor unions; amendments to the Compensation Act to give organized labor a representative on the board; the placing of workers and stage employees in theatres, etc., under the Act; that all firemen be placed upon an equal footing with other workmen as regards the operation of the Act; the abolition of the making of clothing in private homes; the extension of compulsory school attendance to children up to sixteen years of age; provision for pensions for widowed mothers; a protest against making election days public holidays, and a request for legislation extending the hours for voting to 8 p.m. in order to give workers ample opportunity to vote; a protest against one-man operation of street cars, etc., where more than twelve passengers are carried; the abolition of running-boards on street cars; the elimination of the property requirement for candidates for municipal councils and other elective bodies; amendments to the income tax laws to provide exemption from income taxation according to the number of children in the family; representation for organized labor upon the Ontario Hydro-Electric Commission; a request for an inquiry into the question of what is and what is not an intoxicating beverage; provision for punishing contractors who violate fair-wage clauses in public contracts; that inspectors be appointed to inspect all stages and scaffolding; that no legislation be passed preventing the practice of "any of the professions or sciences relative to healing the sick"; the enactment of sanitary laws, requiring the removal of old wall paper before putting on new paper; protecting patrons of barber shops; and safeguarding the health of moving picture operators; the enactment of blower laws to protect metal polishers; a clear day off a week for electrical workers in power plants, etc.; the abolition of night work in bake-shops; prohibition of the employment of boys under eighteen in any industry at night work; prohibition of the use of air electric hammers in the fabrication of stone.

THE TREND OF POPULATION

WHEN prices of war supplies were being boosted sky-high, when industrial profits increased in proportion, and when labor unions followed with demands for greatly increased wages coupled with shorter working hours, the Canadian farmer suddenly awakened to a realization of his unhappy position, organized, and prepared to cast his ballot for his own representative. Already a farmers' government is in power in Ontario, a result undreamed of one year ago, and in fact unexpected by the farmers themselves until the election returns showed them to be the strongest party in the new legislature. True enough, the farmer received his full share of price advances, for wheat, live stock and other farm products were among the commodities which advanced most. But the farmer knows quite well that his returns are now falling, and prices of most farm products are now lower than they were one year ago. Abundant supplies are in sight, and further declines are expected. Manufactured goods, on the other hand, are relatively scarce, and price levels are higher than ever before.

For at least twenty years past the trend of Canadian population has been distinctly city-ward. Attracted by plenty of employment, good wages, city conveniences and amusements, the youth of both sexes have deserted the rural districts; the development of the Canadian west has also helped to drain the farming communities of the east. Before the war farm taxes were low, and land could be carried in a state of uncultivation without great difficulty. These taxes have now increased considerably. But what has probably impressed the farmer most of all has been the fact that while considerable unemployment has prevailed in the city, help on the farm is still as scarce as at almost any time during the war. Workers prefer the off-chance of securing employment in the industrial centres, with high wages and plenty of facilities for spending them, to the more severe even if more profitable discipline of the country. "Outside of the food line," says a recent issue of "Canadian Farm," "prices would not be mounting skyward continually if labor for the time being would cut out the demand for shorter hours and be content with the increased wages necessary to meet the cost of living. Is it fair that the worker in the city should be constantly securing shorter hours, while the farmer is compelled to increase his hours of labor per day because he cannot get sufficient help to do the necessary work? If the people in cities and towns would, for a year or two, follow the farmer's example, even to a limited extent, so far as working hours are concerned, we would soon reach a better state of affairs in the country generally. If this were done the manufacturer would have no excuse for continually advancing prices. There is no question about it, this country is becoming top-heavy. People of all classes are flocking city-ward and building up a flimsy urban structure that is liable to topple over some of these days. Perhaps the sooner it topples the better, as we will then have more concentrated effort in developing agriculture, which is the keystone of Canada's prosperity."

This point of view is fundamentally sound, and the intimate relation between hours of work and the volume of production is increasingly appreciated. It has, of course, been realized right along by labor leaders, as is indicated by the fact that demands for short hours came almost entirely from essential industries, where it was well known that the volume of production had to be maintained, and the concession of the demands would have the effect of increasing wages still further without altering materially the hours of work. The international labor conference in Washington has practically agreed on the forty-eight-hour week as a proper basis. Out of nine million industrial workers in the United States, over seven million now work more than forty-eight hours, so that even this measure would mean a substantial increase in production and living costs. Referring to relative conditions in Canada and the United States, S. R. Parsons, a Canadian delegate, said: "If we are ready to cast to the winds our propaganda, carried on in various directions, to lower the cost of living by increasing production; if we are ready to turn over to our governments economic questions which may receive political rather than economic answers, owing to certain influences working in one way or another; and if the United States accepts the proposed convention for a forty-eight-hour week, then Canadian employers, in my opinion, can have no valid objections to uniform conditions."

CRITICS OF THE BANKING SYSTEM

OF the great volume of free criticism which has been proffered during the past year, regarding our commercial and financial institutions, the Canadian banking system has received its full share. With admitted defects, this system has nevertheless a very creditible record, and it is unfortunate that demagogues have found it an advantageous field to attack. Speaking in Toronto last Sunday, M. McBride, mayor of the city of Brantford, Ont., criticized the banks for not maintaining an adequate gold reserve against note issues. This criticism may be based on sane grounds, but when the speaker proposed that through the establishment of a national bank, unsecured notes should be advanced to municipalities, etc., for their public works and other capital requirements, the quality of his criticism became apparent. By such a national bank, he maintained that municipalities could secure their funds for permanent improvements, without interest, paying only the nominal amount necessary to cover the expense of the note issue.

The name of John W. Leedy, of Edmonton, Alta., is also well known through his agitation for a system of local banks. In an interview just a few days ago, Mr. Leedy, after stating that the greatest economic need of the Dominion at present was the intelligent cultivation of more land, said:—

"To ensure this being done intelligent supervision of farming operations should be given in every community by those who are successful in that community. This can only be done by small local banks, with local directors, who are the successful farmers and business men in that community. Struggling farmers, who have had little or no credit, will always agree that those who give it may direct the investment of the money and oversee the farming operations. This takes the gambling chances out of it and makes it profitable to the farmer and the creditor. More farmers fail from lack of judgment when and how to do, than from any other cause.

"Kansas, thirty years ago, was the poorest state in the Union, per capita. By the last census it is now the richest state in per capita wealth. This was brought about by the intelligent supervision of 7,00 directors of local banks, who look after their welfare. This service costs nothing, as they serve without pay.

"Our policy of having the government endorse the notes of all but the very best farmers is saying in effect that farming in this country is too precarious a business for banks to finance on its merits and will be a very poor advertisement of the farming possibilities of the country and is not likely to increase our population fast enough to keep pace with our debts. Our banks are instituted for the purpose of doing commercial business and have not the equipment to finance the farming industry efficiently. With the large and increasing deficit in the national revenue agriculture will have to be put on a better basis, if we are to avoid disaster. The community bank is the best, if not the only adequate remedy."

U.S. INSURANCE COMPANIES IN CANADA

Still Doing Large Part of Business Here—The Wheat Crop—Sale of Thrift Stamps

(Special to *The Monetary Times.*)

Ottawa, January 1, 1920.

THE department of finance will make a complete change in the method of carrying on the campaign for the sale of thrift stamps and war-saving stamps. The campaign for the sale of these small government securities was begun about the first of 1919, or about a month after the stamps were actually placed on sale. The scheme got off to rather a poor start as the advertising matter for the campaign was not ready nor did publicity begin until about a month after the stamps were placed on sale. The fact that the war ended before the campaign began caused it to lag from the start. The intention had been to have begun it earlier, but the Victory Loan took precedence.

During the year in which the stamps have been on sale, less than three million dollars' worth have been sold, and it has cost about 14 per cent. to sell them, which is considered by the finance department too high to make it a practicable proposition. Hereafter, the idea will be to dispose of the remainder of the issue of stamps, which is understood to have been fifty million dollars, through the school teachers of the country. The teachers will be asked to push the sale among the school children, and will be given a small commission on the sales. So that while the idea is not being abandoned, it is really becoming largely educative in its purpose.

Newsprint Supply

The newsprint situation in Canada is attracting some interest owing to the fact that the minister of finance, Sir Henry Drayton, has taken cognizance of the complaints, coming principally from western consumers, that the supply to them has been restricted, while large shipments have been made to the United States. It is understood that Sir Henry Drayton considers that the first duty of the Canadian newsprint manufacturers is to look after the wants of Canadian consumers, whose requirements are comparatively small. It has been intimated from the other side of the line that if the Canadian mills were not allowed to ship all they desire to the United States, that country might retaliate by reducing Canada's coal supply. As Canada consumes only about 5 per cent. of the United States' coal production, it would seem that no complaint could fairly be made if we retain 15 per cent. of the newsprint production for our own consumers.

Agricultural Production

The agricultural statistics just issued showing the value of Canadian field crops for 1919 illustrate pretty forcibly what is the basis of the wonderful prosperity which still attends Canada. The estimate of the value of all crops for the year is by far the highest in our history, amounting to $1,452,787,000; and this will have to be revised upward when the final returns received by the farmers for the wheat crop are published.

The value of the wheat crop is put at $373,086,000. This is within a few million dollars of last year's crop. The final figures received by the farmers will not be known by anyone until the entire crop is disposed of; but the fact that the price has been recently advanced will certainly mean that the above total will be increased by from thirty to forty million dollars. The estimated price of the statistical department on which the above total is based, is $1.90 per bushel; but the final price received by the farmers will run considerably higher.

There is still a good deal of wheat in the hands of the farmers. The Wheat Board can control the price and market the crop, but it cannot commandeer wheat which the farmers choose to hold, and as the farmers who have wheat this year are pretty well able to hold it and know that the American crop has fallen off, there is not much doubt that a good deal of the crop is being held back.

Some figures published within the past few days as to the amount of wheat shipped and the price received were not official and were prepared under a misapprehension. They have created considerable excitement among the western trade. No official figures have been given out and neither the government nor the wheat board are likely to give out any until the whole of the 1919 crop has been disposed of. While the price is not definitely known, it was stated some time ago on pretty good authority that the price received for the shipments in the early autumn, was $2.44 seaboard, which would be about $2.30 to the farmer. It is known that the millers have been paying the latter price, and the export price would be no less. The millers price just fixed is $2.80, and the farmers will be receiving a corresponding price, which will probably be about 15 cents less.

American Insurance Companies

It is estimated by officials of the Finance Department that American insurance companies hold over one-third of the total life insurance in force in Canada. Twenty years ago they held 28 per cent.; and ten years ago, 27 per cent. Sir Henry Drayton pointed out not long ago that Canada is under insured, the average amount held in Canada per head being $225, which is considerably lower than in the United States. The amount has been increasing pretty rapidly in late years, however, up until the opening of the war. For the years preceding the beginning of the new century the average amount of new business written yearly was around six million dollars; in the years preceding the outbreak of war it had reached fourteen million dollars a year. In 1914 it dropped off the same amount, and did not come back until we began to feel the effect of munition making and other forms of wealth production. In 1917 this was shown to the full when there was an increase of fifty million dollars over 1916.

There has been a big increase in industrial insurance in Canada all of which has gone to foreign companies, principally to the American organizations as none of the large Canadian companies do much in this line. The higher rate of interest earned by life insurance companies here, and the fact that the rate of exchange has been so strongly against us has led the American companies to keep their funds here for investment to a large extent.

DEPARTMENT OF PUBLIC INFORMATION

The Department of Public Information, operated by the Dominion government, closed on December 31st. The activities to be continued are related to the publicity work that is being carried on in Great Britain and the United States. These will be transferred to the Department of External Affairs. The office of director of public information was created in November, 1917. In September of the following year an associate director was appointed, and the functions of the director, M. E. Nichols, and the associate director, George H. Locke, were merged in the Department of Public Information.

TREATY REINSURANCES, LIMITED

The above is the name of a company which has just been established in England to transact reinsurances by treaty for fire, marine and accident risks, and also accident reinsurances facultatively. The shares in the company are held by the following six companies: Atlantic Assurance Co., Ltd., Century Insurance Co., Ltd., London and Scottish Assurance Corporation, Ltd., London Guarantee and Accident Co., Ltd., Scottish Insurance Corporation, Ltd., Western Australian Insurance Co., Ltd. The combined paid-up capital of these companies amounts to £460,000. The authorized capital of Treaty Reinsurances, Ltd., is £50,000, of which £30,000 are subscribed and fully paid. The six above-mentioned companies have each entered into an agreement guaranteeing the whole operations of the new company.

CITY AND CORPORATION MANAGEMENT

Comparison Between Public and Private Administration—Failures of Former Have Been Numerous

By D. Mitchell,
City Comptroller, Edmonton, Alta.

THE *raison d'etre* of Citizens' Research Leagues, Institutes and Citizens' Associations, I imagine, is that very often the important—the practical—thing to be done seems to be more clearly apprehended by those who compose the members of these associations than those who sometimes are supposed to be closest in touch with the subject-matter in hand, and that to such people too often it seems as regards public business, as if Nero fiddles while Rome burns. Let us be frank about it. We all know that there are some critics, of course, whose profound insight into public affairs is only equalled by their absolute incapacity to attend to their own business properly. But on the other hand, it will not be disputed that many of those who give of their time and talent to carrying on civic work feel that the best results are not achieved through lack of direct application of more scientific methods in their treatment of that work. When we consider the varied character of municipal undertakings, it is at once apparent that the qualifications demanded of aldermen and councillors are of an exacting nature. Municipal work carries with it something of its own reward, else its pursuit may well be considered as hardly worth the pains so far as public recognition is concerned oftentimes.

City Is a Public Corporation

An incorporated city is created for the benefit of the many—not merely of the few. In one respect it may be said to be monopolistic, and that is as the custodian of the rights and privileges which inherently belong to the people. It is a great public trustee corporation.

It has occurred to us that possibly it may be useful for a few minutes to study the analogy that exists, or perhaps ought to exist, between the conduct of the affairs of a town or city, and that of, say, a commercial corporation which is understood to be directed according to the most approved methods of efficient management.

We know that when an organized community has reached the stage of becoming incorporated either as a town or city, it secures under its charter certain rights and powers which are designed to promote the well-being of those who compose its citizens. Similarly with reference to an incorporated business, under its memorandum of association are embodied those objects for which the company has become registered. In either case, there are certain definite ends in view. The parallel may thus be extended to include a comparison between the two as regards:—

Commercial corporation.	City corporation.
Charter of incorporation	City charter.
Shareholders	Citizens.
Board of directors	Mayor and council.
Managing directors or managers ..	Commissioners.
Capital subscribed by shareholders	Capital borrowed on debenture.
Revenue earnings from business ..	Revenue from: (1) Taxation; (2) services sold.
Profits and dividends	Services supplied at cost—e.g., Health and recreation; protection of life and property; (a) fire and police services; (b) street lighting; (c) hospitals; (d) utility services.

The City in Industry

Civic administration comprehends many different forms of activity. There is perhaps a tendency in some quarters to extend the operations or enterprises of a city unduly. We have in addition to the general government, in many cases, the public services or utilities, such as electric light and power, water supply, street railway transportation, telephone, while others include such undertakings as municipal farms, public abattoirs, milk supply. We notice that the city of Winnipeg is apparently taking steps in the last-named direction. Unfortunately, the experience of some cities has not been particularly happy as to the success of their municipal ventures, while others seem to have achieved a very creditable record. The Toronto abattoir is a recent example of failure evidently on the one hand, while as a practical illustration of successful management we may refer to the case of the Winnipeg hydro-electric plant, which has had a phenomenal career. Similarly satisfactory results in municipal ownership have been experienced in some of our own cities in Alberta, as you may know; but the public verdict on the merits of municipal ownership and municipal management generally is naturally contingent on their experience of the concrete results produced, and whether the service rendered to the community is up to the requisite standard of efficiency. No arguments however plausible in favor of municipal management of utility or other trading enterprise can possibly countervail against the evidence of poor service or an accumulation of deficits on the operations of civic undertakings where these occur; and it necessarily follows that civic authorities must accept the citizens' usually candid but well-informed estimate of these results. The remedy, if these are unsatisfactory, is obviously more skilled treatment and better methods of administration.

Lack of Efficiency

Tested by the average private corporation's procedure in transacting their affairs, the city's routine leaves much to be desired as to its management of public business and where official lethargy is present it should be exorcised unrelentingly.

Good management on the part of either a private corporation or of a city demands a sound financial policy in the first place. We are generally emerging from the embarrassments of the past few years of war and financial stringency, which have taught us many salutary lessons and which should serve to remind us in the future that a policy of "pay-as-you-go" can never become out of date, but is of permanent value in the economy of public administration. In the past, long-term borrowings had become an obsession. When we are told the net debt of Canada which, before the war was $336,000,000, is now about $1,800,000,000, there is certainly good reason to exercise caution, even if necessity is the only alternative, in assuming new financial responsibilities. It is more than probable that the temptation of most western towns and cities is to travel too fast.

Financial Estimates

This naturally invites attention to the importance of the budget or estimate system. A definite policy of ways and means is imperative and by the use of council appropriations only is it possible to control municipal expenditures; otherwise overexpenditures and unauthorized expenditures are bound to occur inevitably with resulting confusion. The budget system properly administered is the best guarantee for regulating civic undertakings whether of a capital or current nature. As you know, these appropriations are one of the distinguishing characteristics of civic accounting.

Amongst other prime factors which enter into capable civic management may be mentioned: Centralized purchasing of supplies; an effective appropriation and requisition system for all such; accurate accounting records and the principle of pre-audit as applied to the various stages both in incurring as well as discharging the city's liabilities. It implies the elimination of friction and wasteful methods. The numerous agencies of a city should be synchronized, so

AN ALLIANCE FOR LIFE

Many of the large Corporations and Business Houses who bank exclusively with this institution have done so since their beginning.

Their banking connection is for life—yet the only bonds that bind them to this bank are the ties of service, progressiveness, promptness and sound advice.

372 Branches in Canada, extending from the Atlantic to the Pacific

New York Agency: 63 and 65 Wall Street

Bankers in Great Britain: The London Joint City & Midland Bank, Limited The Royal Bank of Scotland

that all parts of the civic machinery will operate towards producing a high degree of efficiency of service to the public. Indeed it may be postulated that because an enterprise is conducted under municipal auspices is all the greater reason why a first-class type of service should be available; and it is even conceivable that inefficiency may sooner or later be regarded as a disqualification to the ranks of membership of those unions which now embrace most of the employees of a city. The co-operation of citizens (who are the shareholders in the concern) and of employees, however, is required to render obsolete the too frequent objection to municipal management—namely, that of incompetence.

When you consider that most of our cities have invested in both productive and non-productive assets millions of dollars, it is surely eminently reasonable that all should combine towards assuring the full enjoyment of these investments to all classes, without discrimination. While a city does not follow the parallel of a private corporation in distributing cash dividends, we venture to think that a wisely conducted civic organization can accomplish results and provide the community with real advantages on a scale comparable to any pecuniary profits derivable from individual investment of a private kind. The average citizen is virtually a shareholder, in every sense of the term, of the city where his home is, where his family are being educated and trained, and where he himself has the opportunity to develop his resources moral, mental and material, under circumstances of the most favorable description.

AMERICAN PAPER MILL TO USE CANADIAN PULP

According to a statement made by Mr. Geo. F. Whalen, of the Whalen Pulp and Paper Mills, who has just returned to Vancouver from the east, a $4,000,000 paper mill is to be erected at Port Angeles, Washington, to use British Columbia pulp, and will be in operation next fall. Mr. Whalen has been after organizing capital for the new industry, and the money has been secured largely from United States capitalists.

Operation of this plant opens up another channel for better marketing of British Columbia pulp, according to Mr. Whalen. It enables the United States paper manufacturers to avoid the high duty on Canadian paper. Mr. Whalen states that the demand for pulp from British Columbia is very strong and increasing rapidly. The Canadian directors of the company are Mr. James Whalen and Mr. George F. Whalen.

SICKNESS INSURANCE RATES UP

As a result of unfavorable experience, companies writing sickness insurance have found it necessary to revise their rates on this line. In a circular to this effect, the Norwich Union says:—

"On and after February 1st next, this society is increasing its sickness rates for renewals and new business, to $9, ages 18 to 50, and $12, ages 51 and up. The renewals for the month of February are now being written at the increased rates, and will be forwarded you at an early date. The increase in sickness rates has become necessary, owing to the continued unsatisfactory experience in this class of business by the companies writing same, and we have no doubt that the public, realizing the heavy loss ratio during the last number of years, will understand the necessity of an increase in rates, especially when taking into consideration the fact that this is the only advance made by the companies, who have borne the burden of the epidemics and increased cost of doing business during the last few years.

The annual meeting of the Royal Securities Corporation was held in Montreal on December 29, about 50 representatives being present from the corporation's various offices.

UNION BANK ANNUAL STATEMENT

Evidence of the further progress of the Union Bank of Canada is given in the annual report for the year ended November 30th last, showing aggregate assets of $174,989,057 compared with $153,181,451 in the previous year, an increase of $21,807,606 or 14.2 per cent. This strengthening of the Union Bank of Canada's position will be accepted with satisfaction by the shareholders, whose numbers were materially added to with the taking up of the $3,000,000 new capital stock. During the year approximately eighty new branches were established. Another development was the formation of the Park-Union Foreign Banking Corporation, which is jointly owned and controlled by the National Park Bank of New York and the Union Bank of Canada.

Liquid assets total $76,062,432, compared with $72,368,327, and are the equivalent of almost 50 per cent. of the bank's liabilities to the public. Profits for the year were $932,256, compared with $824,174 a year ago, an increase of $108,082. Before the close of the fiscal year, with the recent sale of the new stock issue, the paid-up capital was brought up to $7,968,150, but it is understood that since the books closed for the fiscal year the full amount of $8,000,000 was reached. The premium on the new stock amounted to $1,781,170 and this, with a further amount of $218,830 from current profits was transferred to reserve. As a result the reserve account was brought up to $5,600,000, giving the institution a combined capital and surplus of $13,600,000, compared with last year's figures of $8,600,000.

Deposits made a striking gain, the combined total of non-interest-bearing and interest-bearing deposits reaching $135,496,514, compared with $127,242,698. There was a falling off in the total of non-interest-bearing deposits from $58,805,207 to $51,119,804 but there is an increase of $15,939,219 to $84,376,709 in the aggregate of interest-bearing deposits. As the Victory loan, which caused heavy withdrawals, closed in November, this gain is notable.

Comparative figures of the bank's statement follow:—

	1918.	1919.
Balance brought forward	$ 106,624	$ 126,298
Net profits	824,174	932,256

Saskatchewan Legislature Has Large Program

Act to Govern Provincial Borrowing — New Village Act — Seed Grain Loans — Rural Municipalities Act Amendment — Bill to Regulate Sale of Shares, Bonds or Other Securities of Companies

CONSIDERABLE legislation will be placed on the books by the Saskatchewan legislature at its 1919-20 session, according to the number of bills already introduced. The session opened on November 27th. Among the more important government bills are the new Village Act, amendments to the Succession Duties Act and new regulations for provincial borrowings. Most of these bills have passed the second reading, though latest information received does not indicate any to have been finally passed.

The Homesteads Act provides that every transfer, lease, etc., of a homestead shall be assented to by the owner's wife. This is not to apply in the case of transfers to a railway company, however.

The Supplementary Revenue Act, 1917, is amended so that "the moneys at the credit of the supplementary revenue fund shall be withdrawn from time to time under the authority of an appropriation of the legislature, and, in case and in so far as such appropriation is insufficient for the purposes of this Act, such moneys may be withdrawn under the authority of one or more special warrants."

The payment of bounties for the killing of prairie wolves, which was authorized in 1913, but repealed in February, 1919, will be resumed under the "Act to Provide for Payment of Certain Wolf Bounties" of the present session.

The Public Revenues Act (1917) is amended, paragraph 2 of section 2 being changed to read, "Rateable property in cities, towns, villages and rural municipalities means land, but not the improvements thereon."

A bill has also been introduced to amend the Wild Lands Tax Act, 1917, providing that there shall be associated with the wild lands tax commissioner, for advisory purposes, a committee of two members, to be appointed annually by the executive of the Saskatchewan Association of Rural Municipalities.

A bill to amend the City Act provides, among other things, that a by-law for proportional representation may be submitted.

Seed Grain Loans

As already mentioned in these columns, new legislation for seed grain advances has been introduced. Loan company machinery and money is to be used, and the government may guarantee repayment if it sees fit. Such advances are to be a charge on the mortgaged land, without registration, and are to have the priority enjoyed by the original loan. Not more than $250 per quarter section is to be advanced in this way. In addition, the mortgagee is given a lien upon the 1920 crop, or the 1921 crop where there is already a lien on the 1920 crop under the Seed Grain Act of 1917.

In an amendment to the Chattel Mortgage Act, new provisions as to the registration, etc., of such mortgages are set forth.

Municipal Income Taxes

A bill to amend the Town Act provides that a town may make a grant to a licensed hotel for the purpose of maintaining a public rest-room; may tax the income of married persons over $1,500 and of others over $1,000; extends to personal representatives of deceased soldiers the benefits enjoyed by returned soldiers in connection with the sale of property for taxes; and provides for certain poll tax exemptions.

The "Attachment of Debts Act" lays down new regulations for the issue and service of garnishee summonses, etc. An "Act respecting Absconding Debtors" provides for the attachment of goods of a debtor where the creditor has reason to believe he is about to abscond himself or remove his property. An "Act respecting Arbitration and Reference" defines methods of arbitration, valuation, etc. The Minimum Wage Act, 1919, is amended in one or two clauses, and also the Factories Act. "The Dairy Products Act" provides for the issue of licenses to operate creameries, etc., for which purpose the applicant must furnish a bond to insure the payment of those who sell to him. A department of agriculture is also to be established under the "Department of Agriculture Act."

Rural Municipality Borrowing

Important amendments to the Rural Municipality Act, 1917, are also slated. Section 211 is amended to read: "Whenever the council of a municipality is authorized by the local government board to borrow any sum of money as herein provided, the council may thereupon issue a debenture or debentures to secure the amount of the principal and the interest of the loan so authorized, or of any less sum, upon the terms specified in the by-law; and the debenture or debentures and the coupons thereto attached, when signed by the reeve and secretary-treasurer of the municipality and the debenture or debentures sealed with the corporate seal thereof and signed and sealed by the local government board, and in addition countersigned by the minister or deputy minister as hereinafter provided, shall be sufficient to bind the municipality and create a charge or lien upon all municipal property and rates and taxes in the municipality."

The advantages extended to returned soldiers in connection with the sale of lands for taxes, are also extended to the representatives of deceased soldiers. New clauses also affect the poll tax and the business assessment.

Private Bills

Among the private bills introduced were the following: An Act to extend the time for issuing debentures under certain by-laws (616, 621, 624, 625, all passed in 1913) of the city of Saskatoon; an Act to incorporate the "Capital Securities Company, Ltd."; an Act to incorporate "Les Soeurs de Notre Dame de la Croix."

The Village Act

One of the most important bills introduced is the "Village Act." New villages must have an area of not more than 640 acres, and must have a population of at least fifty. The Act is to apply to summer resorts incorporated as villages with certain exceptions, such as that they may not issue debentures. Where a village is part of a school district, the standing of the latter is not to be affected, and the village is to collect the school taxes for the municipality. The minister of municipal affairs is also empowered to disorganize a village if he sees fit. In such cases he may appoint a person to settle the assets and liabilities, and if the former are insufficient, further taxes may be levied to meet the deficit.

The village secretary-treasurer, who is to be appointed as soon as possible after the organization of a village, "shall, before entering upon his duties, give security to the council by a bond or policy of guarantee of any corporation empowered to grant securities, bonds or policies within the province for the integrity and faithful accounting of public officers or servants, or persons occupying positions of trust, and such security shall be for such an amount as the council deems expedient, and shall be renewed at the beginning of each year, or changed at other times whenever renewal or change is required by the council." Members of the council are to be jointly and severally liable if they fail to see that such a bond is furnished.

GENERAL REALTY CORPORATION, LIMITED
Whalen Building, PORT ARTHUR, Ontario

The financial year for each village is to be January 1st to December 31st. An auditor is to be appointed before November 1st each year, who will prepare, before November 15th, an abstract of the village's finances for the ten months. On or before March 1st a similar statement for the year is to be presented.

Village Borrowing

Temporary borrowing from "any person, bank or corporation" is authorized to meet current expenses until such time as taxes are levied. In any year the total so borrowed is not to exceed 60 per cent. of taxes for the year. By-laws to authorize the issue of debentures must be in the form prescribed by the local government board, and application for approval must be made after the first reading. Public notice must also be given in the village, and if one-fourth of the electors demand a poll, such poll must be provided. The village secretary-treasurer must also furnish the local government board with a statutory declaration, showing the total value of assessable property in the village as shown by the last revised assessment roll. Debentures are to be countersigned by the board. The Act also states the form in which the debentures are to be issued. This process of approval by the board, signing by the overseer and by the secretary-treasurer of the village, and countersigning by the minister or his deputy, makes the debentures binding on the village. The debenture debt of any village is not at any time to exceed 10 per cent. of assessable real property, the interest rate is not to be more than 8 per cent., and the debentures shall not run for longer than fifteen years.

Village Taxes

The Act provides that, not later than July 1st each year, the village assessor shall assess all real and personal property and income. Land is to be assessed at its fair actual value, buildings and improvements at 60 per cent. Businesses are to be assessed, not on the stock in trade, but per square foot of property, for which purpose the assessor is to fix a rate, which may be different for each class. The rate shall not exceed $10 per square foot, except in the case of banks, loan companies and other financial institutions, in which case such rate shall not exceed $15 per square foot.

The following property is to be exempt: Property of the Crown; property specially exempted by law; Indian lands; church property; personal property to the amount of $300 other than income; public cemeteries; school and hospital property; agricultural societies' property; village property; public libraries; income up to $1,500 in the case of married persons and $1,000 in the case of single persons; household effects, etc.; grain. Income taxes may be levied on assessable income from real property, wages or salary, but those who come under the business assessment shall not be assessed for income from such business, and those who pay a license to do business shall be liable for business taxes. A soldier's property is exempt for one year after discharge. Provision is also made for the sale of land for taxes.

Estimates of expenditure are to be prepared as early as possible each year and the tax rate fixed, the uniform rate not to exceed 15 mills in any one year unless to meet debenture coupons.

For What Province May Borrow

"The Saskatchewan Loans Act" defines how provincial borrowing is to be done in future. Loans may be raised, after appropriation by the legislature and authorization by the Lieutenant-Governor-in-Council, for capital expenditures as follows:—

"(a) Public works, including the purchase or construction of public buildings, permanent improvements thereof, their furnishing and equipment, and the acquisition of lands;

"(b) Public improvements, including the construction and improvement of public highways under "The Highways Act";

"(c) The construction and extension of telephone systems and telegraph systems;

"(d) Purchase of drainage district debentures and advances for the execution of work of any description under "The Drainage Act, 1918";

"(e) Agricultural, industrial and commercial undertakings, and advances for such undertakings;

"(f) Any purpose for which authority to raise money by way of loan is given by an Act of the legislature;
and, if considered expedient, such sums may be borrowed in advance of the fiscal year for which the appropriation has been made."

Manner of Raising Money

Continuing, the bill lays down the methods of borrowing as follows:—

"3. The Lieutenant-Governor-in-Council may authorize the provincial treasurer to raise by way of loan upon the credit of the province, in such manner and at such times as may be deemed expedient, by the issue and sale of securities of one or more of the classes hereinafter specified, such amounts as will realize the net sum authorized or required for any or all of the following purposes:—

"(a) Capital expenditure appropriated by the legislature for any of the purposes mentioned in section 2 hereof;

"(b) Any object or purpose authorized by any Act where the authority to borrow the amount required is not subject to appropriation by the legislature;

"(c) Payment of the principal or interest of any loan or any bonds, debentures or other securities, guaranteed by the province of Saskatchewan;

"(d) Repayment, renewal or refunding, from time to time, the whole or any part of any loan made or securities issued under the provisions of this or any other Act, notwithstanding that the issue of securities for such purpose may have the effect of increasing the amount of the public debt.

Character of Securities

"4. The securities referred to in the preceding section are as follows:—

"(a) Saskatchewan government stock, bearing such rate of interest not exceeding 6 per cent. per annum as may be deemed expedient, payable half-yearly, principal and interest to be made payable at such times and places as the Lieutenant-Governor-in-Council may direct, and to be charged upon and paid out of the consolidated fund, the stock to be subject to these conditions:—

"(i) The stock may be redeemed at any time at the option of the Lieutenant-Governor-in-Council, provided six months' previous notice has been given by registered letter to the registered holder of the stock at his address as it appears on the register;

"(ii) The stock shall be subject to such regulations as to the inscription, registration, transfer, management and redemption thereof as the Lieutenant-Governor-in-Council may prescribe;

"(iii) The Lieutenant-Governor-in-Council may direct that the whole or any part of the stock be inscribed and transferred in a register kept in Canada, in the United Kingdom or in any foreign country at such place and by such bank, officer or person as he may appoint;

Charge on Consolidated Fund

"(b) Bonds or debentures of the province of Saskatchewan, which shall be in such form and for such separate sums, and shall bear such rates of interest as the Lieutenant-Governor-in-Council may direct; principal and interest to be payable at such times and places as he may approve, and to be chargeable upon and payable out of the consolidated fund; the said bonds or debentures to be subject to such regulations with respect to their inscription, registration, transfer, management and redemption as the Lieutenant-Governor-in-Council may prescribe;

"(c) Treasury bills in such sums and for such rate of interest or discount as may be deemed expedient, principal and interest to be payable at such times and places as the Lieutenant-Governor-in-Council may direct, and to be chargeable upon and payable out of the consolidated fund;

Within Seven Years

the business of this Corporation has doubled in volume. Our constant aim is to furnish a trust company service second to none. Estates which come into our care are managed by officers of wide experience in every department of estate management.

Beneficiaries who have dealings with us are assured of courteous treatment and prompt dispatch of their business.

"(d) Temporary loans by way of a line of credit to be obtained under agreement from any chartered bank or from any person, corporation or government, in such sums upon such terms, for such periods and upon such conditions as may be approved by the Lieutenant-Governor-in-Council.

Hypothecation for Temporary Funds

"5.—(1) Pending the sale of any securities or in lieu of selling or disposing of the same, the Lieutenant-Governor-in-Council may authorize the provincial treasurer to raise by way of loan on such securities such sums of money, in such manner and on such terms and conditions as may be deemed expedient, and to deposit, hypothecate or charge such securities as additional security for any such loan, and to give as security for any such loan securities in any form authorized by section 4 hereof, and to enter into any agreement for the purpose of carrying out the terms and conditions of such loan as may be deemed expedient.

"(2) When securities issued under this or any other Act have been pledged as security for a loan and the loan has been paid off and the pledge redeemed, the securities shall not be deemed to have been extinguished, but shall be deemed to be still alive, and may be reissued and sold or pledged as if the former pledging had not taken place.

"(3) The provincial treasurer shall make an annual report to be incorporated with the public accounts, and which shall include a statement of the facts in connection with the hypothecation of provincial securities during the fiscal year.

How Marketed

"6. The Lieutenant-Governor-in-Council may:—

"(a) Make regulations for the issue and sale of securities of the province, the management of the public debt and the payment of principal and interest thereon in the currency of any country;

"(b) Provide for the creation and management of sinking funds or other means of securing repayment of loans raised by authority of the legislature;

"(c) Appoint one or more fiscal agents in the city of London, England, or elsewhere, and arrange the rate of compensation to be allowed them for negotiating loans and paying the interest of the debt;

"(d) Pay the sums necessary to provide the sinking fund or other means of repayment, and such compensation, out of the consolidated fund; and

"(e) Provide for the manner of executing provincial securities, and that the signature of the provincial treasurer upon provincial securities and the coupons attached thereto may be lithographed or engraved, the securities being in such case countersigned by the deputy provincial treasurer or such other official of the treasury department as may be appointed for the purpose, and may also provide that any securities shall be countersigned for identification by any bank, corporation or firm designated for the purpose.

"7. No person employed in the inscription, registration, transfer, management or redemption of any of the aforesaid securities, or in payment of any dividend or interest thereon, shall be bound to see to the execution of any trust expressed or implied to which such securities are subject, or shall be liable in any way for anything by him done in accordance with the regulations.

"8. All money raised by the issue and sale of any of the aforesaid securities shall be paid to the provincial treasurer and shall form part of the consolidated fund.

Exempt from Provincial and Local Taxes

"9. Securities issued under the authority of this Act and the interest thereon shall be free from provincial taxes, succession duties, charges and impositions; and moneys invested in province of Saskatchewan securities and the interest thereon shall be exempt from municipal and school taxation.

"10.—(1) The Lieutenant-Governor-in-Council may under the great seal authorize any person to make any declaration and take any steps necessary to record Saskatchewan government stock or any portion thereof under and in accordance with the provisions of the Imperial Acts known as the "Colonial Stock Acts, 1877 to 1900," or any amendments thereof.

"(2) The provincial treasurer may, out of the consolidated fund, pay, satisfy and discharge any judgment, decree, rule or order of a court in the United Kingdom which, under the provisions of section 20 of "The Colonial Stock Act of 1877," or any amendment thereto, is binding upon the registrar of Saskatchewan government stock in England, and with which he is required to comply.

"11. The Lieutenant-Governor-in-Council may do or cause to be done all things which may be required by any stock exchange with reference to the securities referred to in this Act and to their issue, in connection with any quotation or listing of such securities upon such stock exchange.

Substitution of Securities

"12.—(1) The Lieutenant-Governor-in-Council may change the form of any part of the debt of Saskatchewan by substituting one class of security for another, but, except where a security bearing a lower rate of interest is substituted for one bearing a higher, no such substitution shall be made if the effect is to increase either the principal or the interest of the debt.

"(2) Where a security bearing a lower rate of interest is substituted for one bearing a higher rate of interest, the amount of the debt represented thereby may be increased by a sum not exceeding the difference between the values of the respective securities at the date of substitution.

"(3) No substitution of securities shall be made unless the consent of the holder of the security for which another is substituted is obtained, or such security is previously purchased or redeemed by or on account of Saskatchewan; and such substitution may be made by the sale of a security of one class and the purchase of that for which it is desired to substitute it.

"13. This Act shall apply to all loans heretofore or hereafter authorized under any Act of the legislature:

"Provided that nothing in this Act shall impair or prejudically affect the rights of the holders of any securities heretofore issued."

"Blue Sky" Law

Another important bill is one to regulate the sale of sale of shares, bonds, or other securities of companies. Government and municipal securities are exempt from its provisions, as are also "stocks, bonds, debentures or other securities authorized by the board to be sold or listed on any stock exchange which has been approved for the purpose of this section by the board, or to the sale of shares in any company incorporated under section 22 of the Companies Act, chapter 14 of the statutes of 1915, or to the sale of shares of a fraternal or benevolent society where the sale is restricted to the members of the society."

How Securities May be Sold

The provisions as to marketing require that a certificate be obtained from the local government board. The bill says:—

"4. No person shall sell or offer or attempt to sell in Saskatchewan any shares, stocks, bonds or other securities of a company, other than the securities hereinbefore excepted, without first obtaining from the board a certificate, and in the case of an agent a license, as hereinafter provided.

"5. No person shall print, publish, issue or distribute any advertisement, prospectus, circular, letter or other document containing an offer to sell or request to purchase any of such shares, stocks, bonds or other securities unless the company whose shares, stocks, bonds or other securities are offered for sale shall first have obtained from the board the required certificate.

"6.—(1) Every company whose shares, stocks, bonds or other securities it is desired to sell or offer for sale, or the person desiring to sell the same, shall file with the board, together with a filing fee of ten dollars, the following documents:—

"1. A statement showing in full detail the plan upon which the company proposes to do business, and specifying

the branches of business included in the objects of incorporation where it is an incorporated company, or in the purposes of the copartnership or unincorporated association, as the case may be, which it intends to carry on;

"2. A copy of all contracts, bonds or other instruments which it proposes to make with or sell to its contributors;

"3. A statement showing the location of the head office of the company, an itemized account of its actual financial condition and the amount of its property and liabilities, and such other information touching its affairs as the board may require;

"4. In case of a copartnership or unincorporated association, a copy of its articles of copartnership or association, and all other papers pertaining to its organization.

"(2) The company or such person shall also file with the board:

"(a) where the company has not been organized under the laws of Canada or of any province thereof, a copy of the laws of the state, country, territory or government under which it exists or is incorporated;

"(b) in addition thereto, a copy of its charter, memorandum of agreement or association, articles of incorporation or association, or constitution and by-laws, and all amendments thereto.

"7. All of the above described papers shall be verified by the oath of a member of a copartnership or unincorporated association, or by the oath of a duly authorized officer, if it be an incorporated company or association. Such of them as are of record in a public office shall be further certified by the officer of whose records they form a part, as being correct copies of such records.

May Make Detailed Examination

"8. The board shall examine the statements and documents filed, and if deemed advisable, shall make a detailed examination of the company's affairs, at the expense of the company or of the person desiring to sell the said shares, stocks, bonds or other securities, as hereinafter provided.

"9.—(1) If the board finds that the company is solvent, that its memorandum of agreement or association, articles of incorporation or association, or constitution and by-laws, its proposed plan of business and proposed contracts provide a fair, just and equitable plan for the transaction of business, and appear to indicate the probability of a fair return on the shares, stocks, bonds or other securities by it or by such person proposed to be offered for sale, the board shall issue to the company or person applying a certificate reciting that the company has complied with the provisions of this Act, that detailed information in regard to the company and its securities is on file in the board's office for public inspection and information, and that the company is permitted to sell its shares, stocks, bonds or other securities, or a limited and defined amount thereof in the province; and such certificate shall also recite in bold type that the board in no wise recommends the securities to be offered for sale by such company.

"(2) The fee to be paid the board upon the issue of such certificate, or for its renewal in case the certificate for any reason lapses, shall be five dollars.

"10. If the board finds otherwise than as mentioned in the preceding section, it shall refuse the certificate and so notify the company or person applying. Such refusal shall not debar the company or such person from renewing the application at any subsequent period.

"11. The board may grant a certificate under this Act in respect of any class or classes of stocks, bonds, shares or securities of a company, and exclude others therefrom.

"12. A company shall not, nor shall any person, either as principal or agent, transact business in form or character similar to that set forth in section 4 of this Act, until such company or person has obtained a certificate as provided by section 9 hereof."

Further clauses provide against changes in the charter, method of doing business, etc., contrary to the declarations filed. Agents must secure a license annually, upon payment of a fee of $1, and must "produce the said license to every one with whom he proposes to do business." Annual statements must be filed each year. The board may conduct an examination into the affairs of any company making application, the expenses of which the company must pay. It may appoint a receiver for any company it considers unsound. It is also provided that securities may be sold without a certificate, when such sale "is not made in the course of continued and successive acts." Mining stocks, on which the return is difficult to estimate, may be sold under a special certificate, but advertisements, etc., must carry the words "development stock," conspicuously displayed.

NORTHWESTERN LIFE DECLARES BONUS

A pleasant surprise awaited the office and field staff of the Northwestern Life Assurance Co., when each employee was presented with a cash Christmas bonus ranging from 20 to 35 per cent. of his or her salary. It was announced that the company would, beginning with the new year, introduce a group insurance system for its entire staff, those in the first year to receive $250 of life assurance, those in the second year $500, those in the third year $750, and those in the fourth and later years $1,000. The company will pay the entire cost of this insurance.

Beginning with the new year, the company will enter the group insurance field, issuing policies for any number of employees without medical examination, a feature that has been previously applied where less than fifty people were employed.

CANAL DEEPENING IS OPPOSED

The deepening of the St. Lawrence canals, to admit ocean vessels, is being opposed in New York State, because of the probable diversion of traffic from the Erie canal which connects Buffalo with New York harbor. An editorial in the "New York Journal of Commerce," of December 15 says:—

"The executive committee of the New York Board of Trade and Transportation seems to put upon reasonable ground its objection to having our national government join with Canada in constructing a waterway from the lakes to the wide and deep part of the St. Lawrence River, so that shipping could proceed across the Atlantic without any change of cargo. It would be a costly piece of work, and it is estimated that this state would have to contribute to it somewhere from thirty to fifty million dollars. The assumption of those who favor the Canadian plan and our sharing in the cost of establishing it, is that it would be a general benefit of high value to the commerce of the country as a whole with Europe, whatever might be the effect upon the costly canal system of this state.

"The ground taken by the Board of Trade and Transportation is not based upon the belief that the costly scheme of long-distance shipping through Canada would divert trade from the canal system of the state. It expresses the conviction that if there was reasonable assurance of benefit to our trade as a whole, it would not oppose it, though it might draw somewhat from the canal activity through the state and down the Hudson River. But it is convinced that it would not have any such effect, at least in any way corresponding to the cost, on account of the long distance and the obstacles to the commerce on that route. But, if it did not divert commerce or hurt the traffic of our canal system it would be worthless to the commerce of the country, while increasing the burden of government expense and indebtedness, a large proportion of which this state and especially this city has to bear."

Dominion Appraisal Co., head office 10 Wellington Street East, Toronto, has opened an office in the C.P.R. Telegraph Building, 4 Hospital Street, Montreal, under the management of H. S. Meir, the vice-president of the company.

$1,000,000

THE

King Edward Construction Company, Limited

Toronto - Ontario

(Subsidiary of United Hotels Company of America).

Guaranteed 7% Cumulative Redeemable Preference Shares

Par value $100 per share

Dividends payable half-yearly, May 1st and November 1st.
Payable in Toronto and to American holders in New York
Redeemable at option of the Company at 110 on any dividend date.

THE KING EDWARD CONSTRUCTION CO.—The King Edward Construction Company has been incorporated for the purpose of constructing an addition to the King Edward Hotel, of Toronto, now in the chain of United Hotels Company of America, and is acquiring the remainder of the block on King Street, Toronto, now occupied in part by The King Edward Hotel Company, Limited, covering in all approximately 16,000 square feet, on which it is proposed to erect a modern, fire-proof hotel building of seventeen stories, having 500 guest and 500 bathrooms.

The estimated cost of Land and Building is $2,350,000; of this $1,000,000 has been arranged for by a first mortgage, the balance to be provided from sale of the shares.

The King Edward Hotel Company has made an agreement by which it leases the new addition for a period of 30 years at a rental sufficient to create a sinking fund, the application of which will retire the first mortgage by the end of the lease and pay interest thereon, pay 7% dividend on the Cumulative Preference Stock, 10% on the Common Stock; all taxes, rates, insurance and repairs.

PARENT ORGANIZATION.—The United Hotels Company of America, guarantors, control sixteen modern, fire-proof hotels throughout the United States and Canada; the net earnings of which (after interest and depreciation) for the first six months of 1919 were $558,639.94. Three of these hotels are in course of construction. It is safe to say that no company operating hotels in North America was ever better organized or equipped than the United Hotels Company of America.

PREFERENCE STOCK GUARANTEES AND SAFEGUARDS.—The dividend on the Preference Stock is guaranteed unconditionally and irrevocably both by The King Edward Hotel Company and the United Hotels Company of America, by trust agreement with the Toronto General Trusts Corporation, Trustee.

The application of the Sinking Fund against the outstanding mortgage will wipe it out in thirty years, thereby leaving the entire property as security to the Preference Stock.

The terms of the lease make the dividends and sinking fund payments of The King Edward Construction Company, a direct obligation of The King Edward Hotel Company, and therefore payable in priority to dividends on that Company's stocks.

This stock is Preferred both as to Capital and Dividends, the latter being cumulative.

HOTEL ACCOMMODATION.—Toronto with a population exceeding half a million has less than 500 rooms in fire-proof hotels, over 400 of which are in the King Edward. On completion of the new addition there will still be only 1,000 rooms available. This is a smaller percentage than in any other city of its size in America.

Price: Par ($100) per share

carrying a bonus of thirty per cent. in Common Shares.

Payment may be made as follows:
25% on application; 25% on Feb. 1st, 1920;
25% on Jan. 1st, 1920; 25% on Mar. 1st, 1920.

Fractional shares of Common Stock will be adjusted, at $60 per share.

Dividends on amounts paid up on Preference Stock commence on date of payment.

We reserve the right to cancel all subscriptions and return the amounts paid by subscribers with interest at 7% at any time prior to the 1st day of April, 1920.

Application will be made to list the Preference and Common on the Toronto Stock Exchange.

Detailed statements of the Companies involved, agreements, guarantees and leases are on file at this office and open to inspection by purchasers of stock.

NOVA SCOTIA CROPS GOOD

In Spite of Bad Weather, Estimates Compare Favorably With Figures for Other Years

THE 1919 crop report for Nova Scotia, based upon returns from 293 correspondents, has been issued by the provincial department of agriculture. The season, in contrast to many previous ones, was favorable both for the general farmer and the fruit grower, and although wet conditions of August and September interfered seriously with the harvesting operations and reduced the aggregate yield of the field crops, the year is regarded as one of the best agricultural years in the history of the province.

The hay crop was 25 per cent. greater than that of the previous year. The total crop was estimated at 1,279,836 tons. The oat crop yielded 5,633,078 bushels. Satisfactory as this return is, it would have been from 10 per cent. to 20 per cent. higher, had it not been for the prolonged rains which reduced the crop, especially on poorly drained lands. The return is estimated at 605,610 bushels; 312,096 bushels of barley; 12,900 bushels of rye and 413,694 bushels of buckwheat were raised, together with 173,024 bushels of mixed grain.

Roots and Vegetables

Except in one or two small areas the increased acreage under potatoes was maintained, there being an increase in acreage of about 10 per cent. over two years ago. The estimated yield is 8,561,798 bushels. Crops of turnips and other roots were about 75 per cent. of an average crop. The turnip crop was estimated at 9,996,257 bushels and the mangels at 1,099,935 bushels. There was a reduction of about 2 per cent. in the acreage under garden produce. Conditions were extremely favorable for the hardier garden crops, such as peas, beets, carrots, etc., but the tenderer crops, such as squash, pumpkins, beans, etc., were extensively injured by June and July frosts and the frost of September 10th.

While a few correspondents report pastures only fair the great majority report pastures decidedly above average. At the same time livestock, while in better condition than for several years, did not improve as much as might have been expected. The total production of creamery butter during 1919 was 2,126,000 pounds, an increase over the previous year of 363,636 pounds.

Correspondents from every county report an increase in the apple yield of from 50 per cent. to over 250 per cent., as compared with 1918. For the larger fruit-producing counties the average estimate is about 225 per cent. ahead of the previous year. This represents from the fruit shipping-counties a gross yield of at least 1,500,000 barrels.

During 1919 the total acreage under crops, exclusive of apples, was 2,023,633 acres.

AFRICAN BANKING CORPORATION

The African Banking Corporation Ltd., 64 Wall Street, New York, have received the following cable from their London office: "Board of directors have recommended final dividend for the year ended 30th September last 5 per cent. less income tax being at the rate of 10 per cent. per annum and 9 per cent. for the year and payable 16th January, 1920."

MANITOBA PLANS FINANCIAL CHANGES

Following upon an extensive inquiry into provincial and local taxation, conducted by the Manitoba Taxation Commission, important new legislation will probably be introduced at the session of the legislature to open late in January. It is understood that numerous drastic changes will be put forward in the method of provincial taxation, most important of which will be recommendation for a provincial income tax and a considerable increase in succession duties. A tax on the net income of business houses in the province may also be recommended.

GUARANTEED PREMIUM REDUCTION POLICY

The Canada Life Assurance Co. has announced a $5,000 "Guaranteed Premium Reduction Policy." For a man insuring at age 35 the annual premium is $222.55 for the first ten years, $163.30 for the next five years and $74.50 for the last five years, the payments ceasing after the twentieth.

NEW MONTREAL BROKERAGE FIRM

A new stock brokerage firm under the name of Leggat, Chipman and Cassils, has commenced business in Montreal at 82 St. Francois Xavier St. Mr. Arthur R. Chipman, a member of the firm, has been elected a member of the Montreal Stock Exchange. The other members of the firm are: Lieut.-Col. Wm. Leggat, formerly assistant manager of the Montreal branch of the Canadian Bank of Commerce, and Angus S. Cassils, who up to recently was a member of the firm of Molson and Robin.

NATIONAL BANK OF SCOTLAND

Net profits of the National Bank of Scotland, for the year ended November 1, 1919, were £326,664, and a balance of £72,428 was brought forward from 1918. Dividends at the rate of 16% per annum, less income tax, required £112,000; £100,000 was transferred to reserve, and £10,000 each to heritable property account and to officers' pension fund; this left £167,092 carried forward for 1920. The balance sheet now shows assets totalling £41,370,380, some of the items being gold, coin, notes, etc., £5,236,080; call and short loans, etc., £4,887,026; government securities, £11,219,927, bills discounted, £5,912,875; current loans, £9,617,148. Paid-up capital is £1,000,000, reserve £1,000,000, circulation £3,248,796 and deposits £34,294,546.

MOST OF WHEAT CROP SOLD

Removal of the embargo against Canadian wheat by the United States, does not affect the status of the Canadian Wheat Board, said Sir George E. Foster, Minister of Trade and Commerce, on December 26. He also estimated that two-thirds of the 1919 crop has already been sold as follows:—

Great Britain, 33,395,300 bushels for $77,188,240; United States, 4,688,987 bushels for $9,311,154; France, 3,073,916 bushels for $6,936,715; Italy, 1,119,290 bushels for $2,462,025; Australia, 2 bushels for $5; Newfoundland, 72 bushels for $190; New Zealand, 15 bushels for $45; Gibraltar, 1,659,484 bushels for $3,928,146; Alaska, 2 bushels for $8; Belgium, 1,730,374 bushels for $4,092,048; Greece, 2,666,540 bushels for $6,161,796; Rumania, 45,333 bushels for $107,893; total, 48,379,315 bushels for $110,183,265.

CUBAN-CANADIAN SUGAR STOCK OFFERING

The unsold balance of a $4,000,000 8 per cent cumulative preferred stock issue of the Cuban-Canadian Sugar Co., is being offered by the Royal Securities Corporation at 100 and accrued dividends. The stock carries a bonus of one common share with every four preferred shares.

The Cuban-Canadian Sugar Co. is being organized to acquire all the securities of the Rio Cauto Sugar Co. which was successfully operated for a number of years, at Ingenio Rio Cauto. Net earnings for the year ended September 30th, 1919, after deducting interest charges and taxes and writing off $454,402 for maintenance and depreciation were $397,355.

The company has an authorized capital of $20,000,000, of which $9,000,000 is to be issued now. There will be outstanding $1,500,000 6 per cent., notes maturing $750,000 on June 30, 1920, and $750,000 on June 30, 1921.

Details of the offering are given elsewhere in this issue.

ALBERTA'S INDUSTRIAL POSSIBILITIES

Attention Attracted to Manufacturing This Year, and Some Developments Expected—Natural Resources of All Kinds

By D. L. Campbell
Secretary, Calgary Board of Trade

A BIG factor in the development and continuing prosperity of a new country is the possibility of producing food for those who already inhabit it, and for the increased immigration, which must in some cases precede, but which in all cases must attend upon development. The province of Alberta, the newest in substantial settlement of the western provinces, is blessed with agricultural productivity that has not yet been nearly measured. From a condition which caused it to be looked upon and characterized as a part of the "great American desert" hardly a generation ago, Alberta has been developed so that in 1917 the value of the products of the farm, the dairy and animal industry totalled $403,332,576. Needless to say, agriculture is, and will continue for many years to be, the basic industry of the province.

Outlook for Manufacturing

Those who have made a study of conditions within the province have come to the conclusion that, while Alberta is probably too far from the sea coast to develop into a province of great factories, yet there are many conditions which warrant the expectation that a great deal of manufacturing of different kinds will be carried on before many years. In August, 1919, a remarkable congress was held in the four Alberta cities of Medicine Hat, Lethbridge, Calgary and Edmonton for the purpose of studying the possibilities of industrial expansion and of acquainting those engaged in industry in other parts of Canada and in the United States with these possibilities. Considerable newspaper publicity has already been given to this Industrial Congress, which, it is hoped, will be repeated during the year 1920. Some information to be considered may be found in the following suggestions as to industries already established and raw materials available.

Plants for converting live stock and the products of the soil into manufactured products naturally were the first to be established, and large packing houses are doing a thriving business in Calgary and Edmonton. Flour milling has shown very considerable expansion during the past few years and the industry is developing rapidly.

Fuel Supply Good

The coal production in the province of Alberta for 1918 was in the neighborhood of 7,000,000 tons, but as yet the coal fields have been but sparsely developed, as there is a limit to the distance that soft coals can be shipped, and only sufficient is produced to take care of the population of the western provinces. The cities of Medicine Hat, Lethbridge and Calgary and many of the towns and villages in southern Alberta use natural gas very extensively in their homes.

Oil has been discovered in commercial quantities in the southern part of the province and is now being marketed, while prospecting on an extensive scale is being carried on in the northern part of the province, where it is expected tremendous oil fields will later be opened up.

Other Raw Materials

Timber is available, particularly along the western boundary of the province, and plays an important part in industrial life. Clay and clay-shales abound in the province, and are being utilized to a small extent in the manufacture of pottery, sewer pipe, brick, cement, etc. The proximity of natural gas areas simplifies the problem of fuel used in the manufacture.

The fisheries in the province are being developed to some extent, and undoubtedly increasing quantities of freshwater fish will be made available for the people of Alberta as transportation facilities are extended into the north country.

Iron ore is a mineral that exists in the province, but in what quantities has never yet been determined. With the vast areas of coal and natural gas, with sulphur and limestone available for smelting, the presence of iron ore in quantities is of great importance. The future will probably show whether the hope of the present-day prospector will be realized or not.

Mention of some of the raw materials available for manufacture is of interest, looking toward future development. At present industries are established which turn out such products as cured meats, butter, cheese, spices, sash and doors, overalls, certain machinery parts, pottery, cement, brick, lime and many other commodities used within the confines of the province. Railway facilities for the distribution are particularly good, and, with increasing agricultural development, Alberta looks forward with confidence to the future.

BETTER WATER SERVICE URGED

Improvements in the water service are necessary if Winnipeg's fire-fighting equipment is to be adequate, according to a special committee of the city council which on December 18th made an inquiry into the fire department. Evidence was received from Fire Chief Buchanan, from A. H. S. Stead, of the Fire Underwriters' Association, and others. Mr. Stead stated that he had found that the firemen were sometimes blamed for faults in the equipment.

EMPLOYMENT CONDITIONS IN CANADA

The Employment Service of the Department of Labor reports that returns from the Dominion and Provincial offices of the Employment Service of Canada for the week ended December 6th, show an increase in placements, as compared with the returns of the preceding week. During the week the 93 offices reported that they had referred 7,152 persons to regular positions, and that 6,148 of these had received employment. This represents a decrease of 215 as compared with the previous week when 6,363 persons were placed. In addition 1,308 casual jobs were supplied, as compared with 1,310 of the week ended November 29th.

During the week 9,011 applicants were registered, of whom 672 were women and 8,339 were men. This represents an increase of 6 in registration, when compared with 9,005 applicants of the preceding week. The number of vacancies notified by employers totalled 7,884 of which 1,348 were for women and 6,536 for men. As compared with the 7,575 vacancies notified during the preceding week, this shows an increase of 309 vacancies. Of the placements in regular employment 403 were women and 5,745 were men. The number of returned men reported as placed was 2,203.

Of the placements in regular employment 23 were reported by Prince Edward Island offices, of which 3 were within the province and 20 in other provinces, as compared with 61 during the preceding week; 155 by Nova Scotia offices, all within the province, as compared with a total of 173 the previous week; 240 by New Brunswick offices, 222 within the province and 18 in other provinces. This compared with 283 the preceding week. Quebec offices reported 581, of which 435 were within the province and 146 in other provinces, compared with 621 reported the preceding week. Ontario offices made 2,148 placements as compared with a total of 2,106 the previous week. Placements reported by Manitoba offices totalled 825, of which 639 were within the province and 186 in other provinces, as compared with 821 the preceding week; 635 were reported by Saskatchewan offices, 519 within the province and 116 in other provinces, as compared with 738 the week previous; 586 by Alberta offices, 534 within the province and 52 in other provinces, as compared with 680 the preceding week. British Columbia offices reported 955 placements during week, as compared with a total of 880 during the preceding week.

MUNICIPAL MANAGEMENT

Entrance of Municipalities into Public Utility Field Has Brought New Problems—City Commission and City Manager

By Angus Lyell

THERE is an agitation in the city of Lethbridge to abolish the existing form of commission government and to introduce an administration under a city manager. Lethbridge was one of the first cities in western Canada to adopt commission government and now it is one of the first to consider seriously the advisability of the appointment of a city manager. Calgary is also operating under the commission plan, but last year voted for its continuance. Considering the state of its finances, however, it is reasonbaly certain that the question of appointing a city manager will come up again at an early date.

Quite a number of cities both in Canada and the United States have adopted the commission plan of administration. This means that men are elected by popular vote to act as commissioners for a term of one or more years, each commissioner having direct charge of one or more of the city's departments. Where a city is operating its public utilities—water supply, light and power, street railway and so on—these utilities are placed under the management of the commissioners.

Commission Plan Not Satisfactory

It was about the year 1912 that the efficiency of the system began to be questioned in the United States. The criticism made was that commission government was too complex; that under it responsibility for inefficiency, where inefficiency obviously existed, could not often be attributed to any particular official; that the duties and consequent responsibility of the commissioners were usually divided and obscure; that there was no chief executive, as in the case of an industrial or financial corporation—a man to whom those interested in the undertaking can go in the case of serious complaint; that the work of the commissioners was rarely efficient, they having to legislate in the interests of the city as well as operate its business undertakings and to rely on popular vote for the position they held.

From this criticism developed the plan of taking from the commissioners, or other officials elected by popular vote, the work of the administrative or operative departments, placing this directly under a city manager, appointed by the members of the council or aldermen. The underlying idea was to place the affairs of a city on a basis as near as possible to that of a business organization, where the shareholders elect directors, as the ratepayers aldermen, and the directors, a general manager, to carry on the business of the undertaking, the directors advising on matters of policy and procedure, as would the members of the council where there was a city manager.

Powers of a City Manager

In the city of Dayton, Ohio, the city manager plan has been in operation for a number of years, and it is interesting to study the powers of the manager as enumerated in the city charter. These are given as follows:—

(a) To see that the laws and ordinances are enforced.

(b) To appoint and, except as herein provided, remove all directors of departments and all subordinate officers and employees in the departments in both the classified and unclassified service; all appointments to be upon merit and fitness alone, and in the classified service all appointments and removals to be subject to the civil service provisions of this charter.

(c) To exercise control over all departments and divisions created herein, or that may be hereafter created by the commission.

(d) To attend all meetings of the commission, with right to take part in the discussion, but having no vote.

(e) To recommend to the commission for adoption such measures as he may deem necessary or expedient.

(f) To keep the commission fully advised as to the financial condition and needs of the city, and

(g) To perform such other duties as may be prescribed by this charter or be required of him by ordinance or resolution of the commission.

Such powers are comprehensive, but the object of having a city manager is to have one man who will be directly responsible to the city council for the administration of the city's affairs, and without wide powers efficiency could not be obtained. Under this plan, there would be but three men reporting directly to the council—the city manager, the auditor and the legal adviser.

Debt is Chief Problem

In western Canada, and in the east also, the big problem facing most cities is that of the payment of the debenture indebtedness. Taxation has been increased from time to time until it is becoming a burden, and it is nothing uncommon, in quite a number of cities, to hear prominent business men remark that the best solution might be the appointment of a receiver to act for the debentureholders. In past years, in the boom days, there was far too lavish expenditure. Streets were opened up, miles and miles of pavement laid, water and light systems installed—for what purpose? For the so-called development of the city, which, in other words, often meant the unloading on some poor suckers of vacant lots. The city council was sometimes in the control of real estate and other, more or less, unscrupulous speculators.

Even to-day, in most cities, it is difficult to get able men to accept a place on the city council. This is not because the position of alderman is one that generally carries no salary, but because the position is one which is usually not held in high regard. Even the post of commissioner—where there is commission government—attracts but very mediocre men, the salary notwithstanding. Take, for example, one of the leading western cities, where there are two commissioners, operating street railway, waterworks and other utilities. Inquire into the business history of the commissioners, and then fairly consider whether the city would not be better off under the other plan, that of having a city manager. Each of the commissioners receives about $3,500 and the mayor about $5,000. This would provide about $12,000 to be paid to a business expert for the management of the affairs of the city.

Qualifications are Broad

Recognizing the tendency of the day in the appointment of city managers, some of the leading universities in the United States, such as the University of Michigan, have arranged complete courses of study to help qualify men for the position. The range of subjects is usually wide, comprising certain branches of civil, mechanical, chemical and electrical engineering, municipal administration, public finance, corporation problems, public service industries, business administration, principles of accounting, municipal accounting, mathematical theory of investments, city planning and civic improvement, and the law of municipal corporations and that of public officers.

The city manager would be expected to put the affairs of a city on an efficient business basis. He might, and in most cases would, have to reorganize the accounting system, the methods of budget preparation, the assessment of taxes, the repayment of the bonded debt. There would be departmental reorganization, introduction of centralized purchasing, the proper keeping of records, and so on. There would also be problems pertaining to city planning, paving, building regulations, public parks and open spaces; the police and fire departments; and the operation of street railways and other utilities. The position is one that calls for expert knowledge, coupled with tact and diplomacy; and, as far as I can see, if receivership is to be avoided in several of our cities and a sound financial system established, it will be necessary to appoint, in the near future, expert city managers.

MORTGAGE AS SECURITY FOR DEBT

Position of Parties When Mortgagee Becomes Absolute Owner—British Columbia Court of Appeal Divided

A RECENT case before the British Columbia Court of Appeal was that of Royal Bank vs. McLeod, in which the rights of parties to a mortgage, where the mortgagee subsequently became the owner of the lands in question, were settled.

The facts of the case, which, as regards the appeal, were not in dispute, are as follows: McLeod had become indebted to the Quebec Bank in the sum of $95,000, and was sued for the balance which remained after crediting on the debt $9,000 réalized from the sale of certain land held on mortgage by the Quebec Bank as security. In 1912, in addition to promissory notes, McLeod assigned to the Quebec Bank certain land which had been agreed to be sold to him as further security for his indebtedness, and another loan of $21,000 was made to him. On June 25th, 1914, demand was made for payment, but by an agreement between the bank and McLeod three months' further time for payment was granted, and, in case of final default, McLeod executed a quit claim deed and release of his equity of redemption in the land which he held by agreement of sale. The payments were defaulted, and by a special provision in the quit claim deed the bank became owner of the land. The assets, etc., of the Quebec Bank being later sold to the appellant, the Royal Bank became entitled to the indebtedness of McLeod to the Quebec Bank, and on default sold the land and credited the money received on McLeod's debt.

Was Effect Like Foreclosure?

The point in dispute was whether all that had occurred would bring into effect the same results as if a decree of foreclosure had been obtained in respect of a single security for the whole debt and the land sold, thus placing it out of the bank's power to revest the title to the land in McLeod if he later made payment of the total indebtedness.

The reasons for the decision of the trial judge are in the following terms:—

"It seems to me settled law that a person, who was once a mortgagee, but who, by foreclosure decree or otherwise, has become the absolute owner of the mortgaged property, cannot sue for the debt or any part of the debt secured by the mortgage without reopening the foreclosure; and if, by a sale of the mortgaged property to a third party, he has put it out of his power to reconvey that property to the mortgagor upon redemption, he should, in the language of Idington, J., in *Mutual Life Assurance Co.* v. *Douglas* (1918), 44 D.L.R. 115 at 122, 57 Can. S.C.R. 243 at 253, 'be restrained from proceeding to enforce that common law right, whether by suing upon the covenant'—or other promise to pay—'or in way of asserting a proprietory right over any property he had held by way of collateral security to his mortgage.'

Bank's Title to Property

"The general release clause in the instrument of transfer of the equity of redemption (ex. 6, June 25th, 1914), has, in my opinion, no relation to the circumstances here. It was simply intended to make the bank's title to the mortgaged property more absolute, if that were possible. But the absolute character of the title acquired by a (former) mortgagee does not affect or prevent the reopening of the foreclosure in case the (former) mortgagee afterwards sues for any part of the debt. And, as I have already intimated, where the foreclosure cannot be reopened by reason of the mortgaged property having passed into the hands of the *bona fide* purchaser for value the right to sue is forever gone.

"The action must be dismissed with costs, and the defendant is entitled to the declaration and injunction asked for in his counterclaim, with costs."

On appeal, Macdonald, C.J.A., and Eberts, J., held to dismiss and McPhillips and Martin, J.J.A., held to allow the appeal. The reasons given by Macdonald, C.J.A., for dismissing the appeal are that the mortgagees (the Quebec Bank) obtained absolute title to the land by the release of the equity of redemption to them, and that, therefore, the relation of mortgagor and mortgagee ended unless foreclosure proceedings on the mortgage were reopened, but that this latter plan was impossible because the land had passed into the hands of a purchaser for value (the Royal Bank); that the quit claim deed releasing the equity of redemption must be taken to have been a settlement of the indebtedness, for if the right to redeem has been lost by reason of the release of the equity of redemption, the land takes the place of the debt and is held free from any right of redemption; that, therefore, the debt was extinguished and the appeal should be dismissed (Eberts, J., assenting).

Dissenting Judgment

McPhillips, J.A., in his judgment, said that the land was one only of several securities held by the Quebec Bank, and at most could only be security for the debt, which was past due when the assignment of the agreement for sale was taken; that this security did not fully cover the debt, and that, therefore, it could not be considered as a full settlement of the indebtedness and a release of the other securities. The sale by McLeod to the bank was absolute, and, therefore, the amount realized was to be considered as a *pro tanto* reduction of the whole indebtedness (Martin, J.A., assenting).

The two decisions are thus directly opposed to one another, Macdonald, C.J.A., deciding that the whole indebtedness was cancelled, and McPhillips, J.A., deciding that the indebtedness was lessened only by the amount derived from the sale of the land.

The appeal was dismissed.

QUEBEC AND ST. THOMAS GET NEW INDUSTRIES

Very Few New Developments—Large Properties Transferred in Hamilton

THIS being the holiday season, very few announcements of new plants, extensions, etc., are being made by manufacturing concerns. Those in the United States which have been contemplating branches in Canada, are watching the strengthening farmers' movement, and it is fairly certain that some downward revision in the tariff will be made, not at the coming session of parliament, but possibly at the next.

A large Detroit automobile concern is to build a plant at St. Thomas, Ont., which, it is announced, will take care of the entire Canadian trade. Options have been taken on a site, and work on the factory will commence in the spring. Arrangements are being made for railway spurs into the plant.

The National Steel Car Corporation, Ltd., recently organized under Dominion charter, has taken over the plant, business equipment, assets and liabilities of the National Steel Car Co., Hamilton. The new company is purely Canadian, having as president, R. J. Magor, second vice-president of the National Steel Car Co. The National Steel Car Corporation, Ltd., will continue to manufacture railway cars, having on hand two large orders and others about closed, and the motor truck department will have a greatly increased capacity. The minimum production for the coming year is placed at 1,500 motor trucks.

The Pion property on Prince Edward St., Quebec, Que., has been sold to the Colonial Hide Co., of Boston, one of the largest American hide corporations, with branches in all parts of the United States and Canada. Heretofore, this company has had a branch in Quebec, in conjunction with other branches in Halifax, St. John, Ottawa, etc., but lately they decided to go into the manufacturing business in the city, on a very much larger scale, and for this reason secured the above-mentioned property for the purpose. It is estimated that over two hundred hands will be employed as soon as the new machinery can be installed. The company will manufacture the products of hides, which includes oil, greases, glue, etc.

THE SECRET OF SUCCESSFUL SALESMANSHIP

If the salesman has unlimited confidence in the company he represents and in the goods he is offering, it will not take long to communicate that confidence to the prospect. And this applies to Life Insurance more than to any other article. Agents of the Mutual Life of Canada meet with extraordinary success for that simple reason—they devoutly believe in Life Insurance and above all in "Mutual" Life Insurance. The Mutual Life has been conducted for fifty years exclusively in the interests of its policy-holders. The result is an unprecedented demand to-day for Mutual Life Policies. With the Mutual "the secret of successful salesmanship" is simplicity itself—the Agent knows that he has the Company and the Policy that the prospect NEEDS. The rest soon follows.

BE A MUTUALIST.

COBALT ORE SHIPMENTS

The following were the shipments of ore, in pounds, from Cobalt Station for the week ended December 27th, 1919:—

Dominion Reduction Co., 65,000; La Rose Mine, 65,696. Total, 130,696. The total since January 1st is 23,890,388 pounds, or 11,945.19 tons.

INDEX NUMBER OF COMMODITIES

October Figure Shows Decline of Almost One Per Cent. Compared With September—Still Ahead of Last Year

In wholesale prices the index number for October, according to the Labor Gazette, stood at 299.6 as compared with 301.5 for September, 289.6 for October, 1918, and 134.6 for October, 1913. The chief change was the decrease in live stock and meats, but there were also slight decreases in fish, hides, metals and paints. Increases occurred in dairy products, miscellaneous foods, textiles, lumber and the miscellaneous group. Over the one-year period, it will be noticed, there are very few decreases, metals and implements being about the only group. The increase in the case of hides and leather is also noticeable.

The index number of wholesale prices is based upon the quotations of 271 commodities, one having been dropped in 1915, and is the simple average of the percentages which the current prices of the several commodities bear to their average prices for the base period, 1890-1899, these being, therefore, made equal to 100.

New Issue

MONTREAL, *January 2nd, 1920*

$4,000,000

Cuban-Canadian Sugar Company

(Cuba)

8% Cumulative Preferred Shares

Dividends will be cumulative at the rate of 8% per annum from January 1st, 1920
Bankers—Royal Bank of Canada
Transfer Agents—Montreal Trust Company

The Preferred Shares will be Preferred as to assets and entitled to a fixed cumulative dividend at the rate of 8% per annum.

CAPITALIZATION

	To be Authorized	To be Now Issued
8% Cumulative Preferred Shares	$10,000,000	$4,000,000
Common Shares	10,000,000	5,000,000

The Company will have outstanding $1,500,000 of 6% Notes maturing as to $750,000 on June 30th, 1920, and $750,000 on June 30th, 1921.

Application will be made in due course to List both Preferred and Common Shares on the Montreal Stock Exchange.

Complete prospectus (copies will be mailed on request) contains a letter from Edward C. Miller, President and General Manager of the Company, from which we summarize as follows:—

1. **Cuban-Canadian Sugar Company** is being organized to acquire all the securities of the Rio Cauto Sugar Company which has successfully operated for a number of years, at Ingenio Rio Cauto, on the line of the Cuba Railroad in Oriente Province, Cuba, a large sugar plantation and factory.

Production of sugar (bags of 325 pounds each) has been as follows:—

1915-1916	1916-1917	1917-1918	1918-1919	1919-1920 (Estimated)
68,884	84,152	150,245	169,691	192,000

2. **Plantation Lands** consist of 32,300 acres belonging to the Company, of which 8,300 acres are in cane. In addition, approximately 5,200 acres of land are in cane under the cultivation of neighboring farmers, whose cane is sold to the Company in return for payment to the farmers of approximately 50% of the sugar produced from cane purchased. The eminently favorable position of the Company's cane supply is indicated by the fact that administration (Company) cane is 60% of its total consumption.

3. **Properties**, consisting of Plantation and Pasture Lands—Sugar Factory of a capacity of 250,000 bags per annum—26½ miles of Standard Gauge Railway—158 Railway Cars and 3 Locomotives—Dock Properties at the Company's own Port of Carenas—Town Buildings—Electric Lighting, Water and Sewerage Systems—2,000 head of Cattle and Draft Animals, etc., **have a replacement value of at least $5,500,000.**

4. **Net Liquid Assets**—as at June 30th, 1920, on the completion of the grinding of the 1919-1920 crop, should be **not less than $1,000,000.**

5. **Net Earnings for the Year ended September 30th, 1919**—after deducting Interest Charges and Taxes and writing off **$454,402.88** for Maintenance and Depreciation were **$397,355.34.**

Earnings for Year ending September 30th, 1920—after providing for Interest, Depreciation and Taxes on same basis as last year—

Available for Preferred Dividends are conservatively estimated at	**$1,127,000**
Deduct Preferred Dividend	320,000
Available for Common Shares	**$ 807,000**
Equal to over	**16%**

6. Earnings for year ended September 30th, 1919, as shown above, were made under unusually unfavorable weather conditions which prevailed during 1918-1919 crop, and the resulting low production of sugar was sold under Government control (which has ceased to exist) at 5½c. per lb. f.o.b. Cuba.

Estimated Earnings for year ending September 30th, 1920, are based on an average sale price of **7.10c.** per lb. f.o.b. and arbitrarily assuming similar unfavorable weather conditions.

Under usual weather conditions, and possibly slightly higher prices for sugar than those now prevailing, **it is conceivable that this estimate of profits might be exceeded by from $300,000 to $500,000.**

The larger portion of this issue has been sold in Canada and the United States. We offer the unsold balance at a price of

100 and accrued dividends, yielding 8%

Carrying a bonus of 25% in Common Shares

(One Common Share with every four Preferred Shares)

Payable as follows:
25% of the par value on application
25% of the par value on January 20th, 1920
25% of the par value on February 20th, 1920
25% of the par value on March 20th, 1920

Common Stock Bonus will be adjusted to even amount by purchase or sale of fractional share at the rate of $30 per share

The right is reserved to allot none, or a portion only of the amount applied for. If only a portion of the amount applied for be allotted, the balance of the deposit will be applied towards payment of subsequent instalments. Payments may be anticipated in whole or in part at any time. Interest will be allowed on payments at the rate of 8% per annum. Interest will be adjusted upon final payment.

Application may be made on the accompanying form

NEWS OF MUNICIPAL FINANCE

Toronto's Finances in Sound Condition—Montreal Debt High —Lack of Sinking Funds is Reason—Saskatoon Tax Collections Increase

Kenora, Ont.—The financial report of the town for the period from January 1st to December 15th, 1919, shows that assets exceed liabilities by $240,155. Total tax collections amounted to $108,584, while the amount collected from tax sales totalled $4,274. The total net debt has now reached the sum of $221,677. Advances from sinking fund, including sinking fund liability to bondholders of $191,232, amount to $45,194.

Mimico, Ont.—According to the financial statement of the town, assets up to December 15th, 1919, totalled $491,323, and liabilities $476,771, leaving an excess of assets over liabilities amounting to $14,551. Receipts amount to $309,019 and the payments amount to $294,738, including $14,281 cash in the bank. During the year the council of Mimico passed forty-two by-laws.

New Westminster, B.C.—The city can still borrow $886,563 in addition to its present indebtedness, and without taking into consideration the question as to whether the sinking fund in hand should be considered as having reduced to total bonded debt for that purpose. The total general bonded debt is $4,496,000, which includes $389,000 for schools. The city's total borrowing power is $4,993,563, and it has borrowed $4,107,000 against that, leaving a balance to go on if the ratepayers see fit.

Montreal, Que.—The statement is made by E. R. Decary, chairman of the Administrative Commission, that one of the principal causes of the city's financial troubles was the failure of the past administration to provide sinking funds to pay off the millions borrowed. Figures submitted by Mr. Decary show an enormous increase in debt since 1910 of nearly $73,000,000. The figure in 1910 was $49,102,727 and in 1919 $122,000,000. Accumulated sinking fund amounts to $6,100,000, and debt charges amount to about $7,000,000. The debt per capita is $175.

Saskatoon, Sask—Tax collections for the first eleven months of 1919 totalled $914,774, compared with $793,241 for the same period in 1918. Of these collections, for 1919, $892,050 was for straight taxes and $22,723 for penalties. In 1918 $772,947 was for taxes and $20,293 for penalties. It is anticipated that before the end of December large collections will be made, taxpayers realizing that by payment before the end of the year they will escape the 2½ per cent. penalty on the 1919 taxes, which is added quarterly on arrears. If not paid before November 15th, 1920, these arrears are taken into the list for the tax sale.

New Toronto, Ont.—The financial statement of the municipality up till December 15th, 1919, shows excess assets over liabilities of $46,755. Receipts amounted to $270,905, which includes $79,989 of current and other taxes. The expenditures are as follows:—

The expenditures of the New Toronto Hydro-Electric system for the year amount to $95,720. Actual receipts amount to $83,145, with a bank overdraft of $12,574.

The assets of the system are $35,094, and the liabilities $19,755. Waterworks system assets are $213,441, and liabilities $206,534. Expenditures were $15,388, and receipts $153,063, with a bank overdraft of $823.

Winnipeg, Man.—The Bank of Montreal has virtually refused to allow the Winnipeg Electric Railway Company to pay a portion of the $635,179 owing to the city in taxes, and if the bank does not change its attitude within a week a writ against the company will be issued. Such was the statement made at the weekly meeting of the city's finance committee.

The bank, it was stated, was again being asked by the company to allow payment. It was also explained that the company, when waited upon by a committee from the city, agreed to pay the 1917 taxes, with the exception of some pavement charges in dispute, and approximately figured at $120,000. The company also promised to pay its 1918 taxes by May 1st, which would mean another $225,000.

Edmonton, Alta.—The net result of operation of the utilities for the month of November is a surplus, after providing for capital and depreciation charges, of $17,221 as compared with a deficit of $8,480 for the corresponding month of last year, or, in other words, an improvement of $25,701.

The gross earnings for the eleven months ending 30th November amounted to $1,912,322, while operation and maintenance cost $1,073,140, showing a surplus on operation of $839,182 as against $694,966 for the same period of last year; and after meeting capital and depreciation charges, there is a net surplus on all the utilities, inclusive of the deficit on the street railway, for the eleven months of $137,919 as compared with $2,528 for the corresponding period of 1918.

The street railway for the month of November shows a net surplus, inclusive of capital and depreciation charges, of $1,526, against a net deficit for that month last year of $25,546. The net deficit on the street railway for the eleven months of this year amounts to $53,283 as against $132,267 for the period of last year.

Toronto, Ont.—The financial statement of the city for the year ended December 31st, 1918, has been submitted by Finance Commissioner Bradshaw. The city's capital assets at the end of the year amounted to $150,209,418, including sinking fund assets of $28,073,357; Consumers' Gas Company stock, $31,587; war expenditures rights and benefits, $6,769,848, and permanent properties, improvements, etc., $115,334,625. The gross capital indebtedness of the city was $105,125,387, the major portion of this, $104,122,200, being the city's gross funded debt, part of which is repayable by annual instalments and part at the end of specific terms of years out of accumulated sinking funds, and the balance, $1,003,187, being the city's obligation to the Toronto Harbor Commissioners, which is repayable by the city to the commissioners, under agreement, in forty annual instalments.

Toronto's war expenditure, which will practically be cleared off this year, is stated approximately at $13,500,000, or about $135 for the head of each family group in the city. The amount embraces $5,250,000 expended for life insurance on the lives of volunteer citizen soldiers, $2,250,000 for patriotic, relief and other grants, 1915 to 1918, $1,500,000 for wages of enlisted civic employees, and $500,000 for interest and debt incurred for war purposes and for protection of city property.

"The city's financial condition is unquestionably sound," remarks the commissioner. "Sufficient revenue is derivable to meet running expenses; the enjoyment of a high credit enables such necessary capital to be obtained as may be legitimately required; adequate provision has been made for retiring all funded obligations as they become due; moneys receivable by the city do not, to any extent, remain overdue an unreasonable length of time; and funds are available for discharging all current indebtedness.

"That the unpaid taxes and accounts receivable at the close of 1918, namely, $5,197,653, were not unduly large will be recognized from the fact that the total receivable for 1918 was about $30,000,000, made up of about $25,000,000 of taxes and general revenue, chiefly due in the last seven months of the year, and approximately $5,000,000 carried over from the previous year.

"Since the outbreak of the war many large projects advanced prior thereto had either to be entirely given up or temporarily postponed, while during its progress practically none but extremely important new undertakings were entered upon, or even considered. The extensive programme of capital outlays, however, commenced before, and in various stages of progress at the beginning of hostilities, had to be completed, and necessitated providing, with $4,500,000 for war purposes, no less than $35,000,000 of new capital in the war years, 1915-1918, inclusive, while in the two years previous, 1913 and 1914, over $31,500,000 of new capital had to be provided, making a total within the past six years of over $66,500,000. Of this tremendous capital expansion, equivalent to 64 per cent. of the city's present funded debt, begun practically in 1912, $38,900,000 was for non-self-sustaining purposes. This was so abnormally great, compared with the prevailing assessment, that if there had been no increase in assessment, the 1918 tax for debt charges alone, apart from

GOVERNMENT AND MUNICIPAL BONDS

Manitoba Disposes of Bonds—York Township Places Issue—Otherwise Week was Quiet

THIS week was featured by the sale of a $4,000,000 6 per cent. 5-year issue of Manitoba bonds at 102.81, Canadian payment, to the Merchants Bank of Canada, which means that the province pays about 5.35 per cent. for its money. This exceptionally good price is of course made possible by the exchange situation, and United States investors are eager to buy high-grade securities.

York Township has sold five blocks of debentures amounting to nearly $600,000 on a very favorable rate. Verdun turned down all bids for the third time and will seek aid from the province.

Practically all of the large issues placed last month have been absorbed by the public. Alberta's issue is meeting with a good reception, the underwriters state. The offering is being made at a price of 97.75, to yield 5.80 per cent. Some of the January offerings are:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Assiniboia, Man.	$ 161,506	5	Various	Jan. 5
Sherbrooke, Que. ..	342,500	Various	Various	Jan. 5
Nanton, Alta.	6,000	6½	10-instal.	Jan. 15
Red Deer, Alta.	50,000	6	10-instal.	Jan. 16
Rivers, Man.	9,000	6	20-instal.	Jan. 21

Rivers, Man.—Tenders will be received until January 21, 1920, for the purchase of $9,000 6 per cent., 20-instalment debentures. (See announcement elsewhere in this issue.)

Assiniboia R.M., Man.—Tenders will be received until January 5, 1920, for the purchase of bonds totalling $161,506 as follows: 1—5 years, bearing 5 per cent. interest (wells), $4,663.04; 2—7 years, bearing 5 per cent. (sidewalks), $538.64; 3—20 years, bearing 5 per cent. interest (waterworks), $57,115; 4—20 years, bearing 5 per cent. interest (sewers), $99,190.—Frank Ness, Kirkfield P.O., Man.

Debenture Notes

Sifton, Man.—A by-law for the borrowing of $40,000 for good roads, has been passed.

Portage la Prairie, Man.—Money by-laws totalling $92,000 for various improvement purposes, have been passed.

Galt, Ont.—The Hydro radial by-law was passed, and also a by-law to raise $30,000 by debentures for a central heating plant.

Nelson, B.C.—The city council has decided to submit a by-law at the approaching election for a new water system costing $50,000.

Perth, Ont.—Ratepayers will be asked to vote on the raising of $75,000 by debenture issue, for the purpose of erecting a hospital.

Levis, Que.—The city council has approved of the by-law for the raising of $80,000 for roads, and ratepayers will be asked to vote.

Guelph, Ont.—A by-law to borrow $50,000 for improvements to Royal City Park will be submitted to electors at the coming elections.

Dresden, Ont.—The town council plans construction of waterworks system, at an estimated cost of $10,000. A by-law will be submitted.

Sarnia, Ont.—Two money by-laws, one for $35,000 for a municipal plant, and the other, $35,000, for waterworks, have been endorsed by ratepayers.

Capreol, Ont.—On January 15th a by-law to provide for borrowing $20,000 for the construction of an electric light plant will be submitted to the electors. Clerk, W. H. Mathews.

Guelph, Ont.—Two money by-laws were passed at the elections as follows: To issue debentures to the amount of $855,235 as Guelph's share of the Hydro scheme, and to raise $75,000 for the construction of a new gas container.

Kincardine, Ont.—A by-law to provide $40,000 to install a hydro-electric power system and to rebuild the electric light system will be submitted to electors at January municipal elections.

Stouffville, Ont.—A by-law to raise $20,000 for the purpose of building an electric power line to connect the village with the Metropolitan line at Bond Lake, a distance of about seven miles, will be submitted to the taxpayers at the municipal election.

Bedford, Que.—As a result of the passing of a by-law, an issue of bonds to the amount of $30,000 will shortly be issued, to provide for the purchase of the Bedford Light Co., Ltd., and the purchase of the municipal water system, which is in the hands of that company.

Verdun, Que.—Following the rejection of two more tenders for the city's bonds, the council, on the motion of Alderman Rheaume, authorized the city treasurer to communicate with the Lieutenant-Governor-in-Council with a view of obtaining his permission, through the minister of municipal affairs, to sell the city's bonds at private sale, at a minimum price to be fixed by him.

Hamilton, Ont.—The following money by-laws have been passed: $70,000 for the purchase of fire-fighting apparatus, $50,000 for the development of Mountain highways, $150,000 for the development of Scott Park as an athletic field, and $850,000 for the construction of a central storm overflow sewer. It was decided to issue debentures for $15,000 for the purchase of a school site on Concession Street in the township.

Toronto, Ont.—The following money by-laws have been passed: To issue debentures for the sum of $1,000,000 for the erection of a live stock arena at the Exhibition grounds; authorizing the proposed Transportation Commission to raise $5,000,000 by debentures to cover extensions and equipment for the street railway system; authorizing the deposit with the provincial Hydro Commission of debentures to the amount of $4,000,000 as the city's share of guarantee for the securities issued covering the erection of the proposed Toronto and Eastern Hydro radial railway to Bowmanvlle.

Moose Jaw, Sask.—The proposition has been made to abolish the business license, and to substitute a business tax. This would increase the assessment to about $750,000 annually, it is estimated. As the city act provides that a city may borrow up to 20 per cent. of its assessment, the passage of the by-law, it is hoped, will increase the city's borrowing power by a sum from $140,000 to $160,000. The city has for some time past been at the end of its borrowing power and the council has been seeking various ways and means of increasing the assessment in order to extend the borrowing power.

Sales of the Week

North Bruce Township, Ont.—Messrs. A. E. Ames and Co. have been awarded the $12,000 10-year 6 per cent. bonds. The price paid was 99.43, and the funds are required for telephone extension purposes.

Strathroy, Ont.—Messrs. A. E. Ames and Co. have purchased a block of $64,451 5½ per cent. 20-instalment bonds at 95.09, which price is on about a 6⅛ per cent. basis. Some of the bids were:—

A. E. Ames and Co.	95.09
Wood, Gundy and Co.	95.07
W. A. Mackenzie and Co.	95.07
R. C. Matthews and Co.	95.07
Canada Bond Corp.	94.83
C. H. Burgess and Co.	94.57
W. L. McKinnon and Co.	94.48

York Township, Ont.—Messrs. A. Jarvis and Co., in joint account with R. C. Matthews and Co., have purchased five blocks of bonds as follows, paying 98.73 and accrued interest: $211,314.68 6 per cent. 10-instalments, for local improvements; $38,600 5½ per cent. 25-years, for public school purposes; $60,000 5½ per cent. 25-years, for school purposes; $172,650 5½ per cent. 25-instalments, for public school pur-

NEWS OF MUNICIPAL FINANCE

(Continued from page 38)

any war debt, would have been practically eight mills. Clearly, the city's future was being too heavily and unjustifiably mortgaged. Notwithstanding increases in the assessment, the tax required to cover the debt charges (including those on war debt) increased from approximately 5 mills in 1914 to over 7½ mills in 1918. Had there been no curtailment and no increase of assessment, the burden of overhead charges would to-day have been extremely heavy. In addition to the general debt charges of 7½ mills, the special rate for local improvement debts averaged 3 mills on the 1918 assessment, which really means that on the average the taxpayer was called upon to pay 10½ mills for debt charges in 1918. Unless there is an unusual yearly increase in assessment, it will be a very considerable time before the rate for fixed charges on non-self-sustaining works, etc., is appreciably lowered.

"Debentures were sold during 1918 amounting to $6,898,108, all of which were issued in connection with capital commitments of prior years. Of these, $6,117,700 had been authorized in 1917, but remained unnegotiated at its close. The remainder, $775,403, was authorized in 1918 to cover the cost of completed local improvements, the construction of which had been authorized in preceding years. On $3,966,693 of these debentures, the annual debt charges, $399,299, are practically all met by general taxation, while on the balance of $2,926,410, the annual debt charges, $297,500, are provided either by revenue from the services for which the debts were incurred or by special local improvement assessments.

"Certain of the fixed assets are revenue producing, the services which they represent being wholly or partly self-sustaining. The income from the city's waterworks system not only rendered that great utility self-supporting in 1918, but produced a surplus of $546,616, which was applied to the reduction of general taxation. For all the charges involved in the investment in the comparatively new and expanding Toronto Hydro-Electric system the city is completely reimbursed by the commissioners from earnings of that well-managed and well-equipped enterprise, which is admirably serving the citizens. The franchise revenue from the Toronto Railway more than met the expenses and charges on account of the pavement of the right-of-way by $62,039, this surplus also being applied in reduction of taxation.

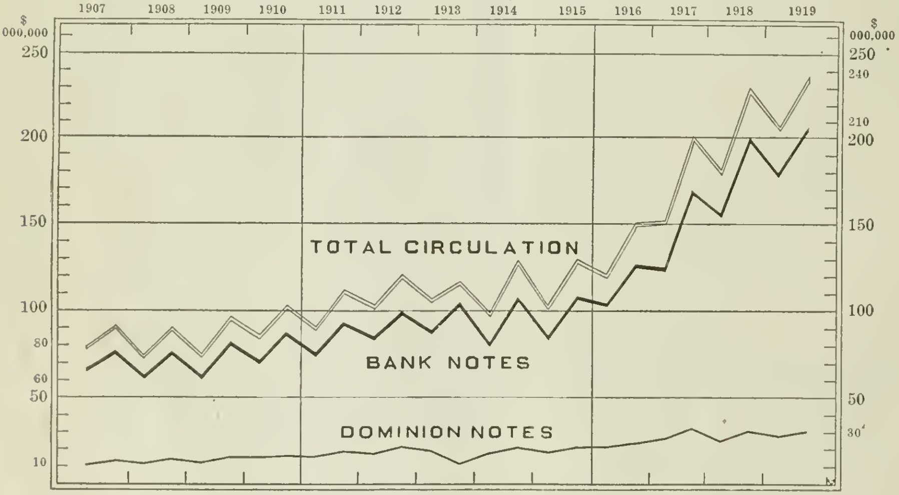
"Against the substantial funded debt there were reserved sinking and other funds, amounting to $27,797,470, provided out of revenue, which reduced the liability to $76,324,730. In addition to the redemption funds, the sinking fund included two other miscellaneous items, viz., sundry minor amounts raised by debenture loans, but ultimately found not to be required to meet the cost of the respective works, and proceeds of sales of certain city assets, amounting together to $204,400, which sum is also available for the liquidation of the funded debt. The total sinking fund of $28,073,357 is comprised of city of Toronto bonds, $25,409,336; Dominion government securities, $450,487; loan to Toronto Harbor Commissioners, $975,000; accrued interest on investments, $483,448; and cash, $755,086. The actual net interest earnings of the sinking fund amounted to $1,235,182, being at the average rate of approximately 4.62 per cent."

BANK AND DOMINION NOTES

Commenting upon the increase in circulation shown in the October bank statement, the December Commercial Letter of the Canadian Bank of Commerce says:—

"The bank statement for October showed a very large increase in deposits and current loans, both of which were the result of preparations for the Victory Loan. There was a notable increase in circulation of $10,569,482 as compared with the previous month, and of $8,879,671 as compared with October, 1918. The highest point reached during the month was $242,509,573. The October increase is seasonal, but it may be observed that the requirements of the public are steadily increasing from year to year. The regular annual changes in the demand for currency, and the increase in the amount in circulation since the war began are shown in the diagram below:—

DOMINION NOTES AND BANK NOTES IN THE HANDS OF THE PUBLIC
As at April 30 and October 31, 1907—1919



"The top line shows the actual amount of paper currency in the pockets of the people at the end of April and October in each year commencing with 1907, the panic year. It will be noted that early in 1914, when bank-notes were still redeemable in gold, there was a marked decline in the volume of currency owing to the depression in business. Later in the year, bank-notes were made legal tender and a decided expansion took place, only to be followed by a sharp contraction caused by the crop failure that year in the west. As the industrial and military efforts of Canada developed, aided by the bountiful harvests of 1915, government credits on a larger scale became necessary, with the result that the seasonal contraction that year was not as marked. Since then, in proportion as government credits increased and prices rose, the demand for currency has also risen. In 1907 the circulation was $10 per capita, and to-day it is fully three times greater, or about $30 per capita."

GOVERNMENT AND MUNICIPAL BONDS

(Continued from page 40)

poses; $80,000 6 per cent. 25-instalments, for waterworks. Other bids received were:—

Wood, Gundy and Co.	98.63
C. H. Burgess and Co.	98.281
Dominion Securities Corp.	98.176
A. E. Ames and Co.	98.09
National City Co. Ltd.	97.296

Messrs. Housser, Wood and Co. bid on the separate lots as follows: 99 for block No. 1, 94.302 for block No. 2, 95.017 for block No. 3, 94.302 for block No. 4, and 99 for block No. 5. The total issue was for $562,564.68.

Manitoba.—The province has disposed of an issue of $4,000,000 6 per cent. 5-year bonds to the Merchants Bank of Canada at $102.81, which is on a 5.35 per cent. basis. Four bids were received as follows:—

Merchants Bank of Canada	102.81
A. E. Ames and Co., Dominion Securities Corp. and Wood, Gundy and Co.	102.087
National City Co., Harris, Forbes and Co. and the Continental Commercial Trust Co., Chicago	101.29
A. Jarvis and Co., Toronto, Illinois Trust Co., Merchants Loan and Trust Co., First Trust Co. and Lee, Higginson and Co., all of Chicago	98.38

The Hon. Edward Brown also states that an issue of $500,000 telephone bonds has also been disposed of.

Saskatchewan.—The following debentures are reported sold by the Local Government Board:—

Schools.—White Cap, $2,500; Bond and Debenture Corporation, Winnipeg. Dublin, $1,000, Fransfield, $2,400, Spion Kop, $1,400, Woodlawn, $2,000, Brobizna, $1,200, Green Mount, $600; Canada Landed and National Investment, Winnipeg. Jackson, $900; J. H. Kern, Moose Jaw. Crimea, $2,900; Great-West Life Assurance Co., Winnipeg. Davidson, $18,000, Dubuc, $2,000; Harris, Read and Co., Regina. Suffield, $3,800, Walhalla, $4,000, Rereshill, $3,500, Amherst, $4,500, Clashmoor, $3,700; Waterman-Waterbury Mfg. Co., Regina. Black Diamond, $7,000; T. K. McCallum, Saskatoon; Lac Cheval, $2,400; Regina Public School Sinking Fund Trustees.

Telephones.—Luseland West, $7,000, Duval Longlake, $7,400, Good Luck, $31,000; W. L. McKinnon and Co., Regina. Turtleford, $45,000; T. D. Rourke, Regina. Fiske, $13,500.

Rural Municipalities.—Lakeview, $11,500; Harris, Read and Company, Regina.

END OF MANY ORDERS-IN-COUNCIL

The agreement of 1919 brought to a conclusion some war-time activities which had extended throughout the year. A large number of orders-in-council of the Dominion government were among these; in fact, only nine now remain, passed under the War Measures Act. These relate to government control of pulp and paper, sugar, coal and wool; orders governing silver coinage and gold export; trading with the enemy and internment of aliens, and the order relating to the War Purchasing Commission.

The business profits war tax also expired at the close of the year. This tax has been applied during four successive years, and has produced the following substantial totals each year:—

1916-17	$12,506,000
1917-18	21,271,000
1918-19	32,970,000
1919-20 (estimated)	30,000,000
Total	$96,747,000

An office and warehouse building is being erected by the Windsor Lumber Co. at a cost of $20,000 on Crawford Avenue, Windsor, Ont.

HURON AND ERIE WINNIPEG PREMISES

The Huron and Erie Mortgage Corporation, of London, Ont., have purchased the Northern Crown Bank Building on Portage Avenue, Winnipeg, and will shortly occupy up-to-date offices on the ground floor, formerly occupied by the bank.

IMPERIAL TRUSTS DEAL POSTPONED

At the meeting of the shareholders of the Colonial Investment and Loan Co., held in Toronto on December 30th, it was decided to secure further information about the Imperial Trusts Co. before sanctioning the purchase of its stock. Another meeting will be held on January 30th.

TWO MORE BANKS DECLARE BONUS

The Standard Bank of Canada recently announced the distribution of a Christmas bonus to all its employees, amounting to 15 per cent. of the year's salary.

A Christmas bonus has also been granted to the staff of the Dominion Bank, and, in addition, special bonuses to married men. During the present year, outside of increases in salary to all employees, the Dominion Bank has distributed bonuses of 25 per cent. to the junior members of the staff, and 10 to 15 per cent. to the senior members; also extra distributions to married men.

TOO MUCH PUBLIC EXTRAVAGANCE

In a review of the financial situation in Canada during 1919, published in the Halifax Chronicle of January 1st, F. B. McCurdy, M.P., criticizes the government financing, and particularly the terms on which the Victory Loan of 1919 was issued. He says the loan was marked by timidity on the part of the government when there need have been no such feeling. He asserts that the people have been expecting the government to lead in the example of thrift and economy, but that these homely virtues have been lacking. As an example of this, he quotes in a Canadian Press dispatch that one department of the government at Ottawa may cost 40 per cent. more to operate this year than last. He says, further, that there has been provincial government speculation in international exchange, and asserts that such governments, for the sake of obtaining slightly higher prices for their bonds floated in Canada, have incurred the obligation of repayment in New York funds.

Mr. McCurdy condemns absolutely the issue of the government bonds this year at 5½ per cent., when towns and municipalities with a much inferior credit were getting their money at a lower rate of interest, often at 5¼ per cent. This action of the government he ascribes to timidity, and says that its effect has been to make money dearer than it should be for all other borrowers. He expresses the belief that the money could have been obtained at 5 per cent. if municipalities got it at 5¼ per cent. He says the borrowing era must come to an end, and that the government should proceed at once to rectify its financial position in the same way as a private individual would do who found his expenditures far exceeding his annual income.

Last year the Canada Trust Company, London, Ontario, issued a convenient legal diary. Another one is issued in similar form for 1920, but this year the information included in the volume is more of a business character, and this year's is accordingly called a "Commercial" edition. Figures are included showing the trade of Canada, the income tax rates, succession duty rates, sterling exchange tables, postal rates, etc.

INVESTMENTS AND THE MARKET

Abitibi Paper to Convert Debentures — Imperial Tobacco Profits Lower—C.P.R. Net Earnings Down—Large Surplus for Coniagas Mines

Ritz-Carlton Hotel Co.—A special meeting is called by the Royal Trust Co. for January 12th, 1920, for holders of first and second mortgage bonds for the purpose of considering the interest arrears and to modify the trust deeds.

Canada North-West Land Co., Ltd.—Notice has been given that a distribution on realization of assets No. 13 of $5 per share has been declared, and that the same is payable on the 18th day of January, 1920, to shareholders of record on the books of the company at the close of business on the 20th day of December, 1919 (fractional shares not included).

Cape Breton Electric Co., Ltd.—The following is the earnings statement of the company for the twelve months ending October 31st, 1919:—

	Oct. 31, '19.	Oct. 31,'18.
Gross earnings	$577,493	$501,328
Operating expenses and taxes	448,513	373,764
Net earnings	$128,980	$127,563
Interest charges	64,377	62,989
Balance (for reserves, replacements and dividends)	$ 64,602	$ 64,573

Lake Superior Corporation.—It is stated that a settlement has been reached in regard to the Lake Superior Corporation, and the bondholders of the Algoma Central Railway and of the Algoma Central Terminals. President W. H. Cunningham, on returning to Philadelphia from a meeting of the directors in New York, stated that word had been received from the London committee that the bondholders had accepted the proposal of the Lake Superior Corporation for full settlement and discharge of its guarantee obligations, under the mortgage of both companies. The bonds in the case of the Algoma Central Railway amounted to $10,080,000, and in the case of the Algoma Central Terminals $5,000,000.

Imperial Tobacco Co. of Canada, Ltd.—The annual report of the company covering the twelve months' period ended September 30th last, shows net profits of $2,920,719, a decline of almost $700,000 from the record level of 1918, but nearly $500,000 over the preceding year. After the payment of the usual dividends on the preferred and ordinary shares, there remained a surplus from the year's operations of $818,769, which, added to the previous balance of profit and loss account, brought the latter up to $2,859,935, after allowance is made for the payment of a final dividend for the current year of 1 per cent. on the ordinary stock. Although bills payable show an increase of $1,350,000 over the total of a year ago, the position of the company as to working capital shows further strengthening, standing at $10,141,534, compared with $9,769,873 at the end of the 1918 period.

Abitibi Power and Paper Co.—Shareholders of the company have received a circular announcing that the 7 per cent. convertible debentures of the company will be retired on April 1, 1920, at 110 and accrued interest. This debenture stock of the company was offered to the public in April, 1918, at 87 and accrued interest, to yield over 8½ per cent., and was nominally due December 1, 1932. The company, however, had the option of retiring the debentures at 110 and accrued interest at any time on or before March 1, 1921, after which they were convertible at the holders' option into common stock at par. The retirement of the debentures will reduce the company's funded debt to $5,400,700, which, with $1,000,000 preferred and $5,000,000 common, represents the outstanding capitalization of the company.

Canadian Pacific Railway.—A decline in net earnings for November of $548,663, as compared with the same month last year is shown. The following is the statement:—

	Nov. 1919.	Nov. 1918.	Increase.
Gross	$17,366,849	$15,023,088	$2,343,761
Expenses	14,517,040	11,624,615	2,892,424
Net	$ 2,849,808	$ 3,398,473	*$ 548,663

---

*Decrease.

The returns for the eleven months showed that operating costs outdistanced the increases in gross earnings. The ratio of working expenses to total receipts in the 1919 period stood at slightly in excess of 84 per cent., compared with 77.6 last year, the actual increase for the eleven months being in excess of $18,500,000, the total having increased from $110,095,467 in 1918 to $128,652,616 in the current year. The net figures of $31,250,860 are the lowest in any similar period in the past ten years.

Coniagas Mines, Ltd.—The financial report of the company for the year ended October 31, 1919, shows a surplus in the balance sheet of $2,103,745. Total assets amount to $6,562,837. Some of the principal items are: Capital assets, $4,441,788; investments, $1,592,542; current assets, $174,611; cash in hand and in bank, $184,235; current liabilities, $204,092; reserve for depreciation, $255,000. The profit and loss account shows profit of $645,352.

The average price realized for silver sold during the year was $1.06 per ounce, as compared with 94¼ cents per ounce for the previous year. The output of silver was 940,267 ounces, compared with 954,264 ounces in the year preceding. The combined sales of ore from the mine at Cobalt and the production of reduction at the plant at Thorold aggregated $3,574,456.

During the year three dividends of 2½ per cent. each or a total of 7½ per cent., were declared making a total distribution to shareholders to date of $9,640,000, of which $7,800,000 or 190 per cent. of capital, was paid as dividends, and $2,040,000, or 50 per cent. of the capital as bonuses. No work has been done on the Porcupine property during the year.

RECENT FIRES

Succession of Fires, Involving Heavy Losses, Continues—Beamsville, Ont.; Chambly Canton, Que.; Fairview, N.S.; Fredericton, N.B.; Moncton, N.B.; St. John, N.B., and Woodstock, Ont., Suffered

Arborfield, Sask.—December 9—The rectory, close to the Catholic church, was destroyed. Cause unknown. Estimated loss, $2,500. Insurance carried, $800.

Athens, Ont.—December 28—Three buildings were destroyed, viz.: a three-story frame structure, owned by R. N. Dowsley and leased to the mission; the second was occupied by Geo. Flood, tinsmith; the third was also a frame building, owned by Miss Maud Addison, fruit and confectionery. Cause unknown. Insurance carried on the last-mentioned.

Beamsville, Ont.—December 29—The Hamilton, Grimsby and Beamsville Railway barns, with three cars, were destroyed. Estimated loss, $40,000.

Chambly Canton, Que.—December 24—Two buildings belonging to the Bennett Company, used for the manufacture of artificial leather, were damaged. Estimated loss, $100,000, partly covered by insurance.

Fairview, N.S.—December 24—Warehouses of the Canadian Oil Co., with three cars of paint and ten cars of oil, were destroyed. Two gasoline tanks were damaged. Cause unknown. Estimated loss, $100,000. Insurance carried, $50,000.

Fredericton, N.B.—December 28—Gem Theatre, situated at the corner of Carleton and King Streets, was destroyed. Cause unknown. Estimated loss, $25,000.

London, Ont.—December 27—Residence of Mrs. John Friend, 772 Colborne Street, was damaged. Cause, defective fireplace. Estimated loss, $1,500.

Moncton, N.B.—December 25—Building of the Moncton Tramway, Electric and Gas Co.'s car barn, machine shop and a street car and sweeper were destroyed. Cause unknown. One death. Estimated loss, $50,000. Insurance carried in the following companies: British American, North British and Mercantile Co. and the Fidelity Co.

Montreal, Que.—December 25—A shed at 15 Woodstock Street and a four-tenement house, occupied by W. Delphito and P. T. Hobin, were damaged. Cause, thought to have originated through hot cinders in the shed. Estimated loss, $500.

Newcastle, N.B.—December 26—Building owned and occupied by P. J. McEvoy, liquor vendor, was destroyed. Insurance carried, $3,500, covering the loss. Another building, owned by Dr. F. J. Desmond and occupied by R. M. Fandel, dry goods, with contents, was damaged. Estimated loss, $6,000. Insurance carried, $5,000.

Port Arthur, Ont.—December 26—The woodwork and interior of the big steel tug, "A. Conmee," was damaged. Cause unknown. Estimated loss, $25,000.

Quebec, Que.—December 25—Building of the Quebec Abattoir Co., situated in the Limoilou Ward, at the northern limits of the city, was destroyed. Estimated loss, $2,500, covered by insurance.

Russell, Man.—December 25—Queen's livery stables were destroyed.

St. John, N.B.—December 30—Building occupied by J. Marcus and Sons, furniture dealers, owned by Roger Owen, of the Union Assurance Co., England, and the American Cloak Manufacturing Co., owned by S. K. Cohen, and John Coffees, electrician, was damaged. Estimated loss, $50,000, with little insurance.

St. Sauveur, Que.—December 26—The establishment of Myrand and Labrecque, located at 25 Renaud Avenue, was damaged. Cause unknown.

Toronto, Ont.—December 25—A large three-story building at 346 Spadina Avenue, occupied by Miss Bernice and owned by Albert Ogden, was damaged. Cause, defective grate. Estimated loss, $1,000.

December 26—Building of the Ideal Shoe Store, situated at 204 Queen Street East, was damaged. Cause unknown. Estimated loss, $3,500, fully covered by insurance.

December 29—Building at 452 Bloor Street West, was damaged. Cause, overheated stove. Estimated loss, $750.

December 30—Six houses at Treford Place were damaged. Cause, defective stove. Estimated loss, $1,600.

Victoria, B.C.—December 21—Building of J. M. Nagano and Co., Japanese fancy goods store, 1501 Government Street, was damaged. Cause, overheated chimney flue. Estimated loss, $4,000. No insurance carried.

Woodstock, Ont.—December 27—Main mill of McKinney Lumber Co. was destroyed. Damage was done to much valuable machinery. Cause, sparks from boiler. Estimated loss, $25,000, partially covered by insurance.

ADDITIONAL INFORMATION CONCERNING FIRES

Brown's Flats, N.B.—December 10—Residence of Mr. William Thorpe, with contents, was destroyed. Cause, defective chimney. Estimated loss, $3,000. No insurance carried.

Edmonton, Alta.—December 2—Residence of A. R. Wilson, 10942 90th Avenue, was damaged. Cause, overheated stovepipe. Estimated loss, $2,010.60. Insurance carried, $3,000.

Halifax, N.S.—December 14—Building occupied by Messrs. George and Clifford Ramey, manufacturers of mineral waters, was destroyed. Cause unknown. Estimated loss, $5,000. No insurance carried.

Montreal, Que.—Up to December 27th the Montreal fire brigade responded to 3,345 alarms, including 23 second alarms, one third alarm and one general alarm. Nineteen persons perished in the various fires, the most disastrous being that of the Dominion Park, August 10th, where the toll of death was eight.

Sarnia, Ont.—December 15—Building and machinery of the Asbestos Covered Metal Corporation were damaged. Cause, igniting of material used in coating. Estimated loss, $21,000. Insurance carried in H. H. Robertson Co., Ltd.

Sault Ste. Marie, Ont.—The fire loss for the year 1919 is $150,000 less this year than during 1918, the losses this year amounting to only $65,000.

St. Catharines, Ont.—December 21—Factory of the Dominion Electric Co. at 181 Church Street was damaged. Estimated loss, $5,200. Insurance carried, $3,300. An adjoining house of Mr. Kelly was also damaged. Estimated loss, $1,392. Insurance carried, $3,000.

Victoria, B.C.—December 10—Lumber mill, with an adjoining dry-kiln, belonging to Moore and Whittingdon, was destroyed. Cause, overheated bearing. Estimated loss, $45,000. Insurance carried, $24,000.

TORONTO SECURES TWENTY-FIVE NEW INDUSTRIES

The annual report of the Industrial Department of Toronto, for 1919, will disclose many interesting facts when issued. Since March last there have been no fewer than 25 industries brought to the city entirely through the efforts of the department.

In the majority of cases these industries are branches of parent industries in operation across the line. This means that instead of sending Canadian money to the United States, thereby still further affecting the balance of trade, practically the same goods will be manufactured in Canada, by Canadian workmen.

In one instance alone, that of the establishment of a firm manufacturing musical instruments, from $2,500,000 to $3,000,000 will be retained in Canada that was formerly sent across the line. Another firm, manufacturing fire extinguishers, has a capital of over $500,000, to establish its Canadian branch. These are only two of the 25 concerns which have been brought to Toronto through the activity of the industrial department.

Retrospect and Prospect

CANADIANS may well look upon the year 1919 as a year of surprises—a year in which many theories which had survived, and which had arisen out of the events of the war were exploded. The extraordinary way in which the industrial machinery of the belligerent nations had adjusted itself to war conditions was in itself an impressive illustration of the power of present economic organization. But the very fact that industry had settled down on a permanent war basis was in itself a warning against the great changes that would be required when the fundamental cause was removed. Economists had predicted that no war between any of the great nations could last long, because the struggle would be on so vast and intensive a scale that the limit of finances would soon be reached. When the war did commence, with a large proportion of the civilized nations in it from the start, a few months at the outside was set as the maximum duration. But all the large nations soon became involved, and considering the fact that fighting was carried on continuously, it has been one of the longest wars in history.

But while the economists, no doubt, erred by being over-positive, and by under-estimating the power of duration, they made no mistake as to the enormous effect upon the whole economic system. In this respect the value of a critical examination of fundamental conditions, as compared with superficial evidence, has been demonstrated. Widespread prosperity and the ease with which economic and financial requirements were met seemed to indicate that war was a benefit rather than an injury. Some even maintained that the speeding up process saved more than the cost of the war, and many predicted that the necessity for rebuilding devastated areas, replacing destroyed ships and property, and filling up generally the gaps in ordinary industries, which had resulted from the diversion of effort to war production, would bring a period of even greater activity for many years after the war. From this brand of ultra optimism opinion ranged to those who saw only the economic waste in men and material, the tearing down of normal industry, and the enormous debts which were being created. Pessimism at least was supported by the experience of previous wars, which were followed almost immediately by periods of pronounced depression, falling prices and declining wages, accompanied by a great deal of unemployment.

While neither of these extremes has by any means been realized, the tendency has been distinctly along the lines of previous experience. Many of the developments of the past year have in fact been quite unexpected. Probably the most surprising thing has been the way in which prices have maintained the high levels of 1918, and in many cases have exceeded them. This fact alone has been a great stabilizing influence, although it would no doubt have been more desirable if no further advances had taken place. It has produced orders, maintained employment, and prevented business failures which would undoubtedly have taken place if there had been any sudden and substantial decline. At the same time it really indicates the extent to which consumption had outstripped production, and while an increase in the general price level has been made, yet the course of prices of such fundamental commodities as iron and steel, and of most farm products, which are reliable indices of future conditions, has been downward.

Comparing Canada with the other countries which were engaged in the war, we find that it has escaped most of the ills and at the same time secured most of the benefits. There has been no destruction of property here, while the possession of great supplies of those raw materials of which Europe was in dire need has maintained a continuously favorable trade balance. There has not been during the whole war period any total crop failure; Canada is, in fact, too large and the climate too varied for such an event to happen now. At the same time our manufactures have shown continuous expansion, our transportation facilities are overworked, and our financial institutions have accomplished marvels.

Primary Industries

Canada's principal industry has been, and still is, agriculture, and this year fair crops with high prices have assured prosperity for some months to come. According to preliminary estimates of the Dominion Bureau of Statistics the yield of the principal crops is as follows, compared with similar preliminary estimates for preceding years:—

	1917.	1918.	1919.
Fall wheat	15,363,450	6,960,200	19,001,800
Spring wheat	218,379,400	203,355,400	174,687,000
Total wheat	233,742,850	210,315,600	193,688,800
Oats	403,009,800	456,733,900	399,368,000
Barley	55,057,750	83,262,500	66,443,500
Rye	3,857,200	10,375,500	8,234,100

The wheat crop in many parts of the west was poor this year, and in some places it was a total failure, owing to bad weather, including hail storms. Saskatchewan and some parts of Alberta suffered worst. Owing to the fact that mixed farming is now fairly general in Alberta, however, that province has agricultural income in other forms.

Conditions in the mining industry have not been favorable; in the first place the war time demand for many of the metals has fallen off. The cost of mining operations, again, has increased, making especially difficult the production of gold. Through a government arrangement, the gold miners have, however, been able to secure the benefit of the premium on New York exchange, which has to a small extent offset their difficulties. The price of silver, moreover, has continued upward. The year 1919 has been a fair one for the Porcupine gold mines, and a good one for the silver mines of Cobalt and in British Columbia, although a strike in the month of September shut down the mines in the Cobalt district for a short time. Production of other metals shows a decrease in many cases.

The possession of natural resources now stands forth more prominently as a national asset than ever before; and Canada is recognized as one of the few countries which have an extensive supply of timber. It is unfortunate that even our resources are showing distinct signs of depletion. The careful conservation of these resources should be an essential part of government programs during the next few years, and the increasing price of lumber coupled with the assured demands for products of the Canadian forests should not be permitted to outweigh regard for the future. Although the exportation of pulpwood has fallen off, the pulp and paper industry as a whole has nevertheless prospered. It is probable that the opening of European and American markets to Scandinavian sources will bring an end to the virtual monopoly which has been enjoyed by Canada during the past few years, but the future of the industry is assured.

The high prices prevailing for products of the fisheries, and the fact that this industry, like agriculture, is free from difficulties with organized labor, has brought prosperity to the fishing population of the Dominion. Here again, however, depletion of supply is making itself felt; the higher grades of salmon, which have given British Columbia its reputation in this industry, can now scarcely be caught.

Transportation

In the field of transportation changes have been taking place which are of enormous importance to the future of this country. The purchase of the Canadian Northern Railway by the Dominion government last year resulted this year in the complete amalgamation of that road with the other government lines in the name of the Canadian National Railways. This system was still deficient as regards terminals and branch lines in the east. These facilities were possessed by the Grand Trunk Railway. The latter road has itself been in financial difficulty because of its subsidiary, the Grand Trunk Pacific, and a subsidy has been voted by the government annually for some years past to keep the system going. In October of this year, therefore, the government introduced and passed legislation designed to purchase the stock of the Grand Trunk from the shareholders, the value to be determined by arbitration. The Grand Trunk will be operated in conjunction with the rest of the government system, constituting the largest railroad system on this continent, and one which is regarded as possessing possibilities. The main line of the Grand Trunk Pacific in the west parallels in many cases the Canadian National Railway; this has been an unsatisfactory element in the Grand Trunk system, and the expense of operating and paying the fixed charges on both will be a heavy burden on the people of Canada. Equipment is also deficient.

Another outstanding event of the year was the development of the shipbuilding program launched last year by the Dominion government. Forty-three vessels, at least, will be owned and operated in conjunction with the national railway. The ownership of these two important transportation services makes the Dominion of Canada one of the leading countries of the world from the point of view of public ownership. The possibilities for building up the Dominion are immense, and on the other hand the probability of heavy annual deficits is regarded with anxiety by the people of Canada. Private ownership in these fields is by no means extinct, however. The Canadian Pacific Railway is well able to compete for railroad business and many privately owned lines of steamships on the ocean and on the great lakes furnish facilities of this kind.

Public Utilities

The difficulties of public service corporations, which were referred to in these columns last year, have been still further accentuated during 1919. This is the result of increased costs of operation and the public is only too ready to assent to increases in these costs, while increases in rates are obtained with the greatest difficulty. The British Columbia Electric Railway Co., the Winnipeg Street Railway Co., the Toronto Railway Co. and the Montreal Tramways Co. as well as other street railway companies have all been involved in questions of this kind. Similarly the Bell Telephone Co. was able this year to secure an advance in rates and a number of gas and electric companies did the same. The Ontario Hydro-Electric Commission made further extensions and large additional expenditures are planned.

Manufactures

In spite of the cessation of war orders, manufacturers of Canada have been able, with few exceptions, to maintain their plants in full operation. Until about midsummer, in fact, the principal difficulty was the shortage in labor, and skilled help in many industries is still not available in sufficient quantities. The agitation for a reduction in the tariff has become still stronger and was recognized by the Dominion government by slight concessions. The costs of production on the other hand have increased and the continued advance in prices has resulted in the appointment by the Dominion government of a Board of Commerce to inquire into this subject.

Trade

The tendency in trade during the latter part of 1918 has been the reverse of the changes which took place during war years. Our favorable trade balance which reached the maximum figure of over $114,000,000 for November, 1917, has been greatly reduced, although there is still a considerable excess of exports over imports. The principal decrease in exports has, of course, been in the case of those to Great Britain and other European countries. Our imports from the United States are still large, but show some decrease. As a result of these two changes and of the new financial relations between the United States and the United Kingdom, New York exchange has this year been at premium, ranging in Canada from three to twelve per cent. Exchange on almost every other country has, however, been less than par.

Insurance

A phenomenal increase in the amount of life insurance written in Canada has taken place this year. Twenty-eight representative companies, according to a compilation of *The Monetary Times* had at the end of March written $113,116,978 of new business as compared with $60,978,906 during the first three months of 1918, an increase of 85.5 per cent. New levels have been established from month to month, although the slackening of business during the summer months made the comparisons less impressive. Several factors are assumed to be responsible for this change, among them being the decreased value of money, and the consequent necessity for providing larger indemnities; the advertising which has resulted from government insurance and the increased recognition of business insurance.

For fire insurance this has been a much better year than 1918, the losses being substantially less. They are still higher than in any preceding year, however, and fire prevention work has not been organized sufficiently long to show substantial results, if it is successful at all. Large fires continue to take place, although they were not so numerous as in 1918.

Hail insurance was a bad gamble this year and the Alberta municipal system had to levy excess rates. While some of the companies writing hail insurance have come out with a small balance on the right side, yet most of them have lost money. Automobile insurance continues to grow rapidly in proportion to the increased use of motor cars. All the lines of casualty insurance have expanded and many companies have entered this field.

Banking

The Canadian bank figures for the year, given elsewhere in this issue, show significant changes, while deposits have increased rapidly, apart from temporary decreases due to war loan payments. Current loans commenced to fall off early in the year. Circulation also declined in August for the first time for a long period. Loans to municipalities have been regularly less this year than last; permanent tax payments have been better and in some cases have been required earlier in the season, while on the other hand the conditions of the money market made financing easier than last year.

The amalgamation of the bank of Ottawa with the bank of Nova Scotia took place on May 1st. Most of the bank stocks show increases in market value; this has resulted from increases in the dividend rates, strengthening of reserves and the issue of new stock at favorable terms by some of the banks.

The Investment Field

Interest rates have fallen off this year and in July provincial bonds were being sold at about 5.25 basis. The change in the investment situation is illustrated by the fact that tax exempt bond 5½ per cent. Victory loan bonds were issued last year at a slight discount while taxable 5½ per cent. bonds were issued at par in the case of the 1919 Victory loan.

Issues of provincial and municipal bonds have been substantial, although many were postponed towards the end of the year, because of the Victory loan campaign. The results of the latter are given in full, in this issue.

Who's Who in The Monetary Times

(Continued from page 3)

JACKMAN, W. T., M.A., Toronto.—Assistant professor of political economy in the University of Toronto; has specialized in transportation; recently published a two-volume work on transportation in modern England. (Page 102.)

JAMES, F. J., Regina, Sask.—A member of the firm of Nay and James, one of the first organizations to deal in bonds in the Canadian west. Mr. James served overseas and returned in 1919 to his business activities. (Page 160.)

JESSUP, JOHN A., Montreal, Que.—Manager of the casualty department of the Canadian branch of the Royal Exchange Assurance, London, England (Page 200.)

JONES, S. L., London, Eng.—Manager of the branch of the Dominion Bank in the United Kingdom. (Page 58.)

KIRKPATRICK, A. E., Toronto, Ont.—General manager for Canada of the United States Fidelity and Guarantee Co., Colonel in the Canadian army until taken prisoner at the battle of Ypres; repatriated two years later. (Page 198.)

LANGSTAFF, M. P., A.I.A., F.A.S., Waterloo.—Actuary of the Dominion Life Assurance Company of Waterloo; member of Institute of Actuaries of Great Britain and of the Actuarial Society of America. (Page 173.)

LIGHTBOURNE F. J., Toronto.—Manager for Canada of the Maryland Casualty Co.; this company is one of the largest underwriters of casualty lines in the Dominion. (Page 176.)

MACALLUM, A. B., Ottawa.—Chairman, Honorary Advisory Council for Scientific and Industrial Research. (Page 21.)

MacMURRAY, J., St. John, N.B.—As managing director of the Eastern Securities Corporation, Mr. MacMurray is an authority on the investment situation in the maritime provinces. (Page 116.)

MAVOR, PROF. JAMES, Ph.D., Toronto.—Educated in Scotland, where he also filled academic positions for several years, Prof. Mavor has for over twenty years past been professor of political economy in the University of Toronto. He is the author of several books on economic subjects. (Page 10.)

McEACHERN, D., London.—Assistant secretary, Huron and Erie Mortgage Corporation and Canada Trust Company; elected Canadian director of Financial Advertisers' Association at the convention of the Associated Advertising Clubs of the World held at San Francisco, July, 1918. (Page 162.)

MITCHELL, J. W., Toronto.—Vice-president of the Dominion Securities Corp., Ltd. Through his work as head of the Victory loan organizations for the city of Toronto, as well as in connection with the extensive business of the Dominion Securities Corp., Mr. Mitchell is regarded as one of the investment authorities of Canada. (Page 91.)

MORE, W. G., Toronto.—Secretary Imperial Bank of Canada. A banker of broad experience, who has taken a special interest in currency questions. (Page 66.)

MUNRO, J. S., Toronto.—Many years of experience in the foreign exchange department of the Canadian Bank of Commerce enables him to write authoritatively on this subject, and his records of quotations have been used for some years past in "The Monetary Times' Annual." (Page 54.)

PROCTOR, J. E.—A member of the well-known insurance firm of Jones and Proctor Bros., Toronto. Mr. Proctor has had wide experience in writing casualty lines, and describes inland transportation insurance in this issue. (Page 200.)

RAWLINGS, HENRY E.—Managing director of the Guarantee Co. of North America, Montreal, and an independent thinker on insurance topics. He deals with some aspects of guarantee insurance in this issue. (Page 192.)

RIFE, RALEIGH S., New York, N.Y.—Graduated at Doane College in 1909; took three years of post-graduate study in economics at Cornell and Princeton universities, holding graduate fellowships in each university; became connected with the statistical division of the bond department of the Guaranty Trust Company of New York. (Page 139.)

SCOTT, W. D., Ottawa.—Superintendent of Immigration, Ottawa. For many years past Mr. Scott has been at the head of the immigration service, and his comments on the developments in 1919, and prospects for 1920, are interesting. (Page 25.)

SMITH, GEORGE H., Toronto.—Assistant general manager, Canada Permanent Mortgage Corporation. Mr. Smith's long experience in the loan business, and his connection with such an extensive business as that of the Canada Permanent, enables him to deal authoritatively with loan company subjects. (Page 107.)

SMITH, R. GOLDWYN, Toronto.—Formerly financial editor of the "Toronto Times." Mr. Smith has made a special study of the stock exchanges. (Page 142.)

STEWART, BRYCE M., Ottawa.—Director of the Employment Service of Canada, Department of Labor. Mr. Stewart has served the Department of Labor in several capacities, and when it was decided to organize a federal employment service he was given charge of this important work. (Page 18.)

SWANSON, W. W., M.A., Ph.D., Saskatoon.—Educated at Oshawa High School and Queen's University; received the gold medal, and graduated M.A., 1906; graduated Ph.D. at University of Chicago, 1908; associate professor of economic science, Queen's University, 1908-1916; now professor of political economy, University of Saskatchewan; author of "The Establishment of a National Banking System." (Page 23.)

TAYLOR, J. FRATER, Toronto.—Aberdeen Scot by birth; came to Canada eleven years ago to represent English financial interests; until recently was identified with the Lake Superior Corporation group of industries, succeeding the late Mr. T. J. Drummond as president; prior to coming to Canada Mr. Taylor spent some time in Madras, India, where he took part in the successful operation and reorganization of the Madras railways on behalf of the bondholders. Now with the Canadian Car and Foundry Co. (Page 238.)

TODD, S. E., Toronto.—Secretary-treasurer of the Industrial and Development Council of the Canadian Meat Packers' Association. Formerly connected with the Canada Food Board. Mr. Todd took up his position when the association was formed a few months ago. (Page 236.)

WEIR, GEORGE, Toronto.—Of the London Guarantee and Accident Co., Ltd.; entered service of the company in 1907; appointed manager in October, 1916. (Page 206.)

WHITE, JAMES, Ottawa.—Assistant to chairman and deputy head of the Dominion Commission of Conservation; unusually conversant with the extent and possibilities of Canadian resources. (Page 233.)

WILLISON, SIR JOHN, Toronto.—President of the Canadian Reconstruction Association; originally with the "London Advertiser," November, 1882, whence he passed to the Toronto "Globe," September, 1883; was editor-in-chief of the Toronto "News" in 1902; appointed correspondent in Canada for the "London Times" in 1910. (Page 236.)

WILSON, GEO., Toronto.—In his capacity as associate general manager of the Union Bank of Canada, Mr. Wilson has paid particular attention to business in the East. Early in 1919 he made an extended visit to the Orient, resulting in the entrance of the Union Bank into the Park-Union alliance. (Page 36.)

WRIGHT, HEDLEY C., Toronto.—Assistant manager and secretary, the General Accident Assurance Company of Canada since November, 1917. Previously with London Guarantee and Accident Co., Ltd., in London, England, Toronto, Calgary and Halifax. (Page 188.)

Canada in the World's Money Market

Restrictions on Movement of Commodities, and Some of the Effects—Critical State of European Countries and Position of the United States—Should Canada Borrow, or Finance Her Own Requirements?

By JAMES MAVOR, Ph.D.

An analysis of the present economic situation must begin with a study of the movement of goods rather than with the movements of money. The latter movements must for a long time be influenced by the extensive governmental operations occasioned by the war, and must be affected by political considerations. Large as these operations have been, and must continue to be for a long time, they are after all inferior in aggregate amount to the amount involved in the international movement of commodities. For this reason alone it is necessary to begin with the latter. At the present moment the situation may be described briefly as follows: Central Europe, though in a sense not completely bankrupt, is in a state of liquidation. Under such circumstances, credit, though not stopped, is nevertheless much restricted. It is impossible to determine decisively as to the solvency even of firms whose business has hitherto been substantial and profitable; nor can the solvency even of the most important banks be thoroughly relied upon. For this reason alone, were there no others, the circulation of commodities is impeded.

There are, however, other reasons for the impeded movement of commodities. Shipping on the high seas and transportation by land have been less effective—both absolutely and relatively to the demands upon them—than they were before the war. This condition is being rapidly changed. The total tonnage of mercantile shipping is already greater than it was before the war by upwards of 5 per cent. The movement by rail, seriously impeded as it was through the destruction of permanent way, and through the wearing out of it and of rolling stock during the military operations, is only now beginning to be even tolerably effective. Yet a long time must elapse before the railways of central and western Europe and of Great Britain are equal to the demands that are being made upon them. Even if there were no question of suspended credit, the physical difficulties of transporting with the required rapidity the enormous quantities of material necessary to meet the demands of reconstruction would constrict the movement of commodities.

Political Restrictions

There are, however, other reasons for the restricted circulation of goods. Among these must be considered as of importance the restriction of the trade of central Europe through the limitations imposed by the Peace Treaty upon importation of certain raw materials. The effect of this must be, and was intended to be, to diminish the opportunities for competitive trade on the part of Germany and Austria with external countries, whether belligerent or neutral. This must mean a total world trade of less magnitude than would otherwise be the case, for in proportion as German industries are deprived of raw materials, their production is less than it would otherwise be. The profits of the total trade will be divided in such a way as to give advantage to the entente manufacturing nations. At all events, it was with this avowed intention that the commercial clauses of the treaty were drawn. It must be kept in mind, however, that the total trade must be less than otherwise it might be, other things being equal. The influence of this pact upon prices is obvious, but that point need not detain us at the moment.

Another subsidiary cause of restricted movement of goods is the suspension, up till the present time, of international patent rights. Many commodities—especially chemical products and certain kinds of machinery—have been manufactured in all countries under temporary licenses. It is a question—not yet fully settled—which group of countries benefited or lost, respectively, in this regard under the conditions of the war. Germany copied and made British machinery which could not be made in that country before the war. Great Britain and America made certain chemicals which could not be made before the war because of German patent rights. Large industries have grown up in consequence of the abrogation of international patents, and their divergent interests will not easily be adjusted. The movement of goods subject to patents is for this reason affected. The total movement at the present time must be influenced by the requirements for reconstruction purposes. Great quantities of machinery of all kinds were destroyed or used up in the war, normal reparation was suspended, and now all this machinery has to be replaced at high speed. The building of houses in the devastated areas, however simply these may be constructed, involves an enormous mass of building material, much of which must be brought from great distances. Bridges must be rebuilt and the avenues of communication re-established.

All this involves movement of goods under conditions that can only gradually cease to be highly unfavorable.

Credit a Temporary Remedy

Apart from the physical features of the economic situation, there are the pecuniary features. How are these goods so urgently required to be paid for? Inevitably, they must be paid for by other goods, either immediately or at no great distance of time. The world does not live on credit, but on exchange. The reconstruction of Europe can only be effected through production in Europe. Charity may relieve, but it cannot sustain. Permanent support of the millions of people in central Europe by millions elsewhere is inconceivable. Even if there were no indemnities to be paid, the disorganization of commercial and industrial life in Europe has been great enough to produce a situation in which rapid production is urgently necessary. It is not surprising that, contemporaneously with this transparent necessity, there should be a revolt of the industrial classes against excessive labor, and even that there should be disinclination towards labor that is not excessive. Yet production is absolutely essential, or the urban population must decline, while the rural population must be reduced to a bare existence without the luxuries which they have been accustomed to import from the towns.

To what extent Germany, its so-called socialist government, notwithstanding, has actually formulated and carried into practice a system of state socialism is not yet apparent. In so far as it has done so, it may fairly be presumed that a system of compulsory labor is established and will be rigorously conducted. If this be so, there will be no undue shortening of the hours of labor; strikes will not be permitted, and the rejuvenation of industry will be conducted with military precision. This plan, worked on a large scale, will afford a means of determining whether industry under socialism, and the compulsory labor involved by it, are more or less productive in the long run than industry carried on under a system of free labor. The experiment will also show whether the life of the industrial laborer under socialism is more or less ample in other than material respects than the life of the industrial laborer who is free to choose his employment.

It is possible that the German people may encounter the tremendous difficulties of their situation with the same kind of skill and energy which they displayed under the empire, and may thus recover rapidly from the disastrous experiences of the war. If, however, they go farther and aim at the same kind of economical and political domination as they aimed at under the imperial system, they may expect to meet with another and more irremediable debâcle.

Uncertainty in the United States

The rôle of the United States in the reconstruction of international commerce cannot be described at the present time as otherwise than ambiguous. That the United States has made enormous profits out of the war goes without saying. That their people seem disposed to make what further profit they can out of it is roundly asserted by some of their own spokesmen. Mr. Hoover has, for example, denounced his countrymen for their shortsighted greed. It is, however, no crime to desire the best price for saleable wares, although it may be a commerical blunder to hold out for a price which prevents transactions from taking place. The root of the matter is probably to be found elsewhere than in the mere desire to make a good bargain. The Treasury of the United States has been buying in Liberty bonds at a discount, thereby taking advantage of the fervid patriotism that induced the sale of them to the public at par. The Federal Reserve Bank is refusing foreign credits and employing its money in domestic discounts, thus contributing to speculation, and at least temporarily contributing to maintain the present high level of prices. Meanwhile, stocks of certain commodities, deprived of the demand for export, are accumulating, and conditions seem to be preparing for a slump in commodity prices unless the artificial means alluded to are sufficient to prevent it. If Mr. Hoover's statements are correct, there must, for example, be large surplus stocks of flour for which there is no possible domestic demand, and one day the existence of these must reflect itself upon the price unless the holders of it are sustained by government or other credits. If, however, the action of the Federal Reserve Bank in refusing to permit foreign credits is a political expedient designed to force the Senate to ratify the Peace Treaty, it is possible that this action may suddenly be reversed, either because the Senate ratifies the Treaty or because there is no hope of its doing so. In this event there is no doubt that a movement of flour and other commodities would take place to Europe without the necessity of immediate settlement.

Exchange Acts as Embargo

Meanwhile of course, the exchange situation must remain disturbed. It is very obvious that so long as it remains in its present condition there is in effect an embargo upon exportation from America to Europe. At the present moment Great Britain has an advantage in exchange over the United States in all European countries as Germany has an advantage in exchange with these countries as compared with Great Britain. The so-called adverse exchange has, indeed, the effect of a prohibitory tariff. It keeps out American goods so long as it lasts. It is quite true that a very high price must be paid for wheat, cotton, copper and any other commodities which must be imported from America; but these are after all raw materials, and the customers of Great Britain must pay a proportionately higher price for manufactured articles. They are doing so, and thus Great Britain suffers but little from the adverse exchange, while in so far as she produces the same raw materials within her own borders, she obtains for them a higher price than she would otherwise obtain.

Where Will Canada Borrow?

The interest of Canada in these movements is unquestionably affected by the situation in the United States; but it is also affected by the circumstance that Canada requires to borrow abroad while her principal previous market is practically closed. The borrowings of Canada have been chiefly in London. Now, so far from Canada being able to borrow to advantage there, Canadian securities are being sold back to her, the exchange offering the inducement of profit. Canadian securities are thus flooding the domestic market.

New flotations cannot be made as they were. They must be effected either in Canada or in the United States. The large sums already raised by the government by means of domestic loans must render new industrial flotations difficult to effect at home, while the high rate of interest current in the United States and the higher rate likely to be current should the embargo against foreign credits be lifted render flotations in the United States not altogether easy in spite of the advantage of the exchange situation.

Danger of Dependence?

It certainly looks as though governments and public alike were under the necessity of economizing and of refraining from engaging in new enterprises. If existing Canadian securities are to be prevented from falling to a heavy discount, they must be absorbed by the savings of the people. This absorption must of itself retard the process of procuring capital for new enterprises, whether of an industrial or of a public character. There is no justification for pessimism, but there is need for care. We must contrive to stand on our own feet, because the sustaining arm upon which we have been accustomed to lean is not at present in a position to support us, and because we are old enough to do so ourselves. If we can contrive to stand absolutely alone, so much the better, but it may not be easy to do so. Fresh capital is continually demanded for legitimate and necessary enterprises. The exchange situation with the United States offers inducement for investment of United States funds in this country. Some voices have been raised against such investments. While it would be unwise for many reasons for this country to become economically dependent upon any other, and while, as indicated above, independence of extraneous supplies of capital is to be aimed at, this independence may even be more speedily secured by utilizing extraneous capital for the development of our resources where this is possible. The question is largely one of proportion and balance. The investment of American money in British securities has not made the United States the master of Great Britain in any sense. Great Britain had at one time enormous investments in the United States, and still has large investments there, larger by far than the United States have in Canada—yet there is no suggestion of political, or even economical, domination. We may expect investment of surplus funds in the United States in our securities. Indeed, this process is going on now, and unless it goes on, our securities, for the reason explained above, must decline because of the difficulty of the absorption of large amounts suddenly thrown upon the market.

GREAT LAKES TONNAGE

Tonnage which passed through the United States and Canadian locks and ship canals at Sault Ste. Marie during the season of navigation of 1919 was the lightest registered in five years.

Total freight handled through the waterways connecting Lakes Superior and Huron during the year was 68,235,542, compared with the 1914 tonnage of 55,369,934. The shrinkage in cargo volume was general. The number of passengers carried was greater than ever before. The net registered tonnage of vessels passing through the canals was but 50,089,090, the smallest since 1914.

Lumber shipments showed a continuation of the shrinkage in that commodity that has been noted for a number of years, being but 244,426,000 feet, the smallest since 1888. Flour shipments, 7,246,495 barrels, were the lightest since 1911, while movement of wheat was but 113,734,848 bushels, also the lightest since 1911. Other grains totalled 52,734,345 bushels, the lightest in eight years. Iron ore movement was 46,922,792 tons, the lightest since 1915. Coal totalled 13,874,951 tons, the smallest since 1905. Salt and oil made gains, and general merchandise volume was greater than of last year.

9/1/20

The Cost of Safety

is low when the present high rates of interest, obtainable on the best securities, are considered.

The following are among our offerings:—

City of Hamilton, Ont., 4½% bonds to yield 5¾%.
City of Peterboro, Ont. 4¼% bonds to yield 5¾%.
Province of Alberta 4% bonds to yield 6%.
City of Montreal, Que., 4% stock to yield 6%.
Town of Port Colborne, Ont., 5½% bonds to yield 6%.
Greater Winnipeg Water District 4½% bonds to yield 6⅛%.
City of Fort William, Ont., 5% bonds to yield 6¼%
City of Medicine Hat, Alta., 5% bonds to yield 6¼%.
Town of Sudbury, Ont., 5% bonds to yield 6¼%.

We shall be glad to have you consult us regarding your investment requirements

Canada's Premiers Write of the Outlook

Heads of the Provinces Tell of Past Developments and of Future Plans From Coast to Coast in Canada

MANITOBA

Manitoba

By
Honorable
T. C. NORRIS,
Premier

A YEAR ago I had the privilege of recording to readers of *The Monetary Times* the fact that Manitoba had come through the last year of the war in a state of undiminished prosperity and that the people of this province looked forward to the years of peace that lie before us with a confidence born of experience in trying times.

It is again my pleasure to report "a good year." It is true that we have had, climatically, an abnormal crop season. Excessive heat and drought in certain restricted districts affected the yield, but generally speaking, the return was good and the province as a whole can thankfully close its books for 1919 with a satisfactory showing.

The steady movement in Manitoba towards diversified agriculture, "mixed farming" as we call it here, is more pronounced than ever and has much to do with the fact that a partial failure of the grain crop no longer means to this province what it did ten years ago. Few Manitoba farmers to-day depend entirely on their grain harvest. Dairying and stock raising for the beef market now play a large part in their activities and the wealth of natural feed makes the return from these reasonably certain under any conditions.

Manitoba has hitherto been regarded as a purely agricultural province, but her people are beginning to have substantial hopes of other things. I believe it to be true that agriculture will continue to be our basic and most important industry, and that the encouragement of agriculture will continue to be the first duty of any government in this province. At the same time we have other natural resources the value of which is beginning to be recognized in its true light. The past year has seen considerable development of our minerals, and this development has aroused an interest which undoubtedly has a solid basis in the proved existence of vast deposits of gold, copper and other metals. Development will proceed on a much larger scale during the coming year and it is the confident expectation of those who know the country best that Manitoba will yet prove to be the greatest mineral producer among the provinces of the Dominion.

Manitoba also has vast water powers, not only on the Winnipeg river, close to the city of Winnipeg, but in the great stretches of new Manitoba, between The Pas and Hudson Bay. The Winnipeg river water powers, capable of cheap development, undoubtedly afford a great industrial opportunity in the vicinity of the city and are attracting the attention of large manufacturers. In the northern country there are vast tracts of pulpwood adjacent to water power that can be utilized at low price for the production of paper and other pulp products.

The confidence with which the people of Manitoba are looking to the future is justified by their knowledge that our natural resources are abundant and that nothing is required but hard work and the necessary capital to market them. Business of every kind has been and continues to be extremely active and there is constantly increasing evidence of the determination of all classes of the community to pull together for the benefit of all.

T. C. Norris

NOVA SCOTIA

Nova Scotia

By
Honorable
G. H. MURRAY,
Premier.

THE basic industries of Nova Scotia—agriculture, fishing, lumbering and mining—have prospered during 1919.

In agriculture the season was favorable to both the general farmer and the fruit grower, and this year is regarded as one of the best agricultural years in the history of the province. In the fisheries the banking fleet had the largest catch on record. The lumber cut was larger than in the previous year and as available tonnage increases the lumber export promises to reach large dimensions. The coal mines are unable to supply the heavy demand for coal and prospects in the coal mining industry are exceedingly favorable.

The labor unrest while not so manifest here as elsewhere tended to restrict operations in the manufacturing industries. The excellent British spirit of fair play is abroad, however, and indications point to a reasonable adjustment of all difficulties. A settlement ot the labor question satisfactory to all concerned would undoubtedly result in the immediate extension of our manufacturing activities.

All in all Nova Scotia emerges from 1919 strengthened for the abundant work and larger industrial growth of which the coming year gives promise.

G. H. Murray

SASKATCHEWAN

Saskatchewan

By
Honorable
W. M. MARTIN,
Premier

SASKATCHEWAN made substantial progress in 1919, notwithstanding abnormal climatic conditions which seriously affected the crop yield in portions of the province. The province of Saskatchewan covers such an immense expanse of territory that in the same season parts of the province may suffer from drought and other districts from an excess of moisture, and this is what occurred in 1919. South-western Saskatchewan, after a spring of execeptional promise, was visited by a severe drought, and in the north-eastern part of the province there was an excess of moisture, which resulted in serious damage to the wheat crop from rust. Between these two extremes there was a wide area of the province where the crops were good and the grain of an exceptionally high grade. The total grain crop is believed to have been fully as good as in 1918, the total production of wheat, oats, barley, flax and rye being estimated at 230,000,000 bushels for 1919.

Grain growing holds the premier position in the agricultural industry of Saskatchewan, but mixed farming is making rapid strides and the province now ranks first in Canada in the number of its horses, and third in the number of live stock.

Dairying has made exceedingly satisfactory progress the past few years. During 1918 all records for export were broken when ninety-seven carloads of butter were shipped out of the province. The output of the creameries in 1919 was such that even with the large local consumption, 100 carloads of Saskatchewan creamery butter were shipped to the Pacific coast and eastern markets.

A great increase in the number of improved farm buildings and homes; an equally pronounced increase in the number of new school buildings throughout the province; the construction of approximately 7,000 pole miles of rural telephones in 1919, as compared with 4,943 in 1918, are all evidences of the continued progress of this great prairie province.

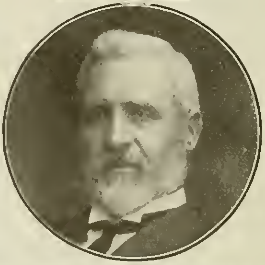
Highway construction and improvement has gone steadily on in the past year, although hampered by labor shortage, and a most striking illustration of the northward advance of settlement in the province was the installation by the Saskatchewan Department of Highways the past summer of a second ferry across the Beaver River, 366 miles north of the international boundary. This ferry was urgently needed to accommodate increasing traffic in the far north, where thriving colonies of new settlers are locating far in advance of the railroad.

The return to their home province of many thousands of young Saskatchewan soldiers, a large proportion of them going back to the land, many of them in the newly settled districts, will unquestionably prove a powerful factor in the future development of the province. These young men are the very finest type of citizens and they are showing the same initiative and energy in grappling with the task of conquering the soil which they showed on the battlefields of France and Flanders.

Over a thousand students enrolled at the University of Saskatchewan, more than twice the number registered any previous year, is another inspiring omen of the higher development of the province. Saskatchewan faces the future with the greatest confidence and hope, and is as ready to do her part in the building up of Canada in peace times as she was to bear her full share of the common burden during the dark days of war.

Wm Martin

BRITISH COLUMBIA



British Columbia

By
Honorable
JOHN OLIVER,
Premier

EARLY in the last half of 1918, when it appeared certain that the war would be won by the allied nations, the government of British Columbia, in a letter written by the premier to Rt. Hon. Sir Robert L. Borden, suggested the desirability of a conference of provincial premiers with the Dominion government with the view to the adoption of a co-ordinated policy respecting the re-establishment of returned soldiers in civilian life. Such a conference was held in Ottawa in the month of November last year and a system of co-operative activities looking to the assistance of returned soldiers was agreed upon, provision being made that there should be no duplication of administrative functions of the respective Dominion and provincial governments. So far as British Columbia is concerned, the arrangement being entered into sympathetically and with a view to the fullest possible participation in the re-establishment of returned citizens, has been carried out faithfully.

It was understood that a reasonably proportioned number of returned soldiers desired to settle upon agricultural lands. The crying need of the province of British Columbia for increased agricultural production—in order to offset the necessity for importation of household foodstuffs—induced the government to attack the agricultural feature of the re-establishment problem seriously. Pursuant to the conference of provincial premiers already mentioned the legislature of 1919 enacted the "Soldiers' Land Act Amendment Act, 1919," providing for the fitting for occupation of lands, and to grant, on terms deemed advisable, to soldiers or persons other than soldiers "or to any community of persons" . . . subdivisions of land not exceeding 160 acres to each person—for the purpose of enabling any Soldier Settlement Board of the Dominion government to settle soldiers, or settlers, on such lands. The result of this legislation has been the establishment of a community settlement—composed wholly of returned soldiers—on Vancouver Island, and another at Creston, where nearly 3,000 acres of excellent land are being subjected to cultivation under conditions which promise the most satisfactory results.

Additional to this undertaking the province has set aside certain "settlement areas" in northern and central British Columbia, which, under the provisions of the Land Settlement Act and the administration of the Land Settlement Board, are being taken up by bona fide settlers. The outcome of this first practical attempt at a solution of the agricultural problem of the province promises to be more than gratifying and it is anticipated confidently that the assistance given new settlers will result in a constantly and steadily increasing accession to the agricultural production of the country.

The provisions of the amended Land Settlement Act include authority to take over, at an appraised value, lands acquired by private purchase, the object being to enforce colonization of unoccupied lands in desirable agricultural sections of the province. Under the authority of this Act the province has acquired a large tract of land in the South Okanagan District of British Columbia and is undertaking, as a government measure, a gigantic scheme of irrigation which will bring a large tract under cultivation. Sod has been turned on the great irrigation ditch which is to provide water insuring the fertility of this area and it is expected that 3,000 acres will be ready for occupancy early next year. Returned soldiers shall have preference in the purchase and development of this land and it is expected that the selling price of the land will recompense the government equitably for its credit and outlay.

Industrially, the province is suffering from a decline of the shipbuilding industry, which, with the completion of the foreign contracts for wooden vessels, threatens partial decline. Worthy efforts are being made to perpetuate this industry and co-operative enterprises are being mooted in order to maintain this industry on a permanent basis. These efforts have the cordial endorsation and sympathetic consideration of the government.

The last session of the legislature enacted an Act to establish a Department of Industries and set aside the sum of two million dollars to encourage the development of the resources of the province. Under specified conditions the Act authorizes loans to industries already, or about to be, established, the design of the Act being to assist returned soldiers in initiating industrial undertakings. The Act provides, however, for the investigation of such natural resources as may be promising if developed and the work of the department already is well in hand.

Both commercial and industrial undertakings in the province are conducted on sound business principles. Collections are said to be excellent and a spirit of optimism prevails. The business and professional citizenship of the country have the fullest confidence in the future and on the whole the disorganization of both commerce and industry incident to the prolongation of the war is in a fair way to be overcome.

John Oliver

Practically all of the British Columbia salmon pack for the 1919 season, consisting of 1,393,156 cases and valued at more than $15,000,000, has been sold. Seventy-five per cent. has been exported, principally to Great Britain. Cased salmon is smaller and varying quantities have been shipped from the province to other points in the British Empire and to France, Italy, Greece and several European countries.

ONTARIO

Ontario

By
Honorable
E. C. DRURY
Premier

THE general prosperity of the province of Ontario was well maintained during the past year notwithstanding that our field crops were somewhat below the average owing to unusual climatic conditions in the spring, that the industrial situation was affected by the sudden closing of the munition plants and the demobilization of the army, and that the mining operations were to some extent curtailed on account of labor difficulties. Under the circumstances I regard this outstanding fact as very significant and encouraging. We are passing through a period of readjustment. War prices are still in force. Those of us who anticipate the future realize that normal prices must eventually be restored, approximately at all events, and that the process will be less disturbing to business if we bear that fact in mind.

So far as the province of Ontario is concerned I have unbounded confidence in the future. We have weathered the severest storms without panic or great hardship to our people. Our diversified production, embracing as it does the yield of the farm, the factory, the forest, the fisheries, and the mines, affords a varied and continuous source of wealth and prosperity. Our remarkable position in this respect was well demonstrated by the success of the recent Victory Loan, when the province of Ontario subscribed as much as all the rest of the Dominion combined. Another great tribute to the strength and the soundness of our position is the fact that with a quarter of a million persons suddenly thrown upon the labor market by the conclusion of the war, over ninety per cent. of these have already been absorbed and the market is still calling for skilled and unskilled labor. In fact the demand for labor in almost every line is strong and insistent, except for clerical work. So far as the apprehensions of popular unrest are concerned, I believe there is no real ground for them in the province of Ontario. The people desire, and will have, efficient, economical and public-spirited government, subservient to no class, creed or condition, and guided only by a desire to promote the general welfare.

The government of Ontario, as at present constituted, will adhere to business principles in the consideration and determination of all business matters. We have in Ontario a great heritage, not only in lands and natural resources but in an intelligent, patriotic, industrious and thrifty population, which ensures the prosperity and the permanence of our institutions and inspires us to seek with confidence the achievement of the highest ideals of human progress.

E. C. Drury

ALBERTA

Alberta

By
Honorable
C. STEWART,
Premier

A CAREFUL survey of business conditions in Alberta for 1919 leads to the conclusion that prosperity is a few points below average—i.e., for Alberta. Crops and pasture were below expectations and promise, consequently this condition is reflected in the whole situation.

Spring opened normally with the soil in fine condition for seeding. Crops germinated rapidly and progressed very favorably until the middle of June. From this date until the first week in August was a period of serious drought covering nearly half of the province. The country in the vicinity of Edmonton and the great districts west and north, namely, the Pembina, Grande Prairie, Peace River, Athabasca districts had an abundant rainfall, and splendid crops have been harvested. Hay and fodder is plentiful and a large quantity of grain and fat stock is available for export. The traffic to and from the Peace River and Grande Prairie districts shows an increase of 30 per cent. over the total traffic of 1918.

By the first of August, the feed situation in the drought areas was regarded as serious, both by the government, the farmers and ranchers. The first week of August, however, witnessed drenching rains over the entire province, and in a few days the brown sun-baked plains were green again. This had a most satisfactory effect upon the feed situation, and relieved it beyond all possibility of serious famine. The grain crop, however, was too far advanced when the rainfall came to cause a very great increase in the yield, and as a result the total crop for the province will be below normal for the harvest of 1919.

The feed situation, of course, affected the disposition of many herds in the drought areas, and until the rain came many farmers and ranchers felt that they would be compelled to sacrifice large numbers of their cattle and sheep. Although the situation with respect to feed has been complicated still more by the early set-in of winter, and although there is a great deal of liquidation of herds and flocks, there does not seem to be many serious sacrifices on the part of the owners. The most of the cattle are coming in to the yards in good condition, and are realizing adequate sums for the owners.

A large number of cattle will be sent to the American markets, but their equivalent in money will be left in the country. This does not appear as serious as it might, because of the great increase in the herds of the province during the last four or five years. There is plenty of foundation stock and all breeders and growers look forward with hope to a good season next year.

The coal strike, the difficulties of transportation and a surplus of stocks from 1918, are responsible for a falling-off in the total production of coal for the current year. Production will be about 5,000,000 tons.

The banking and building returns show a gratifying increase over those of 1918, and although the increase is inflated by high prices, the volume of actual business represented thereby is satisfactory and significant of steady progress.

Employment in agriculture, lumbering and mining indicates that these industries can absorb all the labor that is offering. The percentage of unemployment among the skilled trades and general laborers is, notwithstanding the great numbers of men who have returned from overseas this year, well within the safety margin.

Conditions in the rural municipalities show steady improvement in local government and finance. Necessity has led to a clearing up of tax rolls. Receipts are far in excess of those in the so-called boom years before the war, and collections to date during the current year are above those of last year.

An index of the feeling in the country is seen in the extraordinary increase in the number of farmers' sons and daughters who are attending the schools of agriculture. These institutions are full to overflowing, and the principals of each one have scores of applications from young men and young women for next year. The same is true with respect to the attendance at the provincial university. The country districts have sent a large percentage of the eight hundred students now in attendance there.

The dairy industry has seen a successful year, and by the end of the year, Alberta will have produced over 30,000,000 pounds of butter, most of it of the very best quality, even good enough to compete in the European market with the best products of Denmark.

While there are gloomy spots in the picture of Alberta for this year, the whole is brightened by the feeling that the province is now so firmly established that no ordinary crisis will give it a serious setback. Local crop failures may come and go, but the activities of the people are becoming so varied and complex, and the wealth-product exhibited in so many forms, that permanent prosperity is assured.

Chas Stewart

QUEBEC

Quebec

By
Sir LOMER GOUIN
Premier

THE economic situation of the province of Quebec continues exceedingly good. Its progress in all kinds of activity is constant. There have been many seasons of agricultural prosperity, and our farmers have been able to profit by the adundance of their crops to accumulate some savings, to improve their lands and to ameliorate their methods of culture. They have gradually got rid of the mortgages which encumbered their properties, and they are now living in easy and satisfying conditions, contented with their lot.

Industry is equally prosperous. The pulp and paper business, in particular, develops with remarkable rapidity. New mills are in course of construction, as for example that at Kipawa, where the Riordon Pulp and Paper Company are about to spend $4,000,000, and those at Three Rivers, where the St. Maurice Company is to disburse between 7 and 10 millions. At the same time, old mills are being enlarged, like those at Kenogami, where the Price Brothers Company is about to construct additions and new works to cost between ten to fifteen millions of dollars.

It is true that there are few countries in the world which are so admirably situated as the province of Quebec is for the development and the prosperity of the pulp and paper industry. We have the raw material in abundance; we have expert manual labor in this kind of work; we have numerous and well situated rivers for the floating of logs, and we have considerable water powers, and, as a consequence, we have electric power in profusion. Finally, as a guarantee for the capitalist who risks his fortune in such enterprises, we have the inestimable advantage of being free from socialistic agitations and of having a population which is a respecter of peace, of order and of property.

Lomer Gouin

War Time Prosperity Maintained

Commencing in Autumn of 1915, Canadian Industries Have Been Continuously Busy—Next Few Years May See Reaction—Business Conditions Graphically Illustrated—Course of Bond and Stock Prices.

No setback in the wave of prosperity which has favored this country since the fall of 1915, when the demands of the war upon economic organization began to be felt, has as yet been experienced. The accompanying chart, compiled by Babson's Statistical Organization, Wellesley Hills, Mass., shows that the graph representing bank clearings, commodity prices, and other business indices, continues to move upwards.

Explanation of Chart

In explanation of this diagram, the compilers say:—

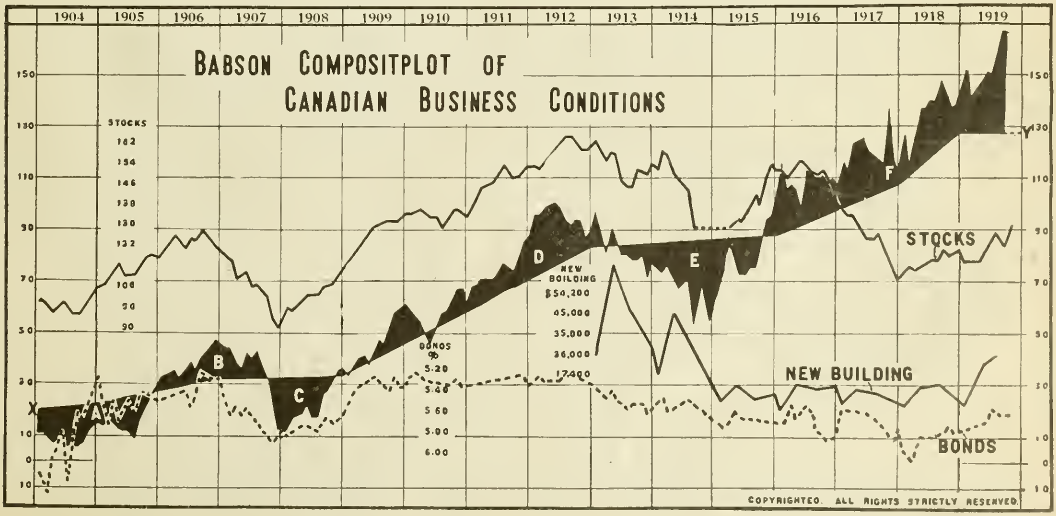
"The black areas are formed by combining the plotting figures on bank clearings, new building, failures, commodity prices, railroad earnings, security prices, ratio of bank cash to liabilities, and money rates—subjects which, taken together, make a reliable measure of general business.

"The X-Y line represents the average gain or growth in business. In locating the X-Y line we have assumed that the law of equal and opposite reaction applies to business and economic phenomena just as it does to mechanics, chemistry, medicine and other sciences. In other words, for every degree of over-expansion in business a corresponding rest period or depression must be experienced. The X-Y line, therefore, is drawn to make the two areas of each cycle equal, its trend being determined in accordance with such statistics of growth as are available."

Two Cycles Indicated

There are now two complete cycles on the plot. The first (areas B and C) runs from the end of 1905 to 1908. The second (D and E) runs from 1908 to the latter part of 1915. For the past three years a large area of business expansion has been developing, which indicates that a reaction in trade may normally be expected. The stock line represents the monthly average prices of 10 representative stocks. The bold line on the plot indicates the position of five representative Canadian bonds. The building chart shows clearly the very small amount of private construction which has been done during the war period. Since early in 1919, however, building has revived considerably, the permits for each month showing regular increases.

The course of bond prices has, it will be noticed, followed that of stocks. Some stocks, of course, fell rapidly after the signing of the armistice, whereas bonds, especially public securities, strengthened. From early in 1919, however, up to about August, both stock and bond markets were strong.



Problems Of The Employment Service

Ninety-two Employment Offices, Under Federal Direction, Replace Twelve Provincial Offices—Two Hundred and Thirty Thousand Positions Filled—How the Employment Service Keeps Posted on Conditions Throughout Dominion.

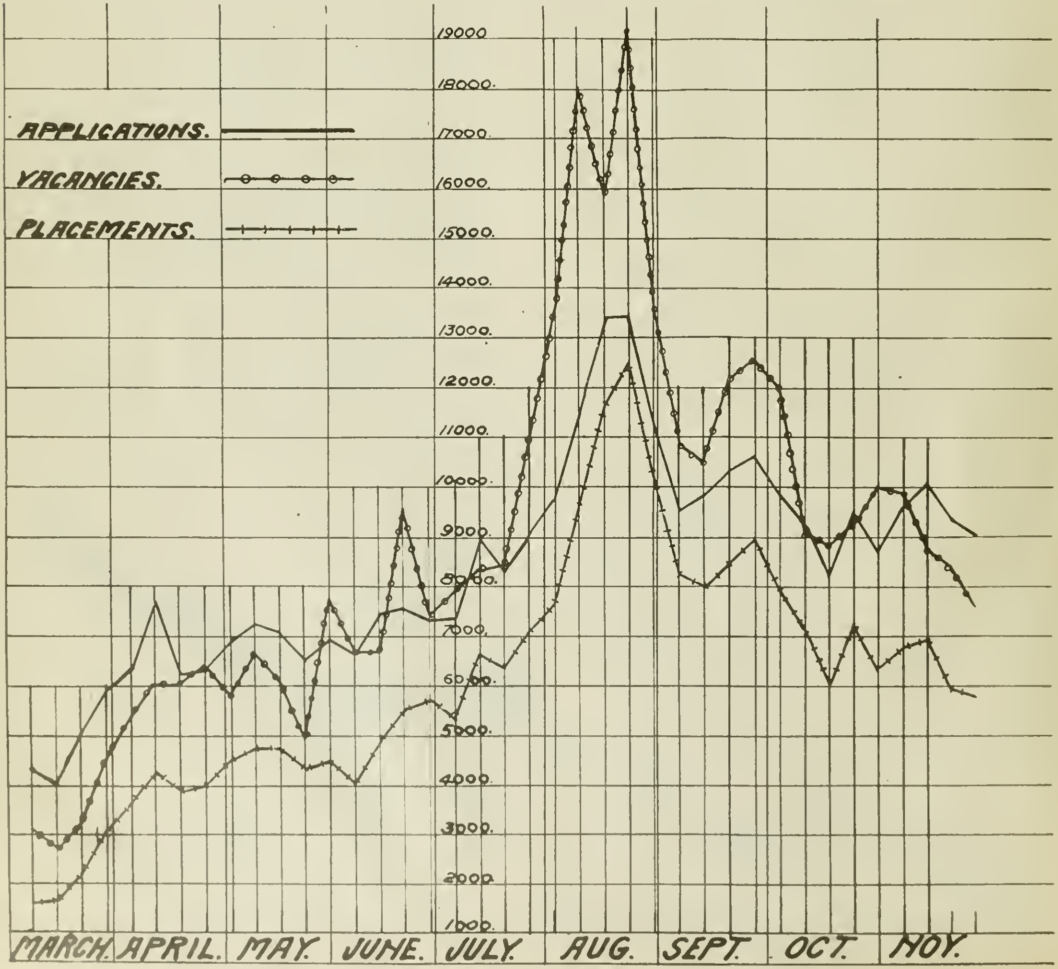
By BRYCE M. STEWART.

IN anticipation of the demobilization problem the Dominion government passed at the 1918 session the Employment Offices Co-ordination Act, which authorized the minister of labor to aid and encourage the organization and co-ordination of employment offices and to promote uniformity of methods among them; to establish clearing houses for the interchange of information between employment offices concerning the transfer of labor and other matters and to compile and distribute information received from employment offices and from other sources as to employment conditions.

When the Employment Offices Co-ordination Act came into force in 1918 there were about a dozen provincial employment offices in Ontario and Quebec. Since then a system of 92 local offices, extending from Halifax to Victoria, with six provincial and four inter-provincial clearing houses has been established. The offices are distributed among the provinces as follows: Prince Edward Island, 1; Nova Scotia, 5; New Brunswick, 6; Quebec, 7; Ontario, 36; Manitoba, 8; Saskatchewan, 9; Alberta, 7; British Columbia, 13.

From March 1, 1919, when the statistics of the service began to be fairly reliable, until November 29, the number of vacancies notified to the service was 345,277. The number of applications for employment totalled 325,132 and the number of placements made was 238,481. In addition 32,173 placements in casual employment were effected.

The accompanying chart indicates the applications for



work, the vacancies for workers and the placements made by the Employment Service weekly since the first week in March. The chart indicates that during March and the first half of the month of April applications, vacancies and placements retained a constant relation to one another. After that the vacancies, which we may call the demand, approached the applications, which may be called the supply, more closely. Indeed, toward the end of April the vacancies equalled the applications. This increase in vacancies, however, was largely due to the spring demand for farm help and as the service found it very difficult to persuade workers to leave the cities for farm employment, placements, while they were considerably increased, did not maintain the same relation to vacancies as formerly. About the end of May demand increased sufficiently to exceed applicatons, and except for brief periods in June and July demand continued in excess of supply until the middle of October. In August the demand for harvesters in the west brought the number of vacancies in one week to 19,250; in that week 13,436 persons applied for employment and 12,561 placements were made. This was the record week of the year. From this peak, demand declined until the middle of September when a marked recovery began, due to the early opening of bush operations in the east. In two weeks of October applications for employment slightly outnumbered vacancies and in the second week of November, on account of the release of numbers of men from railroad and construction operations and farm work, supply mounted above demand, where it has since remained and in all probability will remain throughout the winter.

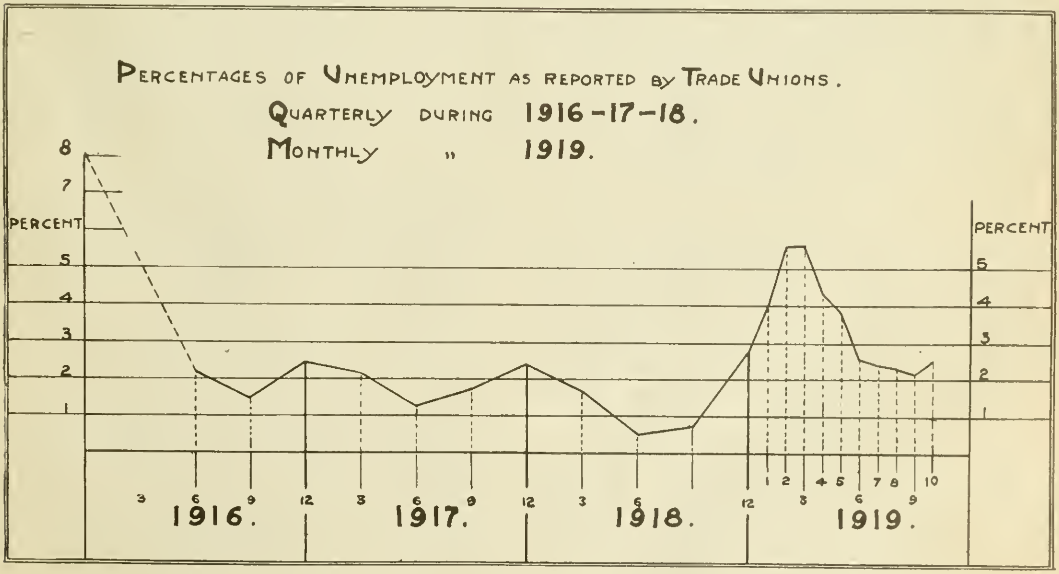
Trade Union Figures

The Employment Service has several indices of employment conditions throughout the Dominion, in addition to the weekly reports of applications, vacancies and placements received from the employment offices. Since 1915 returns have been received from trade union secretaries stating the number of unemployed members in their unions on the last day of the quarter. To meet the needs of the Employment Service, the secretaries were requested at the beginning of 1919 to give this information for the last day of each month, and the percentages of unemployed members reported are shown in the chart herewith, by quarters for 1916-17-18, and by months for 1919. The chart shows the closer application of the labor forces in Canada year by year during the war. From a trade union unemployed percentage of eight on December 31, 1915 (percentage for March, 1916, not available), employment except for seasonal slackness continued to expand, culminating in an unemployed report of only one-half of one per cent. in midsummer, 1918. The chart shows plainly the rise in unemployment following the armistice, when there was added to the usual winter slackness unemployment caused by the cessation of war orders, the demobilization of Canada's army and the general uncertainty in regard to future prices and markets. After registering a trade union unemployment percentage of 5.6 in February and March, the highest since December 31, 1915, the curve of unemployment declined steadily to slightly over two per cent. at the end of September, which may perhaps be considered almost normal in peace times. With the approach of winter the curve had begun to mount slightly, and at the end of October it stood at 2.5 per cent. If the chart is turned upside down, it may be read as an employment rather than an unemployment curve, which in some ways is more satisfactory.

System of Reporting

A system of weekly reports from representative employers of labor in all industries and in all parts of the country is now almost completely organized. At present about 5,000 employers are forwarding information weekly covering approximately 700,000 employees. These employers' reports indicate the number of persons on the payroll at the end of the week and the number anticipated at the end of the next week. They have made it possible during the difficult reconstruction period to keep in touch with the actual and anticipated changes in employment conditions.

As this system of reports was organized during the year, the number of returns varied from week to week as industry after industry was brought within the scheme, and a continuous record of persons employed in identical establishments for any given period cannot be presented as yet. It may be stated, however, that unemployment during the late winter was not as widespread as many had feared and during April and May a considerable rise in the volume of employment was reported. High prices and labor unrest make the recovery less substantial than had been anticipated, and it was midsummer before industry seemed to strike its stride again. From then until November the trend of employment as reported by employers was generally upward, some slackness being reported, however, from the west, particularly in British Columbia. Within recent weeks several declines have been registered.



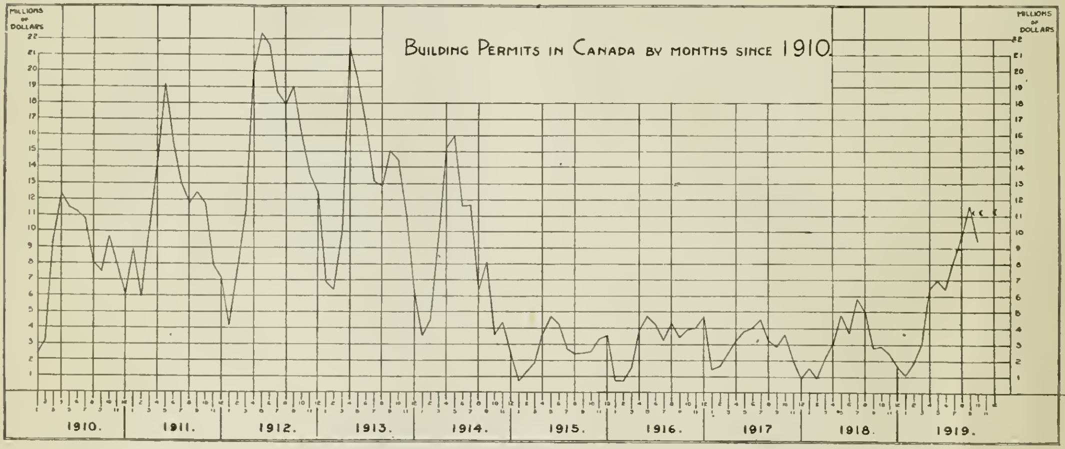
PERCENTAGES OF UNEMPLOYMENT AS REPORTED BY TRADE UNIONS.
QUARTERLY DURING 1916-17-18.
MONTHLY " 1919.

A feature of the employment situation during the year was the recent revival in building operations, despite the higher material and labor costs. In order to keep in close touch with actual and anticipated employment conditions in the building trades, the Employment Service maintains a record of the value of building permits issued monthy in thirty-five of the largest cities of the country. The accompanying chart tells the story of employment in the building industry since January, 1910. The curve indicates the brisk employment of the building boom in the years before the war with its peak in 1912, followed by the slackness consequent upon the almost irreducible minimum of building during the war. The post-bellum revival in 1919 is quite remarkable in its extent, but was tardy in getting under way. The Employment Service experienced great difficulty in meeting the heavy demand for building tradesmen in the autumn months. During the building slackness of the war, building tradesmen were forced to seek other employment and to-day it is impossible to satisfy the demand for these workers despite the fact that the wages nominally at least are the highest the contractors have ever offered.

Year Was Satisfactory

Summing up, all the indices of employment for the year point to the same conditions. Dullness in the first few months due to winter slackness and the necessary post-bellum readjustment in industry, resulted in a greater volume of unemployment than at any time since the winter of 1915-16. While substantial improvement was recorded in the spring, the recovery was not as marked as had been expected, and it was midsummer before industry seemed to have readjusted itself and the country's building and construction program to have gotten under way. Then was set up a heavy demand for building tradesmen of all classes, for tailors, for workers in the garment trades, for cabinet makers, for workers in the leather industry, for experienced hands in jewelry and other luxury trades, for women workers in textile mills, shoe, carpet and clothing factories, and for unskilled laborers for railway maintenance, construction work and farm employment. This demand continued until the late autumn, and it was not until the second week of November with the enforced contraction in outside work that the demand for labor in employment offices fell below the applications for employment. This buoyancy was in evidence particularly in Ontario and Quebec, and the prairie provinces. In the maritimes some unemployment among coal miners and metal tradesmen was registered, and in British Columbia industry, partly on account of demobilization problems peculiar to the province, did not recover sufficiently to take up all the labor slack.

Everything points to the conclusion that the country has come through the year of demobilization remarkably well. At the threshold of 1920 many are asking the question: "Has industry really made its way from war to peace, or was 1919 only the first phase of the readjustment?" Industry will probably answer the question in the new year.



LESS MINERAL PRODUCTION IN 1919

The Department of Mines has estimated the production of coal in Canada during 1919 at about 12,500,000 short tons, as compared with a production in 1918 of 14,997,926 tons. The production of the more important metals during 1919 is estimated as follows: Gold, $16,275,000 in value; silver, 13,500,000 ounces; copper, 81,500,000 pounds; nickel, 43,000,000 pounds; lead, 50,000,000 pounds; zinc, 38,000,000 pounds; pig iron, 920,000 short tons; steel ingots and castings, 1,020,000 short tons. The 1918 production of these metals was: Gold, $14,463,689; silver, 21,383,979 ounces; copper, 118,769,434 pounds; nickel, 92,507,293 pounds; lead, 51,398,002 pounds; zinc, 31,580,800 pounds; pig iron, 1,195,551 short tons; steel ingots and castings, 1,873,708 short tons.

The total value of the mineral production in Canada during 1919 is estimated at $167,000,000. The total value of the 1918 production was $211,301,897. The production of pig iron in Canada in 1919, including both blast furnace iron and pig iron made from scrap metal in electric furnaces, is estimated at 920,000 short tons, of which not more than 8,000 tons was electric furnace pig iron. The production of pig iron in 1918 was 1,195,551 short tons, including 32,031 tons made in electric furnaces.

The estimated production of steel ingots and castings in 1919 was 1,020,000 short tons, as compared with 1,873,708 tons in 1918. Electric furnace steel production in 1918 was 119,130 tons. It is doubtful whether the 1919 production of electric furnace steel reached 15,000 tons.

In a ruling, dated December 24th, 1919, the chairman of the Board of Railway Commissioners stated:—

"The board has considered the substance of the application of James Richardson and Sons, Ltd., re the proposal of the telegraph companies to charge a fee of $2.50 for registering cable addresses. I am of the opinion that the charge is not a rate under the control of this board, because it is a charge made by the telegraph companies for a service to be performed by the cable companies, over which we have no jurisdiction. In other words, the telegraph company is acting to some extent as an agent for the cable company by devising a means by which one or two words may answer the purpose of half a dozen words which would be charged for individually by the cable company. Therefore, I do not see that we have any jurisdiction to interfere."

Work of the Research Council for 1919

Broad Field Covered in Two Years—Has Recommended a National Research Institute—Investigations in Chemistry, Mining, Fuel Supply, Fisheries and Forestry.

By A. B. MACALLUM.

THE activities of the Research Council for 1919 have been exercised on a large number of subjects, only a very few of which may be referred to in the limit of this contribution.

The most important, for the moment, of all these is the establishment for Canada of a National Research Institute. This subject has engaged the attention of the Council during the last two years. This Institute, which it has recommended the government to establish, would be situated at, or near, Ottawa, and in it would centre the direction of the researches which must be undertaken to assist in the utilization of the natural resources of the Dominion and the development of its industries.

Functions of Institute

The Institute would have the functions of a Bureau of Standards like that at Washington, and of an Industrial Research laboratory like the Mellon Institute at Pittsburgh. Institutes, more or less of this type, are in existence in England and Germany, and there are at Washington three bureaus, namely, those of Standards, Mines and Chemistry, on which approximately $5,000,000 are expended annually by Congress, and which are of the very highest service to the nation in the development of its resources and its industries. A National Research Institute, for which over three million dollars have been already obtained, is being established in Japan, and an Institute of Science and Industry is to be founded by the Commonwealth of Australia.

Canada has at present no organization like these, and to equip it to meet industrial competition from abroad and to enable it to pay its debts, the establishment of a National Research Institute is a vital necessity.

The government has not yet adopted the recommendation of the Research Council on this subject, but during the last regular parliamentary session an influential committee of the House of Commons, under the chairmanship of Major Hume Cronyn, investigated the question and presented a report which recommended the establishment of a Bureau of Standards for the Dominion. This report was unanimously adopted by the House of Commons. It is expected that during the coming session the subject will be given further consideration by the same, or a similar, committee, and the council hopes that the first step towards the establishment of this Institute will be taken in 1920.

Industrial Alcohol

Cheap industrial alcohol is a factor in the development of the chemical and other industries of Canada. It was, and is, a great factor in German industry, as evidenced by the consumption there before the war of about 100,000,000 gallons annually, and the amount used in the United States in 1918 was approximately 40,000,000 gallons, while the consumption in Canada in 1917 was under 130,000 gallons a low amount due to the restrictions on the production of industrial alcohol in Canada, which makes the price, at least, 50 per cent. more than what it is in the United States, and more than twice what it is in Great Britain.

The Research Council has made representations to the government, urging the removal of these restrictions, in order that industrial alcohol in Canada will be as cheap as it is in the United States. This will, also, result in the development of an alcohol industry in Canada and the utilization for this purpose of waste material of all kinds, particularly waste wood, of which enough is consumed annually in British Columbia to furnish 50,000,000 gallons, which could be sold abroad, with a return of about $15,000,000 annually. The production of industrial alcohol in Canada thus stimulated would prepare the Dominion for the day, not far distant, when industrial alcohol will replace gasoline as a motor fuel.

Canada has an enormous supply of low-grade, or refractory, iron ores, which could be utilized if cheap and efficient methods of reduction could be found for them. 96 per cent. of the iron ores smelted in Canada is imported, and, in consequence, this means the annual payment abroad of a large sum. The Council has made grants to assist Professor Stansfield, of McGill University to investigate new methods, by electricity and gas, for the reduction of such ores, and it is hoped to achieve results which will encourage the use of Canadian ores.

Utilizing Fish Waste

The fish waste of Canada, on both the Atlantic and Pacific coasts, amounts annually to about 300,000 tons. Fish waste is utilized in the United States and in Europe, but little has been done in this way in Canada hitherto. The Council urged the government to establish an experimental plant at Canso, which would demonstrate the feasibility of utilizing the fish waste which can be collected there, to make food for cattle and hogs, and oil to be used for soap-making and other purposes.

Before the government had given extended consideration to the subject, a private company headed by J. S. Myers, of the Peerless Milling Company of Woodstock, Ontario, stimulated by the representations of the Council on the subject, installed a plant at Canso for this purpose, which is now in operation and beginning to turn out a very acceptable product. The company is largely composed of Americans, but it is hoped that other firms, with Canadian capital, will be organized to engage in this industry, which will mean, eventually, a production of over $5,000,000 a year, at least.

The fish curing industry in Canada is largely run on old-time methods, and, in consequence, the production, except in certain lines, is not up to the standard of that produced in Europe. The Research Council, holding that these methods should be improved and based on scientific principles, made a large grant to investigate the chemistry and bacteriology of fish-curing, the results of which investigation, it is hoped, will place the industry in Canada on a secure basis and will guarantee a product that will, in its qualities, be far in advance of that which obtains in the market to-day. The importance of this may be seen from the fact that the value of the cured fish in Canada to-day amounts to about $4,000,000. If the product could be greatly improved, its market would be enlarged and the value of it would accordingly increase.

Experiments With Helium

The only supply of helium in the British Empire is to be found in the gas wells of Ontario and Alberta. The amount of the supply in Canada is large, and, at least, 12,000,000 cubic feet annually go up the chimneys in Calgary. The Council has made representations to the government, that this supply should be conserved because helium is certain to be of enormous value in the near future. Dirigibles inflated with it are free from the risks that hydrogen, as an inflating gas, entails, and it has 90 per cent. of the carrying power of the latter. It is also certain to be of service in a number of industrial applications, for example, in electric bulbs, and, possibly, also, as a freezing agent when liquefied. The Council made a large appropriation to Professor J. C. McLennan, of the University of Toronto, to investigate the properties of the gas, in order that it may be used to the utmost advantage. It is a subject which has interested very much the staff in the physical laboratories all over the world, and it is now opportune that this investigation be undertaken in a Canadian laboratory.

Western Lignites

Two years ago the Council recommended that the Dominion government should undertake an experimental demonstration of the briquetting of western lignites for the production of a fuel that would be equal in value, ton for ton, to anthracite, over half a million tons of which were then annually imported from Pennsylvania. The lignites cannot be used as such for domestic heating purposes, but the Council held, from an examination of all the investigations that had been previously conducted on the subject, that these lignites could be utilized by carbonizing, and then, with a binder, putting the residue in the form of briquettes.

The government, in conjunction with the governments of Manitoba and Saskatchewan, last year provided a grant of $400,000 for this purpose, and appointed a Lignite Utilization Board, of which R. A. Ross, a member of the Council, was appointed chairman, to carry out the experimental demonstration recommended by the Council. This Board has for the last year been investigating the methods hitherto used, and, after a careful trial, has selected those which it thinks will make the demonstration a thorough success. It is now installing a plant near Estevan, in southern Saskatchewan, which will begin in August next to turn out briquettes at the rate of 30,000 tons a year, which may be sold in Winnipeg at the rate of $9.40 a ton, in contrast with the price for anthracite now sold there at $16 a ton. If this should prove successful, it is likely that many other plants will be erected at various points in Saskatchewan and Alberta, to supply all the domestic fuel that may be needed in Canada, from Fort William to the Foothills. This will result in keeping in Canada about $6,000,000 now spent annually for anthracite from Pennsylvania.

Other Work of the Board

Amongst the other subjects dealt with by the Council may be mentioned: Fuel research for Alberta; the establishment at Ottawa of a central information bureau on the natural resources of Canada; reforestation in Canada; the flotation processes in the separation of Canadian ores by waste oil from wood distillation; the breeding of a new variety of wheat for the western provinces; the utilization of ultra-violet rays in catalysis; investigations on signalling in fogs; and the chemistry of the bitumen of the tar sands of Northern Alberta.

STATISTICS OF CANADIAN DEVELOPMENT

Phenomenal Increase in Canadian Trade—Bank Figures Continued to Grow in 1919—Volume of Financing Illustrated

FIGURES given below, compiled by *The Monetary Times*, illustrate Canada's economic progress during the past decade. Some of the figures for 1919, such as building permits and price index numbers, were not available in complete form for this number, but will be given in later issues of *The Monetary Times.*

TABLE 1—TRADE OF CANADA*

Fiscal year.	Exports of Canadian produce.	Exports of foreign produce.
1906	$ 235,483,956	$ 11,173,846
†1907	180,545,306	11,541,927

Growth of a National Economic Policy

Farmers' and Labor Movements are Outstanding Questions of the Day—Assistance to Urban Industry Has Increased Rural Depopulation—Credit Must be on Sounder Basis and Borrowing for Current Needs Must Stop.

By. W. W. SWANSON.

IN many respects Canada finds itself in a fortunate and favorable economic condition as compared with other nations of relatively equal industrial and financial power, but it is impossible to deny that there are grave and disturbing factors in the present situation. The country has discounted the future to a dangerous degree, and it is as futile as it is idle to attempt to disguise the patent facts. It is, as the economists say, the "putative" income of the Canadian people that is meeting the present requirements of the federal and provincial treasuries—an income that may never be earned unless agitation and class jealousies and rivalries give way to united and intelligent economic effort on the part of every worker within the Dominion. The free flow of money, and the favorable market conditions created by the war, have blinded many laborers and producers to the fact that the time to repair the waste and wreckage of the war years is at hand, and that the only manner by which it can be done is by following the road of economy and hard work.

It is scarcely necessary to survey the present financial and economic situation in Canada to make this point clear. The national debt has increased by leaps and bounds until it now amounts to approximately two thousand million dollars. To cover current annual requirements almost four hundred millions will be needed—or a per capita tax of fifty dollars if the borrowing process is ended, as it ought to be ended. In the midst of all this, there are placed to the fore claims based on class-consciousness and even greed. The duty of the hour is to hammer out a program that will harmonize the claims of all classes, and unite their efforts to serve the common good. It is a sheer waste of time and energy to indulge in the mere luxury of deciding which class or group has reaped an unearned increment in the past. The time for reconciliation and action has come. The difficulties that confront Canada are so threatening, and so urgent is their demand for a solution, that it is imperatively important to attempt to find that solution; and to find it, moreover, in an atmosphere of tolerance and goodwill.

Farmers' Movement Has Sound Basis

There are two problems confronting Canadians to-day, of the first magnitude—the agrarian question, and the demands of labor. In some respects it was inevitable that the coming of peace should force to the front issues that create class antagonisms, but that gives no good ground for accentuating such differences as exist. Indeed, it may be affirmed that the only wise and fruitful way to proceed is to attempt to satisfy legitimate demands wherever and whenever these arise. This holds good for the demands of all classes, and especially for the great agrarian class, upon whose prosperity depends the welfare of the entire state. This attitude is the only sound one to assume, even if those demands appear, at first glance, selfish and extreme. It is futile to label as "populism" the program and policies of the farmers of the present day. While certain elements among them may run to extremes, it is well to keep in mind that the farmers, as a political body, are ably and sanely led.

What lies behind this agrarian movement in Canada? The demands for fiscal reform are based upon something more than any merely selfish class-conscious appeal. The census of 1911 shows not only a relative, but an absolute, decrease of the rural population of the maritime provinces and Ontario, while rural Quebec gained only 39,951, as compared with an increase of 314,383 in the population of the urban centres. According to census returns for 1916, the percentage of rural, as compared with urban, population in the western provinces indicates a steady decline. In 1901 the rural population was 75.39 per cent. of the whole, as contrasted with 64.31 in 1916. Bearing in mind that there has been an absolute increase in the population of Saskatchewan during the past decade, it yet remains significant that, during the period 1911-1916, the percentage of rural population to the whole has decreased from 84.37 to 72.79. It seems just to conclude that, in view of the fact that only about 15 per cent. of the available arable lands of the west are under cultivation, there is something decidedly wrong with an economic system that induces such results.

Isolation Injures Agriculture

From first-hand investigation of the facts, and discussion of the problem with professional and business men, as well as with farmers themselves, the writer is forced to the conclusion that the greatest menace to the settlement of the idle lands of the west, and to the retention of settlers on the lands that are taken up, is isolation. This single, simple fact disproves the contention so often made in the east, as well as elsewhere, that scientific farming, greater production and the like, are the best available methods for keeping the people on the land. Increased production, particularly in terms of dollars, is of paramount importance, to be sure; but it is sufficiently clear that bigger production merely adds to the menace of isolation, if it comes through better farming and a more intensive utilization of labor. If the same labor, with better methods and machinery, can make two blades sprout where one grew before, then a proportionately smaller number of farmers will be required to till the land. With every increase in the use of machinery, and with each added item of capital equipment, the workers diminish in number and isolation becomes more acute.

From this it follows that a premium must be placed upon agriculture, as compared with industry in the urban centres, if the vast vacant spaces in the west are to be occupied and the home market—the richest market—developed for Canadian manufacturers. To be more concrete: An automobile on every farm in the west, particularly where there is a family, and a gramophone in the home, with access to other comforts and conveniences, will do more to destroy isolation than anything else of which the writer is aware. Add to these the installation of the telephone; rural mail delivery; "travelling" libraries; community churches and consolidated schools, and the most powerful forces are thereby marshalled to make it worth while for the farmer to remain on the land. And without these—without some sort of premium to offset the menace of isolation—the rural population of the west, more notably, will continue to be a drifting one. It must always be kept in mind that there is no greater danger to good farming than precisely this tendency on the part of the agricultural population to "drift." It retards community development and encourages those methods of production that result in exploitation of the natural resources of the soil.

It would be useless to deny that the premium upon productive undertakings, insofar as there has been such, has hitherto been found anywhere rather than in farming. The laborer has migrated to the town and city, not so much to obtain better wages—although he has generally received such—as to derive certain unmistakable social advantages. Man is a social animal; and the agrarian worker keenly feels the lack of educational and other advantages at present to be had in urban centres alone. To give the agricultural workers command over the finer and nobler things in life, it is essential to place a premium upon farming, in terms of dollars and cents, as well as in the manner described. And some of the articles necessary for famiy well-being on the farm may not be classed as "luxuries"—the automobile, for instance—despite the urgent need for economy and thrift.

Taxation Is Main Issue

If the above analysis holds good, one can readily understand the impatience of the agricultural class, particularly in the west, with the present scheme of taxation under which the major part of the revenues are derived from taxes levied upon consumption. The farmers are incensed, because they feel convinced that a premium is placed upon urban production, where it is least required; whereas their industry is penalized. They object to a system of taxation that places a burden upon the machinery and tools they require in the productive process, and that once more in the form of consumption taxes mulcts them of a considerable share of their income. In lieu of present customs duties, therefore, in large measure they would rely for revenue upon direct taxation. The farmers' platform, as approved by the agrarian interests in general, advocates a direct tax upon personal incomes; a graduated inheritance tax upon large incomes; a graduated inheritance tax on large estates; and a direct tax upon the unimproved values of land, as well as a tax upon all natural resources. This, along with a comprehensive program of public ownership, would involve the making of radical changes in the productive and distributive processes.

The organized farmers are avowedly ready for the adoption and application of these new principles in our national economy; and are prepared to convince the rest of the nation of their inherent soundness and justice. Mr. W. C. Good, for example, in his recent work, "Production and Taxation in Canada from the Farmers' Standpoint," draws a black picture of rural stagnation and decay, both with respect to the quantity and the quality of the population. In his judgment the scientific application of correct economic principles to agriculture is of even greater significance than scientific farming. In his analysis of Canada's economic problem the chief defects are to be found in an over-development of factories, railways and other "capitalistic" equipment, in comparison with the basic industry—agriculture—upon which ultimately the successful functioning of the former depends. From a study of census returns Mr. Good reaches the conclusion that manufacturing, with a capital investment in 1900-1914 of $1,500,000,000, yielded a surplus profit of $260,000,000, while during the same period agriculture, with an investment of $5,000,000,000, involved a deficit of $110,000,000 if ordinary wages are allowed. Both Mr. Good's analyses, as well as the data furnished by the census returns, are open to doubt; but there is no room for doubt that agriculture, in ante-bellum days, afforded a precarious and meagre livelihood, particularly in the western provinces.

Farmers Are Now Capitalists

On the other hand, it should not be overlooked that the farmers of Canada are in possession of an immense volume of capital, much of wihch is the direct product of labor. Many of the farmers in pioneer days, both east and west, bought their land with the product of labor, and thus raised themselves out of the wage-working class. Artisans and unskilled workers in general have no similar command over capital; although but a few years since many farmers, especially in the west, were members of the employed class which they have left behind to become, in turn, proprietors. It is also but fair to say that farmers as a whole have never been more prosperous than they are to-day.

There is a tendency in some quarters to urge farmers to insist, for the future, upon joint action in the marketing of their products—to dispose of their wheat, for example. through a permanent wheat board. It is said that price-fixing is the general rule and not the exception elsewhere, and that monopoly is absent from the marketing of agricultural products alone. But while retail prices appear to be fixed, stocks of goods will remain unsold that are not adjusted in price to the demand. The merchant, in truth, must be a shrewd student of market conditions if he hopes to succeed. In the same way farmers through their various co-operative selling agencies study the markets in an attempt to get top prices. It is doubtful whether any board, under normal conditions, can obtain better prices for wheat or any other product produced under like circumstances, than are secured by commission men in the open competitive markets of the world. That does not mean that economies in distribution are any less important, however, than cutting the costs of production.

Present Prosperity Unparaleled

Although much is heard of "monopoly," as the cause of the prevalent political unrest among farmers, there is no comparison between the present level of well-being—even garnting the all too evident effects of trusts, mergers and combines in our economic life—and that obtaining a generation and less ago. Time was when wheat was selling on Canadian and American farms at 50 cents a bushel; when hogs brought 3 cents a pound and cattle about the same. There are many who recall the "golden age," when butter was sold by the farmer's wife at 8 cents a pound, and eggs at 8 cents a dozen. It was at this period in the agricultural development of the continent that the Farmers' Alliance in the United States secured hundreds of thousands of adherents, who voted for the free coinage of silver and an increase in paper money issues. The political movement among the farmers at the present time, therefore, is occasioned by quite other conditions than those obtaining when populism swept the west and the working classes in the United States demanded more and cheaper money.

During the war years conditions have changed for the better for the Canadian farmer; and the plain, unvarnished truth is that he wishes to hold, in so far as it may be legitimately accomplished, his gains. And why not? It is a legitimate aspiration. The farmer is willing to work hard, and to work efficiently and well. One hears from him little or no talk concerning an "eight-hour day." During the war years the farmer has received as much as $100 for the meat value of a discarded dairy cow; and for a good beef animal he has got as much as a team of horses would have fetched a few years ago. A fairly good yield of oats brought, per acre, from $45 to $60; and $45 to $50 for barley, corn and wheat. True, partial harvest failures tend to reduce agricultural returns; and in some sections of the west farmers have been brought to the brink of ruin because of unfavorable conditions occasioned by drought, grasshopper plagues and the like. Nevertheless, agrarian workers have tasted prosperity, and are determined to continue it, if it lies within their power. The pressure of poverty can not be blamed for the revolt against the present economic and fiscal system in Canada. It is well that such is the case, for the movement thereby loses its strictly class-conscious appeal.

Dense Population Not Desirable

Agitation in itself will accomplish little or nothing in raising or maintaining the standard of living on the farm, unless the objects sought are clearly kept in view. In our judgment the great menace to the successful settling of the land, as stated above, is isolation. It must be granted that not for many years to come, if ever, will the density of population on Canadian and American farms—particularly in the west—be equal to that in Belgium, Denmark, Holland, Germany and other European countries. The reasons are obvious: We are not driven to it by the pressure of population; hired labor here gets from two to three dollars a day instead of forty cents, as in Europe; and land is relatively so abundant that the per capita product in terms both of material and value is much higher than in Europe. Extensive, and not intensive, cultivation must be followed in the west for years to come. The small farm there is an economic impossibility; and that fact in itself makes for isolation. The drift of population in Canada is toward urban centres, which makes it imperative to place a premium upon agriculture—to give the rural population certain terms that will counterbalance the greater drawing power of city life. These terms will be discovered largely in extending still further to agriculture credit facilities; in removing grievances, to the extent that they actually exist, in connection with excessive interest rates; in providing better facilities for the shipping and storing of grain and other farm products; and in reducing the "overhead" expenses of the farmer by preventing the undue multiplication of middlemen. Research and cool thinking along these lines will prove a thousand times more effective than the attempt to apply a panacea on a wholesale scale—such, for example, as the panacea of a tax upon ground rent, urban and rural.

With respect to the fiscal reforms advocated by the organized farmers, there is much to be said in their behalf. The emphasis placed upon the need for greater production is sound and admirable. It is the chief weapon in the nation's arsenal wherewith to reduce the high cost of living. Canada's fiscal system must be readjusted to bring about this essential result. The high cost of living forces upon labor continual demands for more wages; and the granting of necessary increases pushes costs of production and hence prices skywards. To place farming and other basic industries of Canada upon a firm and normal basis, it is imperative to speed up production on the one hand, and to deflate currency and credit on the other. Only by increasing the volume of traffic on our railways may we face the financial aspect of the railroad problem with confidence. For, let it not be forgotten that high prices—which brought many other industries prosperity—laid a heavy burden upon the railroads. A larger volume of traffic will not merely stabilize rates, and hence keep the cost of production in industry and farming down, but it will put an end to relying upon general taxation to make good railroad deficits.

Borrowing Overdone

But increased production is demanded above all else to bring to an end the financing of the current requirements of the nation by the easy, but fatal, policy of raising loans. Not only the organized farmers, but the saner elements everywhere, are doubly justified in the demand that excess profits and large incomes, wherever these may emerge, be forced to yield a return to the treasury according to faculty or ability to pay. This is not class legislation; for agricultural wealth and the income derived from farming stand ready to pay their fair share. Under the present scheme of taxation, whereby the greater part of the annual revenues of the state are raised by taxes laid upon consumption, farmers insist that they pay too large a proportion of those revenues, inasmuch as they comprise five-ninths of the population. Ability to pay can not be reduced to a population basis, but must be considered with reference to income. The income of the Canadian people is estimated at $2,400,000,000 annually; and the real problem confronting our people and government is how to increase that income, in the face of rising costs of production induced by heavier taxation, among other causes. This will involve a radical readjustment of the protective tariff. As, however, the policy of protection can not be abandoned over night, even granting the will for its accomplishment, such changes as are determined upon should be brought about by agreement of all concerned, after an exhaustive study of comparative costs at home and abroad. Such an investigation should cover agricultural as well as manufacturing costs.

War-time control of industry in the United Kingdom, the United States, Canada and elsewhere, has demonstrated that economic laws can not be flouted, any more than other laws, without disastrous results. Where success has been achieved it has been through taking into account those business and human factors that operate silently, for the most part, but with relentless certainty. One fact in the experience of the past five years stands out above all others—that to obtain the efficiency desired, to eliminate wastes of capital and labor power, it is imperative to recognize the group interests of the entire nation. The first step in economic and social progress, therefore, is to discover those group interests, and then forge a national policy that will be impartially administered in the spirit of service to all.

In simple truth the farmer, the manufacturer, the wholesaler, the distributor and the laborer—one and all—must be got "into the game." There are common interests to be served. A higher standard of living for the workman and the farmer, with increased efficiency, means a widening of the market for manufacturers and distributors, a greater volume of output, and a steadier and surer market. That higher standard of living can come only through speeding up production, thus taking inflation out of credit and prices. Cheaper goods will aid enormously in stabilizing wages, and so in getting costs down to a normal basis. Credit, prices and production are upon wholly artificial levels in Canada to-day; and nothing enduringly good can be accomplished in the sphere of national economy until group interests are recognized and fused in a policy making for the common good.

IMMIGRATION SHOWING RAPID INCREASE

Many More People Came to Canada in 1919 than in 1918—Immigration from United Kingdom Increased Twenty Fold—More Homestead Entries

By W. D. Scott

THERE is good reason to believe that immigration to Canada during 1920 will be much greater than in any year since the beginning of the war. This is based on several well-grounded facts; the first and more important being the wonderful stand that Canada took in this great struggle, and the remarkable magnitude of all her resources during the trying period of the war. Loan after loan was negotiated, each one greater than the former, and the sustaining influence of these and the credit thus given to the Empire showed her in outstanding colors. In this she aroused the admiration of the world, and by it she was brought before the eyes of the public in a way that led to the conviction that there must be resources in Canada greater in extent than the world had yet been apprised of. This led to inquiry from every part of the globe as to our lands, minerals, timber, industries, fisheries, shipping and agriculture.

Probably the most important of the inquiries are those which refer to agricultural lands, the knowledge of Canada's riches in these having been greatly awakened during the last few years and only awaiting the close of the war for a hitherto unachieved development in occupation. Agriculture will bring a greater number to Canada than will any other class of industry. While the rebuilding of devastated portions of Europe will occupy the attention and give occupation to a large number, there remains the fact that many, with the wanderlust, easily understood, will seek a country where they may forget the scenes through which they have passed, and Canada will receive many of the most desirable of these. Only desirables will be admitted, the revised Immigration Act having fully provided against the entrance of others.

Good Class From United States

From the United States there will come an excellent class of settlers, greater in number than for some years past. They will bring with them large amounts of capital for investment in farm lands in western Canada, furthering production on our fertile prairies. Western Canada lands have increased in value, but nothing in proportion to that at which lands in the United States are selling to-day. We will see the man who has sold his Iowa farm for $400 per acre crossing the line into Manitoba, Saskatchewan or Alberta and purchasing land for himself and his sons, three or probably four or more of them, at a tenth or an eighth of the figure at which he sold. They are now coming.

But immigration to Canada will not be confined to those who go upon the land. Other industries will grow. Manufacturing will develop, and many new lines at present unknown to Canada will open up, and these will not only give employment to the unemployed here, but attract those from the outside. The year 1920 will see these predictions fulfilled, or on the way to fulfilment, and are but the gateway to greater development in following years.

Figures of immigration and homestead entries are given on page 26 of this issue.

IMMIGRATION INTO CANADA, 1917-19

(Figures furnished to "The Monetary Times" by Mr. W. D. Scott, Superintendent of Immigration, Ottawa.)

Two Important Sessions of Parliament

Government Railways Combined and Acquisition of Grand Trunk Authorized — Large Appropriations for Housing, Highways, Education and Soldiers' Civil Re-establishment— Handling the 1919 Grain Crop—Matters to be Dealt With at 1920 Session.

By ARTHUR R. FORD.

DURING the past year there were two sessions of parliament, both of which were marked by the passing of legislation of more than ordinary importance to the business and financial world. The first session opened February 20th, and adjourned immediately out of respect for the memory of the late Rt. Hon. Sir Wilfrid Laurier, until February 24th. The address in reply to the speech from the throne was moved by Major D. L. Redmond, of Calgary, and seconded by Capt. R. J. Manion, of Fort William. The debate which followed was not concluded until March 17th.

From the standpoint of the business world two of the most important measures of the session were the bills creating a Board of Commerce and the bill under which it operates, called the Combines and Fair Prices Act. The Act creating a Board of Commerce had its origin in the recommendation of a committee appointed during the session to inquire into the high cost of living. The board was empowered with the general administration of the Combines and Fair Prices Act, passed at the same time. By the provisions of this Act the board is empowered and directed to restrain and prohibit the formation and operation of combines.

Grain Act Amendments

Several amendments to the Canada Grain Act were introduced by Hon. A. K. Maclean, two of which were of unusual importance to the grain trade. One provided for the creation of a board of appeal in Western Canada to replace a board of surveys which has hitherto heard appeals from inspectors of grain. The other important feature is that providing for the restriction of overages at terminal elevators. It reduces the overages which may be taken to one-quarter of one per cent. of the gross amount of grain received in elevators during the crop year. The surplus is to be sold annually by the board of grain commissioners, and the proceeds paid to the board for the purpose of meeting the cost of administering the Act.

The Budget

The budget speech was delivered by Sir Thomas White on June 5th. The government's tariff proposals which were adopted provided for the entire repeal of the British preferential tariff rate of five per cent., and for a partial repeal of the intermediate and general tariff rate of 7½ per cent. imposed as a war measure in 1915. The budget provided for the free importation into Canada of wheat, wheat flour and potatoes from countries which do not impose a customs duty on such articles grown and produced in Canada. There was a reduction of five cents per pound in the British preferential, intermediate and general tariff rates on roasted or ground coffee, and three cents per pound under the British preferential tariff on British-grown teas. The budget provided for a total reduction, including the 7½ per cent. war duty under the general tariff from 27½ per cent. to 15 per cent. on: cultivators, harrows, horse-rakes, seed-drills, manure spreaders, and weeders, and complete parts thereof, and from 27½ to 17½ per cent. on ploughs and complete parts thereof, windmills and complete parts thereof, portable engines and traction engines for farm purposes, horse-powers and threshing machine separators and appliances therefor. On hay-loaders, potato diggers, fodder or feed cutters, grain crushers, fanning mills, hay tedders, farm, road or field rollers, post-hole diggers, snaths, and other agricultural implements, provision was made for a total reduction to 20 per cent., and a similar reduction on farm wagons. Respecting cement, the war customs duty has been repealed and the general tariff rate reduced to 8 cents per 100 pounds. It was further provided for specific instead of ad valorem rates of duty upon pig-lead, zinc spelter, and copper ingots.

Business and Income Tax

The Business Profits War Tax Act was renewed for the current calendar year so as to make it apply to accounting period ending on or before December 31st, 1919. Important changes were made in the rate of taxation levied on incomes. The government's proposals provided for the following: All corporations shall pay ten per cent. on their net income in excess of two thousand dollars. The old tax rate was six per cent. In respect of individuals the normal rate of four per cent. is to be levied on all incomes exceeding one thousand dollars, but not exceeding six thousand dollars, in case of unmarried persons and widows or widowers without dependent children; and upon all incomes exceeding two thousand dollars, but not exceeding six thousand in case of all other persons. A normal tax of eight per cent. was provided for on all incomes exceeding six thousand dollars. A surtax under the bill commences from six thousand dollars, as under the old Act; applying first to incomes between five thousand and six thousand and to every two thousand dollars between six thousand and one hundred thousand.

Consolidated Railways Act

During the session the Consolidated Railways Act, which has been before parliament for a number of years, finally passed. It was not passed, however, until the clause providing for a power company securing the consent of the municipality for erecting poles, distributing wires, etc., was defeated in the Senate. Finally, to secure the passage of the main provisions of the bill, the clause in question was dropped.

During the session, a bill was passed under which the Canadian Northern and other government lines were incorporated as a company to be known as the Canadian National Railways Company. This provided for the nomination by the governor-in-council of a board of directors, and defined their duties, etc.

Highways Act

The Highways Bill was passed during the session. It provided for the payment to the provinces by the Dominion of twenty million dollars, spread over a period of five years. Each province is paid a lump sum of eighty thousand dollars. The remainder of the amount is paid per capita to each province. The bill provided for conditions under which payments were to be made. Any highway for which money is granted is to be in accordance with an agreement to be made between the two governments. Any aid to be granted can only be forty per cent. of the work in question, the remainder to be provided by the province.

Bankruptcy Act

From the standpoint of the business world, one of the most important bills of the session was the Bankruptcy Act. This bill was first introduced in the session of 1918 by Hon. S. W. Jacobs, member for Jacques Cartier. It was referred to a special committee of the House, of which Hon. Hugh Guthrie was chairman. They heard a great deal of evidence but the bill was not proceeded with in the session of 1918; it was introduced in the first session of 1919 as a government measure. One of the main objects of the bill was to give uniformity throughout the Dominion to all matters pertaining to bankruptcy. Since the repeal of the Dominion Act of 1880, each province had its own insolvency legislation. One effect of the measure was to place in abeyance existing provincial laws on bankruptcy and insolvency. Under the new bill all preferenecs and priorities between creditors have been abolished; an expeditious means of administering an insolvent estate has been provided, and such administration made as inexpensive as possible. Provision has also been made for an honest insolvent obtaining, under certain conditions, an absolute discharge from further obligations. The bill applied to all corporations, with the exception of banks, railways, trust and insurance companies, and to all persons except farmers and wage-earners earning less than fifteen hundred dollars a year. Certain provisions of the Winding-Up Act were made applicable to the winding up of corporations which have become bankrupt.

Appropriations

Among the larger appropriations voted during the session, that for the building of ships takes precedence. The total under this head was forty million dollars. Hon. C. C. Ballantyne stated that the money was being expended in the carrying out of the government's steel shipbuilding program, which has for its object the building up of a Canadian mercantile marine. There were large appropriations for railways and canals totalling ninety million dollars. This included a loan of thirty-five million to the Canadian National Railways Company, and thirty-five million for railway equipment. For the Hudson Bay Railway the appropriation was four hundred thousand dollars. For the Quebec and Saguenay, $550,000; and for the acquirement of four small railways in the maritime provinces, $292,000. There was also $258,797 as subsidy to the Edmonton, Dunvegan and British Columbia Railway. For public works the total estimates were $21,000,000, of which the largest amount was $3,500,000 for the Welland Canal.

Legislation was also passed authorizing a loan of $25,000,000 to the provinces, in proportion to population, at 5 per cent. for housing purposes. This would work out as follows:—British Columbia, $1,366,000; Alberta, $1,304,000; Saskatchewan, $1,716,000; Manitoba, $1,586,000; Ontario, $8,781,000; Quebec, $6,980,000; New Brunswick, $1,225,000; Nova Scotia, $1,716,000; Prince Edward Island, $326,000. This money is advanced on application from the provinces, and certain conditions as to how it is to be spent are imposed. The sum of $10,000,000, to be expended by the provinces on technical education over a period of ten years, was also provided.

Second Session

The second session was opened on September 1st, and was primarily called for the ratification of the Treaty of Peace between Germany and the allied powers. However, before parliament was prorogued on November 10th, much important legislation was passed.

The legislation of most vital interest was that providing for the acquisition of the Grand Trunk Railway by arbitration. For a year and a half negotiations had been in progress and these were completed while parliament was in session. The bill provided for the acquisition by the government of the entire capital stock of the company, except the four per cent. guaranteed stock, amounting to 12,500,000 pounds. The government guaranteed the payment of dividends at four per cent. per annum upon this stock, with power to purchase at any time after five years; with the guarantee of dividends all voting power ceased. The remaining stocks, consisting of first preference five per cent., second preference five per cent., third preference four per cent., and common stock, amounting at par value to slightly over 37 million pounds, are to be submitted to three arbitrators to determine their value. An amendment was introduced in the Senate, and accepted by the government, providing that the value to be determined by the arbitrators, including the annual return on the guaranteed stock, should not exceed five million dollars. The bill provided for the appointment of a committee of management as soon as the agreement has been ratified by the shareholders.

Aid to Soldiers

During the session a committee of the House was appointed to consider the advisability of granting further gratuities and financial aid generally to returned soldiers. The committee made a very thorough inquiry into the whole subject and embodied its conclusions in a comprehensive report, taking the ground that the financial situation was such that Canada could not provide funds for the gratuity schemes proposed by the returned men. One result of this inquiry was to bring out some very detailed and enlightening statements as to the financial obligations of the country. The committee suggested the expenditure of fifty million dollars for purposes of providing gratuities to Canadians who had enlisted in Imperial units; to provide rebate for transportation expenses paid by dependents who returned to Canada prior to the armistice; to provide for necessitous cases; to take care of unemployment during the coming winter; to advance loans to disabled men for training and education; and for similar disbursements.

Committee on Industrial Relations

Towards the close of the first session a commission was appointed to investigate the question of industrial relations in Canada and to make recommendations which might bring employer and employee together with a view to establishing permanent industrial peace. This commission toured the Dominion and brought in a report just before the prorogation of the first session in July. It recommended among other things the calling of a Dominion conference of employers and employees and representatives of the provincial and Dominion governments. This conference was summoned in October, and was the first of its kind ever held in Canada. While agreement was not reached on all subjects, yet the conference was not without substantial results, and undoubtedly created a better feeling between capital and labor. A number of recommendations were made which will likely be embodied in legislation at this coming session.

PRINCE EDWARD POPULATION PROBABLY LESS

So far as population is concerned, Prince Edward Island has probably lost ground since 1911, according to J. E. B. McCready, publicity and immigration agent for that province. In a recent letter to *The Monetary Times* he estimates that while about one hundred persons have settled there during 1918 and 1919, this and the natural increase has been more than offset by departures.

IMMIGRATION TO NOVA SCOTIA

Figures compiled by W. B. MacCoy, Secretary of Industries and Immigration of Nova Scotia, show that during the fiscal year ended June 30th, 1919, 3,722 settlers entered the province. These were classified as follows:—

Entered Halifax by boats from Great Britain....	1,172
Entered Halifax by boats from West Indies, etc..	200
Entered Halifax and North Sydney from Newfoundland	350
Entered Yarmouth by boats from Boston, Mass...	500
Entered at rail from western Canada and U.S.A.	700
Entered at ports of Quebec and St. John, N.B....	800
	3,722

During the summer of 1919, there were very few arrivals, as almost all the boats were engaged in carrying returned troops and their dependents. About 172 arrived on 25 ships from July 1st up to September 30th.

Review of Canadian Books of the Year

Industrial and Labor Questions Foremost in Interest—Finance Also Represented—"Industry and Humanity"—"The Canadian Budgetary System"—"Wake Up, Canada!"—"Production and Taxation in Canada."

THE output of books on economic questions in Canada is not large, though the number for 1919 was greater than usual. The books of the year deal respectively with agriculture, railways, tariff, industrial relations, national finance and company law.

First in point of importance should be mentioned W. L. Mackenzie King's book entitled "Industry and Humanity," published early in the year (Thomas Allen). It deals with some of the larger phases of industrial relations, and includes numerous charts illustrating the author's arguments. Most readers confess that they find these charts rather incomprehensible, and have difficulty in following many of the discussions in the book. It is probable that Mr. King through long study of the subject has acquired a familiarity with it and a viewpoint not possessed by readers who have merely followed current events. The book is timely, and will no doubt reach some of those who are taking an active part in solving industrial disputes, though it is obviously not for popular consumption. Mr. King's writings on the subject of labor are of special interest in view of his recent election as leader of the Liberal party in Canada.

Professor R. M. MacIver's "Labor in the Changing World," published late in 1919, is a plain-spoken analysis of the present industrial situation in view of recent developments. The author, who is associate professor of political economy in Toronto University, has made a special study of labor questions, and was a member of the labor sub-committee of the Reconstruction and Development Committee of the Cabinet. He takes the view that radical changes in industrial control are bound to come.

Two other legal books are also of interest to business and financial men. "Executors' Accounts," by C. H. Widdifield (Carswell Co., Toronto), describes practice and procedure in the administration of estates. "Dominion Company Law," by Thomas Mulvey (Ontario Publishing Co., Toronto), summarizes the Dominion companies and practice thereunder in a style readily intelligible to the general reader. The text of the Act is also given in full, and other useful information regarding the Winding-up Act, Income Tax Act, etc.

Dominion Financial Administration

"The Canadian Budgetary System," by Villard and Willoughby (Appleton and Co.), is very useful to the limited number of persons to whom the subject is of interest. The Canadian budgetary system is closely modelled upon that of Great Britain, and, as is pointed out by the authors, a study of it is of special interest to American readers in showing how the British system works, and also how it fails to work in a country where conditions are analogous to those in the United States. Apart from this academic interest, however, the financial business of the Dominion government has now grown so large that we should all be able to follow more or less intelligently the workings of the machinery by which it is handled.

A work of more popular interest than either of the above was Mr. C. W. Peterson's "Wake Up, Canada!" (Macmillan and Co.). The sub-title of this book is "Reflections on Vital National Issues," and among the numerous subjects dealt with are transportation, tariff, single tax, national finance, rural credits, agriculture and education. The author's meaning is not always clear, but he writes nevertheless in a fluent and entertaining style. Mr. Peterson has had an extensive experience in journalistic work in Canada, and of late has been deputy fuel controller for the Dominion.

After these should be mentioned "Fifty-Two Questions on the Nationalization of Railways," by "Fabius" (J. M. Dent & Sons). While the book is anonymous, yet many readers at once ascribed it to a well-known Canadian writer who has been connected with railway matters for some time. At any rate, the author is obviously familiar with his subject, and with the various arguments which have been put forth both for and against public ownership. The latter side is upheld, and the points are driven home with striking effect. A number of new phases of the question are also developed.

The Position of the Farmer

Agriculture's side is represented by "Production and Taxation in Canada," by W. C. Good (J. M. Dent & Sons). Mr. Good is connected with the United Farmers of Ontario, and one of the leading figures in the movement to improve the position of the agriculturist in Canada. He is not only thoroughly familiar with the practical side of his subject, but is also able to deal with its theoretical aspect. There is nothing very new in Mr. Good's work, but it is one of the first books to deal with the controversial questions of agriculture in Canada, and summarizes a viewpoint not hitherto dealt with in this form.

"Deep Furrows," by Hopkins Moorhouse (Geo. J. McLeod, Ltd.), records in semi-story form the co-operative movement in the west, which has evolved the Canadian Council of Agriculture, associations of farmers in the three provinces, the co-operative elevator systems, and other institutions. The Canadian west has at last demonstrated that individual agriculturists can unite, and the history of the movement is as interesting as it is instructive.

Edward Porritt's new book, "Evolution of the Dominion of Canada" (World Book Co.), appeared just at the close of 1918. Mr. Porritt is already well known as an advocate of the cause of free trade in Canada, being the author of "Sixty Years of Protection in Canada," and other books. This book is a history of Canada, but two lengthy chapters towards the end describe how the national policy of protection was evolved.

A book of a legal character but still of some interest to business men is by W. E. Lear, and entitled "Practical Guide to Canadian Company Law" (Law Books, Ltd.). It contains the Dominion Companies Act, as amended in 1918, together with information relating to the incorporation, organization and management of companies, and forms and by-laws for their use. Another useful publication of this kind is "The Canadian Bankruptcy Act (1919)," with index, by W. E. Lear, also published by Law Books, Ltd.

John D. Falconbridge's "Law of Mortgages in Canada" (Canada Law Book Co.) is also a publication which is invaluable to loaning companies and to barristers who handle cases of mortgage loans. This is especially the case as the previous work on the subject was twenty-one years old, and had become out of date by reason of much new legislation.

Three other books should also be mentioned here, which, while primarily political, have immediate economic significance. Two of these are by W. H. Moore; the first discussed the race and language problem in Canada under the title of "The Clash," while the second was a political novel, entitled "Polly Masson," dealing primarily with the same subject. "The Birthright," by Arthur Hawkes, discussed larger phases of the nationality question, both from the domestic and the imperial point of view.

"The Parliamentary Guide," by Macmillan and Co., describes the procedure of debate and other routine in parliament, which is the model for clubs, societies and similar organizations. It also describes the duties of the various offices and the mode of election and concludes with a list of definitions of the terms in common use.

Statistics of World Financial Conditions

Four-Year Period Finds Remarkable Changes in Quotations of Fundamental Commodities — Wheat and Cotton Still High — Steel Going Down — Drop in European Exchanges — High Rates for Call Money and Commercial Paper—Stock Exchange Active

THE fundamental changes resulting from the great war, in the economic world, are revealed by an examination of those quotations which have always been regarded as reliable indices of business conditions. In the accompanying table, a good list of these quotations are compared over a four-year period, as at November 1st, each year. This table is a compilation by the "New York Evening Post." Quotations as at October 25, 1919, are also included, because some of the levels as at November 1st last were temporary only.

From the figures of stock exchange transactions, it will be seen that trading on the New York exchange this year exceeded that of any of the four preceding years, in stocks, as well as in bonds. The unusual volume of transactions in railway and other bonds during the weeks ended November 1st, 1915 and 1916, was due in each case to temporary conditions.

Call money rates have advanced each year since 1915. The high quotation of 19 per cent., during the week ended November 1st, 1919, presaged the high level of 30 per cent. reached on November 12th, which was accompanied by a break in the stock market. Short-term commercial paper has been stronger in 1918 and 1919 than in the preceding years, as have also time loans in Chicago and Boston. The next important changes are found in the quotations of European exchanges. The rapid decline commenced, in the case of Russia, with the 1917 revolution, and in the case of France and England, when the government no longer supported the market. The drop, between 1918 and 1919, in sterling and francs, reflects trade changes brought about by the war rather than during 1919.

Quotations of government bonds show little change during 1919. A more rapid recovery from the low levels reached during 1918 had been anticipated, but the failure of the bonds to do so reflects the slowness with which business and finance as a whole is returning to normal.

An examination of the quotations of the government and municipal bonds shows that the United States 4's, which were quoted at 110 on November 1st, 1916, had dropped to 105⅛ by November 1st, 1917, which was seven months after the United States declared war. On November 1st, 1918, just before the armistice, they had risen slightly, and practically no further change took place up to the close of 1919. British consuls declined in 1915, 1916 and 1917, but had recovered to 60¼ in 1918, to drop again last year. The trend of quotations of French rentes is very similar. The New York City bonds were over 101 in 1916, went down to 94 in 1917, reached nearly par in 1918, and had dropped to around '93 by the end of last year.

One of the phenomenal changes of the period is the rise in the price of silver. Since November 1st, still higher levels have been reached, and some governments have taken action with a view to preventing exports of the metal. Wheat shows little change compared with 1917 and 1918, due in part to the fixation of its price, but cotton is again higher this year, following adverse weather conditions. Steel has declined somewhat, as a consequence of the cessation of war orders and general quietness in the market.

Review of Canadian Banking in 1919

Large Increases in Total Assets, in Loans, and in Deposits— Foreign Business Grows, and New Connections Established — Nova Scotia-Ottawa Amalgamation Effective — Financing the Dominion Government and the Crop Movement

By A. B. BARKER

THE year just closed has been one of great expansion for Canadian banks. Some 800 branches were opened during the year, and the paid-up capital and total resources showed marked increases. At the end of December, 1918, the former amounted to $109,492,397, and the latter to $2,689,835,181 and by the end of September, 1919, these figures were $117,050,239 and $2,851,917,000, respectively.

The year was characterized by heavy government borrowing as in the preceding year. The loan of 1918, of which $689,000,000 was taken in Canada, was subscribed for in October though the bulk of this financing for this loan was transacted in 1919. The influence on deposits was not as marked as with previous loans. In November, 1918, notice deposits amounted to $1,018,000,000 and by February they were back to the same figure. After that there was a steady advance and by the end of September, the total had reached the enormous sum of $1,227,000,000, a new high record. This development was regarded with satisfaction as it indicated that bank depositors were accumulating funds which would be available for the government loan scheduled for October. Also as these notice deposits furnish the bulk of the funds used in carrying the regular discount lines the commercial and industrial clients of the banks are deeply interested in fluctuations. If the tendency of these deposits is steadily upwards, there will probably be in normal times an increasing fund available for customers' needs.

Financing the Government

The proceeds of the 1918 loan apparently were sufficient for the requirements of the Minister of Finance until June, for in that month the banks' holdings of Dominion and provincial government securities increased from $100,000,000 to $224,000,000. This was increased in July to $278,000,000, and September showed a further increase to $323,000,000. These advances by the banks bridged over the period from the last instalment of the 1918 loan to the initial payments on the 1919 loan. As in 1918, while the instalment dates in connection with the last government loan extend into the third month of 1920, it is understood that a good proportion of the issue was taken up and paid for in full in 1919, the arrangements made by the government to have the bonds ready for delivery at the opening of the subscription period inducing prepayment of instalments not yet due. In connection with the loan, the banks' share of the labor was heavy, and their efforts in handling the details accurately contributed greatly to the success of the issue, as it did to that of 1918. This year the participation of the banks was facilitated by the solution of their staff difficulties through the return of so many of their old employees from overseas.

Foreign Extensions

The outstanding feature of the year, however, was the entry of two banks into the foreign field and the extension of its foreign branches by another, the Royal, which has opened additional branches in South America, in Rio de Janeiro, Montevideo, and Buenos Ayres. The others were the Dominion and the Union, the former having affiliated with British institutions in the formation of the British Overseas Bank Limited, head office, London, to handle foreign trade. The British banks with which it is connected in this venture are the Anglo South American, Glyn-Mills, Currie and Co., Chas. Hoare and Co., Imperial Ottoman Bank, Northern Banking Co., Ltd., Union Bank of Scotland Ltd., and Williams Deacon's Bank Ltd. The Union has, with the National Park Bank of New York, formed the Park Union Bank to operate in the Far East, and branches of this new organization have already been opened in China and Japan. The Royal also opened a branch in Vladivostok, but it is understood this has since been closed.

One More Amalgamation

One amalgamation was completed during the year, that of the Nova Scotia and the Ottawa. Some opposition was manifested to this merger, chiefly, however, in the Ottawa district and largely on grounds of sentiment. The Bank of Ottawa had been closely identified with the business life of that community during its whole career and many keenly resented a change which meant the disappearance of the name which had been a household word there for two generations. On business grounds, however, the amalgamation was justified; neither bank was a competitor of the other except at a comparatively few points, and each, therefore, gained the desired expansion with the minimum of cost. It gave the Nova Scotia a connection in a wealthy district in which it had not been represented and the wide connections it had elsewhere in Canada, in the United States and the West Indies were of benefit to the clientele of the Ottawa. The terms of the purchase were very favorable, five shares of Bank of Ottawa being exchanged for four shares of the Nova Scotia; the value of the shares for the purpose of adjustment was fixed at $220 and $275 respectively, the cash settlement for odd shares being arranged on this basis.

The chief changes in the paid-up capital of the Canadian banks up to 30th of September, were:—

Bank of Montreal ....$	700,000	to	$20,000,000
Bank of Nova Scotia ..	3,200,000	"	9,700,000
Merchants Bank	1,100,000	"	8,100,000
Provincial Bank	966,000	"	1,966,000
Union Bank	624,000	"	6,290,000
Royal Bank	2,860,000	"	16,820,300
Bank of Hamilton ..	984,000	"	3,980,300

The Bank of Ottawa's $4,000,000 disappeared, the increase in the Bank of Nova Scotia accounting for it. As compared with December, 1914, the paid-up capital of the Canadian banks shows an increase of $8,000,000 though the number of banks has decreased by one.

Legal Decision on Section 88

One legal decision during the year was of deep interest to bankers. In connection with section 88 Chief Justice Sir Louis Davies delivered a judgment which put a construction on the Act materially differing from that previously accepted. The taking of security under this section has always been regarded as rather technical and the banks followed closely the procedure fixed by their solicitors. As a result of this decision the Bankers' Association has adopted standard forms of security and a uniform method of procedure in accordance with the new interpretation. When the Act comes up for its decennial revision there will no doubt be added to the section a declaratory clause setting forth more clearly the exact procedure necessary to give effect to the intention of this section.

The Rural Credits Movement

In the west several of the provinces have in recent years passed legislation authorizing rural credit societies under which members can borrow from the local society. The idea is to encourage co-operation among farmers to obtain credit. The loans are made for certain specific purposes and must have the sanction of the society which borrows for the purpose from the local bank on the credit of the organization. In Alberta the rate of interest is left open and is a matter of negotiation between the local rural credit society and the bank with whom it is dealing. In Manitoba, however, the rate has been fixed at six per cent. which is not entirely satisfactory to the banks. This year they have agreed to accept it but left the matter open for further discussion.

Advances for Seed Grain

Another statute effective in 1919, is the arrangement of the Dominion government for supplying seed grain for unpatented Dominion lands. Application under this is made through official channels and approval given by the Dominion Land Agency in Winnipeg. The borrower gives a lien and pays seven per cent interest, receiving an order for the seed grain. These liens have priority over first mortgage, or other registered charges. The Dominion government undertakes to pay any sum remaining unpaid on March 1st, 1920, but will allow only five per cent on the principal sum.

Another Act effective this year in Manitoba is the Dower Act, under which a wife is given dower rights in her husband's estate and a husband in his wife's estate to the extent of one-third of the whole estate, real and personal, in addition to one-third of the husband's or wife's homestead.

Throughout the year the activity of Canadian industry and the high prices of commodities of every description caused a further expansion of the note issues of the banks. The average for 1918 was $204,000,000, and when the figures for 1919 are available they will show an increase of $30,000,000 or thereabouts.

Foreign Business

The growth of the business in the foreign branches of the banks is reflected in the increase in both deposits and loans abroad. These deposits in 1918, averaged $209,000,000 and current loans $108,000,000; call loans abroad in 1918, averaged $192,000,000 though these latter are maintained by the banks largely as a means of investing a portion of their reserves when they may yield a revenue and at the same time be available at once in case of need. This sum can hardly be said to come under the same head as the current loans, the funds for which come from the foreign deposits and not from Canadian funds. As a matter of fact these foreign deposits yield a considerable surplus over local requirements which is available for use in Canada.

Financing the Grain Crop

The harvest yield of the year was a disappointment, the government estimate showing a reduction for all crops except wheat. The figures, in bushels, are :—

	1918.	1919.
Wheat	189,000,000	193,000,000
Oats	426,000,000	399,368,000
Barley	77,287,000	66,443,500
Rye	8,504,400	8,234,100

In 1918, Canada's export of wheat was 103,000,000 bushels and this year the demand appears to be quite as great, but just how much will be exported will depend on vessel accommodation, loan facilities, and the home demand.

While these figures are disappointing there is little pessimism in the west. It is said that the yield runs in cycles and that 1920 is the year for the big crop, and producers are looking optimistically towards the results of their next season's labor. The bankers financed the crop while at the same time attending to the flotation and completion of the Victory Loan. This year there was no big credit for the wheat export company, the business of purchasing, distributing and exporting the grain being handled through the ordinary channels of trade, as in pre-war days. This involved the banks in the necessity of granting more extensive credits to their ordinary customers instead of participating in a big credit to the government.

BANK PREMISES A GROWING ASSET

In view of the rapid increases which have taken place in the value of real estate during the past few years, banking premises, located in every community throughout the Dominion except some small villages, may be regarded as having appreciated considerably in value. The government returns, however, require this item to be valued in the assets' statement at not more than cost. It is only by improvements, or by purchasing new premises, that this asset can be increased in the returns. The figures, now totalling over $55,000,000 for all the Canadian banks, probably undervalues the premises to a substantial degree, especially as amounts have been written off the value of premises which have decreased in value. The figures below show the aggregate value of premises owned by chartered banks, as reported to the government:—

	1917.	1918.	1919.
January	$49,317,635	$51,716,972	$52,801,507
February	49,620,189	51,897,132	53,005,275
March	49,967,852	52,388,793	53,317,635
April	49,980,909	52,313,874	54,443,467
May	50,134,753	52,501,581	53,898,884
June	50,450,150	52,780,885	54,315,064
July	50,577,670	52,954,694	54,667,642
August	50,725,312	53,333,467	56,014,766
September ...	51,188,669	53,268,468	55,464,363
October	51,107,191	53,009,741	55,602,824
November	50,850,974	52,547,327	....
December	51,484,586	52,550,835	....

RAPID INCREASE IN BANK DEPOSITS

The enormous increase in the deposits in Canadian chartered banks, not only in Canada but also in their foreign branches, is shown by the following monthly totals for the past three years:—

	Demand in Canada.	Savings in Canada.	Deposits elsewhere.
1917.			
January	$427,308,526	$ 864,163,344	$159,494,048
February	430,331,801	880,456,637	156,498,668
March	448,151,528	888,765,698	170,253,362
April	471,312,285	874,948,724	183,322,686
May	443,839,847	892,562,657	206,682,376
June	449,689,670	900,510,552	177,974,187
July	450,849,356	929,442,340	183,846,718

Silver Price Has Advanced Rapidly

Greatest Advance from August, 1919, to December, 1919—Pre-War Price Was Below Sixty Cents—Value of Silver Production Increased, but Volume Decreased—Some Currency Problems.

THE price of silver has advanced this year by about 30 per cent., with attendant problems in currency. Prices (per ounce) in London and in New York, as recorded by the "Commercial and Financial Chronicle," have been as follows:—

1919.		London (pence).		New York (cents).	
Month.	Date.	High.	Low.	High.	Low.

Heavy Demands in the East

Discussing the world situation in the production and price of silver, the November Commercial Letter of the Canadian Bank of Commerce said:—

"Extraordinary demands by India and China, and unusually heavy demands by European countries for silver for coinage purposes, cannot fail to stimulate both the production of that metal, and the utilization of large quantities of low-grade ore which was not of commercial value when prices were below 60 cents per ounce. Quotations at the close of October were approximately $1.22 per ounce. As the world's production of silver is far below current requirements, it is quite probable that the price will remain higher than it has been in recent years. The average production in all countries for some years has not exceeded 160,000,000 ounces annually, whereas to meet present demands 315,000,000 ounces are required. India and China require annually 175,000,000 ounces in settlement of the trade balances due to them which are payable in silver instead of gold. To meet the growing demand for silver coinage, 100,000,000 ounces are now required; and for use in the arts, 40,000,000 ounces.

"The present shortage of silver is attributable in part to the hoarding instincts of the native East Indian, and to the acceptance of the rupee in Mesopotamia, and in Egypt and other African countries, as legal currency. Germany must, perforce, turn to silver, as gold is not within her reach, and without exception the use of silver coinage has greatly increased in all European countries. The result of the advance in the price of silver bullion has in some instances been to make the bullion value of silver greater than the legal value, hence many restrictive measures. The British Chancellor announced on October 30th that the melting or exporting of British silver coins was made illegal and that silver bullion was not to be exported except under licence. The same restrictions apply in France also. These developments will favorably affect the mining industry of Canada. Two-thirds of the world's production of silver is a by-product of the lead, copper and zinc industry, but in Canada only 16 per cent. of the output is thus obtained, the balance being obtained from the mines at Cobalt. From the Cobalt and outlying camps 17,661,694 ounces, having a value of $17,341,790, were produced in 1918, and since the opening of these camps in 1903 up to the end of 1918, 292,056,976 ounces, valued at $169,241,387 have been produced by them. The stimulus which high prices will give to exploration, and to the application of more highly developed processes to all grades of ore, will do much to increase the output, the scale of which in recent years is indicated in the table following:—

Silver Production in Canada

	Value, $	Production, ounces.	Average Price, cents.
1910	17,580,455	32,869,264	53.59
1911	17,355,272	32,559,044	53.30
1912	19,440,165	31,995,560	60.83
1913	19,040,924	31,845,803	59.79
1914	15,593,630	28,449,821	54.81
1915	13,228,842	26,625,960	49.68
1916	16,717,121	25,459,741	81.84
1917	18,034,419	22,150,680	81.41
1918	20,000,000	20,780,000	97.10

Canadian Silver Coinage

As a result of this increase in the value of silver, silver coins, which are issued in most countries as subsidiary currency, are in danger of being withdrawn from circulation, because their value as bullion has rapidly approached their currency value. Canadian silver coinage is based on 360 grains to the dollar, .925 grains fine, or .333 grains of pure metal, worth as bullion 90 cents in New York. Canadian funds are at a discount of 10 per cent. there, so the conversion would not be profitable. Should silver rise, and also the rate of exchange, sufficiently to show a profit on the transaction this is what would happen. The result, however, would not be serious except for the certain shortage of change which would follow. In any event, the remedy is easy. A new issue with a smaller silver content, well below the export price, would have the desired effect. Our silver coins were intended as token coins. When first issued they were actually worth just about one-half of their nominal value, and when issued at par there was a large profit to the government. Their issue was limited strictly to the actual demand for such currency for its legitimate use, that is, as small change for the convenience of the public, and if the issue is as rigidly controlled as in the past, the new coins will do the work quite as well as the old. The total silver coinage of Canada from 1858 to 1915 was $19,848,323, and since then $7,908,458, or $27,756,781 in all, or about $3 to $3.50 per head of population.

How much of this is at present in circulation it is impossible to say, as there was, even under former conditions, when the coin was over-valued, a certain percentage which disappeared. Under present conditions, of course, this percentage will likely increase unless the silver content is reduced.

Canada's Opportunity in The Orient

Important Connections Established in 1919—British, American, German and Other Banks Have Long Been Active in the Field—Some Trade Figures and Possibilities.

By GEO. WILSON.

THE exploitation of British and foreign banking fields by Canadian banks is an old story, the Canadian financial flag having been flown by one or more banks in England, France, Spain, the United States, West Indies, South America and Mexico for many years. The first financial bridge to the Orient in which a Canadian bank is directly interested was built during the past year, when the Union Bank of Canada, in association with the National Park Bank of New York, founded the Park-Union Foreign Banking Corporation which has already established branches at Yokohama and Tokyo in Japan, and at Shanghai, China. The opening of several other branches in the Orient will take place in the immediate future, probably including Kobe and Osaka in Japan, and Hong-Kong, Hankow, Tientsin and Peking in China. The head office of the corporation is in New York, and branches at San Francisco and Seattle have been in operation for some months.

Two great British banks, the Hong-Kong and Shanghai Banking Corporation and the Chartered Bank of India, Australia and China, have been strongly entrenched in China and Japan for many years. Besides these, there are many other strong banks operating in the East, including French, Russian, Dutch, American and Japanese institutions; also many Chinese banks conducted upon modern standards. Prior to the war, the Deutsche Bank and one or two other German banks were well in the financial vanguard, both in China and Japan, but their proud heritage has been swept away, their palatial counting houses confiscated, and they are known no more. (R.I.P.)

Banking Difficulties in the East

The far eastern banking field presents problems and difficulties which, at first blush, appear to be entirely beyond the ken of a Canadian or American banker. This is not so much the case in Japan, where the gold standard prevails and where banking and commerce is modelled closely upon occidental standards, as in China, with not only one, but several silver standards or units and with "local currents," and even silver coinage, subject to frequent and sometimes violent fluctuations at each of the Treaty ports. The Chinese exchanges are so abstruse, ambiguous and complex that a newcomer is utterly bewildered and quickly realizes that a successful banker in the Far East should be "born and not made" there.

This is particularly true of the man at the helm, as no man, however experienced or expert a banker he may have been in Europe, America or Canada, could possibly "carry on" successfully in Asia without first mastering the Eastern exchanges, and the co-relation thereof to domestic and foreign trade, and this would entail a period of assiduous study on the ground for at least two or three years. A Japanese banker in China, upon hearing of the supposedly heavy losses incurred in China by an inexperienced foreign banker during the first year's operations, naively commented upon the amount as being a "reasonable initiation fee."

China's Trade

The Treaty of Nanking, signed in 1842, opened five Chinese ports to foreign trade and granted "foreigners" residential and trading rights. Later on, treaties with the Powers extended these privileges to forty-seven open ports, where customs houses are established in charge of Britishers. The tariff is fixed by treaty at a maximum of 5 per cent. *ad valorem* applicable to imports and exports, in addition to which there are certain wharfage dues averaging 2 per cent., which is apportioned between the foreign municipal councils and the Chinese municipal administrations.

In 1860 the United States controlled nearly 50 per cent. of China's foreign trade, but in later years, Great Britain and Germany and subsequently Japan secured the lion's share, the United States percentage of the total trade falling to 6½ per cent. in 1910. Since then, and more especially during the war, America has been steadily regaining lost ground, her total trade in China for 1918 being taels 140,000,000 (approximately $160,000,000) out of a total Chinese trade of taels 1,041,000,000 (approximately $120,000,000), or 14 per cent. of the total.

Importance of Shipping

It is estimated that had China not been handicapped by lack of ships, indifferent domestic transportation and internal disorders, the foreign trade of the country might have been ten times greater than that actually obtained. The United States is fully alive to the illimitable possibilities of trade with China, but it is quite patent that she has not made the best of her opportunities during the war period when both England and Germany were eliminated as competitors. The former's ocean carriers were practically all transferred for service in the European war zone, to which activities may also be indirectly ascribed Germany's disappearance from the field. Japan, on the other hand, with characteristic alertness, was quick to seize the opportunity and with their splendid mercantile marine subsidized by their government, captured a large share of the Chinese trade formerly controlled by Great Britain and Germany. The Chinese boycott of Japanese goods, as a result of the Shantung award made at the Peace Conference, has caused a serious shrinkage in Japan's trade with China, but there are already indications that the embargo is slackening and that Japan will soon become a formidable competitor in the Chinese markets, a very natural condition of things considering her geographical position and superior knowledge of the Chinese business mind and wants of the country.

China's Future

Although international trade must be reciprocal, Canada, at the moment, is not so much concerned with the extraordinary wealth of China's natural resources as with the development of this latent wealth as a stimulant to our own exports. During the coming years there is bound to be an intensive exploitation of the agricultural, mineral and manufacturing potentialities of China. The present meagre transportation system will be greatly extended and an era of general development is in sight. Competition among all nations will be keen, but with a land area comprising 4,300,000 square miles and a population of 400,000,000, the possibilities are apparent.

Canada's Advantageous Position

It is perhaps not generally realized that one can travel from Yokohama to Toronto within thirteen days and that Shanghai is only three and a half days' journey from Yokohama. Geographically, Canada enjoys the most advantageous position for trading with China and Japan, the sea route from Vancouver to the East being shorter by several hundred miles than from San Francisco and even Seattle, which is the nearest competitor. The Canadian Pacific Railway Co. long ago realized the great importance of Oriental trade and has for years operated a fleet of the finest steamers afloat on the Pacific, plying regularly, with some interruptions during the war, between Vancouver, Japan, the Philippines, Hong-Kong and Shanghai.

Our Present Trade

Canada's trade with the Orient for the year to June, 1919, was as follows:—

	Imports from	Exports to	Excess imports	Excess exports
China	$ 1,340,000	$ 2,927,000	....	$1,587,000
Japan	13,013,382	11,916,035	$1,097,000	....

As China's foreign trade totals over one billion dollars and Japan's over $1,300,000,000, the above statistics indicate the insignificance of Canada's share so far. Although China offers a far larger field for commercial exploitation, Japan must not be overlooked by any means. Far poorer than China in natural resources, Japan's rise in the past few years has been phenomenal. During the war this energetic, industrious and wonderful people has risen from a debtor to a creditor nation and possessed of 733 ships of over 1,000 tons gross, making an aggregate gross tonnage of 2,305,481, enjoying practical immunity from serious labor troubles and with highly organized and efficient business organizations backed by a sound banking system and a uniform and stable currency. Japan has taken a foremost and permanent place among the great foreign trading nations.

Export Trade Necessary

Canada has during the war demonstrated outstanding ability as a manufacturing nation and many of our products rank with the best that the world produces. The appalling burden of indebtedness which the country must carry for many years emphasizes the imperative necessity for the development of our export trade. The government has obviously recognized this by the building of 60 ships to comprise Canada's mercantile marine, but the slackness and apathy evinced so far by the country's manufacturers indicate that they are neither seized of the country's necessities or their own opportunities. Before the United States built its mercantile marine the country was likened to a huge departmental store without a delivery system, and unless this country wakes up, we will possess the delivery system without the departmental store.

A few of the goods which this country produces and which would be marketable in China or Japan or both countries, are: Automobiles, locomotives, railway materials, electrical machinery, motors and appliances, iron and steel, wire fencing, nails, screws, rivets, hardware, cotton and woollen textiles, leather, boots, cigarettes, tobacco leaf, lumber, pulp-wood, paper, paints, canned fish, fruit and vegetables, cheese, butter, flour and cereal foods, etc.

How the Government Can Help

The Dominion of Canada Trade Commissioners at Yokohama and Shanghai, both energetic and capable men, with a thorough knowledge of their respective fields, are so restricted by the niggardly appropriations provided by the government, that they cannot be expected to maintain activities much above the status of a Cook's Tourist Bureau. Adequate staffs and liberal funds should be provided to properly develop the functions of these commissioners. Permanent exhibitions of Canadian products should be established by the Canadian Manufacturers' Association at one or more of the principal cities in China and Japan and these might reasonably be subsidized by the Dominion government and supervised by the trade commissioners.

As Mr. Lloyd Harris, head of the Canadian Trade Mission, aptly expressed it in an address to the C.M.A. in Toronto a short time ago, "Canada is a great country, but it is never going to be really great until its people realize what they have to do to make it so. It is action that counts, not words. We must be prepared to do things in a big way—this is no piker's job."

CAPITAL SUBSCRIPTIONS IN UNITED KINGDOM

Total, Excluding War Loans, Over Three Times 1918 Figure—Domestic Issues Greatly in Lead

USEFUL statistics compiled by the London Joint City and Midland Bank, Ltd., show capital subscriptions in the United Kingdom during the first eleven months of 1919 to be several times what they were in 1918. The totals, excluding British government loans, by classes of issues, are as follows:—

	Eleven months to Nov. 30, 1918.	1919.
Government securities, other than British	£19,585,280	£ 12,940,754
Corporation and county stocks ..	1,942,450	553,547
Public boards, etc.	2,247,120	1,151,708
Railways	1,899,275	628,142
Aviation	758,750	647,500
Banks and discount companies ...	6,158,768	17,734,558
Breweries and distilleries	48,775	163,250
Canals and docks	......	400,000
Commercial, industrial, etc.	5,735,676	81,519,510
Electric light and power	1,301,780	1,704,088
Financial, land and investment and financial trusts	65,671	10,559,869
Gas and water	97,912	292,884
Insurance	62,500	5,259,391
Iron, coal, steel and engineering	15,089,513	21,320,636
Mines	1,321,738	6,171,217
Motors, etc.	577,500	10,267,295
Nitrate	192,500	172,150
Oil	185,125	9,111,623
Shipping	725,000	5,441,427
Tea, coffee and rubber	53,155	2,373,163
Telegraphs and telephones	......	900,000
Tramways and omnibus	133,200	1,449,247
Total	£58,181,688	£190,761,959

Monthly Totals

The figures by months over a three-year period are:—

	1917.	1918.	1919.
January	£ 935,625	£ 192,500	£ 18,330,586
February	618,883	1,275,750	9,683,737
March	892,036	2,674,562	11,862,083
April	3,530,000	1,053,739	6,048,111
May	3,340,764	5,320,618	17,551,224
June	1,503,125	2,295,959	16,823,315
July	1,429,661	4,516,135	28,277,343
August	6,089,643	5,277,640	14,807,345
September	1,092,694	5,986,672	9,294,271
October	2,153,000	7,233,357	24,977,183
November	3,726,568	22,354,756	33,106,761
Eleven months ..	£25,311,999	£58,181,688	£190,761,959
December	1,125,000	7,148,863	....
Year	£26,436,999	£65,330,551	....

Geographical Distribution

The geographical distribution of new capital subscriptions in the United Kingdom is as follows:—

1919.	United Kingdom.	India and Ceylon.	British possessions.	Foreign countries.
Six months to June ...	£ 69,233,295	£169,763	£ 8,742,084	£ 2,153,914
Month of July	21,886,884	25,000	1,553,305	4,812,154
August	14,149,469	52,000	162,278	443,598
September ..	6,723,092	100,000	1,010,703	1,460,476
October	12,275,630	229,087	6,823,327	5,649,139
November ..	26,333,051	3,750	2,776,860	3,993,100
Eleven months to November	£150,601,421	£579,600	£21,068,557	£18,512,381

Banks' Services In Public Finance

Have Been Depositaries for up to Four Hundred Million of Dominion Government Funds—Dominion Has, on Other Hand, Leaned Heavily on Banks for Temporary Funds—Large Holdings of Other Public Securities—Banks' Advances to Provinces and Municipalities.

THE advantages of having strong financial institutions, especially in time of stress, has been demonstrated by Canada's war-time experience. As a result of a decision made early in 1917, to float only one popular loan annually, large amounts had to be kept on deposit to the credit of the Dominion government, or else the principle of deficit financing had to be adopted, the Dominion banks advancing the money for war expenditures, and being repaid out of the proceeds of the loans subsequently floated. In practice both methods were resorted to, with the result that immediately after each loan the banks had large sums owing to the Dominion government, but by the time the next loan was offered the balance was on the other side. During the past three years the public expenditures were especially heavy, and the amounts at the credit or debit of the Dominion were correspondingly large.

War Loan Funds Left on Deposit

This is illustrated by the balances due to the Dominion government, as shown in the statements of the chartered banks submitted to the finance department each month. These balances are calculated "after deducting advances for credits, pay lists, etc." At the end of March, 1917, the total owed by the banks in this way was $45,934,629; on April 30th, after the third war loan had been sold, the total was $93,729,638. On September 30th, 1917, it had fallen to $19,888,938, and at the end of November, after the first Victory loan, it was over $71,000,000. During the first ten months of 1918 it averaged about $100,000,000, and after the second Victory loan was floated in November it reached $388,970,727. Thereafter it declined fairly regularly to about $100,000,000, and the statement as at November 30th last, including the results of the 1919 Victory loan, showed it to be $350,381,389.

The exact figures are as follows:—

	1917.	1918.	1919.
January	$33,090,492	$106,497,043	$236,119,588
February ...	49,142,452	69,419,615	238,256,091
March	45,934,629	89,606,599	228,201,515
April	93,729,638	94,771,219	188,129,800
May	58,075,066	117,664,042	113,860,593
June	29,230,596	86,436,245	128,890,218
July	21,748,070	87,301,606	140,575,172
August	25,271,715	85,393,676	100,639,909
September ..	19,888,938	97,328,077	110,217,948
October	62,025,194	116,362,321	121,028,537
November ..	71,071,106	388,970,727	350,381,389
December ...	65,998,553	254,927,913	....

Amounts Owed to Provinces

These figures are illustrated on the accompanying chart. For purposes of comparison, the total balances due by the chartered banks to the provincial governments, over the same period, are also drawn. These totals, which show comparatively little variation, are as follows:—

	1917.	1918.	1919.
January	$21,951,499	$17,961,683	$21,238,779
February ...	22,569,930	20,754,135	20,800,889
March	22,231,364	19,275,830	21,646,571
April	22,416,890	17,846,752	21,754,210

Balances Due Dominion and Provincial Governments

	1917.	1918.	1919.
May	20,076,311	19,018,352	26,196,865
June	19,093,266	20,531,269	24,454,438
July	29,517,573	22,623,369	23,499,116
August	21,247,058	22,037,448	23,552,757
September ..	21,392,853	20,216,474	24,094,698
October	22,510,190	23,761,147	20,699,308
November ...	19,399,492	18,287,227	17,625,464
December ...	16,781,521	14,756,299	....

Banks Loaned to Government

The other side of the story is found among the assets in the banks' statements, under the heading of Dominion and provincial government securities. There is a column to show "loans to the government of Canada," but this column is left blank, for which practice the government is understood to be responsible, and as the advances are almost always made on the security of four months treasury bills, their inclusion under the first-mentioned heading is therefore justifiable. The results do not show clearly just how much is owed by the government to the banks, for any provincial bonds or short-term provincial bills which may be held by the banks are also included under this heading. The total of provincial securities, however, is not large in comparison with the extent to which the Dominion government has had to lean on the banks as a result of the policy adopted.

As the short-date bills were timed so as to mature as soon as possible after the flotation of the war loans, this item of "Dominion government and provincial government securities" is found to fall off rapidly after each public loan. On April 30th, 1917, it was $113,592,312, compared with $93,837,853 at the end of May. On November 30th, 1917, it was $195,508,089, after which it declined to $101,458,112 on March 31st, 1918. The comparison in the case of the second Victory loan was $278,208,357 on November 30th, 1918, against $112,160,131 on February 28th, 1919. At the end of October last it had reached $361,280,956, and the statement as at November 30th, which is the last available, shows it to have already dropped by that date to $336,855,869.

The figures for the past three years are shown on the accompanying diagram, and are as follows:—

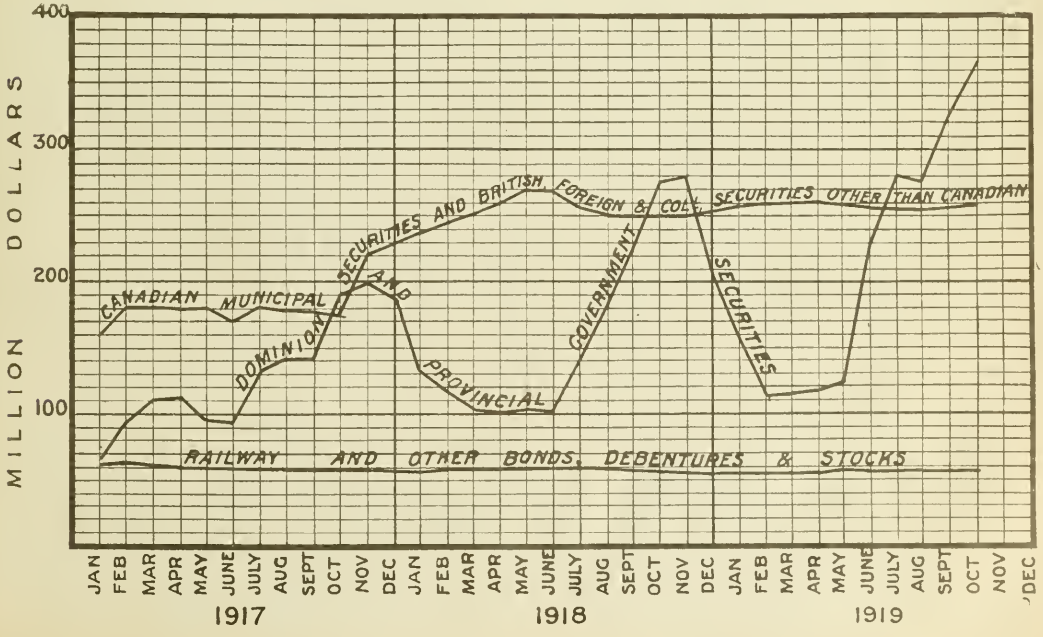
	1917.	1918.	1919.
January	$63,697,347	$127,310,016	$159,039,874
February ...	100,018,609	113,725,526	112,160,131
March	110,876,373	101,458,112	115,180,320
April	113,592,312	101,764,911	117,616,232
May	93,837,853	101,116,979	123,939,312
June	95,504,814	100,152,237	224,301,264
July	134,085,656	143,774,425	278,190,601
August	142,483,388	179,039,711	273,332,930
September ...	142,698,962	223,313,609	323,781,953
October	191,939,668	277,053,142	361,280,956
November ...	195,508,089	278,208,357	336,855,869
December ...	188,703,175	206,935,283	....

Other Public Securities Held

In order to show the part played by the banks in other public financing, holdings of Canadian municipal securities, and British, foreign and colonial public securities other than Canadian, are also illustrated on the same chart. These figures, which show a fairly steady increase up to a maximum of $260,000,000 last March, are as follows:—

	1917.	1918.	1919.
January	$163,299,724	$235,989,801	$259,462,077
February ...	182,808,459	242,256,480	259,422,456
March	178,893,152	250,422,761	260,003,939
April	178,624,830	260,978,505	258,504,084
May	178,833,219	269,102,070	256,617,235
June	167,769,412	266,226,264	254,147,015
July	182,461,263	255,155,438	253,490,909
August	176,249,192	252,239,043	254,235,984
September ...	176,015,496	250,698,255	255,098,813
October	172,639,288	250,254,056	255,684,576
November ...	218,405,643	248,398,067	253,341,708
December ...	224,093,823	253,518,074	....

Banks' Holdings of Public and Corporation Securities



Securities Other Than Public

As the banks also hold substantial amounts of other securities, classified as "railway and other bonds, debentures and stocks," these totals, as given below, are introduced to show their relative insignificance:—

	1917.	1918.	1919.
January ...	$61,304,541	$55,830,072	$53,546,118
February ..	62,691,669	57,459,593	53,416,524
March	61,431,416	57,551,752	54,276,188
April	58,913,952	57,048,350	54,628,223
May	58,160,699	57,170,618	56,812,743
June	59,334,630	58,394,801	55,191,819
July	59,297,033	57,828,305	55,214,138
August	58,763,965	56,190,748	52,679,157
September ..	58,894,390	55,903,534	53,658,486
October ...	56,890,787	54,047,042	54,442,926
November ..	56,214,540	52,678,241	54,327,528
December ..	55,609,725	53,137,962	....

Loans to Provinces and Municipalities

The third chart shows the loans to municipalities, and the loans to provincial governments. As already pointed out, the loans to the Dominion government are not shown separately, but are included in the holdings of Dominion and provincial government securities. The advances to municipalities have a regularly annual trend, as the banks are called upon to meet municipal expenditures early in the year, and are reimbursed out of taxes which are usually collected in largest volume from July to the end of the year. The greatest municipal debt to the banks is found, therefore, about midsummer. In 1919, however, it will be noticed that the highest figure was reached in August, and the total did not fall off in the autumn to the extent which it did during the preceding years.

The same trend is not found in the case of loans to provinces, because of differences in the methods of finance. The banks are frequently called upon to finance provincial works, or perhaps ordinary expenditures, during periods when the markets are not favorable to permanent financing.

The total bank loans to the municipalities and to the provinces during the past three years have been as follows:—

1917.	Provinces.	Municipalities.
January	$ 867,538	$24,487,273
February	1,282,016	26,121,324
March	2,739,191	29,877,911
April	4,881,196	35,931,996
May	4,394,166	39,790,191
June	5,423,688	42,757,673
July	5,056,122	43,989,207
August	5,011,228	43,940,176
September	5,430,535	42,721,563
October	7,695,949	41,204,781
November	8,640,399	36,459,598
December	9,774,419	36,353,039
1918.		
January	6,657,307	40,015,466
February	6,730,193	43,535,628

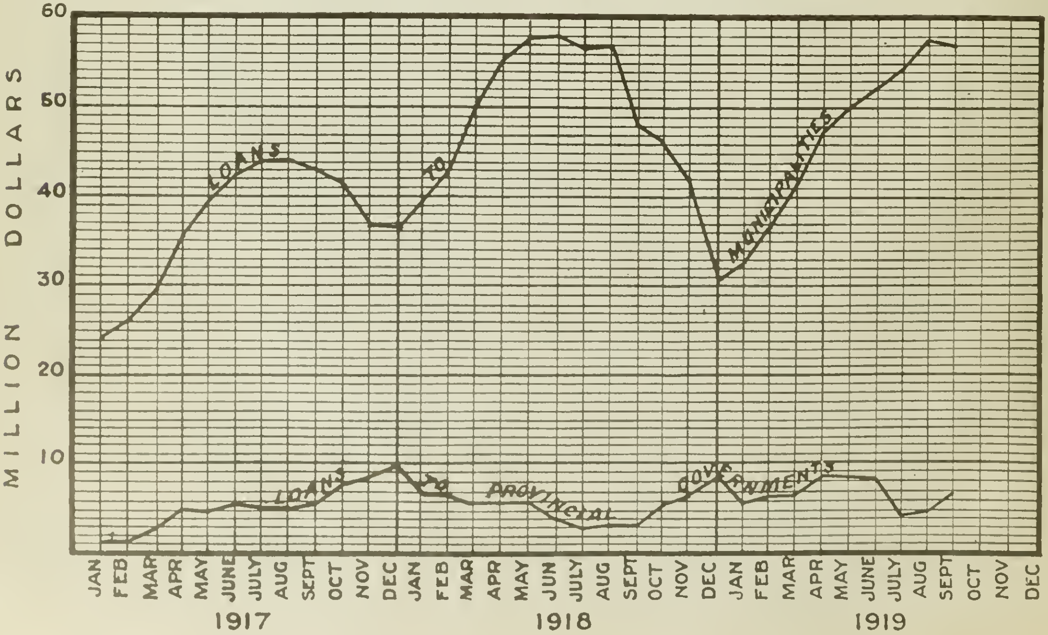
Loans to Provinces and Municipalities



Trust Company Progress in 1919

Valuable Services are Increasingly Recognized—Some Important Ontario Legislation—Broad Scope of Trust Business—Guaranteed Investment Certificates—Other New Developments of the Year in the Trust Company Field.

By JOHN COWAN.

IN common with other financial institutions of the country, the trust companies of Canada have to report a large growth in their business during the past year. This applies to every department of trust company work, especially the estates and trusts departments. The field for trust companies is ever broadening with the growing industry and wealth of the country, and we may expect to see in Canada in the coming years their like growth and development as has taken place in the United States. With the formation of new industrial corporations, their services have been in frequent demand during the past year as transfer agents, registrars, disbursers of dividends on stock, trustees for bondholders, and also as depositary for the safekeeping of securities, the collection and payment over of dividends, mortgage interest, etc.

Wide Range of Business

At a gathering of financial advertisers, the modern trust company was well described as the departmental store of finance. Whilst this description is very applicable to trust companies in the United States it nevertheless applies to a certain extent to our Canadian trust companies on account of the great variety of business which they are called upon to handle. In whatever business men may engage, with all the ramifications of commercial and professional life and specializing that is taking place in every sphere, the trust company may and is constantly entering, giving service both to the living and to the dead. The range of their duties is wide, including the administration of all manner of estates, and filling positions of a fiduciary character of every nature and kind. As has been pointed out in previous issues of *The Monetary Times* there are a considerable number of so-called trust companies in the Dominion which differ greatly in the character of their business from that of the conservatively managed trust companies. Some of these former companies have been incorporated for a specific purpose, such as landholding, stock promotion, realty broking, or the carrying out of some individual private trust. The trust company, however, which alone has the right to merit public confidence or to be entrusted with the execution of trusts, the management of estates, or the investment of private or public funds, is the company which refrains from the employment of its own capital and reserve funds, or any other funds over which it may have control, in real estate speculation, dealing in bonds of a speculative character, the promotion of wildcat schemes, the acceptance of any work, or engaging in any kind of business which may embarrass it in times of abnormal or depressed financial conditions. Business of this character can only tend to shake public confidence in those institutions which have taken such a large share in the development of modern business.

It has been well said by an executive officer of long experience in trust company management, that a trust company having in its keeping the financial affairs of hundreds and sometimes thousands of beneficiaries, many of whom are dependent on the income received through the trust company, should not only confine the investment of its trust funds to such investments as are authorized by law, unless otherwise directed by the will or instrument under which it acts, but should be quite as careful to see that the guaranteed funds under its control, as well as its own capital and reserve, are equally well and securely invested.

Ontario Legislation

In conformity with this policy, and in order to further safeguard funds invested by the public with trust companies, the Ontario Legislature at its last session made certain amendments to The Loan and Trust Corporations Act. The statute relating to Trustees and Executors (R.S.O. 1914, Chap. 121, Sec. 28, S.S. 1) provides that a trustee may entrust moneys in his hands to a trust company incorporated or licensed under the laws of Ontario to invest as his agent in trustee securities. These securities are generally issued in the form of guarantee investment receipts, and carry the guarantee of a trust company as to payment of principal and interest thereon. By the amendment to the Loan and Trust Corporations Act referred to, where moneys are so received for investment by a trust company,

"(a) Such money shall be invested only in securities authorized by the Trustee Act.

"(b) Securities to the full amount of the moneys so received for investment and guaranteed shall be earmarked and set aside as definitely pledged as security therefor.

"(c) A sworn return shall be made to the Registrar quarterly on the 15th days of March, June, September and December in each year, drawn in accordance with the form prescribed from time to time by the Registrar, showing all such securities as they stood at the end of the last preceding month, and stating that they have been definitely set aside as securtiy for guaranteed investments."

A Good Investment

These guarantee investment receipts issued by conservatively managed trust companies provide an excellent form of investment for trust moneys, carrying as they do a double guarantee, first, the earmarked trustee securities, and secondly, the guarantee of the trust company receiving the funds. The average rate of interest on these receipts, which are generally issued for three, four or five-year periods, during the past year has been 5½ per cent. per annum.

In the spring of last year, prospects for a large loaning business looked particularly bright. It was the first year of peace after the world war. The building trade for obvious reasons had fallen far behind its requirements and there was a serious shortage of dwelling houses throughout the country. Unsettled labor conditions, however, made both building contractors and private individuals "go easy" with their plans, with the result that building operations have been much less extensive than they would otherwise have been. Despite this fact, however, a considerable amount of building took place, and there was a large increase over the previous year in the amount of funds loaned by trust companies on first mortgages over improved city property.

The average rate of interest on mortgages in Ontario is from 6½ to 7 per cent. per annum or from ½ of 1 per cent. higher than before the war. Interest payments have been particularly well met during the year. Despite the increase there has been in the interest rate, many beneficiaries whose incomes have been fixed by a will or other trust instrument, and is derived principally from this source, find that the high cost of living has practically cut their income in half.

One Merger and One New Company

During the past year a new trust company associated with one of the chartered banks made its appearance in Montreal, whilst two of the younger companies in Toronto formed an amalgamation which was welcomed by the other trust companies. There are now about thirty regular trust companies in Canada. The records of our Courts show that each year they are being more widely entrusted with the care and management of estates, both as executors named in the will, and as administrators at the request of the next-of-kin in cases where the deceased has died without a will. The accuracy with which the inventories of the estate are compiled both on the application to the Courts for probate or administration and of the completeness of the estate accounts when they are being audited by the Surrogate Court Judge has greatly facilitated the work of the courts and of the Succession Duty Office. In estate management as in other departments of work, method and neatness tend toward accuracy, whilst careless accounting and dishonesty are next door neighbors.

Services in War Loan

During the recent Victory Loan campaign the trust companies rendered material assistance to the federal government by subscribing from their own funds, and by investing in Victory bonds, trust funds under their care. The total amount so subscribed reached many millions.

Service, that is the watchword of to-day. Men and institutions are being tested by the quality and extent of the service they are rendering to the common weal. Trust company service provides both economy and efficiency and by so doing has secured a large place in the business life of our country. In the coming years it is sure to find a still wider field, and will make still larger contributions towards maintaining sound business in the Dominion.

TRUST COMPANY ASSETS OVER HALF BILLION

In the accompanying table statistics are given of trust companies doing business in Canada during 1918. The figures are not complete, but all the larger trust companies are included in the list.

Total assets held by trust companies at the end of 1918 were $551,428,791. The paid-up capital was $16,175,709 and reserves were about one-half this amount. The profits for the year so far as reported totalled $1,530,814, which is about 9 per cent. on paid-up capital; dividends varying from 3 per cent. up to 16 per cent. were paid. While some of the companies date back before 1900, it will be noticed that most of them are comparatively young. Considering this fact, the aggregation of well over $500,000,000 of assets indicates the rapid progress that has been made. As pointed out in the accompanying article entitled, "Trust Company Progress in 1919," the advantages of corporate administration are being more and more appreciated.

RELATIONS WITH OTHER BANKS

In the course of their business the Canadian banks keep funds on deposit not only with banks in the United States, the United Kingdom and other countries, but also with other chartered banks in Canada. The largest sums are, of course, kept on deposit in the United States. The figures below illustrate this phase of Canadian banking during the past three years:—

1917.	Due from banks in Canada.	Due from banks in U.K.	Due from banks elsewhere.
January	$4,720,765	$30,238,719	$51,669,106

Effects of Canadian Trade On Exchange

How War Time Trade and Finance Have Placed Exchange Rates at Present Levels—Influence of Investments—Canadian Tariff Wall Against United States Now Higher in Proportion to Premium on New York Funds.

THE effects of the new trade situation on exchange are described and illustrated in an interesting way in the National Bank of Commerce Monthly for January. The article says:—

"The need of Canadian importers for New York funds upon which to draw in order to meet obligations incurred from purchases in the United States is so great that on December 15 New York exchange was at a premium of 9 per cent. in Montreal, and Canadian funds were at a corresponding discount in New York. As usual, Canada finds herself a debtor to the United States, but a heavy creditor of Great Britain. At present, however, British firms owing for Canadian purchases desire time in which to meet their obligations, both because of the disorganization of British economic life as a result of the war, and because immediate payment would impose a heavy additional burden in the face of the present situation as to sterling. In other words, Canadian exchange on New York is suffering from the factors which have so violently depressed sterling. During the course of the war, Great Britain shipped large amounts of gold to Canada, and, until our entry into it, Canada in turn shipped considerable quantities of gold to the United States, but that movement practically ceased when we became participants in the struggle. At the present time, although the gold stocks in the Dominion are adequate to maintain a satisfactory currency position, it is quite impossible to correct the exchange rate by gold shipments to the United States.

"Before the war, New York funds were at a slight discount in Montreal during part of the year, and at all times the fluctuation in exchange between New York and Canada was through a very narrow range, as it cost but seventy cents per $1,000, or $^{5}/_{64}$ of 1 per cent. on either side of par, to transfer gold. This was reflected in the custom of circulating Canadian and United States coins at par in the border cities. Chart A shows the fluctuations in the cost of New York exchange in Montreal for the ten years from 1910 to 1919. The movement is expressed in premium or discount per $1,000 in dollars.

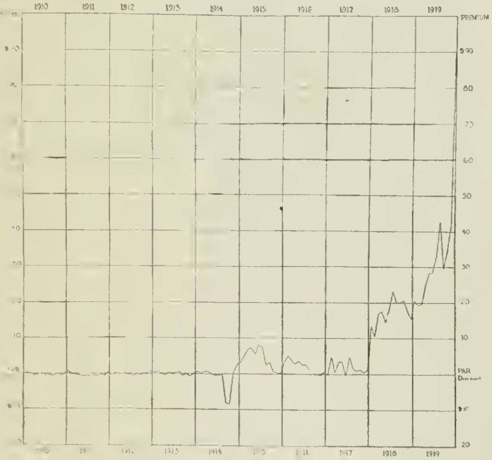

CHART A—FLUCTUATIONS FROM PAR OF NEW YORK EXCHANGE IN MONTREAL
Premium or Discount per $1,000.

"Although in comparison with the depression of other foreign exchanges the discount on Canadian exchange is not great, it has caused a good deal of worry in Canada, because of the closeness of the commercial relations between the Dominion and the United States. It has been especially annoying because the financial and trade position of Canada is thoroughly sound. Prior to 1916, imports of merchandise into Canada, with the exception of a few unusual years, had exceeded exports. Beginning with that year, however, as a result of war conditions, the current turned, Canadian exports being well in excess of imports. Chart B indicates the movement of merchandise in and out of Canada from 1910 to date.

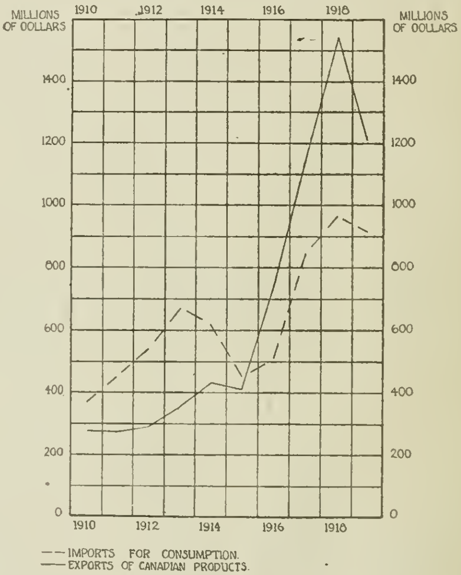

CHART B—CANADA'S FOREIGN TRADE

"Not only have Canadian exports as a whole greatly increased, but a remarkable change is taking place also in their character. Manufacturing exports in the fiscal year ended March 31, 1913, were about $44,000,000, while for the fiscal year ended March 31, 1919, they were $549,000,000, a remarkable increase, even when due allowance is made for the rise in prices.

"Canada has for sale the products which Great Britain desires to buy. Hence a large share of the total goes to the United Kingdom. Before the war the British share constituted approximately half of Canadian exports. By 1917 it had risen to 65 per cent., although for the fiscal year ending March 31, 1919, it declined to 44 per cent. On the other hand, Canada buys in the markets of the United States. The percentage of the total imports received from this country has risen steadily from 59 per cent. in 1910 to 82 per cent. in 1919. Charts C and D show the position of Canada with regard to merchandise movements to and from the United States and Great Britain.

"The degree to which Canadian commercial, financial and industrial organization is bound up with that of Great

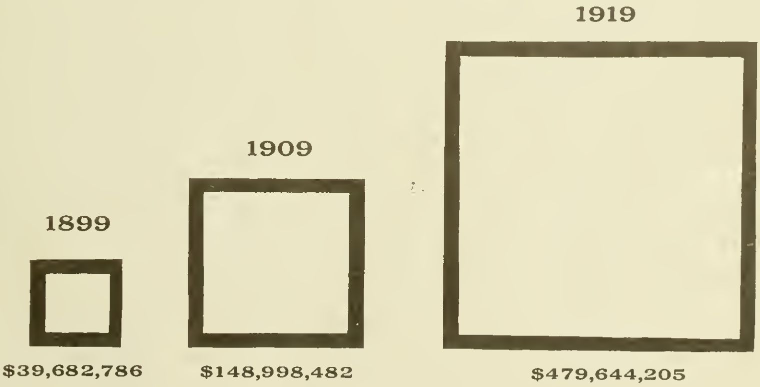
ESTABLISHED 1867

Paid-up Capital	**$15,000,000**
Reserve Fund	**$15,000,000**

TOTAL ASSETS



The diagram above sets out graphically the strides made by this Institution in the past twenty years.

The number of branches has increased from 55 in 1899 to 507 at the end of November, 1919. They include all the important towns and cities in Canada and Newfoundland, and such important centres as London, Eng., New York, San Francisco, Portland, Ore., Seattle and Mexico. The Foreign Department at the Head Office is well equipped to advance trade between Canada and other countries.

Britain and the United States is by no means solely measured, however, by the direction of trade relations. Canada, from the standpoint of development of natural resources, is a new country. Before the war, she was a consistent importer of capital, which was supplied from London and New York. In October, 1919, Canadian securities held in the United States, including holdings of government, state and municipal bonds, and in railroads and public utilities, but excluding Canadian industrial securities, amounted to more than $400,000,000. Investments of capital from the United States in Canadian industrial enterprises take varied forms, and it is not possible to determine an exact total. A large part of our investments there consist in Canadian branches of United States manufacturing industries. Our citizens, also, are holders of securities of industries primarily Canadian as to invested capital, and Canadians are to a degree investors in enterprises in the United States.

U. S. Investments Still Coming

"A careful estimate placed investments of capital from this country in Canadian industrial concerns at $265,000,000 in May, 1919. Since that date it is believed that there has been a considerable increase in these investments, which now probably approximate $300,000,000, so that the total of capital from the United States invested in Canada is known to be in excess of $700,000,000. Payments of interest and capital make a large addition to the balance which must be remitted by Canada to the United States.

"British investments in Canada are also very large, and the war has further complicated British-Canadian financial relations. Great Britain advanced large amounts to the Canadian government during the progress of the war, and in the aggregate Canadian interest payments to Great Britain are heavy. On the other hand, Canada made direct advances to Great Britain, and made heavy sales of Canadian products on credit.

"The Canadian exchange market is New York. This is inevitable, because New York is the centre for dealings in exchange in North America, exactly as London is for Great Britain. Canadian exporters, therefore, draw in sterling against British importers, and the bills are sold in New York. Wheat and other food products are the leading exports from Canada to Great Britain. In normal years this gives a seasonal character to the Canadian export trade, and during those times of the year when their products were being chiefly marketed in Great Britain there was a large amount of Canadian-owned sterling sold in New York, with a consequent accumulation here of Canadian funds. Those Canadian importers who could arrange to pay their obligations in the United States during the fall and early winter were therefore able to remit at a small advantage, while New York funds were usually at a slight premium in Canada in the late winter, spring and early summer. It will be seen, however, that the seasonal advantage held in the New York market by Canadian importers of goods from the United States was dependent upon the payment of British indebtedness to Canada, which is now being deferred for reasons already noted.

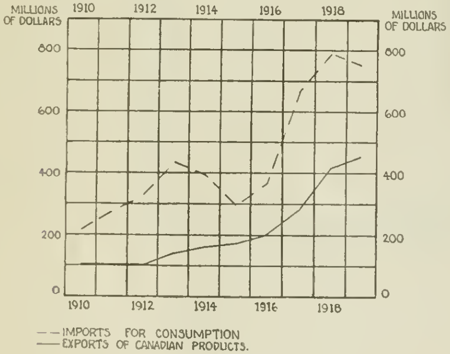


Chart C—Canada's Trade With United States

Protection to Canadian Manufacturer

"The present situation is disadvantageous to the exporter here because it amounts in effect to an addition to the tariff protection which Canadian manufacturers enjoy. It tends to discourage Canadian purchasing in the United States, but, on the other hand, in so far as Great Britain can supply Canada's needs, British products in Canada have the advantage of the discount on sterling. At present, however, British productive capacity is far from normal, and even if this were not so, in most lines Canadian purchasers are accustomed to goods from the United States. Especially in the Canadian Northwest, a considerable part of the population consists of immigrants from this country accustomed to products manufactured in the United States. Buying in Great Britain in greatly increased quantities, therefore, does not seem very likely. The Canadian viewpoint is that correction of the situation will be brought about by curtailment of imports from the United States, which already shows evidence of being under way, and replacement by Canada-made products. It is felt that this will not only serve to correct the exchange rate, but will serve also to occupy those Canadian plants which expanded for war production.

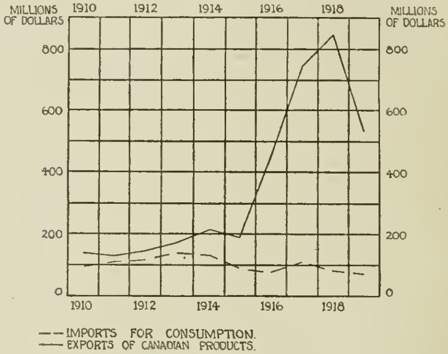

Chart D—Canada's Trade With United Kingdom

"It is also hoped that Canadian exports to the United States will increase, although such expansion will inevitably be limited to certain special lines, since in many respects Canadian industries are practically identical with those of the United States. With free trading, we can absorb increased quantities of Canadian wheat and flour, which is of that strong type in which our native supply is this year especially short because of the drought in the north-west. Free importation became possible on December 15, 1919. We could also absorb increased quantities of Canadian wood pulp, and we could use more Canadian paper, if the present demand for it continues. As our own forests disappear, our markets would also absorb larger imports of Canadian lumber. For the most part, however, Canada can sell in the United States only by superiority of product or lower cost of production. Natural advantages in her favor are limited to a very few products.

"Increased investment of American capital in Canada is also expected to exert an influence toward reduction in the premium Canadians must pay for New York funds. This is taking place, as already noted, not, however, by the flotation of large government loans or private issues, but by a gradual and quiet movement of capital by individual investors. An interesting feature of the investment situation which has resulted from the exchange rate is that Canadian holders of provincial or municipal bonds are profiting by the fact that most of them are payable, both as to interest and premium, either in Canada or New York."

—In Canada and Abroad

Coincident with Canada's foreign trade ambitions we have made remarkable progress toward the fulfilment of our policy to build up an institution of an international character that will provide a financial highway for Canadian trade with foreign countries.

Across Canada there are more than 390 branches of the Union Bank of Canada.

We have our own New York Agency, (49 Wall Street) and two branches in London, Eng., (6 Princes St., E.C., and 26 Haymarket, W.)

In addition, branches of the Park-Union Foreign Banking Corporation, which is jointly owned and controlled by the National Park Bank of New York and the Union Bank of Canada, offer direct banking connections in the Far East, at San Francisco and Seattle in the U.S. and in Paris, France.

Capital and Reserves of Canadian Banks

Authorized, Subscribed, and Paid-up Capital Decreased in 1917 and 1918, but Increased Last Year — Reserve Shows Increase Each Year — Feature of 1919 Has Been Substantial Additions Made by Twelve Banks

To offset the declining value of money, and also to be prepared for business expansion, many of the Canadian banks have during the past year made increases in their capital. During 1917 there was only one increase in authorized capital, when in March of that year the Banque d'Hochelaga had its authorization increased from $4,000,000 to $10,000,000. The Quebec Bank was taken over by the Royal; its authorized capital was $5,000,000. During 1918 there were no increases, and through the dropping out of the Bank of British North America and of the Northern Crown Bank the total authorized capital of Canadian banks decreased from $189,866,666 to $179,000,000.

During the past year the following increases have been authorized:—February, Bank of Montreal, $25,000,000 to $28,075,000; March, Union Bank, $8,000,000 to $15,000,000; May, Bank of Nova Scotia, $10,000,000 to $15,000,000; July, Merchants Bank, $10,000,000 to $15,000,000; October, Provinciale, $2,000,000 to $5,000,000. This is a total of $23,075,000, but in May the Bank of Ottawa was absorbed by the Bank of Nova Scotia, and after its authorization of $5,000,000 is deducted, the net increase is $18,075,000.

Subscribed Capital

In 1917 the Royal Bank increased its subscribed capital by $911,700; that of the Standard was increased by $40,800, and that of the Weyburn Security by $10,000. The elimination of the Quebec Bank with a subscribed capital of $2,735,000 reduced the total from $113,863,966 at the end of 1916 to $112,091,466 at the end of 1917.

During 1918 the following additional stock was subscribed:—Standard, $26,900; Weyburn, $6,000; Montreal, $2,903,800; Royal, $1,088,300; and the Bank of British North America and the Northern Crown Bank, with subscribed capital of $4,866,666 and $1,431,200 respectively, dropped out, making a net decrease of $2,272,866.

Larger amounts still were subscribed in 1919, no less than eight out of the 18 now existing banks opening their books for further subscriptions. The total subscribed (par value) up to the end of October was $12,312,700. The amalgamation of the Bank of Ottawa with the Bank of Nova Scotia on May 1st effected a reduction of $4,000,000, so the net increase during the first ten months of the year was $8,312.700. The new subscriptions for the various banks, by months, are shown in the table accompanying this article.

The totals of authorized and subscribed capital of Canadian banks, as shown by the statements issued by the Finance Department, have been as follows:—

1918.	Capital authorized.	Capital subscribed.
January	$189,866,666	$112,091,466

1919.	Capital authorized.	Capital subscribed.
January	$179,000,000	$110,492,200
February	182,075,000	111,335,200
March	189,075,000	112,401,700
April	194,075,000	114,927,400
May	189,075,000	115,784,700
June	189,075,000	116,360,000
July	194,075,000	116,599,100
August	194,075,000	116,665,200
September	194,075,000	117,602,800
October	197,075,000	118,131,300

Capital Paid Up

During 1917 the dropping out of the Quebec Bank with a paid-up capital of $2,735,000 was offset by new amounts of stock paid up in the other banks as follows:—Royal, $911,700; Standard, $107,350; Home, $724; Northern Crown, $275; Sterling, $4,776; Weyburn Security, $37,610. These total $1,062,435, the amount for all Canadian banks showing a reduction from $113,346,341 to $111,673,776.

A further reduction in the paid-up capital of Canadian banks is found in 1918, owing to the fact that the Bank of British North America, with a paid-up capital of $4,866,600, and the Northern Crown, in which case the amount was $1,429,447, were absorbed. Stock in the other banks was paid up with a par value as follows:—Montreal, $2,903,800; Royal, $1,088,300; Standard, $82,200; Home, $272; Sterling, $4,112; Weyburn Security, $26,010; total of $4,114,734, leaving a net reduction of $2,181,379.

A total of $12,182,905 has been paid up in 1919, up to the end of October, and after deducting $4,000,000, the paid-up capital of the Bank of Ottawa, an increase of $8,182,905 is found. The amounts paid up each month for each bank are shown in the accompanying table.

Rest or Reserve Fund

Coming to rest or reserve fund, we find in 1917 a net increase of $717,350. The additions made were as follows:—Banque Nationale, $100,000; Banque Provinciale, $50,000; Royal Bank, $1,440,000; Standard Bank, $107,350; Weyburn Security, $20,000. These total $1,717,350. The reserve of the Quebec Bank was $1,000,000.

During 1918, the following additions were made:—Montreal, $2,540,825; Nationale, $100,000; Provinciale, $50,000; Union, $200,000; Commerce, $1,500,000; Royal, $1,000,000; Standard, $82,240; Hochelaga, $100,000; Sterling, $50,000; Weyburn Security, $25,000; total, $5,648,065. The reserve of the Bank of British North America was $3,017,333, and that of the Northern Crown was $715,600. These reduced the increase to a net of $1,915,132.

Still larger additions were made during the past year, the total up to the end of October being $12,261,736. The reserve of the Bank of Ottawa was $5,000,000, so that the net increase for the ten months was $7,261,736. The additions are shown in the accompanying table.

The paid-up capital and the reserves of all Canadian banks have been as follows since the beginning of 1918:—

1918.	Capital paid up.	Rest or reserve fund.	Total.
January	$111,709,465	$114,161,223	$225,870,688
February	111,713,047	114,163,908	225,876,955
March	111,727,692	114,176,008	225,903,700
April	111,731,633	114,329,718	226,061,351
May	111,735,615	114,333,518	226,069,133
June	111,781,331	114,344,068	226,125,399
July	111,450,680	114,140,148	225,590,828
August	111,451,963	114,141,248	225,593,211

October	117,675,302	123,477,561	241,152,863

MANY BRANCHES OPENED LAST YEAR

Expansion in 1919 Was in Contrast to War-Time Inactivity—Some Staff Problems and Their Solution

DURING the war the opening of new branches by the banks was officially discouraged, but even if this had not been the case, the shortage of staff would have effectually prevented much expansion. In August, 1914, there were employed in the Canadian banks 17,674 men and 1,609 women, and in January, 1918, 14,220 men and 6,769 women. In the interval, there were nearly 8,000 enlistments, and in the ensuing nine months 1,200 more entered the army, either by voluntary enlistment or through the operation of the Military Service Act. This meant a steady stream of young men all through the war leaving the banks, as reinforcements for the Canadian Corps were required. In addition, there were some 8,000 resignations from other causes, and the task of adjusting the staffs, therefore, was not easy. Some institutions had a turnover equal to the total number employed by them in 1914.

Returned Men All Employed

In general, the banks arranged to hold their positions for the men who enlisted, and now that these have returned in considerable numbers, they are being taken on as soon as they report for duty. At one time it was thought that this might cause some hardship to those temporarily engaged, but this has been found not to be the case, all being needed, owing to the increased volume of work and the new branches opening.

With their staff troubles thus adjusted, the banks are looking for new opportunities, and since the armistice was signed some 800 branches have been opened. Some, no doubt, are due to competition and the desire to protect connections already established, but the bulk are to take care of new business, particularly in the west.

Not only have all of the returning men who desired to re-enter the banks' service been employed, but in almost all cases they were given the increases in salary to which they would have been entitled had they not enlisted. The banks have gone out of the way in helping employees meet the higher scale of prices, by the granting of increases higher than the schedules, and by special bonuses at the end of the year.

All Provinces Get New Branches

The table on page 80 shows that the Canadian banks had, all told, on October 31, 1919, 4,202 branch offices, of which 4,050 are in Canada. The increase for all branches is 985. and for Canadian branches only, 953 for the year. This is distributed as follows: Ontario, 229; Quebec, 235; Nova Scotia, 30; New Brunswick, 27; Prince Edward Island, 17; British Columbia, 38; Manitoba, 90; Saskatchewan, 163; Alberta, 131.

According to population, Canada has a greater proportion of banking offices than any other country, one to every 2,000. In England, the proportion is one to 5,087, Scotland one to 3,660, Ireland one to 4,300 and the United States one to 3,800.

Downward Tendency In Foreign Exchanges

Sterling Dropped When Government Support Was Removed—Other European Exchanges Range Down to Vanishing Point—Canadian Funds Stronger but Lost Ground During Year.

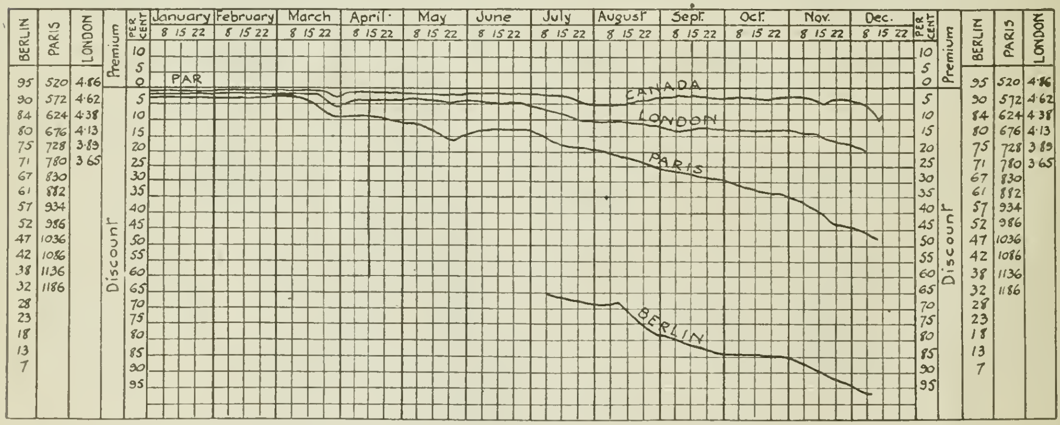
By J. S. MUNRO.

THE outstanding feature of the exchange market in 1919 was the sudden drop in sterling on 21st March, resultant on the "unpegging" of the rate by the British government. The sterling rate was fixed at an early period in the war at 4.76 7/16 through an arrangement between the British government and Messrs. J. P. Morgan and Co., New York. On the withdrawal of the government support the value of the pound dropped on the New York market within a few days to 4.58½. During the first week of April the market stiffened, quotations going as high as 4.68½. Since then the curve has been steadily downward, with sudden drops in July, November and December, until now the pound sterling is only worth 3.77.

French exchange fell in sympathy with the drop in sterling, but with greater rapidity. Francs in New York were quoted on 21st March at 5.71 to the dollar and are now 11. Trading in marks was resumed in July. The first quotations were 32 cents per four marks, since which they have declined steadily to about eight cents for four marks, or to two cents per mark.

Canadian funds were fairly steady from the beginning of the year at from 1 15/16 to 2 21/32 discount. They sagged towards the end of March and recovered a portion of their loss during April, but, like British and French funds, the course has been downwards, although not to such a marked extent as either British or French exchange, even after the spectacular drop to 11 per cent. during the first half of December, from which, however, there was a sharp reaction to 10 per cent. and a subsequent recovery to about 8 per cent.

The close of the year sees the exchanges of all the belligerent countries, with the exception of the United States, anywhere from about 8 per cent., in the case of Canada, to almost vanishing point in the case of Germany and some of the smaller countries in central Europe.



RAPID SPREAD OF RURAL CREDIT MOVEMENT

In the course of two years the rural credits societies in Manitoba have increased in number from one to thirty-eight. The Manitoba Rural Credits Act was passed by the provincial legislature in 1917. It provides for the organization of district societies with a minimum membership of fifty farmers, each of which are required to subscribe to $100 worth of stock of the society, of which he pays $10 in cash. The provincial government and the municipality in which the society is situated subscribe a like amount, thus giving each society a nominal minimum working capital of $10,000. With this as a basis of credit the society procures loans for its members from the local branches of Canadian chartered banks, the borrower being charged 7 per cent., while the bank gets 6 per cent., the balance of 1 per cent. going to the society to cover operating expenses and augment the guarantee funds.

Only one society was organized and operated in 1917. In 1918 there were 10 and a statement just issued shows that in 1919 there were 38 active societies, the members of which actually borrowed $1,051,876. The statement shows that the credits granted in 1919 were for the following purposes:—

Livestock	$ 172,532
Machinery	94,155
Crop loans	246,739
New breaking	247,691
Seed grain	32,009
Improvements	18,865
Retiring liabilities	56,742
Sundry items	183,143
	$1,051,876

It is estimated that the amount loaned for new breaking in 1919 represented at least 30,000 acres brought under the plough for the first time, and, according to past records, this new land should add one million dollars to the agriculture production of the province next year. The rural credit system of Manitoba is the first of its kind, not only in Canada, but on the North American continent.

The Home Bank's Thrift Account Book

A family budget and method of keeping account of household expenses; contains special tabulated forms for detail of taxes, insurance, mortgage or rent and outstandings, with record for payments; a page for payments of gas, electric light, water, fuel and telephone accounts in parallel columns; a yearly summary for all expenses of the household.

Complete in Sixteen pages.

Good for one year beginning upon any date.

Distributed at all Home Bank offices in the interests of thrift.

Ask for a Copy at the nearest office of the
Home Bank of Canada

Course of Bank Deposits and Loans

Canadians Have Purchased More Securities Than Ever Before, and Still Deposits Increase — Recent Tendency in Loans Has Been Downward

THE comparative table of bank figures on another page shows a steady increase in the monthly totals under these headings as compared with previous years. As compared with 1914, the increase is tremendous. Owing, however, to the decrease in the value of the dollar, this does not indicate a corresponding increase in the actual volume of trade over former years. According to the index numbers for Canada published by the Department of Labor the purchasing power, or in other words, the value of the dollar, is just one-half, in 1919, what it was in 1914, and when the various totals are compared due consideration must be given to this fact.

Little Change in Relative Position

As they now stand the relative positions of the various totals of the bank figures are the same as before, and Canadian institutions, therefore, are in the same healthy condition they were then. Probably better, in fact, as owing to the impetus which war conditions gave to trade, their customers have benefited very largely. The unprecedented demand, coupled with the shortage of new goods, has enabled dealers, retail as well as wholesale, to clear their shelves of all dead stock at a profit, and the high prices should have prevented the accumulation of unsaleable goods in their hands. There is also a more prompt collection of outstandings and this improvement in merchandising methods is reflected in the steady decrease in the number of commercial failures. The returns called for under the federal income tax law will also force better bookkeeping methods on traders as these require detailed information as to annual turnover, expenses and profits, which previously in too many cases were unknown even to the dealer, as every assignee knows.

Bank deposits, particularly those payable after notice as distinguished from those payable on demand, are generally accepted as a fair indication of the habits and state of mind of the country. On this basis the course of these deposits in the Canadian chartered banks for the last five years is very reassuring. The averages of all deposits for these years are as follows (000,000 omitted):—

	Demand.	Notice.	Total in Canada.	Dep. elsewhere than in Canada.	Total.
1914	$346	$ 656	$1,012	$ 97	$1,099
1915	358	690	1,048	110	1,158
1916	428	780	1,208	155	1,363
1917	468	928	1,396	178	1,574
1918	587	966	1,553	206	1,759
1919	584	1,091	1,675	227	1,912

When it is remembered that during these years the many issues of debentures and other securities which formerly were taken by foreign investors were largely purchased at home, and in addition that Canadian war loans to the extent of $1,400,000,000 were chiefly subscribed for and taken up in Canada, the showing is gratifying. This does not take into consideration the loan of 1919, the subscriptions for which will not be all paid in until the early months of 1920.

Savings Record Is Good

Canadian bank deposits amount to about $221 per head of population, and of this $144 is in the deposits payable after notice. These deposits as a rule are those belonging to the savings depositors of the banks. As a basis of comparison this would indicate a high average well-being in this country, especially when it is remembered that these figures do not include deposits in government savings banks and in loan companies and other savings institutions.

The war has taught Canadians to save as no one dreamed was possible and the habits thus formed will prove of inestimable value to the country in those periods of financial stress which occur from time to time in the business life of every community.

CANADIAN BANKS' RELATIONS WITH ENGLAND

Freedom in Trade Means Additional Business for Banks—Exchange Rate Sends Securities Here

BY S. L. JONES

IN the days of peace, which may be referred to as "piping" or not—just as it pleases you—when the cash resources of Great Britain were increasing at the rate of something like two hundred millions of pounds per annum, the British proprietor of capital looked to the newer portions of the Empire to provide investments, and Canada saw to it that her requirements were not neglected. Federal, provincial and municipal loans and issues and flotations of all kinds were made in London. Railways were financed, and mining, industrial and land enterprises were assisted by British capital. Promoters and investment brokers were always present in London in great numbers, each one with his "proposition" to lay before the city financiers and controllers of capital. The rates of exchange were then normal and through the banks the golden stream was directed in its proper channel to its destination.

Then came the war and the monetary rise in the value of the pound to nearly $6.50, caused by the drawing in of British resources, followed by a decline to $4.50, and a subsequent "pegging" of the rate whereby the price was maintained by artificial means in the neighborhood of $4.76 until the spring of the present year. The export of British capital was prohibited and Canada had to look to the United States for her financial sinews. Meantime, she was manufacturing and exporting munitions of war and obtaining high prices for her foodstuffs, thus helping to provide the means for the flotation of her own very successful domestic war issues.

New York Now Fixes Exchange

After the "unpegging" of the rate by the withdrawal of supporting purchases this spring, the dollar value of the pound commenced to decline. Great Britain was spending much more in the United States than that country was spending in Great Britain and the British government would not allow the continuous export of gold whereby, in former times, fluctuations were checked and adjusted. It is, of course, understood that the value of the pound in Canada depends upon the New York price and it is a rather sad commentary on the effect of the war in shifting the financial centre of the world across the Atlantic that the sterling rate is now dictated from New York. London dealers in exchange look to the New York ones for a lead when there is unsettlement, whereas London formerly held the reins.

This decline in the value of the pound has created a situation whereby the American and Canadian investor can buy back the securities which were placed in Great Britain before the war at prices to benefit both the British holder and himself. Consequently London brokers have been busy in filling American and Canadian orders for all sorts and varieties of dollar bonds, debentures and stocks that have been put away in British strong boxes and stockings for years. Again the banks are called upon to direct the stream, this time in the opposite direction. The lower the value of the pound goes, the more tempting are the bidder's offers and soon Canada will own all her own securities.

THE STANDARD BANK OF CANADA EST. 1873

Old Banking Business Restored

The Canadian banker in London, as agent for his home branches, in normal times handles the shipping documents in connection with the food exports from Canada to this side of the water, but during the war the authorities took control of these, and, for the time being, only the government banker was interested. During that period the Canadian military forces had to be looked after, for officers who were customers at Canadian branches usually brought their banking accounts to the London office of the same institution. Many were the commissions executed and varied the services rendered to officers and men in the field and in camp or town by their fellow-citizens in the London banks.

Now once more foodstuffs are coming to British ports free of government control, and wheat is the only commodity that is not dealt in by private contract between the Canadian exporter and the foreign agent. The British government still subsidizes the bakers, whereby the price of the loaf of bread to the consumer is kept in check. As far as exports from Canada other than necessities are concerned, the rate of exchange is not encouraging but, on the other hand, it operates to the benefit of the British exporter. For the same reason with the German mark at the present low valuation, an impetus is given to exports from that country, which is having its due effect.

BANK AND DOMINION NOTE CIRCULATION

Increase Is Due to Business Expansion and to Lower Money Value—Reserves Have Been Kept Intact—Comparison of Monthly Circulation Since 1917

ONE index of trade activity in a country is the volume of currency necessary to carry on business. This trade activity, in certain lines particularly, is due in no small measure to freer spending habits than heretofore in the community in general. War industries, with their sudden demands for labor at increasingly high wages, are responsible for much of it, and though these industries have ceased the habits remain. In Canada this currency consists of notes issued by the chartered banks and by the Dominion government, and silver coins, this latter being about 10 per cent. of the total amount of all currency in the hands of the public. In 1914 the average amount of currency in circulation was $150,000,000, of which $19,500,000 was silver, $104,500,000 bank notes and $25,000,000 Dominion notes. The total amount of Dominion notes issued was $114,000,000, but of this $69,000,000 was either held by banks or deposited by them as security, for notes issued by them in excess of paid-up capital, and cannot therefore be taken into account in arriving at the actual amount in circulation. This worked out on a per capita basis as follows: silver, $2.54; bank notes, $13.54; and Dominion notes, $3.68, or a total of $19.41.

Since 1914 there has been a steady rise in these figures, the annual totals working out as follows:—1915, $19 per capita; 1916, $21 per capita; 1917, $25 per capita; 1918, $30. The complete figures for 1919 are not yet available, but will show in all probability about $33 per capita. Part of this is due to trade activity, but an important reason is the decrease in the value of the dollar as shown in its decreased purchasing power, and there is required, therefore, a greater amount of currency to do the work.

How the Notes Are Secured

With this great increase in circulation, however, there has been no decrease in security. The Act of 1914 under which the Dominion notes are issued calls for a reserve of 25 per cent. in specie against the first $50,000,000, and dollar for dollar either in gold or approved securities for any issue over this amount. In 1915 an issue of $26,000,000 was authorized, $10,000,000 in connection with the Canadian Northern Railway, and $6,000,000 for the Grand Trunk Pacific, against the securities of these corporations, and $10,000,000 to meet maturing obligations of the government. These securities are not included among the approved securities held against note issues and in the government reports appear as uncovered. The various acts, therefore, authorize an uncovered issue of $63,500,000. This excess, however, was intended as a temporary measure, and was never fully availed of, the present uncovered issue being $46,000,000, or only $9,000,000 more than the original act contemplated. The banks under their charters may issue up to the amount of their paid-up capital, any further issues to be covered, dollar for dollar, by a deposit in the central gold reserves. In addition, each bank may, during the crop-moving period, issue up to 15 per cent. of its paid-up capital and reserve, and on this excess interest at the rate of 5 per cent. per annum must be paid to the government by way of tax. On the notes issued against the deposit in the central gold reserve there is no tax, and on the ordinary issue there is a tax of 1 per cent.

Proportion of Reserve to Notes

During the year 1918 and up to the time this article was written this privilege has not been availed of to any extent. The bank circulation has been handled on very conservative lines, excess issues being practically always covered by deposits in the gold reserves, as the following figures (000,000 omitted), show:—

1918.	Capitalization.	Circulation.	Gold reserves.	Excess.
August	$111	$200	$ 91	....
September	111	211	100	....
October	106	227	123	$2,000,000
November	106	234	131	....

August	115	222	106	1,000,000
September	117	225	115	....
October	117	236	126	....

Circulation Over Three Years

During 1919 bank circulation, as shown by the comparative table given above, has greatly increased in volume over the previous year. In November the highest point for the year is usually reached, due to the amount of currency required to handle the western crops. During the year the monthly average was about $20,000,000 more than in 1918. The November figure is $237,547,162, which is just $2,500,000 more than the figure for November, 1918. The figure for December, 1919, is not available at the time of writing. Experience of past years would indicate, however, that the November figure will be the highest for 1919, and no doubt the December circulation will be lower by several millions.

The average amount of bank notes in circulation on the last day of each month, over a period of three years, has been as follows:—

	1917.	1918.	1919.
January	$133,358,187	$171,674,464	$203,424,472
February	138,257,295	176,369,296	204,779,750
March	148,265,140	191,058,404	214,576,870
April	145,550,619	180,654,964	208,958,572
May	142,653,596	181,889,959	215,895,050
June	156,625,701	194,681,710	217,608,195
July	154,692,268	187,865,833	206,906,941
August	156,450,657	200,839,660	222,461,915
September	177,589,268	211,623,856	225,907,997
October	189,852,907	227,597,808	236,477,479
November	196,135,810	234,982,978	237,547,162
December	192,923,824	224,501,117	....

Four Points to remember !

1. Strength Paid-Up Capital - $1,500,000 Reserve Fund - $2,000,000
Assets under Administration Exceed - $90,000,000

2. Experience Established in 1882 this is the oldest Trust Company in Canada. Estates under our care are managed by officers of wide experience in all the duties of estate management.

3. Service Our constant aim is to furnish a trust company service second to none. Beneficiaries and Clients are assured of courteous treatment and prompt dispatch of their business.

4. Confidence The confidence of the public in the Corporation is evidenced by the constantly increasing volume of business entrusted to our care. During the past seven years our business has doubled in volume.

QUALITY **ACCURACY** **SECURITY**

Meeting Currency Requirements in War Time

Finance Act of 1914, and Dominion Notes Act, 1914, Were Two Measures Which Have Endured Test of War Time—Operation and Effect of the Acts—Their Possibilities As Permanent Measures, and Some Objections.

By W. G. MORE.

THE Finance Act of 1914 was passed originally at the special session of parliament convened in August of that year to provide machinery to deal with any crisis which the outbreak of war might involve, and also to ratify certain steps to that end which had already been taken under Orders-in-Council. The chief provisions of the Act, which are not widely known, were (a) the authorizing of advances by the government to the banks by the issue of Dominion notes against approved securities; (b) the authorizing of payment by the banks in bank notes as legal tender in place of gold or Dominion notes; (c) the authorizing of additional circulation by the banks to the extent of 15 per cent. of their combined paid-up capital and rest during the whole year in place of during the crop-moving period only as theretofore; and (d) the suspension of redemption in gold of Dominion notes. Though originally intended as a purely temporary measure, these provisions have been continued in force from time to time until in June of this year an Act was passed extending them for the definite period until the end of two years after the conclusion of peace. That the provisions made in August, 1914, have been sufficient without additional financial legislation of any kind and practically without change to tide the country over the period of stress and strain which has been endured during the past five years, is a tribute to our banking system and to the wisdom and foresight of those charged with administration of the nation's affairs at that time.

Dominion Notes Act

The last three of the above four main provisions of the Act do not require further explanation, but with regard to the chief provision—namely, the granting of advances by the government to the banks by the issue of Dominion notes, to enable this to be accomplished, it was necessary at the same time to pass another Act called the Dominion Notes Act, 1914. Under that Act, re-enacting the law as it formerly stood, the Minister of Finance is required to hold security in gold to the extent of 25 per cent. of the first fifty million dollars of Dominion notes issued and 100 per cent. in excess of such amount, but under the Finance Act, securities deposited with the Minister by the banks for advances are deemed to be security required to be held by the Minister within the meaning of the Dominion Notes Act. In this way the securities deposited by the banks for advances of notes take the place of the gold which the Minister would normally be required to hold.

That these Acts, the Finance Act and Dominion Notes Act of 1914, have played an important part in providing for the abnormal demands for credit incidental to the war, including the financing not only of the government itself, temporarily at least, but also the annual movement of our crops, at double the rates prevailing in normal times, and the manufacturing of munitions and other necessities of war, will be seen in the increase of Dominion notes outstanding, from $148,792,222 on October 31st, 1914, to $311,639,746 on October 31st, 1919, and in the balances due by the banks to the Dominion government in which are included the advances of the government to the banks. These balances, which are taken from the government returns for the month of October in each of the years 1914 to 1919, are as follows: October, 1914, $21,849,662; October, 1915, $12,563,525; October, 1916, $40,991,302; October, 1917, $62,025,194; October, 1918, $116,362,321; October, 1919, $121,028,537.

A perusal of the government returns shows that advances from the government to the banks during 1915 and the early part of 1916, when general business was at a low ebb, were comparatively small and from that time on fluctuated somewhat with the seasons of the year, but on the whole steadily increased in volume, the peak being reached in November, 1918, when the total balances due by the banks reached the huge amount of $388,970,727. It should be stated, however, these figures do not entirely represent advances as ordinary bank balances carried by the government are included, but assuming such balances amounted on October 31st, 1919, to $20,000,000, which is probably about right, there would remain a total of $100,000,000 of advances outstanding, an amount almost equal to the total combined paid-up capital of all the banks. The figure of $388,970,727 as on November 30th, 1918, was no doubt swelled by the initial payments upon the Victory Loan of that year which were deposited to the government's credit with the banks.

Profitable Business for Banks

Loans under the Act have undoubtedly been a source of additional revenue to the banks, who have thereby been enabled to borrow at a rate of interest usually not exceeding 5 per cent. per annum, and, owing to the abnormal demands for money, to reloan the amounts against the most liquid forms of security, chiefly grain documents, and sometimes even to the government itself in the shape of temporary loans pending funding of war debts, at rates of from 5½ per cent. to 6 per cent. per annum. They have also, presumably, been profitable to the government, who have obtained a reasonable return of interest merely for the cost of note printing, which as the notes would take the form of large denominations negotiable only between the banks, would be negligible in amount.

Now that the war is over and it is expected with the end of war financing in sight, demands for credit will gradually get back to a normal basis, the question has been raised as to whether the facilities provided by the Finance Act should be continued in some permanent form. There would appear to be little doubt that elasticity in our currency is desirable and necessary in times of abnormal expansions or trade activity, and so smoothly has the strain of the past four years been taken care of, that it has been suggested the Finance Act might find a permanent place in the statute book, or as there are obvious objections to the government engaging in the business of banking, that a substitute might be furnished in the formation of a bank of rediscount with powers and performing functions somewhat similar to those of the Federal Reserve Banks in the United States. It would seem, however, that the needs for which the Federal Reserve System was established in the United States have hitherto been fully served by our unexcelled system of branch banks, and that the necessity for a bank of rediscount, which would be largely owned by the government and to which our banks would take liquid securities and obligations received from customers and obtain advances in the shape of currency notes which would be an obligation of the government and from the proceeds of which fresh loans could be made by the banks, has not been sufficiently demonstrated. Indeed, it is not improbable the advances which the banks have already obtained have contributed in some measure at least to the inflation from which we are now suffering and that any system which enables banks or any other institutions to build up a pyramid of loans upon a relatively small capital must sooner or later inevitably lead to inflation and quite conceivably to disaster

If this is correct then, probably, with the enormous debts already incurred and the future so uncertain, the present may not be an opportune time to introduce a radical change of this nature and with evidence of inflation all

BANK OF NEW ZEALAND

ESTABLISHED in 1861

Bankers to the Government of New Zealand, which holds Preference Shares in the bank for $3,649,875 and guarantees its Redeemable Stock $2,579,186.

Paid-up Capital ($11,095,561) and Reserve Fund ($11,436,275)	$22,531,836

around us in the shape of abnormal increases in our Dominion and bank note circulation and large bank deposits, and the swollen balance sheets of some of our banks, anything which tends to further inflation, which experience has taught us brings in its train an era of spending and of high costs and taxation with consequent labor and other unrest, should be carefully avoided. Rather probably should our efforts be directed towards deflation and towards liquidating the advances which the banks now have current from the government. If this is to be accomplished so as to cause least inconvenience and dislocation to business, it can probably best be done gradually.

COINAGE IN 1918 AND 1919

During the first ten months of 1919 the Canadian Mint turned out more gold and silver coins than during the whole of 1918. The coinage of "coppers," on the other hand, was a great deal less. Sovereigns were the only gold pieces coined. The figures for 1918, and for 1919 up to October 31st, were as follows:—

		Gold pieces.	Value.
Coined	1 Jan.—31 Dec., 1918 ...	£ 106,516	$ 518,377.87
"	1 Jan.—31 Oct., 1919 ...	£ 135,889	661,326.47
Issued	1 Jan.—31 Dec., 1918 ...	£ 130,768	636,404.27
"	1 Jan.—31 Oct., 1919 ...	£ 171,042	832,404.40
		Silver pieces.	**Value.**
Coined	1 Jan.—31 Dec., 1918 ...	15,900,064	$2,258,744.55
"	1 Jan.—31 Oct., 1919 ...	17,096,614	2,379,697.60

The International Exchange Situation*

How Canada is Affected by New Trade Situation— Drop in European Exchanges Shows Effects of World War—Exchange Rates Will Bring Adjustment — Theory of Foreign Credits — Amounts Already Advanced to European Countries

By W. C. CLARK.

IT has been jestingly said that not until Lord Rhondda's rationing organization laid violent hands upon tea were the horrors of war brought vividly home to the average Englishman. It took a similar rude shock to awaken him to the gravity of the financial situation left to Europe as a heritage of the war. That shock came when the pound sterling, the emblem of stability and one hundred per cent. value, fell to a discount of 16 per cent. in the New York market. Cold comfort could, of course, be gleaned from the "tuppenny ha'penny" performance of the German mark and the weakness of other currencies, but this merely emphasized the completeness of the demoralization in international trading and financial relations.

The present situation is the culmination of a movement which began early in March, when France and Great Britain removed the artificial support which, since January, 1916, had kept Paris and sterling exchange "pegged" at but a slight discount in New York. The immediate result was a sensational decline in the price of sterling remittances. This reached such proportions as to disorganize the whole foreign exchange market and forced a weakening of exchange on other countries. But the pound sterling soon rallied from its lowest point and fluctuated between $4.60 and $4.65 until about the middle of July, when a flood of cotton bills and a weakening of confidence in the general situation caused a further slump. This time the rates went as low as $4.26, but later recovered, closing the month around $4.36. During June and July, exchange on all the more important centres moved decidedly in favor of New York, as will be apparent from a study of the following table showing the course of the exchanges in New York during the summer months:—

New York Quotations for Cable Transfers.

		Low —	4.95	3.65	. . . .	. . . .

This, in part, is a reflection of the fact that by lifting the embargo on gold exports early in June and removing most of the restrictions on exchange transactions a little later, the United States had become practically the only free market for gold in the world. Heavy purchases of commodities in the United States for resale to Germany explain the decline of the neutral exchanges, while the greater steadiness of Italian lire as compared with British and French exchange is in part, at least, due to the flow of funds to Italy incident to the return of Italian immigrants to their homeland. In July, limited transactions took place with Austria and Germany on a basis of 3¼ cents per krone and around 8 cents per mark. This represented a depreciation of 84 per cent. in Austrian and 66 per cent. in German currency. Japan, Spain and some of the South American republics were the only countries to have their funds quoted above par in New York, and during the period covered these premiums steadily declined.

Cause of Low Records

Since July, all the European exchanges have broken to new levels, while the fluctuations in rates have been erratic. Sterling fell as low as 4.13¼ for cable transfers, but later recovered slightly, and has since fluctuated between 4.15 and 4.27. Francs and lire have made new low records of 9.18 and 10.02, respectively. The German mark declined sharply to 3.65, and still remains below 5 cents. The Austrian krone closed on September 30th at 1.75.

Fundamentally, the cause of the situation just described is the excessively one-sided character of American foreign trade and the consequent breakdown in the current methods of striking balances in the international books. Ordinarily, one country sends to other countries, as a whole, about as much value in goods of various kinds as it receives from them; in the long run, exports pay for imports, and commodities themselves approximately settle the international balance. Another element tending to even up the balance in the trade between Europe and the United States in normal times was the interest and dividend payments sent to Europeans on their investments in American securities during the past century. There was also a considerable current exchange of securities, tending to keep the books balanced. Minor elements included remittances by immigrants to friends and relatives at home, freights on shipping carried by European bottoms, tourist expenditure, and banking and insurance commissions. If the balance were not struck by these various means, gold shipments resulted, gold being, so to speak, the small change commodity between nations. On the whole, the account about balanced, although running in favor of the United States, during the fall and winter, when cotton and wheat were going out, and in Europe's favor during the spring and summer months. Gold importations and exportations alternated, though the amounts involved were never large.

Investment Relations Are Changed

Since the war all this has been changed. The United States has bought back from Britain and France the greater part of the American securities and other American property interests held abroad, and the Alien Property Custodian is eliminating what remains of German holdings in the United States. Interest and dividend payments to foreign holders will, therefore, in the future be largely curtailed. On the other hand, the government at Washington has made loans to foreign governments aggregating nearly ten billions of dollars. These draw interest at 5 per cent., and, along with

foreign loans made on the public market and privately, will mean that the interest charges running to the United States will henceforth be of very considerable volume. Even more striking has been the tremendous increase in the so-called "favorable" merchandise balance. Before the war the United States had a balance in her favor on merchandise account averaging $500,000,000 per year. To-day that balance is piled up in a single month. In June last, exports reached the enormous total of $918,000,000, exceeding imports by no less than $625,000,000. In the fiscal year ending June 30th, the "favorable" balance amounted to $4,129,000,000, which brings the total for the past three years up to $10,734,000,000. In contrast, witness Britain swelling her so-called unfavorable balance from 150 million pounds to approximately 800 millions, and Europe in general supplying the United States with 16 per cent. of her imports as compared with a full 50 per cent. before the war. Is it any wonder that European bills should flood the New York market and sweep exchange rates past all the familiar landmarks?

Exchange Rates Adjust Trade

Fortunately, the "invisible hand" which, according to Adam Smith, beneficently controls the economic ship under a system of natural liberty, is sometimes in evidence. Natural laws do tend to correct an unbalanced state of trade and to maintain an equilibrium. When the balances running in favor of a country send its exchange to a premium, purchases in that country become more costly to the extent of the premium. New York exchange is now commanding a premium of 14 per cent. in England, 38 per cent. in France, 47 per cent. in Italy, and 81 per cent. in Germany. Buyers of American goods in these countries must pay the American price, plus the exchange premium, plus transportation charges. Purchases of American goods are, therefore, discouraged in proportion to the height of the premium. It is evident that where the premium rises, as in the case of Austria to 91 per cent., it becomes almost prohibitive. Conversely, the fall of a foreign currency in terms of the American dollar will make goods priced in that currency cheaper and encourage importation on the part of American merchants. Thus an American buyer at the present moment finds the purchasing power of his dollar increased by 13 per cent. in terms of the pound sterling, and is encouraged to buy. Or, looking at it from the other point of view, the foreign exporter may either cut prices by 13 per cent. to secure access to the American market or sell the credit received in New York for his goods to a fellow-countryman at a premium of 13 per cent. The incentive to import applies to loans as well as to goods. The high premium on New York funds will enable a foreign borrower to pay a high interest rate to obtain American funds. It creates an inducement to sell securities or borrow money in New York. The inducement will continue and increase with rising exchange rates until the check to exports and the stimulus to loans and imports eventually bring about a new equilibrium of trade. It is probably true that the decline in United States exports from $918,000,000 in June to $570,000,000 in July and the decline in the "favorable" balance from $625,000,000 to $225,000,000 are in part attributable to the corrective effect of the high exchange rates, though dock strikes and transportation difficulties had undoubtedly more influence.

Natural or Artificial Remedy

Should the situation be allowed to correct itself in this natural way? This is the question which bankers, foreign traders and public men in the United States have been discussing since March. At least two schools of thought have been in evidence. One school emphasizes the absolute necessity of maintaining the present high level of American exports, though some of its members fail to see that this implies corresponding imports or huge loans to European purchasers. The other group stresses the danger of overdoing the extension of credit to Europe in the present state of uncertainty as to future business conditions and the national credit of certain of the powers, and questions the advisability of aggravating the high cost of living at home by furthering the competition of export demand with domestic demand. The latter see clearly that extensive loans to Europe will raise the price level in the United States, not only by rendering goods scarce, but also by increasing the supply of credit or money or securities through payment for the goods. The whole situation has been well put by the monthly review of the National City Bank for August:—

Loss of Foreign Markets

"If nothing is done and American exports are curtailed, prices will fall rapidly in this country. Some people think this would be beneficial. The cost of living would come down; the problem of inflation would be solved; this would be the first country in the world to get back to a normal basis. But the effects would not be altogether agreeable. Industry would be disorganized by such a loss of markets. We would be thrown back on our own resources, and it would be some time before the domestic market would furnish employment to all the wage-earners. We would have a loss of production at a time when great need for it exists. On the other hand, Europe cannot get along without our cotton, grain, meats, copper and other raw material. Without them people will starve, industry will stagnate and social chaos will result."

A summer's discussion has brought most people to a middle position. A debtor can settle his obligations in a foreign country only in three ways: (1) by sending commodities or performing services, (2) by sending gold, and (3) by sending securities and negotiating loans. Europe will use the first method in increasing degree, but not for a long while to a sufficient degree, because of the disorganized state of its industry and its need of raw materials. It is idle to talk of helping the situation to any appreciable extent by the export of gold. Europe's gold reserve has already been badly depleted; the remainder is vital to protect its credit system, and in any case would not be sufficient for so huge a task. Moreover, the United States has already more gold than is needed or desired. Of course, some gold will be shipped. A considerable shipment is already on its way from Germany. London has given the South African mines permission to send gold direct to New York; some has already gone, and more will go. Neutral countries may also be expected to release some gold to the United States. But when all is said and done, if anything like the scale of foreign trade which is now accepted as desirable is to be maintained, the third source of payments must be largely availed of. Most Americans now realize that they must loan in considerable volume to European purchasers to enable them to obtain the raw materials and capital goods needed to re-establish European industry.

The Foreign Credit Solution

The controversy has latterly shifted from the question of *what* ought to be done to the question of *how* it ought to be done. Should the government or private corporations provide the funds? The government has solved this problem by declaring its decision to abandon its policy of foreign loans, though there is still a demand that the necessary measures to provide private funds should be organized on a semi-public basis and along lines that will have the approval of Washington. The question still remains as to what private interests should be chiefly responsible. At first business men looked to the banks, but latterly opinion has been crystallizing in the belief that what is needed is not short-time credit created by the commercial banks, but long-time or investment funds. Various plans have been formulated to supplement existing machinery. Under the Webb-Pomerene Act, manufacturers can combine to form export companies, putting in as capital such sums as they are severally willing to devote to the export business, and under the War Finance Corporation Act such export combinations can borrow from the War Finance Corporation sums based upon their financial standing. The Edge bill now before Congress provides for the formation under federal charters of corporations with a minimum capital of $2,000,000 for the purpose of engaging principally in foreign banking or other financial operations having as their object the furtherance of American commerce. It is also proposed

to amend the Federal Reserve Act by permitting national banks to invest five per cent. of their capital and surplus in the stock of such corporations, and thus set the example for other business interests. It is felt that the responsibility of the private interest directly concerned is essential to prevent reckless business, and that with the aid above outlined, those whose products are to be sold and who reap the advantage of such sales ought to be prepared to finance their own sales. Anything more would be adding a burden to the general public for the purpose of subsidizing exports.

A considerable amount of foreign financing has already been done. Sweden has sold $25,000,000 bonds in the American market, and Switzerland another $30,000,000. An acceptance credit of $50,000,000 was provided by New York bankers for a consortium of Belgian banks, and a smaller amount arranged for Czecho-Slovakia. France is now offering treasury bills in New York to a maximum of $50,000,000. Business of very considerable volume in the aggregate is also being done by private individuals and corporations. The sum-total of these loans, however, does not approach the figures of accruing trade balances, and unless the lending movement is greatly accelerated, it would appear that the decline of European exchanges in the New York market is bound to continue. Autumn always brings a very heavy movement of foodstuffs and other commodities to Europe. In past years it was ordinarily necessary to ship large sums of gold to New York in settlement for these exports. In view of the slight probability of extensive merchandise imports from Europe and the impossibility of receiving substantial amounts of gold, the pressure on the market will continue heavy, and, failing other support, prices will sag.

New Canadian Trade Relations

Only the briefest consideration can be given to the Canadian aspect of the question, though much that has already been said applies. During the present year the discount on the Canadian dollar ranged roughly from two to five cents. Individuals making some purchases in American stores have had to pay 110 Canadian cents, or even more, for an American dollar. This discount is abnormally large, though it should be noted that it is not anything like as large as the discounts quoted in New York on the currencies of most of the European nations. In other words, the Canadian dollar is at a premium in most of the world's leading trading centres. In normal times gold can be shipped from New York to Montreal, and vice versa, at a cost of about 70 cents per $1,000, so that the range of fluctuation in the exchange between the two countries is approximately only 5/32 per cent., allowing for a premium of 5/64 per cent. and a discount of 5/64 per cent. With the present restrictions on the shipment of gold from Canada, however, the range may be considerably wider. Presumably, now that the United States has lifted its gold embargo, the premium on Canadian funds will not be allowed to go above 5/64 per cent., but the discount will depend entirely on the volume of exports and imports and the invisible items in Canada's balance of trade sheet.

The peculiar triangular nature of Canada's trade will be a sufficient explanation of the present abnormal discount. A study of the following tables will make this clear. Since 1914 Canada has had a "favorable" balance of trade, decreasing in recent months, but amounting to $340,000,000 in 1918-19, and in the last three fiscal years to $1,295,000,000. This would normally be expected to cause a premium on Canadian exchange. It will be noted, however, that Canada buys mainly from the United States, and buys much more than she returns. Thus, in the last three fiscal years the balance of imports over exports in her trade with that country amounted to $1,098,000,000; in 1918-19 it was $272,000,000, and in the four months, April to July, $156,000,000. Before the war the balances in our favor in Great Britain were available to meet our obligations to the United States. To-day we have to sell to the Mother Country chiefly on credit. Recent government advertisements show that $220,000,000 of the last Victory Loan were granted to Britain for the purchase of wheat, fish, other foodstuffs, ships, etc., in Canada. Much of the coming loan will be used for the same purpose. The Canadian banks have also had to make similar advances. Canada is, therefore, in the position of selling largely to a buyer who cannot pay cash and of buying largely from a seller who demands cash terms. The discount on Canadian funds in that seller's market is the inevitable result.

As already shown, this adverse rate of exchange will in time bring about an adjustment of our trade relations. What we obviously need is to reduce our purchases from the United States and to increase them from Great Britain and the other countries which owe us gold, and which will thereby be enabled to pay us in goods. These things are just what the present state of the exchanges is doing. Canadian business men and the consumers of luxury commodities find themselves penalized from 2 to 5 per cent. in making purchases across the line, and the slight decrease in Canadian imports is in part due to this penalty. On the other hand, the discount on sterling places a premium on purchases from England. In view of the production difficulties of Britain and the firm grip which, thanks to proximity, similar tastes and habits, the American producer has on our market, this process of adjustment will not be a rapid one. It will be accelerated by any Canadian loans floated in the United States and by the sale of securities to American investors. The stimulus to such operations has already had considerable effect.

CANADIAN BANKERS' ASSOCIATION

At the annual meeting of the Canadian Bankers' Association, held in Montreal on November 13th, 1919, C. A. Bogert, general manager of the Dominion Bank, and formerly vice-president of the association, was elected president in succession to E. L. Pease. The following were elected vice-presidents: Sir Frederick Williams-Taylor, general manager of the Bank of Montreal; H. A. Richardson, general manager of the Bank of Nova Scotia; Sir John Aird, general manager of the Canadian Bank of Commerce, and C. E. Neill, general manager of the Royal Bank of Canada. The office of the association has been moved from Montreal to Toronto. Henry T. Ross continues as secretary-treasurer.

Bank Legal Decisions of 1919

Northwestern National Bank of Portland vs. Fergurson — Clarkson vs. the Dominion Bank— Banbury vs. Bank of Montreal

By M. L. HAYWARD, B.C.L.

A NUMBER of rather important decisions in cases involving banking law were decided by the Canadian courts in the year 1919, and the principal ones are summarized in the following brief review.

One rather important case was Northwestern National Bank of Portland vs. Fergurson, decided by the Supreme Court of Canada, in which it appeared by the evidence that one W. W. Fergurson and one Robert Smith were buying horses in the United States which they proposed selling to the French government, and John Fergurson, W. W. Fergurson's father, had some correspondence with the Northwestern Bank in reference to guaranteeing W. W. Fergurson's transaction and the repayment of any amount which he might borrow from the bank, and the bank wrote John Fergurson stating that it must have a guarantee from him for any sum advanced to W. W. Fergurson and Smith up to ten thousand dollars. In reply to this demand Fergurson wired as follows: "I hereby guarantee advances to my son up to ten thousand dollars," and on the strength of this guarantee the bank advanced to W. W. Fergurson three thousand dollars on his promissory note payable thirty days after date.

After making this advance the bank wired John Fergurson asking him to confirm his telegram, to which Fergurson replied stating that he confirmed his guarantee to the extent of ten thousand dollars as requested. The three thousand dollars which the bank had advanced being sufficient to supply W. W. Fergurson and Smith with all the funds they required in that locality, when the three-thousand-dollar note fell due the bank accepted a renewal signed by W. W. Fergurson and Smith alone for another thirty days, without the consent of John Fergurson and without communicating with him in regard to the matter.

Responsibility for Renewal Note

The renewal note fell due and was unpaid, and the bank sued John Fergurson on his guarantee, Fergurson setting up the defence that he was relieved from liability on the ground that the bank had accepted a renewal note without his knowledge or consent. The Supreme Court of Canada, however, decided in favor of the bank on the ground that, inasmuch as the guarantee specified no details as to the time or manner of the advances, it was a continuing guarantee which did not relieve John Fergurson, the guarantor, from his liability.

"There was nothing in the guarantee or the evidence anywhere, showing that any definite time for the payment of the advances was contemplated, and, in my judgment, the extending of the thirty-day note and the giving of a new one had no greater or other effect upon John Fergurson's liability under the continuing guarantee than the taking of the thirty-day note in the first instance," said one of the judges. "Those were matters of detail which John Fergurson left to be settled between the bank and W. W. Fergurson. John Fergurson knew from the telegram sent him by the bank that advances were being made and notes were to be taken for them, and he was asked whether he wanted Smith's name also on the notes, to which he replied that he expected his son's associates to join in liability to the proportion and extent of their interest. He said nothing about the time the notes were to be taken for, evidently leaving that detail for the decision of the bank and his son and the latter's associates. They settled upon the thirty-day note, and subsequently agreed that it should be renewed for another thirty days. It may be argued that this renewal should be treated as the first advance by the bank within the guarantee. I prefer, however, to rest my judgment upon the facts, as I have stated, and my construction of the guarantee as a continuing one, and the fact that the guarantor left all questions of detail as to the time when the advances should be repaid to the bank and his son."

"That there is no room for doubt that the guarantee was 'continuing' in the sense that it was intended to cover a series of transactions," said Judge Anglin. "The taking of a short-term note (thirty days) was surely for the bank's convenience and according to what is well known to be a usual custom even when a longer period of credit is intended and understood. It was obtained merely to evidence the debt and Smith's joint liability. It was not meant thereby to fix thirty days as the period of credit, or to render the money exicible by the bank on their expiry. The obligation of the makers had not then matured either in the sense that the bank would have been justified in taking immediate action to compel repayment, or that the guarantor would have been entitled to force the principal debtor to liquidate the liability or to secure his discharge. On the contrary, having regard to the nature of the undertaking and all the circumstances, I think the inference is irresistible that the bank intended to give, and the Fergursons well understood when the three thousand dollars was advanced that they were obtaining a more prolonged period of credit and that the thirty-day note would merely evidence the advance and might just as well have been drawn on demand or at sixty days or three months."

Sections 88 and 90 of Bank Act

Another Supreme Court of Canada case dealt with Sections 88 and 90 of the Banking Act of Canada which read as follows:—

88. "The bank may lend money to any wholesele purchaser or shipper of or dealer in products of agriculture, the forest, quarry and mine, or the sea, lakes and rivers, or to any wholesale purchaser or shipper of or dealer in live stock or dead stock, or the products thereof, upon the security of such products, or of such live stock or dead stock or the products thereof.

"The bank may lend money to any person engaged in business as a wholesale manufacturer of any goods, wares and merchandise, upon the security of the goods, wares and merchandise, manufactured by him, or procured for such manufacture.

90. "The bank shall not acquire or hold any warehouse receipt or bill of lading, or any such security as aforesaid, to secure the payment of any bill, note, debt, or liability, unless such bill, note, debt or liability is negotiated or contracted:—

"(a) at the time of the acquisition thereof by the bank; or

"(b) upon the written promise or agreement that such warehouse receipt or bill of lading or security would be given to the bank:

"Provided that such bill, note, debt, or liability may be renewed, or the time for the payment thereof extended without affecting any such security."

Advances Under Section 88

In the case referred to, Clarkson vs. the Dominion Bank, it appeared from the evidence that Thomas Bros., Limited, had from time to time obtained advances from the Dominion Bank, the advances being made from time to time on written applications of Thomas Bros., Limited, stating that "we agree to give from time to time to you security for the said advances under Section 88 of the Banking Act, covering all

the said goods, or by warehouse receipts or bills of lading covering the same or part thereof. This agreement is to apply to all advances made to us under the said line of credit, the intention being that all such goods which we may from time to time have in said buildings shall be assigned from time to time to you as security for all advances."

The bank contended that the "written promise or agreement" referred to in sub-section (b) of Section 90 of the Banking Act was not a promise or agreement required to be given contemporaneously with the proposed loan or advance, or having reference to any specific goods or property to be secured, but was a "blanket" promise sufficient to cover any future loans or advances which the bank might make up to the time when it was acted upon or security taken.

The liquidator of the insolvent firm, on the other hand, argued that the written promise referred to was one having reference to a specific loan then being negotiated for, and applying to specific goods proposed to be given in security for the loan, and the Supreme Court of Canada adopted the latter view.

Judgment of Court

"I have had no hesitation whatever in adopting the liquidator's contention on that point," said Judge Davies. "In construing such an important section as the one in question, which validates a secret and unregistered security on personal property not in possession of the bank and in direct opposition to all provincial laws on the subject requiring registration of such securities, one must exercise one's common sense and common knowledge. I cannot believe that it ever was the intention of parliament to pass a law having the object and purpose contended for by the bank.

"To my mind, the object, intent and purpose of this section was plain and sufficiently well expressed, though not perhaps so clearly as to remove all doubt. Primarily the section required that the taking of the security should be contemporaneous with the negotiation or contracting of the debt or loan. If, however, for any reason that could not be done, and scores of reasons arise to one's mind of conditions in which it could not, then the alternative of a written promise is substituted for the execution of the security. But the written promise to give security has reference, and reference only, not to a future debt or loan to be subsequently made, but to the then debt or loan being negotiated and to the goods and personal property then existing which it was proposed to give security upon, and with reference to which negotiations were taking place. It was only intended in my opinion to cover cases where the actual security could not be given because of the non-possession of the goods or property and not future or other loans than the one for the specific goods which were to be secured by such loan."

Mortgages as Security

Another interesting point arose in the same case, as it appeared that Thomas Bros., Limited, an Ontario company, while solvent, agreed to give the Dominion Bank mortgages on Ontario and on Quebec real estate, and after the company became insolvent, it gave such mortgages according to the agreement, and the liquidator attempted to set aside these mortgages.

On this point the court decided that as to the Ontario real estate the Ontario law would govern, and as Thomas Bros., Limited, were solvent at the time of the agreement to give the mortgages, the Ontario mortgage was good, but that the Quebec mortgage would be governed by the Quebec law, according to which the company was required to be solvent not merely at the date of the agreement but on the date of the mortgage itself, so that the Quebec mortgage was set aside.

"I am of the opinion that with respect to the Quebec mortgage, the law of the place where the property was situate and where the mortgage has been given should govern," said the Court. "According to the Civil Code of the province of Quebec where the creditor has knowledge of the insolvency of his debtor, he cannot take a valid mortgage on the property of his debtor There is no doubt that when the mortgage was given the Dominion Bank knew that Thomas Bros., Limited, were unable to meet their liabilities. Then, according to my opinion, the Quebec mortgage should be set aside."

Responsibility for Investment Advice

This review would not be complete without referring to the case of Banbury vs. Bank of Montreal, decided in the latter part of 1918 by the British House of Lords, but concerning a Canadian Bank and Canadian Banking Law.

In the Banbury case, which is the most important banking decision of the last ten or fifteen years, the evidence showed that Captain Banbury, a retired English Army Officer, was possessed of some current cash and a desire to travel in "the colonies," with the idea of investing some cash if he saw a suitable opportunity. When he arrived in Montreal he called on Sir Edward Clouston, the general manager of the Bank of Montreal, who gave him a circular letter addressed to the bank managers of the Bank of Montreal in the following words:—

"Dear Sir:—

"I take pleasure in introducing to you Captain Banbury, of London, England, who is visiting this country on pleasure. Should he apply to you for assistance or advice you will be good enough to place yourself at his disposal."

After receiving this letter Banbury travelled across Canada, and at Victoria, B.C., he met one, Gallatly, the manager of the Bank of Montreal at that place, showed him the letter, and had some general conversation in reference to various forms of investment, but without arriving at any definite decision.

Bank Did Not Want Account

At that time a British Columbia Company, the Westholme Lumber Company, was carrying out a large contract with the city of Victoria in connection with which the Bank of Montreal had made heavy advances to the Lumber Company and held a first mortgage on all its assets. The contract, however, called for more money than was anticipated, and at the time of Banbury's arrival in Victoria the lumber company was endeavoring to obtain further advances from the bank which the head office of the bank not only refused to make, but was urging Gallatly to close out the matter and to secure the advances which the bank had already made on the first mortgage.

Quite naturally, therefore, Gallatly proposed to Banbury that the latter should advance one hundred and twenty-five thousand dollars to the lumber company on an agreement that Banbury was to take a second mortgage at 8½ per cent. interest, that the money was to be used in connection with the Victoria contract, and that Banbury was to receive 12½ per cent. of the profits of the contract.

This agreement being signed, Banbury cheerfully paid over the one hundred and twenty-five thousand dollars to the Victoria bank and allowed Gallatly to arrange the details, but after Banbury returned to England he discovered that twenty-five thousand dollars of the cash advanced by him had been used to pay off a second mortgage on the lumber company's property, that even the additional capital advanced by Banbury would not complete the Victoria contract, and that Banbury's second mortgage was practically valueless.

Claimed Responsibility for Advice

Banbury then started suit in the English courts against the Bank of Montreal for the one hundred and twenty-five thousand dollars advanced by relying on Gallatly's advice, and the jury gave him a verdict for the amount claimed, finding (a) Gallatly had authority as a branch manager to advise Banbury to invest his money in the lumber company mortgage; (b) that Gallatly advised Banbury that the mortgage would be safe and would rank second to the bank's claim, that the money would be used only for the Victoria contract, enabling the lumber company to complete that work

without further assistance; (c) that Banbury invested the money relying on such advice; (d) that the advice was given negligently and unskilfully; and (e) that the bank had been negligent in allowing part of Banbury's money to be used in paying off the second mortgage.

The House of Lords, however, set aside this verdict in favor of Banbury and entered judgment in favor of the bank, on the ground that the bank was not liable for Gallatly's advice, and owed no duty to Banbury to advise him carefully or to advise him at all.

It was strongly urged in the argument that Sir Edward Clouston's letter given to Banbury imposed a certain duty on the bank not to give Banbury improper advice, but on this point of the case the House of Lords said:—

"If this letter be read as it should be, in the light of the respective positions of the writer and the receiver, the object of the latter's visit and the social habits of the Canadian people, as described by Banbury himself, I think it is clear that originally, at all events, it was nothing more than a friendly letter, and the writing of it was merely a courtesy in trying to procure for Banbury as he went from place to place a good reception, and the performances of the friendly services he mentioned. The letter is addressed to all the local managers without distinction. It is a kind of a circular letter. There is nothing ambiguous about it. Its language is clear enough. It contains no reference to investment or explicitly to any business matter. And it is, in my mind, perfectly impossible to believe that a man of sagacity and experience in business, such as Sir Edward Clouston must have been, could ever have intended to create between Banbury and the Bank of Montreal, through the agency of any bank manager to whom the letter might be presented, the legal and confidential relation of advisor and advised on the subject of investment of money, entailing on the bank all the responsibilities which such a relation would impose."

Subscription to Bank Shares

The Monarch Bank of Canada was incorporated in 1905, and one Barry started out to solicit subscriptions for stock in the new bank. Barry approached E. J. Murphy, a Halifax merchant, for a subscription, held out certain inducements in the way of banking accommodation, and Murphy subscribed for thirty shares at $125 per share, giving Barry a demand note for $3,750.

Barry indorsed the note, which was dated August 6th, 1906, to the Monarch Bank, and on August 22nd, thirty shares were allotted to Murphy. Murphy was not notified directly of the allotment, although, in September, 1906, the bank wrote Murphy a letter, which would imply that he was a shareholder, and on November 12th, 1906, the bank notified Murphy that his note fell due that day. Murphy replied to this notice, setting up the claim that the arrangement was that the note was to be held by the bank and the interest paid out of Murphy's remuneration as a director and practically refusing to pay.

On a winding up order Murphy was held liable as a stockholder and set up the defence that he had received no notice of the acceptance of his subscription.

Ontario Court's Decision

The Ontario Supreme Court, Appellate Division, has decided that while allotment and notice thereof are necessary, a written demand for payment of a note given for stock is sufficient notice of allotment.

"Assuming, however, that allotment and notice were needed to bind the bargain," said Judge Meredith, "allotment was admittedly duly made, and there was, as I cannot but find, notice. The notice required can be only such as is needed to bring, or as brings, knowledge of the fact to the applicant: that is its purpose—the only reason for requiring it; and notice of that character was given to the respondent in the written demand which was made upon him in respect of the payment of his note; that is made very plain by him in his testimony in this matter; it is there admitted, more than once, that he knew that he had the stock; and he made no such pretence as is here made for him, that he was a mere unanswered applicant for it, without knowledge of its allotment."

"It seems to me, too," said another Judge, "that the letter of the 12th November, 1906, is a sufficient notification to him, especially when taken in connection with the letter of the 15th November, 1906, in which he suggests that his note which had been given for the stock should be paid by realizing on the stock. There is nothing like repudiation on his part."

Recent Tendencies In Investments

Abnormal Profits in Industry Characterized Early War Years, But Costs Have Now Caught Up With Prices — Preference for Securities With Assured Return is Indicated by Stock Exchange Transactions — Pessimistic Reaction the Danger of Future.

By ADAM SHORTT, LL.D.

IN view of the prevailing high level of prices in most lines of industry and service, it is natural to expect that there should be a more or less eager desire on the part of those possessed of free capital to invest it in standard lines of production. It might further be expected that the securities of those industries established before the war would find a ready market at considerably increased prices. Surveying the investment field, however, since the outbreak of the war, and especially for the year following the suspension of hostilities, we find that there is neither that eagerness to invest in the general field of production, nor that appreciation of established securities which the well maintained high level of prices might suggest.

There has been, it is true, a good deal of speculative dealing in securities, fostered by professional optimism and popular propaganda, which, if taken at anything like their face value, would indicate that we have emerged from a very costly war in a much more prosperous condition than that in which we entered it. Indeed, labor unions and a section of the returned soldiers are operating on the assumption that these representations express the real state of our economic affairs. The appreciation of securities, however, temporarily due to professional and speculative trading, has proved to be of a very precarious nature. The rapid reactions lately experienced reveal the fact that there was little real buying on an investment basis.

During the war the natural appreciation of securities connected with the chief munition industries rapidly passed into the speculative zone, and suffered the inevitable reaction. A number of the most permanent and conservative of the munition industries wisely devoted a considerable proportion of their exceptional profits to placing their corporate finances upon a sound basis, in order to maintain their stability during an anticipated period of reconstruction and possible stagnation after the war. The appreciation in value, however, of the securities of such corporations is the natural result of this wise policy and can hardly be attributed to the later high prices of their normal products.

Discounting, therefore, the purely speculative manipulation of securities for a temporary gain, we may consider briefly the conditions affecting normal capital investment from the point of view of permanent holdings based on earning power. Here we have to face certain fundamental conditions which affect the intelligent and experienced investors of capital.

How Large Profits Were Made

In the first place, it requires to be noted that the exceptional profits obtained during the war by those industries which were most extensively employed, was largely due to the fact that the prices of their products, under the stress of emergency demands, rose much more rapidly than the immediate costs of production. The increase in cost of production was slow in starting and its pace at first was not rapid. This allowed to all those manufacturers whose products were connected directly or indirectly with war supplies, a very handsome margin on which to draw during the greater part of the war period. Towards the close of the war, however, and since its suspension, costs of production have tended to rapidly overtake prices, in most of the normal lines of industry. This increase in costs, however, has not yet very seriously affected the traders, whose war rates of profit have been as yet quite well maintained in the transition from military to domestic consumption. A larger proportion also of the product of industry now passes through their hands. Owing to the continued inflation of credits and vast expenditures for quite unproductive purposes, there exists an enormous purchasing power without any corresponding cumbering of the markets with desirable products. The trader, therefore, finds no difficulty in rapidly accomplishing the turnover of his capital at excellent profits and on a purely cash basis.

It might appear at first sight that the manufacturer should enjoy at least as good a position as the trader, and indeed in some lines which require no serious adjustment in passing from war to peace conditions, this is approximately true. There are, however, special drawbacks to be considered which affect the manufacturer much more seriously than the trader.

Analysis of Production Costs

The cost of production in its last analysis, apart from management and the interest on borrowed capital, resolves itself into raw material, labor, and machinery, or more broadly plant, including transportation. But plant again resolves itself into raw material and labor; and raw material, as appropriated from nature with the aid of plant, represents chiefly labor cost. Transportation, of course, through its various combinations of labor and plant, resolves itself into the same elements of labor and primitive raw material. Thus the primitive factors of cost are management, interest, and labor. Hence for the employer the dominant factor in cost, whether of goods or services, is labor.

In a period of financial inflation such as accompanies all great wars, and which is its most important instrument of taxation, there are available extensive funds for financing industry and trading. Where the cost of labor is steadily advancing, in the shape of higher wages and shorter hours, even if the rate of interest for bank accommodation is not materially increased, yet the volume of such accommodation must keep pace with the increasing labor costs at every advance or turnover in the process of production. So also with profits, even if the rate of profit is not materially increased, yet the volume on which it is levied steadily increases per unit of product with every increase in price. To illustrate from a concrete case: take a yard of cloth, now costing $4, where it formerly cost $1.50. If the profit in each case in the last turnover were 20 per cent., it means that the profit was formerly 25 cents, but is now 66⅔ cents; and if the rate of interest on accommodation be three per cent. on the turnover period in each case, the interest was formerly 5.34 cents, while now it is 11.65 cents. An adequate cost accounting, not for single industries, but for completed articles through every stage in their production from raw materials to finished goods, would reveal the true proportions of the labor, profit, and interest factors which enter into the final prices.

It is obvious that the steady increase in the labor factor of cost carries with it at every stage two other steadily augmenting factors of profit and interest, even though the rates of these may not be materially increased. If, however, these factors also increase in rate the ultimate price must so much the more rapidly increase. Naturally the increase in the final price of commodities serves as a basis for new labor demands. Theoretically, of course, there is no top to this spiral stairway. Practically, however, it falls ultimately of its own weight; and the higher it attains the greater is the fall thereof, and the more extensive the debris, in the midst of which the cry is, "Sauve qui peut."

Practically, high prices and brisk demand for finished articles do not necessarily mean high rates of profit for, as already indicated, high rates of profit are possible only where, in the race between prices and costs, prices have a good start and maintain the lead for some time. But costs, though invariably slow on the get-away, have always the better wind, ultimately overtaking and even passing prices in the race. This discourages production, the rider of prices, and ultimately checks labor, the rider of costs. Perceiving the inevitable outcome, shrewd investors are shy of venturing more capital in industries other than those which are reasonably certain of their future, such as those connected with food products, building materials, or such industries as have a virtual control of foreign markets, as, for instance, the pulp and paper industries of Canada. Even the popular luxuries of the masses, among the most highly profitable and most thoroughly profiteered of all industries, begin to slacken their pace when their profits are threatened by stagnation in employment. When costs have overtaken prices and profits fall, capital seeks safe shelters until the future is more certain. Meanwhile speculative capitalists are not averse to trading in securities, the less experienced for the rise and the more experienced for the fall; but few commit themselves to permanent holdings. For most capitalists uncertain of the future, government securities offer special attractions. They afford a safe resting place at very fair rates of interest. Under present conditions our tax-free issues offer a safe and commodious harbor where the larger fortunes may ride securely at anchor without heavy port dues in the way of income taxes with rapidly mounting rates on investment craft of heavy tonnage.

Recent Investment Tendencies

The heavy government borrowings during the war were, of course, inevitable; and it was highly desirable that as large a proportion as possible of our loans should be financed within the country. There have been, however, some peculiar secondary consequences of this situation and of the special encouragement given to investment in government loans, through appeals to the wealthy in the way of tax exemption and to all classes on the basis of patriotism. Those who invested their free capital in government loans were represented as patriots of a high type, although in so doing they were relieved of the anxiety and worry of the management of their investments and uncertainty as to the ultimate security of their capital. On the other hand, those who invested in productive industries and trade, especially those who were concerned with furnishing the necessaries of life, prices of which were steadily rising, were regarded with suspicion; and, if operating on a large scale, with frank hostility as profiteers of the most objectionable type.

As already noted, in the earlier stages of the increase of prices profits on industrial capital were high, but lately much more modest, while the prospects for the future are quite uncertain. Those who furnished the less urgent supplies and services, if not so directly the objects of popular resentment, are nevertheless the more likely to suffer first from the rapid rise in costs. The prevailing forces therefore operating on capital seeking investment are, first, popular favor for investors in government securities with popular disfavor for investors in production and trade, especially in the necessaries of life. Secondly, exemption from heavy taxation on large investments in government securities, contrasted with subjection to heavy taxation on large investments in other lines. Third, entire relief from the responsibility and management of industry once capital is invested in government securities, as against increasing anxiety and risk and close attention to the management of business where capital is invested in the usual industrial lines.

Surveying the trend of investment on such typical stock exchanges as those of Montreal and Toronto, one finds that the sales of securities are heavily centred on the tax-exemption investment bonds, especially those of the longer periods. They are obviously passing from smaller and weaker holders, who have little or nothing to gain from tax-exemption, into large and strong possession, where everything is to be gained by tax-exemption and relief from uncertainty as to the future of permanent investments. In the face of such a very natural but rather unfortunate situation, one can understand why industrial securities, with a few special exceptions, are not particularly buoyant, and why new commitments of capital for the reconstruction and expansion of general industry are far from being so popular as the high prices of products and services might indicate.

As a matter of fact the development of Canadian industry appears at present to have more to hope from the influx of American capital than from the commitment of new Canadian capital. While this, if it tends to develop, should in many ways afford a welcome relief, alike from the point of view of the maintenance of industry, the support of standard securities, and the equalization of exchange, yet it is not likely to relieve the high cost of living. Ultimately it must involve the heavy export of products without any corresponding balance of imports, whether in credits or goods.

Critical Time to Come

Among the normal symptoms of costs overtaking prices and leading to the stifling of industry, are greatly increased volumes of bank deposits, both time and demand. To fully realize this trend, however, one must eliminate government transactions, including Dominion, provincial, and municipal financing, as also the operations of government-owned public utilities; for none of these is financed on the basis of meeting expenditure out of earnings, and may therefore ignore the normal relations of costs and prices. In every financial reaction from extravagant expenditure, and especially after great wars, the depreciation in industrial and the appreciation in government securities have been symptomatic accompanying factors. Contrary to popular expectation, however, the critical financial period never follows immediately on the close of a war; but only after such a period as permits of a great outburst of lavish expenditure and speculation, proportioned to the amount of inflation of credits, continued disbursements of governments. Hence the consequent optimistic conviction, supported by the statistics of trade, wages, prices, bank returns, and expenditures generally, that instead of having made great sacrifices of national wealth and reserves, the country has emerged from the struggle much wealthier and more prosperous, and better fitted to face the future than before it entered on it.

The chief misfortune of this popular conviction is that when the truth can no longer be ignored, the pessimistic reaction is correspondingly severe, equally unjustified, and equally proof against argument and demonstration. Patience, courage and determination will in time undoubtedly overcome even these disadvantages and repair the unavoidable losses. In view, however, of the extent to which we have already drawn upon our resources, nothing is more important than that our remaining capital should be conserved and directed into lines of production, for the supply of the most essential wants and the equipment of further industry.

THE GOVERNMENT THRIFT CAMPAIGN

Thrift stamps and saving certificates will continue to be sold by the Dominion government, but the campaign will not be actively pushed, according to an announcement on December 12th, by the finance minister. Voluntary assistance is still requested, especially in encouraging sales in the schools. The announcement, after mentioning the necessity for continued saving, says:—

"It is therefore provided as follows:—

"(1) To continue the sale of the twenty-five-cent thrift stamp.

"(2) For the withdrawal of the present war savings stamps and the issue of a new savings certificate in denominations of $5, $10, $25, $50 and $100, maturing three years from date of purchase and selling at a discount price, which with interest compounded half-yearly at a rate not exceeding 5½ per cent., will, at maturity, return the face value of the certificate.

"(3) Uncancelled thrift stamps to be accepted as the equivalent of cash in payment of savings certificates.

"(4) The National War Savings Committee and its paid organization to be dissolved as from the first of January, 1920."

1919 Bond Issues Reach Record

Total Bond Flotations Including Government Issues was $909,937,222--War Loan was Largest Single Issue Municipal Financing Less Than Last Year—Railroad and Corporation Issues Increased—More Bonds Sold in United States.

SALES of Canadian issues of government, municipal, railroad and corporation bonds in 1919 totalled over $900,000,000. Of this total almost $200,000,000 was sold in the United States, according to estimates supplied to *The Monetary Times*, by the underwriting houses. A comparatively small amount was sold in Great Britain. This is the largest amount of bond financing ever done in Canada in one year, and the difference between the 1919 figure of $909,937,222 and the 1918 figure of $775,356,361 is due to the increased volume of provincial railroad and corporation issues made during the year just ended.

The most important event of the year was, of course, the Victory Loan, which was floated from October 27th to November 15th, after several weeks of preparation. Final totals are not yet available, but $678,000,000 in subscriptions was at least secured. The distribution of the subscriptions by provinces will be found elsewhere in this issue. The number of subscribers was less than the number in the case of the 1918 loan which was unexpected, as it was thought that a wider distribution would be brought about because of the bonds being taxable.

Besides the Victory loan, an issue of $75,000,000 of two-year notes and of ten-year bonds was sold last July in New York, to repay in part $100,000,000 of bonds maturing there on August 1st.

Municipal bond sales by provinces were as follows:—

Ontario	$13,005,768
Quebec	2,104,000
New Brunswick	248,000
Nova Scotia	1,984,950
Manitoba	2,203,373
Alberta	3,538,150
Saskatchewan	1,878,848
British Columbia	1,311,000
	$26,274,089

The increased volume of railroad and industrial financing results from peace conditions, and the continued demand for goods which has encouraged firms to make extensions in spite of the high costs of material and labor. Besides the railroad issues shown in the tables on the following pages, there was also an issue of $5,105,133 of 5 per cent. 3-year Canadian Northern Railway notes sold in Great Britain. This was a refunding issue, and is included in the totals.

CANADA'S DOMESTIC WAR LOANS

Financing Public and Private Requirements*

Following Upon Success of Victory Loan 1918, Trend was Upward — High Levels Reached in June — Victory Loan Organization and Flotation Occupied Several Months—Effects of Exchange Rates on Prices and Markets.

By J. W. MITCHELL.

THE year 1919 saw Canada courageously grappling with the various financial problems arising out of the transition from an atmosphere of war to that of peace. The nation's jubilance over the winning of the war, so splendidly reflected in the spectacular success of the 1918 Victory Loan and the strong tone developed by the bond market in the first few weeks of 1919, gave a remarkable impetus to the activities of security financing throughout the greater part of the year. This spirit of buoyancy, which was so evident in January, became even more pronounced as the months passed, and was not appreciably affected by labor unrest, the rates of foreign exchange, or by the surprising continuance of high prices for all commodities. The military struggle was over; federal restrictions upon security issues were removed; railway, public utility and industrial corporations, which during the war period had limited their bond borrowings to the minimum to give right-of-way to Dominion government financing, came vigorously into the 1919 market; the provinces and municipalities—east and west—offered many attractive blocks of securities. Finally, the financial strength of the country found renewed expression in the wonderful $680,000,000 total produced by the third Victory loan appeal—a call to "financially finish the war"—while the rapidity with which the various bond offerings were absorbed after the close of the loan campaign showed that the public investment demand was still far from being satisfied. It should, therefore, not be surprising that the aggregate of bonds issued in 1919, viz., $909,383,728, considerably exceeded the total of any previous year in the history of Canada.

Supporting the Market

One of the most important factors influencing the course of security values throughout the year just closed was the work of the Victory Loan Market Committee, which from January, 1918, had been charged with the responsibility of stabilizing the price of Victory bonds. Acting in co-operation with the bond houses and stock exchanges of the Dominion, the committee repurchased millions of dollars of these securities, redistributed the floating supply and gradually advanced the market quotations until the dissolution of the committee in January, 1919, when the Victory loans had a market value of approximately $17,000,000 over their original issue prices. This unique performance elicited much favorable comment from financial circles in Great Britain and the United States, where their war loans had been selling at more or less discount, and not only increased Canadian financial prestige in those and other countries, but through the strong market created, was of the greatest possible assistance in the successful flotation of the 1919 Victory loan.

Issues by Months

A survey of the outstanding financial features, month by month, is interesting. About $30,000,000 of bonds were issued in January, all classes of borrowers taking advantage of the brisk market; $5,250,000 Grand Trunk Pacific 4 per cent. bonds, due 1962, was the most important offering of the month, representing practically the first funded financing of our Canadian railways within our own borders. They were offered at a 5½ per cent. rate, were absorbed almost immediately and promptly went to a premium. Alberta, with $1,000,000 5½ per cent. 1939 bonds, was the first province to enter the market, the issue being readily taken on a 5.50 per cent. basis. The Canadian National Railways successfully placed $7,500,000 equipment bonds in the United States market, and the Winnipeg Electric Railway Co. refunded $750,000 of maturing notes there. Victoria marketed $300,000 5½ per cent. serial bonds at the attractive rate of 5¾ per cent. Numerous smaller municipal issues were well received, and the market gave every sign of advancing. Indicative of the increasing American interest in Canadian bonds is the fact that two of the leading financial institutions, viz., the National City Co. and the Guaranty Trust Co., of New York, about this time made arrangements to enter our market with companies specially incorporated for that purpose.

During February prices of all bonds continued on the up grade, the lead being furnished by the Victory loans; $450,000 New Brunswick 15-year 5½ per cent. bonds were retailed at 5.35 and $650,000 City of Toronto bonds at the same price. Large corporate issues were $7,300,000 Montreal Tramways Co. 6½ per cent. at par; $4,000,000 Riordon Pulp and Paper Co. at 6.40; $3,000,000 7 per cent. 10-year notes of the Consolidated Mining and Smelting Co. at par. At this time New York funds were quoted at 2 per cent. premium, and demand sterling exchange in New York was around $4.76½. Arrangements were made about this time for credits by Canada of $25,000,000 to France, Rumania and Belgium .

Drop in Exchange

Early in March $3,000,000 20-year 5½ per cent. British Columbia bonds were offered on a 5.40 retail basis, a remarkable advance from the 6½ per cent. rate asked just one year before for $1,000,000 5 per cent. 10-year bonds of the same province. Investors paid a 5.30 basis for $1,580,000 5½ per cent. 15-year Manitoba bonds. Industrial offerings, especially those of the pulp and paper companies, met with a good response. On March 20th J. P. Morgan and Co., upon instructions of the British government, suspended the purchase of sterling exchange. The quotation dropped from 4.76 7/16 New York to 4.59 by the end of the month. It was only natural that Canadians should take advantage of this marked decline to pay off at this then low rate some of their obligations in Great Britain. New York funds stood at 2½ per cent. premium at the end of this month.

In April the province of Ontario sold $3,000,000 3-year 5½ per cent.'s, realizing a 5.09 rate, the issue being obviously purchased for the American market. The province of Saskatchewan disposed of $3,000,000 20-year 5 per cent. bonds, which were retailed at 5.30. Winnipeg sold $400,000 5½ per cent. 20-year bonds, the transaction representing the refunding of sterling bonds purchased in Great Britain at a substantial discount. Pulp and paper bonds continued in active demand. The American Victory loan campaign in April had a restraining effect upon the purchase of our bonds by American investors.

The upward swing of values continued throughout May in spite of considerable labor unrest. New Brunswick received a 5.05 per cent. basis for $1,000,000 3-year 5½ per cent. bonds early in the month, and Ontario a 4.93 price for $4,000,000 3-year 5's at the end of the month, both issues being largely sold in the United States; $2,000,000 Mattagami Pulp and Paper Co. bonds were offered to the public on a 7½ per cent. basis. Just here it is interesting to observe that for the first five months of the year industrial issues aggregated over $20,000,000 as against less than $2,500,000 for the same period of 1918, more than half of the former amount being represented by pulp and paper flotations.

---

*This article is available in pamphlet form from the Dominion Securities Corporation, Toronto. The pamphlet is entitled, "Review of the Bond Market in Canada for 1919."

Highest Levels Reached in June

The high point of the Canadian bond market was reached in June. The various war and Victory loan issues attained their highest levels, selling at a 4.85 to a 5 per cent. basis according to maturity. Our Ontario county and city bonds sold as high as a 5.15 basis net and some townships at 5.20. Speculation on the Montreal and Toronto stock exchanges reached large proportions, especially on the former; $3,000,000 British Columbia 5 per cent. 20-year bonds were sold at the end of the month, the retail price being a 5.35 per cent. basis.

July opened with considerable activity, but a pronounced decline in the buying demand soon became evident, with consequent shading in values. The Victory bonds as usual acted as barometer and reflected the altered sentiment. The feature of the month was the issue in New York of $75,000,000 2 and 10-year 5½ per cent. Dominion government notes to refund the outstanding balance of the $100,000,000 5 per cent. unsecured loan made there two years previous. The notes were offered to the public on a 5.90 basis, and were over-subscribed. There was some criticism at the time of the favorable terms of this issue as compared with the prices then prevailing for similar government bonds in Canada, but the subsequent course of events in the United States market abundantly justified the government's policy. Sterling exchange in New York declined to the low point of $4.28½ on the 17th. This encouraged the purchase of Canadian securities in the London market, and, coupled with the lower values established by the $75,000,000 external loan, accelerated the decline in security prices at home. The retirement of Sir Thomas White as Minister of Finance was announced at the end of the month, and in view of his eminent services to the country, especially throughout the war, the news was received with profound regret.

Soft markets prevailed throughout August, due partly to the holiday season and partly to the government's announcement of another domestic loan in the fall. The United States demand for our securities became almost negligible owing to the extremely attractive rates of foreign loans there. The decision of the United States Steel Corporation to fight the strike of its employees had a far-reaching effect in financial and industrial circles. In this month also the British treasury removed its restrictions on the exportation of capital and allowed the London Stock Exchange to resume trading in foreign securities.

Victory Loan Preparations

During September the bond houses of Canada were actively engaged in the preliminary organization work of the third Victory loan, undertaking at the request of the finance minister to handle no new bond issues until November 22nd. Provincial and municipal authorities floated no new bond issues in order that the federal government might have a free field. The loan was for 5½ per cent. 5 or 15-year bonds at par, and applications were received for the three weeks, October 27th to November 15th, inclusive, resulting, as previously stated, in the splendid total of $680,000,000.

This satisfactory subscription by the country was a tribute both to the practical patriotism of the Canadian people and to the excellence of the Dominion-wide organization which undertook this great task. The government upon allotment accepted approximately $650,000,000 of the amount subscribed, and was thereby put in a strong financial position. About $50,000,000 of the loan was subscribed by United States interests, representing largely corporations, firms or individuals directly identified with Canadian business.

The last week of November was characterized by great activity in bond offerings and a brisk market; $2,282,000 New Brunswick and $4,000,000 province of Ontario 10-year 5½ per cent. bonds were offered and quickly taken at a 5¾ rate. A $2,632,$00 5½ per cent. City of Toronto serial issue was rapidly absorbed at the same figure. Sharp declines were registered on the New York and Canadian stock exchanges during the latter part of this month, and speculators suffered accordingly.

A sensational decline in sterling exchange to the record low level of $3.67 and the unprecedented rise in the premium on New York funds to 11 per cent. were the outstanding features of December. The fall in sterling caused a rush of London selling of bonds and stocks to take advantage of the opportunity to realize the 25 per cent. profit from the exchange rate. A considerable volume of Canadian securities was thus transferred from London to New York, and the American dealer specializing in our bonds found himself in the unique position of being able to supply his clients with our Dominion and provincial government bonds at prices ranging from 6.25 to 6.75 per cent., and even higher, according to term. If the London market did not supply the desired security, the unusually favorable discount on Canadian funds enabled him to purchase his requirements in Canada on that basis. These bargain prices for our premier grade securities were more unsettling than attractive to the American market, which at this time was in a very sensitive condition, owing to the high rate for call money, the disruption of business following the great coal strike, the low levels for their own domestic issues, and the unsatisfactory political situation. Such abnormal quotations for our bonds in New York, however, had a reflex influence upon security values at home, and after the middle of the month the demand slackened very noticeably. The public was thinking more of the effect of the uncertain exchange situation upon business generally than upon security investments. During the last two weeks in December $3,000,000 5½ per cent. 10-year bonds of the province of Alberta were marketed. About $1,500,000 were placed in Canada at a 5.80 per cent. rate and the remainder in the United States on a 6.60 per cent. basis.

Present Position

The end of the year 1919 finds Canada carefully taking stock of her financial and general position. With a net debt of $1,817,839,871 (official figures, November 29th, 1919), an annual interest charge of more than $90,000,000, a diminishing foreign trade and a high adverse rate of American exchange, the Dominion has serious matters to engage its attention. Our war expenditure has now largely been provided for, and heavy borrowing by the Dominion government by large internal loans should, therefore, cease. In view of our large unfavorable trade balance with the United States, we have reached a point where it is a matter of national duty to limit our purchases from them to the very minimum, and, on the other hand, it is imperative that we produce more goods and raw materials than ever and export them to the greatest possible extent.

The relations between capital and labor in Canada, while improving along right lines, leave many delicate problems for amicable adjustment, but a new spirit of co-operation has followed the ending of the war. The legitimate demands of labor will be met, but capital also must be fairly treated. For many years we shall need the investment of huge sums in this country to develop our great untouched natural resources, and it is of the greatest importance that interest and profit returns should be such as will attract that capital from other countries. In the opinion of our leading bankers and financiers the present excess profits tax, essentially a wartime measure, should be substantially reduced, if not eliminated. It acts as a deterrent to new undertakings, penalizes initiative and efficiency, and is a material factor in maintaining the high cost of living, because in many instances the tax is undoubtedly figured in the cost of production, thereby directly affecting the price of the commodity to the consumer. It is too expensive a revenue producer for peace times, particularly in a period of transition such as that upon which we have now entered.

In spite of the political and economic problems in the country awaiting solution, Canada faces the future in a spirit of optimism, proud of the confidence of others and confident in herself. We have emerged from the war stronger than any other belligerent, with the single exception of the United States. Over seven-eighths of our war loans are held by our own citizens. The savings deposits in our banks were never so large as just before our last domestic loan. Our people are slowly but surely learning the hard lesson of thrift. Canada's prestige—the result of her war effort—is such that we shall shortly have all the desirable immigration we care to admit within our borders. Great opportunities are before us; to measure up to them let us increasingly "get together and get to work."

COBALT ORE SHIPMENTS, 1908-1919

---

* The shipments for 1904 totalled 158.55 tons ; for 1905, 2,336.01 tons ; for 1906, 5,836.59 tons, and for 1907, 14,851.34 tons.

† In addition to the shipments by this Company, the Dominion Reduction Company shipped from this mine and two others, 2,322 tons of ore, which are included in the total shipments of 15,044 tons in 1916.

**Shipments during July, August and September were very low on account of strike conditions.

‡Absorbed by Mining Corporation in November.

POWER DEVELOPMENT IN CANADA

All Parts Have New Power Works Under Way—Ontario Hydro-Electric Power Commission—Attention Directed to Possibilities of St. Lawrence Power

By Leo. G. Denis

THE important part which electric energy is playing in the development of Canada both industrially and otherwise has now become a well-established fact. Our unexcelled hydro-electric possibilities largely contribute to the fact that with due regard to proportion, Canada's electrical development is second to none. Our important contribution to war production is largely due to this and it may be said in this connection that, electrically, Canada was admirably prepared.

The electrical importance of Canada is well brought out in a report on "Electric Generation and Distribution in Canada" published by the Commission of Conservation a year ago. Respecting what may be termed central station energy, the report shows a total installation of 2,107,743 horsepower, of which over 85 per cent. is from water-power, showing the predominance of hydro-electric energy. Much of the latter is produced in large plants, 40 per cent. being in plants of 100,000 horsepower or over.

The closing of munition plants would nautrally lead one to expect a slump in electrical activity, but, on the contrary, much progress is to be noted during the past year. This may be explained in a measure by the new demand created by peace-time industrial undertakings, while many of the projected electrical expansions had, up to the date of armistice, been debarred by the fact that it was exceedingly difficult and, in many instances, impossible to obtain delivery of the necessary hydro-electric or other machinery. While machinery is now more easily secured, costs are still high, but, as there appear to be no signs of a fall in price, many companies have decided to proceed immediately with the proposed expansions.

Ontario Developments

A striking example of the necessity for these expansions is afforded in Ontario where the greater portion of the electric energy is handled by the Hydro-Electric Power Commission. It has recently been authoritatively stated that the commission had, at present, applications for some 150,000 horsepower which could not be supplied. The commission has strained every effort to meet the increasing demand as instanced at the beginning of the year by the 50,000-horsepower addition to the Ontario Power Co. plant at Niagara, bringing the total for this plant to some 210,000 horsepower.

In connection with the commission's activities, Canada may at present boast of witnessing the construction of one of the most stupendous hydro-electric undertakings so far recorded. While the initial installation of 200,000 horsepower is contemplated in connection with the Chippawa development of the Hydro-Electric Power Commission, it is understood that the commission has in view extensive additions to be made as time and conditions demand. Construction began in 1918 and the plant is expected to be completed in 1921.

Work is rapidly progressing on the 60,000-horsepower Nipigon plant and 12,000 horsepower will be available next June, while the 3,600-horsepower High Falls plant near Perth is almost completed. Substantial additions are to be recorded in the Eugenia, Big Chute and Merrickville plants. The year has seen some twenty-five municipalities added to the commission's various systems showing progress in that direction.

Work on the new 27,000-horsepower plant at Chaudière Falls near Ottawa has been in progress and energy will soon be supplied regularly. A large amount is to be supplied to the British American Nickel Corporation's refinery near Deschênes, Que., which is approaching completion.

A hydro-electric plant is also under construction for Parry Sound and another plant will supply the mining district near Englehart, while a 5,000-horsepower development is contemplated near Elk Lake, Nipissing district, Ont., and another of 9,000 horsepower on the Kapuskasing River in New Ontario.

Many of the new plants and extensions include important conservation storage undertakings. The conservation dam at Big Eddy on the Spanish River in Algoma district, Ont., will almost treble the hydro-electric development of the International Nickel Company.

Water Storage in Quebec

Probably one of the most noteworthy features in connection with electrical expansion in the province of Quebec is the progressive policy of the provincial government in facilitating and constructing conservation water storage and a number of hydro-electric plants are already feeling great benefits therefrom. Three storage dams have been completed and a number of others are proceeding or are definitely contemplated. The largest of these is now known as the Gouin reservoir, on the St. Maurice River, built mainly for the power plants at Shawinigan Falls and Grand'Mère. The present capacity of these plants is some 330,000 horsepower, but it will be increased to about 600,000 horsepower in the immediate future owing to the regulated flow from the Gouin dam.

A 7,000-horsepower plant at Drummondville and one of 1,800 horsepower for the Kipawa Co., in the upper Ottawa have been completed, the ultimate installation of each of these hydro-electric plants to be 18,000 horsepower. Plant extensions are also to be noted at Buckingham, Rivière-du-Loup, Chicoutimi and Kenogami in the Saguenay district.

Government action in the maritime provinces to facilitate hydro-electric development has also to be noted. In connection with this the Nova Scotia Power Commission is contemplating a hydro-electric development on the Indian River to transmit energy to Halifax.

Throughout the prairie provinces the desirability of supplying electric energy transmitted from large central super-power plants is in evidence. At the Calgary Industrial Congress attention was called to the advantages of such super-power plants located near coal mines, while recent activities in the Regina and Estevan districts all tend in this direction.

The Portage la Prairie transmission line from Winnipeg marks a very progressive step and similar activities of the Manitoba Power Commission will doubtless extend to other districts.

While substantial additions have been made to a number of steam power plants in the prairie provinces, hydro-electric expansions in the Winnipeg district include the beginning of a 168,000-horsepower development at Du Bonnet Falls and the addition, to be completed shortly, of two units and a new 110,000-volt transmission line for the Winnipeg municipal plant.

In certain districts of British Columbia demand for hydro-electric energy has not yet reached that of pre-war days, while in others, as in the Kamloops district, there has been a strong move for further hydro-electric development, particularly for pumping water for irrigation. The air nitrate plant recently established near Vancouver is an interesting example of an industry which can use enormous quantities of electric energy.

Railway Electrification

The subject of railway electrification has attracted much attention and, in addition to the numerous activities in connection with Hydro radials in Ontario, the electrification of the Harbor Commission railway at Montreal, involving 20 miles of tracks, should also be noted as now in progress.

This review would be incomplete without a short reference to the St. Lawrence power and navigation project in which the hydro-electric possibilities are counted in millions of horsepower. This is one of the most important international questions that has ever been presented to Canada and requires the most careful consideration by the best and wisest minds, and that counsel be taken with the men of broad vision who have devoted their attention to the international relations of the United States and Canada and who have studied all the economic questions involved. It can not be too strongly emphasized that it is not, in its most important aspects, an engineering question. The engineering aspect is, relatively, a minor one. The Niagara and the St. Lawrence are the two greatest water-power rivers in the world. Their high-water flow is only double the low-water flow which gives them a unique range of flow and, at the same time, the enormous amount of water discharged by them even in the low-water season, constitutes a second characteristic of value, the third being the concentration of descent in Niagara Falls and in the rapids of the St. Lawrence.

CANADIAN RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railroads.

	Canadian Pacific Railway			Grand Trunk Railway			Canadian National Railways

Dominion Debt Has Grown Rapidly

Two-Billion Figure Will Be Reached Before War Expenditures Cease—Gross Debt is Over Three Billion—Success of Victory Loan Was Feature of the Year—War Expenditure by Departments — Railway Guarantees — Revenue and Expenditure.

On October 31, 1919, the gross debt of the Dominion was $3,054,358,274, and the net debt had reached $1,784,876,807. The difference is represented by investments, amounts owing to the government from the banks, etc. Expenditure on war account still continues high, but most of the gratuities have been paid, and the peak of expenditure on vocational training, etc., has probably been passed.

The feature of the year was the highly successful Victory Loan, floated from October 27 to November 15, inclusive. Subscriptions totalling about $685,000,000 were received but at the time of writing the exact figure is not available. The terms of the loan, as compared with the previous five domestic war loans, is given in tabular form elsewhere in this issue. In spite of the fact that these bonds are taxable, the number of subscriptions received was less than in the case of either of the preceding Victory Loans. Comparative results are as follows:—

AMOUNT OF SUBSCRIPTIONS

	1917.	1918.	1919.
British Columbia ..	$ 18,814,700	$ 35,396,667	$ 35,000,000
Alberta	16,515,150	18,189,600	16,181,090
Saskatchewan	21,777,050	23,889,000	21,712,650
Manitoba	32,326,600	43,639,900	41,642,200
Ontario	204,185,400	329,682,950	354,624,500

New Brunswick	26,436	31,000	21,778
Nova Scotia	45,438	51,010	30,000
Prince Edward Island	5,293	5,500	4,232
Total	874,331	1,029,850	793,654

Results for Last Fiscal Year

The Dominion's fiscal year ends on March 31, and the public accounts for the year ended March 31, 1919, were recently issued. The receipts on account of consolidated fund for the year amounted to $312,946,747; and the expenditure on the same account to $232,731,282; showing a surplus of ordinary receipts over ordinary expenditure of $80,215,464.

Capital and Special Expenditures

In addition to the consolidated fund expenditure, the following outlays were made and charged to capital:—

Railways—	
Canadian government railways	$ 14,827,757
Hudson Bay Railway	562,557
National Transcontinental Railway ..	1,066,876
Total railways	16,457,192
Quebec bridge	656,761
	$ 17,113,954
Canals—	
Rideau Canal	$ 8,000
Trent Canal	380,059
Welland Ship Canal	1,823,904
Total canals	$ 2,211,964
Total railways and canals	$ 19,325,918
Public Works—	
Government buildings, Ottawa	$ 3,260,485
Port Arthur and Fort William harbors	191,873
Quebec harbor	842,559
River St. Lawrence ship channel	542,774
St. John harbor improvements	266,725
Toronto harbor improvements	324,872
Vancouver harbor improvements	149,783
Victoria harbor, British Columbia ...	129,226
	$ 5,708,301
Less refund Red River, Manitoba ...	2,953
	5,705,347
Total capital expenditure	25,031,266

Railway subsidies to the amount of $43,805 were paid on account of the following:—

Canadian Northern Ontario Railway..	$ 17,909
Canadian Northern Alberta Railway..	25,896

The sum of $270,802 was paid as bounties on account of the following, and forms a part of consolidated fund expenditure:—

Crude petroleum	$ 162,187
Lead	51
Zinc	108,563

At the close of the fiscal year, the balance at the credit of the depositors in the post office and government savings banks amounted to $53,057,018, a decrease of $303,072 as compared with the balance held on March 31, 1918. The withdrawals during the year exceeded the deposits by $1,952,680, while $1,649,608 was added for interest accrued, making a net decrease of $303,072.

Investments on account of the sinking funds of the various loans were made during the year to the amount of $1,448,495. The total investments for sinking funds increased from $17,216,180 on March 31, 1918, to $18,664,675 on March 31, 1919.

Advances were made under statute to the Montreal Harbor Commissioners and to the Quebec Harbor Commissioners of $505,000 and $281,000, respectively.

Under authority of 5 Geo. V. cap. 3, "The Finance Act, 1914" subsection (*a*) section 4, advances during the year were made in the form of issues of Dominion notes to various banks to the amount of $193,245,500, to which should be added a debit balance of $26,665,000 at the beginning of the year, making a total of $219,910,500. Of this amount $150,282,500 was repaid, leaving an outstanding balance of $69,628,000 on March 31, 1919.

Railway Advances

Advances have been made to the following railways:—

Canadian Northern Railway	$ 541,641
Under authority of sec. 29, chap. 20, Act 1914.	
Canadian Northern Ontario Railway	599,024
Under authority of sec. 10, cap. 6, Acts 1911.	
Canadian Northern Railway	25,000,000
Under authority of Approp. Act No. 1, 1918..

		$446,763,937
		$471,795,203
Less sinking fund	$ 1,448,495	
Surplus of consolidated fund receipts over consolidated fund expenditures	80,215,464	
Charges of Management Loan Account	7,484,273	
		$ 89,148,233
Increase of net debt		382,646,969

Loans to British Government

During the year advances by way of temporary loans amounting to £44,000,000 or $214,133,333 were made to the Dominion by the Imperial government. The balance brought forward from March 31, 1918, amounting to £1,679,204–19–7 or $8,172,130 was by agreement written off against advances made in Canada by the Dominion to the Imperial government.

Advances to the Imperial government by the Dominion government outstanding on March 31, 1919 are as follows:—

Agriculture dept., hay, oats, flour	$ 15,342,064
Admiralty accounts—Militia dept.	2,253
Cereal crop	68,500,000
Dairy Produce Commission	34,759,531
Finance dept., special account	19,466
Foodstuffs	18,500,000
Marine dept.—requisitioning boats	614,767
Militia dept.—fish	246,614
Imperial Munitions Board	315,207,458
Munition workers separation allowance	54,868
Interest account	5,500,000
Railways and canals—rail account	4,175,013
Royal Air Force—Militia dept.	1,456,882
Royal mint—Addition	39,369
Russian Clothing account	1,229,544
Salmon pack	8,811,277
Serbian account—(recruits Militia dept.)	271,285
Paper account—trade and commerce	7,492
Advances outstanding by Imperial government.	$474,737,893

Less—Amount written off by agreement from advances in London to Canada	$ 8,172,130	
Sale of Imperial government property at Halifax to Railways and Canals Dept. for ocean terminals	209,985	
Bullion special account	13,063	
Credit account	30,581,250	
Flaxseed account—agriculture	125,695	
Proceeds for sale of horses in France by Militia dept.	12,249	
Advances by Imperial government in London	214,133,333	
		$253,247,707
Amount due the Dominion by the Imperial government		$221,490,185

Debenture Stock and Savings Certificates

During the year a further amount of 5 per cent. debenture stock was issued to the extent of $2,983,500. This sum with the balance of stock outstanding on March 31, 1918, $14,281,000 made a total of $18,264,500. Of this amount $100,000 was converted into 5½ per cent. debenture stock leaving a balance outstanding on March 31, 1919, of $18,164,500; $2,335,000 of this amount has been converted into Victory Loan 1918.

Under authority of order-in-council dated June 6, 1918, 5½ per cent. debenture stock was offered for sale. During the year the following were issued:—

Due June 1, 1919	$ 11,454,550
Due June 1, 1920	929,250
Due June 1, 1921	1,222,550
	$ 13,606,350

Of this $11,104,650 has been converted into Victory Loan 1918. The flotation charges of the above stock amounted to $13,128.

The total sale of war savings certificates to March 31, 1919, amounted to $13,411,115 and redemptions to $1,806,621. During the fiscal year 1918-19 $647,661 was received on this account which with a redemption during the same period of $1,105,936 reduced the amount of $12,062,768 held on March 31, 1918, to $11,604,493 on March 31, 1919. By order-in council P.C. No. 3041 the sale of these certificates was discontinued. The flotation charges on the above amounted to $91,225. The large amount of redemptions during the year was no doubt owing to withdrawals for investment in the 1918 Victory Loan at a higher rate of interest.

Under authority of order-in-council dated October 4, 1918, P.C. 2462 war savings and thrift stamps were offered for sale. $1,640,166 were sold and $116,132 redeemed, leaving a balance outstanding on March 31, 1919, of $1,524,033. These stamps are due January 1, 1924. The cost of flotation on the above amounted to $231,313.

1918 Victory Loan

Under the provisions of the "War Appropriation Act, 1918" authority was given by order-in-council dated the 23rd September, 1918, P.C. No. 2354 for the raising of a Fifth War Loan of 5½ per cent. bonds issued at par and maturing as follows:—

5-year bonds due November 1, 1923.
15-year bonds due November 1, 1933.

Bonds of the various maturities of this issue will in the event of future issues of like maturity or longer, made by the government, other than issues made abroad, be accepted at par and accrued interest as the equivalent of cash for the purpose of subscription to such issues.

The prospectus of this loan was issued on October 28, 1918. According to the books of the department the subscriptions reached $698,800,000 including conversions of $66,261,166. This total subscription was cut down on allotment by $24,271,800 leaving a total issue of over $674,000,000. The number of subscribers was 1,139,247

Temporary Loans

Temporary loans during the year were made from the chartered banks in Canada and others by the issue of treasury bills amounting to $214,121,250. To this amount should be added $75,110,000 outstanding on March 31, 1918, making a total of $289,231,250 of which $215,411,250 has been repaid, leaving outstanding on the 31st March, 1919, an amount of $73,820,000.

War Expenditures

The expenditure on war account to the 31st March, 1919, amounted to $446,519,439. This amount was disbursed by the various departments and commissions as follows: Agriculture, $478,951; Auditor-General, $61,855; Board of Pension Commissioners, $76,048; Canada Food Board, $527,650; Canada Registration Board, $655,594; Canadian Munition Resources Commission, $57,195; Canadian Trade Commission, $12,044; Civil Service Commission, $3,579; Commission of Conservation, $3,035; Customs, $445,030; Dominion Police, $400,804; External Affairs, $244,543; Finance, $128,081; Governor-General's secretary, $9,353; Halifax Relief Commission, $7,000,000; Housing Committee, $1,735; Immigration and Colonization, $179,165; Indian Affairs, $283,272; Inland Revenue, $48,910; Insurance Department, $3,444; Interior, $279,447; Justice, $3,372,651; Labor, $87,787; Legislation, $13,517; Marine, $19,603,994; Militia and Defence, $377,120,137; Mines, $30,776; Mounted Police, $15,600; National Service Commission, $117; Naval Service, $11,298,999; News Print Commission, $55,026; Penitentiaries, $165; Privy Council, $14,066; Power Control Committee, $1,753; Paper Control Tribunal, $3,071; Public Archives, $21,704; Public Information, $82,251; Public Printing and Stationery, $133,256; Public Works, $9,021,974; Post Office, $813,484; Railways and Canals, $625,523; Reconstruction at Halifax, $335,384; Repatriation and Employment Committee, $129,407; Reconstruction and Development Commission, $9,796; Secretary of State, $72,052; Soldiers' Civil Re-Establishment, $11,831,232; Soldiers' Settlement Board, $3,800; Sub-Committee of Labor (Privy Council), $3,773; Trade and Commerce, $359,487; Trade and Commerce (purchase of pig iron), $489,787; War Committee, $3,439; War Purchasing Commission, $65,670; total, $446,519,439.

Guaranteed Securities

The list of securities guaranteed by the Dominion is as follows:—

1. The Canadian Northern Railway Co., Cap. 7, Edward VII (1903).

The guarantee is for the principal of £1,923,287 sterling, and interest thereon at the rate of 3 per cent. per annum for fifty years:—

2. The Canadian Northern Railway Co., Cap. 11, 7-8 Edward VII (1908).

The guarantee is for the principal of £1,622,586, 19s. 9d. sterling debenture stock and interest thereon at the rate of 3½ per cent. per annum for fifty years from July 20, 1908, interest payable half yearly.

3. The Canadian Northern Ontario Railway Co., Chapter 6, 1-2 George V (1911).

The guarantee is for the principal of £7,350,000 sterling debenture stock and interest thereon at the rate of 3½ per cent. per annum for fifty years from May 19, 1911, interest payable half yearly.

4. The Canadian Northern Alberta Railway Co., Chapter 6, 9-10, Edward VII (1910) as amended by Chapter 8, 2 George V (1912).

The guarantee is for the principal of £647,260, 5s. 6d. sterling debenture stock and interest thereon at the rate of 3½ per cent. per annum for fifty years from May 4, 1910, interest payable half yearly.

5. The Grand Trunk Pacific Railway Co., Chapter 98, Acts of 1905.

The guarantee is for 3 per cent. bonds of the railway company to an amount equal to 75 per cent. of the cost of construction of the western division of the National Transcontinental Railway but not exceeding $13,000 per mile in respect of the prairie section of the said railway. The amount of bonds issued and guaranteed is £7,200,000, of which £3,200,000 were issued in 1905, £2,000,000 in 1909, and £2,000,000 in 1910.

The balance, £6,800,000, of the issue of £14,000,000 authorized by the above Acts to be guaranteed by the Dominion, has been purchased under authority of Chapter 24, 3-4 George V (1913) "The Grand Trunk Pacific Railway Bond Purchase Act."

The purchases by fiscal years were:—

During fiscal year 1912-13	£ 2,287,700
During fiscal year 1913-14	2,645,000
During fiscal year 1914-15	1,867,300
	£ 6,800,000

6. The Canadian Northern Alberta Railway Co., Chapter 7, 2 George V (1912).

The guarantee is for the principal of £733,561 12s. 10d. sterling debenture stock and interest thereon at the rate of 3½ per cent. per annum for fifty years, from April 1, 1912, interest payable half yearly.

7. By "The Canadian Northern Railway Guarantee Act, 1914."

Authority is given the Dominion to guarantee the securities of the Canadian Northern Railway Co., to an amount not exceeding $45,000,000 together with interest thereon at the rate of 4 per cent. per annum. £3,500,000 of these securities have been sold and a portion of the remainder has been pledged for the purpose set out in the Act.

8. By "The Grand Trunk Pacific Guarantee Act, 1914."

Authority is given the Dominion to guarantee the securities of the Grand Trunk Pacific Railway Co., to an amount not exceeding $16,000,000 together with interest thereon at the rate of 4 per cent. per annum. £655,600 of these securities have been sold and $7,500,000 pledged against an advance by the Dominion government of an issue of Dominion notes to the amount of $6,000,000.

Dominion Notes

The circulation of Dominion notes stood at $289,258,697 on March 31, 1919, being an increase over the circulation at the close of last year of $38,459,836. During the same time the gold held by the receiver general for redemption of notes increased from $119,941,748 to $122,227,367.

THE ORGANIZED FARMER IN BUSINESS

Business activities of the organized farmers in western Canada continue to increase. United Grain Growers, Ltd., who now have 35,000 shareholders, showed a profit on their last year's operations for the financial year ending August 31st, 1919, of slightly over $140,000. This amount, while less than in previous years, is considered satisfactory because of the small crop of 1918 and the consequently reduced volume of business passing through the company's hands. An interesting feature of the business of United Grain Growers, Ltd., is the increasing amount of business handled through subsidiary companies. Two years ago United Grain Growers Securities Co., Ltd., was started with a single department—a land department—for the purpose of selling lands and especially improved farms for owners. A land appraisal department was shortly added, and, on account of the company's widespread organization, it was able to offer the only land appraisal service covering the west. This feature of their business has been largely used by mortgage companies and other investors, especially non-residents and owners interested in western lands.

A mortgage department is now announced for the placing of farm loans. The same facilities that enabled the land department to achieve rapid success will probably also be found useful in developing the farm loan business. Certainly this organization should have the requisite knowledge of underlying conditions to enable it to place such loans to the safety and satisfaction of investors.

British Columbia

Province of Vast Resources

THE finances of the Province have been restored to a sound condition, current expenditure is being kept within revenue, and borrowing is restricted to absolutely necessary capital expenditures of a reproductive nature or in connection with assistance to returned men to re-establish themselves in civil life.

Revenue for the fiscal year ending March 31st, 1918, exceeded expenditure by $493,201, and when the Public Accounts for 1918-1919 are presented to the Legislature it is expected a credit balance will be disclosed.

Capital assets, exclusive of natural resources, exceed liabilities by approximately $17,000,000. In addition, the Province possesses the following unpledged assets:—

Prime agricultural lands open for settlement, acres, 50,000,000. Timber lands of saw material, board feet, 349,568,000,000. Coal lands, tons, 83,828,523,000.

LUMBER

The forests of the Province vie with its mines for first place in the splendid array of its natural resources, and furnish about one-fourth of the Province's revenue. In the Queen Charlotte Islands alone is a stand of twenty-three billion feet of sitka spruce. With the application of modern methods of protection and reforestation, these are practically inexhaustible, and the demand is an increasing one. Forest production in 1918, including paper and pulp, was valued at $54,162,523, an increase of 12 per cent. over the previous year.

MINING

The mineral output for 1918 was valued at $41,083,093, an increase of 11 per cent. over that of 1917. There is considerable activity in mining throughout the Province, and a great deal of prospecting and development work is being done as a result of the passage of the Mineral Survey and Development Act. Diamond drilling, carried on by the Department of Mines, shows a growing tonnage of iron ore, and investigations are still in progress under the direction of Doctor Stansfield, to establish the commercial possibilities of electrical smelting as applied to the development of British Columbia's iron deposits.

FISHERIES

For many years British Columbia has led the Dominion in the value of fishery products. The value of all the fish caught in 1918 was $21,518,495, an increase of 40½ per cent. over 1917, and representing 41.13 per cent. of the total value of all Canadian fisheries. This includes the products of the whaling industry, which has been prosecuted vigorously during the past few seasons on the West Coast of Vancouver Island and the Queen Charlotte Islands. Last season's catch of halibut amounted to eighteen million pounds in weight.

AGRICULTURE

Agricultural pursuits are carried out actively in many parts of the Province, and in 1918 the total value of farm production was $49,543,008, an increase of 31½ per cent. over the year before. Mixed farming, stock-raising, dairying, fruit-growing, poultry raising and market gardening are conducted successfully. British Columbia's fruits have won the highest awards at all exhibitions, both on this continent and in Europe. Systematic plans are being carried out by the Land Settlement Board for the opening up of fine agricultural areas, and in this connection a large number of soldiers are being established in community settlements.

INDUSTRIAL

To all manufacturers British Columbia offers very great opportunities, having illimitable supplies of all raw materials. Iron ore exists in large bodies, and in most cases close to power and transportation. An abundance of water power readily convertible into electric power is available at numerous points throughout the province. The utilization of the immense iron deposits of the Province appears to be an early possibility, and the establishment of steel mills and steel shipbuilding plants is under consideration. Wooden shipbuilding has been in progress for the past two years, and the vessels already constructed are operating successfully. The sawmill industry has been long established and continues to expand with the growing demand for British Columbia timber.

Canadian Railway Developments During 1919

Unification of Government Lines, After Canadian Northern Had Been Operated Separately--Are Drayton-Acworth Recommendations Being Carried Out?—The Grand Trunk Pacific Default Leading Up to the Arrangement to Buy Whole Grand Trunk System.

By W. T. JACKMAN, M.A.

PERHAPS no such eventful year as 1919 has been known in our railway history since the year when the Canadian Pacific completed its span across the continent and united the Pacific with the Atlantic across the great unknown wilderness and prairie. From that day to this the lure of the west has been the same for railway builders as for individuals desirous of making new homes for themselves; and it was this prevalent desire of the railways to reach the great granary of the west and bring its products to the east that has been the cause of much of the railway trouble which we have had in the past five years. When to this we add the ever-present incentive on the part of the railways to widen the extent of the market and to convey the traffic that is handled by them over as long a haul as possible, we touch the fundamental causes which have led to the construction of the three transcontinental railways and the present financial embarrassment of two of these systems.

Leaving aside the strong Canadian Pacific Railway, which has come through the war period with the accomplishment of great service and with no other changes during 1919 than a few minor changes in personnel, we turn our attention to the Canadian National Railways, the Grand Trunk Pacific and the Grand Trunk Railway System. These we shall consider in turn.

The Canadian Northern

When the Canadian Northern Railway Company was taken over by the government, on October 1st, 1917, the former operating staff was maintained, but the system was operated under a new board of directors appointed by the government. This system, the majority stock of which was owned by the government, was run as a distinct and separate entity apart from the Canadian government railways, so that we had the anomalous condition of the two different methods of operation of railways which were owned by the Dominion government. The Canadian government railways were operated directly for the government by the Department of Railways and Canals, while the Canadian Northern, which was also owned by the government, was operated by a general manager acting under a board of directors chosen by the government. That such a situation could continue indefinitely was inconceivable, and, in fact, it was not expected. It was anticipated that soon after the acquisition of the Canadian Northern Railway system the railways then included in the Canadian government railways would be merged in management with the Canadian Northern so as to permit the greatest economy of operation.

Unification of Government Lines

Something similar to this had been recommended in the Drayton-Acworth report of 1917 and was put into effect in November, 1918, but it was not till the present year (1919) that the consummation of this plan was effected by the passage of "An Act to incorporate Canadian National Railway Company and respecting Canadian National Railways," which became law on June 6th, 1919. The purpose of this Act was to consolidate all the constituent and subsidiary companies comprised in the Canadian Northern system and to provide for the operation of this system with the Canadian government railways as a national railway system, under the name of the "Canadian National Railway Company." By this legislation, therefore, all the railways which were owned or acquired by the government were consolidated into one operating unit, the purpose being to eliminate the wastes due to competitive operation of the formerly separate properties and, if possible, change the annual deficit resulting from the operation of each of these railways into a surplus for the whole.

It was the repeated affirmation of the Drayton-Acworth report of 1917 that when the government should acquire the Canadian Northern, the Grand Trunk and the Grand Trunk Pacific Railway these roads should be managed by a self-perpetuating board of directors or trustees, constituted as a railway company, and absolutely free from any political interference. That report attached "very great importance to this point that the Board of Trustees should be a permanent self-perpetuating body," and the tenure of office of these trustees was recommended to be the same as that of judges of the Supreme Court, with slight exceptions. The government has been proclaiming constantly its adherence to this report in all its actions, but it would seem to be clearly at variance with that report in the organization of this company; for example, note the following terms of the Act:—

1st.—The number of directors is to be not less than five nor more than fifteen. But the report called for only five.

2nd.—The directors are to hold office from one annual meeting to another, or until their successors are appointed, unless removed by the Governor-in-Council for cause. Upon any vacancy occurring, the Governor-in-Council may fill the vacancy by the appointment of a successor. On the other hand, the report called for a "permanent self-perpetuating" board; and even the original trustees were to be given a tenure of office ranging from three to seven years, while all subsequent appointments of trustees should be for a fixed period of seven years.

But we need not go further in elaborating these differences. A careful study of the Act in its entirety reveals radical departures from the recommendations of the Railway Inquiry Commission of 1916-17, with the relative merits of which we are not concerned here. However, we cannot leave the public with the impression that this new company, in its management of the works entrusted to it, is necessarily going to have absolute freedom from political interference in working out a business administration of these properties. The fact that there is opportunity for the appointment of as many as fifteen directors indicates that this may be used to ensure political interests in a good many constituencies. The annual tenure of office of the directors may be nothing more than a device to safeguard, conserve or promote the political interests of the party in power, in ways which are already too well known to the people of this country.

Not Free From Government Influence

But lest it should be said that we are laying too much stress upon the aforementioned terms of the Act, perhaps we may be permitted to refer also to sections eleven and twenty-three of the Act. By the former (section 11), authority is given to the Governor-in-Council to entrust to the Canadian National Railway Company the management and operation of any railway lines or other works which are now or in future may be vested in his Majesty, under such terms and conditions as may be determined; "such management and operation to continue during the pleasure of the Governor-in-Council, and to be subject to termination or variation from time to time in whole or in part by the Governor-in-Council." Is there any person so unsophisticated as to interpret this to mean that the company is to be absolutely free from political or governmental interference? If so, he has yet to learn the ways of government. In section 23 of the Act it is provided that "with the approval of the Governor-in-Council and upon any location sanctioned by the Minister of Railways and Canals, the com-

THROUGHOUT THE WEST

Farm Land Mortgages

Farm Land Appraisals

IN farm land appraisals, United Grain Growers Securities Company offer the only service that covers the West. No other company can even attempt what this company, because of its wide spread organization is able to do. Our appraisal service has been used by the Soldiers' Settlement Board, by Mortgage Companies, and other large investors, and by administrators of Estates.

INVESTMENT OPPORTUNITIES

Well selected farm mortgages in Western Canada combine high rate and good security to an exceptional degree, and with the steady advance of land prices, the security is constantly increasing. We offer investors a special service in selecting loans of the highest class. To Insurance and Trust Companies and other investors able to place a large amount in the West, our service is especially valuable, as the money can be placed over a wide range of territory and under different conditions. In addition to the ordinary smaller loans, we can place money in amounts of ten to twenty-five thousand dollars on large properties.

United Grain Growers Securities Company is a Subsidiary Company, owned and operated by United Grain Growers, Limited, a business organization of thirty-five thousand farmer shareholders. The reputation of the parent company for sound business and fair dealing is established in every corner of Western Canada. The Securities Company enjoys all the facilities for business of the parent organization.

The Organized Farmer in Business

WINNIPEG **CALGARY**

pany may from time to time construct and operate railway lines . . . in respect to the construction whereof . . . parliament may hereafter authorize the necessary expenditure, or the guarantee of an issue of the Company's securities." In other words, the extension of railway facilities depends henceforth upon the approval of parliament. This, of course, is simply a continuation of the conditions which have prevailed hitherto; the extensions of railway lines are not necessarily going to be made according to the needs of communities, but may be made in accordance with their power to influence votes for the government or as the result of political pressure upon the government.

Do these provisions of the Act, and others which we might mention, indicate that the Canadian National Railway Company is to be divorced from politics? Let him who dare answer in the affirmative. Section after section of the incorporating statute affirms that the Governor-in-Council has direct control over nearly every phase of the company's business, and that the company is really the creature of the government. In saying this, we are not declaring that the principles involved are not correct, for it would seem to be the essence of democracy that what the people own should be under the immediate control of the government of the day. But we do say that the much-vaunted adherence of the government to the suggestions embodied in the Drayton-Acworth report is a blind held before the eyes of the Canadian public to obscure the real nature of this transaction.

This Act has not yet become effective, on account of the fact that the board of directors has not yet been named and the head office of the company has not been determined.

The Grand Trunk Pacific.

The situation of the Grand Trunk Pacific Railway has also been entirely altered during the year 1919. For several years this company had been receiving government advances amounting to $7,500,000 to $8,000,000 annually to enable it to carry on, for the revenues of the road and its insufficient branch lines were not enough to pay even the operating expenses, much less the fixed charges. Even with the increased rates which had been allowed to all the railways, this road was unable to make its revenues measure up to the amount of its expenditures. In the early part of the year negotiations were continuing between the government and the Grand Trunk Railway Company in London looking toward the acquisition of the company's property by the government; but while these negotiations were in progress a critical situation developed in connection with the Grand Trunk Pacific, and on March 4th the government was notified that this railway could not continue its operations after about March 10th, when its funds would be exhausted. The government did not want to ask parliament to provide further funds for the railway so long as the negotiations with the Grand Trunk remained in an unsatisfactory condition; and in order that the operation of the road might not be discontinued, to the injury of many interests, the Grand Trunk Pacific was placed, on March 7th, in the hands of the Minister of Railways and Canals as receiver. The officials of the company from that time onward continued the operation of the system under instructions from the receiver.

Grand Trunk Is Latest Deal

But the position of the Grand Trunk Railway System has given the greatest concern. As we have mentioned already, efforts had been made to take over this system and add it to the other lines that were in the hands of the government, but the outcome was unsatisfactory. The government had offered to take the assets and assume the liabilities of both the Grand Trunk Pacific and the Grand Trunk and to make an annual payment (in the way of a long-term rental) for the same amounting to $2,500,000 for the first three years, $3,000,000 for the succeeding five years, and $3,600,000 annually thereafter. If these terms were refused the government offered to submit the question of payment to a board of arbitration. This offer was made on July 11, 1918. The Grand Trunk directorate in London declined to accept these terms and on August 8, 1918, submitted their final terms, namely, that the government should pay the annual sum of £977,000 (the net earnings of the Grand Trunk Railway System for 1913, the last normal year before the war) and leave to arbitration what further sum, if any, the shareholders were entitled to, due to the prospective value of the undertaking as a result of the development of the Dominion. As an alternative, it was suggested that the shareholders should receive annually £1,163,000 without arbitration.

The whole question dragged on until the matter became acute after the Grand Trunk Pacific receivership. The Grand Trunk was no longer in a position to dictate terms, because if the government should have held it responsible for its obligations regarding the Grand Trunk Pacific, the Grand Trunk would have been unable to meet these obligations and would have been forced into insolvency. On the other hand, the government was anxious to add the lines of the Grand Trunk in the east to the lines it already owned in order, ostensibly, to complete its system and round it out so as to enable it to compete on even terms with the Canadian Pacific. Finally, in the closing days of the session of parliament called to ratify the Peace Treaty, and after this work had been concluded and the majority of the members had left for their homes, the Bill for the acquisition of the Grand Trunk was brought into parliament.

Terms For Grand Trunk Purchase

The more important provisions of the measure may be briefly summarized as follows: The government is to regard the guaranteed stock, which bears 4 per cent. interest perpetually, as an obligation the same as the debenture stock upon which interest is due perpetually. The interest on these two kinds of stock is to be a permanent charge against the revenues of the road. The value of the first, second and third preference stocks and the common stock is to be determined by a board of arbitration and when the amount of the award is known the holders of these stocks, upon surrendering them to the government, will receive new guaranteed stock, bearing interest at 4 per cent., to the amount of the award. All the outstanding stock will be deprived of voting power. When the government acquires the preference and common stocks, the management of the Grand Trunk will be unified with that of the Canadian National Railways so that these will all be made to work in harmony and, as nearly as possible, as one system in the public interest. At any time after thirty years the government may call in and purchase any or all of the guaranteed stock then outstanding, but the interest on the debenture stock is a permanent charge against the operating revenues.

Heavy Obligations Assumed

By taking over the Grand Trunk the government assumes a capital obligation of about $400,000,000 and annual charges of $20.000,000. By the acquisition of the Grand Trunk Pacific the capital obligations will be increased by about $300,000,000 and the annual expenses by at least $8,000,000. Before the issuance of the last loan, in October, 1919, the national debt of the country stood in round numbers at $2,000,000,000; and by this legislation which has been put through by the government at Ottawa there will be an increase of that debt by one-third or more. This will be the result as soon as the Grand Trunk shareholders shall have accepted the agreement which is the basis of this legislation. It seems inconceivable that the government of the day, in the face of the enormous war debt, which is constantly increasing and which must entail stupendous expenditures for long years to come, should be able to view with equanimity this huge piling up of debt. It is urged by the government that there is nothing else that could be done in the face of the existing railway situation Such a plea is the refuge of the weak—of those who do not want to face the issue squarely, or of those whose horizon is too narrow to do anything but yield to such fatalism. It is not the attitude of those who are doing the greatest service to their country. It is not the attitude of the great captains of industry in meeting the large issues of the business world. To be confronted with problems of vast complexity and difficulty is to such men the occasion for showing still greater judgment and eliciting more profound thought.

DIVIDENDS AND NOTICES

DOMINION TEXTILE COMPANY, LIMITED

NOTICE OF DIVIDEND

A dividend of one and three-quarters per cent. (1¾%) on the Preferred Stock of the Dominion Textile Company, Limited, has been declared for the quarter ending 31st December, 1919, payable January 15th, 1920, to shareholders of record, December 31st, 1919.

By Order of the Board.

JAS. H. WEBB, Secretary-Treasurer.

City Treasurer.

34

The total customs revenue of the Dominion for the year 1919 amounted to $169,071,034, or an increase of $14,345,623 over 1918, when it totalled $154,725,411. The statement covering the first nine months of the fiscal year, which also ended December 31st, 1919, shows an increase of $10,932,657 over a similar period in 1918. For the nine-month period the total customs receipts were $130,288,220, while in 1918 they were $119,355,563. December receipts in 1919 were $15,836,007 and in 1918 they were $11,982,855.

FINANCIAL RELATIONS WITH GREAT BRITAIN

For Present, at Least, Canada Is Regarded as a Lender Rather Than a Borrower—Exchange Reduces Britain's Imports

By C. Cambie

THE British Empire is now setting herself to the task of reconstruction after the marvellous effort she put forth in the war. It is a task second only in importance to the work accomplished on the battlefields, and one that calls for the highest degree of political and financial statesmanship.

Great Britain, from the pre-eminent position she occupies in the economics of Europe and as a leading factor in the rehabilitation of the war-exhausted nations, has much to do before Europe regains her pre-war prosperity, but she is assisted in her task by the way the overseas Dominions are grappling with their own problems. Especially gratifying, for instance, has been the splendid response which the people of Canada have made to the Dominion's call for money, and the great success of the last Victory Loan roused much pleasing comment in the United Kingdom. It is now recognized that Canada can pay her own way, and her financial stability, exemplified in the successful handling of her war finances and burdens, have added considerably to her prestige, both national and financial.

New Regard for Canada

Indeed, the Dominion is now looked upon as a lender instead of a borrower, with the added responsibilities which that position entails. Coupled with this fact is the adverse sterling exchange, and some considerable time must elapse before Canadian securities can be advantageously placed on the British market. With the removal, in March last, of the control of the United States exchange, prices of dollar securities in this market automatically increased with the shrinkage in the value of the pound sterling, and as a result they have been purchased in increasing amounts and sent out of the country. It is also evident that many holders of securities have changed their registration so that they will be benefited by obtaining their dividends in dollars instead of in sterling.

British Consumers Pay Heavily

The adverse exchange and the cessation of war orders have also had a lowering effect on imports from Canada and other countries, although, in such essential commodities as food, imports must continue, the increase in price due to the lower value of sterling being borne by the already overburdened consumer. The purchases by the United Kingdom of Canadian products have, in the main, been financed by credits established by the Canadian banks and the Canadian government and by borrowings in the United States, and the resultant trade between the United Kingdom and Canada is, of course, now much reduced, and will so continue until conditions again become normal.

Amalgamations for Banking and Trade

The restrictions in trade which had been in force during the war were, generally speaking, continued until five or six months after the armistice. These, with the control which the government assumed for the importation of food products, lessened to a considerable extent the activities in general trade, and, in consequence, the transactions which in pre-war days were accustomed to be handled by the banks. With the removal of some of these restrictions during the last six months, however, and with greater production and the more general activity in shipments, there has been evidence that the banks are regaining their pre-war trade activities. Not only so, but in the big industrial and economic developments which are already in sight, they will take an increasingly prominent part, and, in this connection, it is interesting to note that during the year a number of amalgamations have been made between the London, Provincial, Scotch and overseas banks. While there may have been some criticism of the consequent decrease in the number of independent banking institutions, the combinations have not only strengthened the financial position of the banks, but have materially increased the efficiency of the banking machinery.

Supported by Investors

This tendency to concentration is equally marked in other commercial spheres. Many large industrial concerns have amalgamated, or are in process of amalgamation, and several of the well-known insurance companies have also combined forces. That the investing public are not out of sympathy with this tendency, which is world-wide, is exemplified in the remarkable response that continues to be made to the big flotations that are appearing daily on the British market. In most cases these issues have been over-subscribed, and, whatever the general situation in Europe may be, there is ample evidence that there is much money available in the United Kingdom for investment in sound securities of this nature.

In the increasingly extensive role which the banks are taking in the development of trade and commerce, the Canadian banks in London are taking a part fully commensurate with the important position the Dominion occupies in this, the heart of the empire and the centre of the world's money market.

GOVERNMENT BANKING INSTITUTIONS

Funds Used in Financing Dominion—Amounts on Deposit in Post-Office Savings Banks and in Dominion Government Savings Banks Decreased During 1919

ALMOST $50,000,000 is kept on deposit in the post-office savings banks and in the Dominion government savings banks, both of which are operated by the Dominion government. The former has excellent facilities for securing deposits, as every post-office throughout the Dominion is a branch. Interest is paid on deposits. The Dominion government savings banks have branches in Winnipeg, Man.; Victoria, B.C.; Charlottetown, P.E.I.; Newcastle and St. John, N.B., and in Barrington, Guysboro', Halifax, Kentville, Lunenburg, Port Hood and Sherbrooke, N.S. While these government depositories have appealed to classes, especially foreigners, who have not confidence in private banking institutions, yet they have been losing ground for some time past. The money deposited is used in financing the Dominion government, and, therefore, is treated as a liability.

Deposits and Withdrawals

The following figures show the trend in the accounts for some months past:—

Post-Office Savings Banks

1919.	Deposits during month.	Withdrawals during month.	Balance at end of month.
January	$1,117,194	$1,109,840	$41,370,405
February	776,237	1,445,347	40,738,913
March	953,229	1,212,329	41,654,960
April	918,146	1,663,804	40,950,513
May	763,039	1,909,835	40,037,950
June	763,472	1,318,241	39,547,520
July	807,142	1,338,330	39,070,422
August	919,568	1,656,354	38,388,667

Dominion Government Savings Banks

1919.	Deposits during month.	Withdrawals during month.	Balance at end of month.
April	$ 243,695	$ 275,980	$11,369,978
May	239,841	488,109	11,121,710
June	235,294	196,685	11,160,319
July	231,721	206,087	11,185,953
August	182,363	210,475	11,157,841
September	200,510	227,298	11,131,053

Loan Companies Position Maintained

Look for Renewal of British Investments in Canada—Debentures Outstanding Have Declined Since 1915—Loan Company Deposits Represent Years of Savings, While Bank Funds Return Almost At Once.

By GEORGE H. SMITH.

FOR many years, prior to the financial disarrangement caused by the world war, Great Britain had been the chief source from which our Canadian land mortgage companies obtained the moneys which they re-loaned on the security of Canadian farms, dwellings and other productive real estate. Previous to 1875 the companies then in existence had been dependent upon the comparatively limited amount invested in their capital stock and the savings of their depositors. In that year the Canada Permanent blazed the trail to the British market by establishing an agency in Edinburgh for the sale of its debentures. It was found that this class of security, based upon old mother earth, appealed strongly to the canny Scot and almost immediately money began to regularly flow to Canada from this source, with most beneficent results to the Canadian people.

The rates of interest which, owing to the previous limited supply of loanable funds, had been very high, were gradually reduced till our farmers and home-owners could obtain a small loan at a lesser rate than our government now has to pay on its Victory Loan and other bonds. At the end of 1913 the companies reporting to the Ontario government had outstanding obligations payable in Great Britain to the large amount of $76,719,734. At the same date their debentures payable in Canada amounted to $20,763,346, and the aggregate of their deposits was $22,203,211.

War Restricted Supply of Funds

The requirements of the British government for the prosecution of the war naturally restricted the investment of money in this as well as other securities outside the United Kingdom, but even in the early years of the war there was a further increase in the amount of British money entrusted to these companies, which at the end of 1915 stood at $78,065,643.

During the years which followed these figures underwent a very considerable reduction. Unfortunately, the government has not made available the returns later than the close of 1917, but at that date the aggregate was $68,985,492, a net decrease of more than nine million dollars. It must be remembered, however, that these debentures are issued for terms not exceeding five years, and that, consequently, not less than one-fifth of the total amount becomes due each year. It will, therefore, be seen that out of about forty million dollars which might have been withdrawn in those two years, more than thirty million dollars were either renewed or re-invested. Taking into consideration the very attractive investments available at home, and the natural appeal to a patriotic people of the British war loans, the foregoing fact bears most eloquent testimony to the high place the debentures of our old-established land mortgage companies hold in the esteem of the most conservative investors in the world.

Reductions Continued Up to Present

In 1918 and 1919 a further reduction in the aggregate has taken place but when the figures are available it will be found that it has not been as great as in the previous two years. In 1919, I am aware that some companies have renewed or replaced nearly the total amount which became due. There is no doubt that the tide has turned and that at an early date the steady flow of funds from Britain would again set in if the dam of an abnormal exchange rate could in some way be removed. With the present serious depreciation of the pound sterling the importation of British money is impossible, but in the meantime the companies can reasonably expect to maintain their obligations to the British investors at about their present level.

On the other hand, the money obtained from Canadian investors in their debentures, and from depositors, has considerably increased. At the close of 1917 the debentures payable in Canada amounted to $26,537,539, and the deposits had increased to $27,029,777. The latter amount would no doubt have shown a further marked expansion in the past two years but for the very large withdrawals for investment in the two Victory Loans issued by the Canadian government in 1918 and 1919.

Savings Accumulate Slowly

The deposits with the loan companies are the accumulated savings, often of many years, and when withdrawn for investment do not immediately return to the companies, as is the case with the commercial deposits of the banks, but have again to go through the slow process of saving and accumulation. However, there is encouragement in the fact that, notwithstanding the many circumstances tending to a lessening in the volume of money available from this and the other sources referred to, the aggregate has been so well maintained. The honorable record and splendid reputation of the old-established companies which for from forty to seventy years have continued the conservative methods adopted at their institution have stood them in good stead in these difficult years. In the reconstruction period there can be no doubt they will maintain the position they have so long occupied and, in the future as in the past, fill a most important place in the development of our great Dominion.

LARGE COMPANIES FORMED IN 1919

Numerous Incorporations Indicate Preparations for Business Expansion—Several Have Capital of $10,000,000 and Over

AN unusually large number of companies have been incorporated in Canada this year under Dominion and provincial charters. The growth of large-scale production is also indicated by the number with capital of $1,000,000 and over. The following list, giving the location of the head office and the capital, has been compiled by *The Monetary Times*:—

Belleville, Ont.—Teco Co., Ltd., $1,000,000.
Walkerville, Ont.—Peabodys, Ltd., $1,500,000.
Galt, Ont.—Stauffer-Dobbie, Ltd., $1,000,000.
Morrisburg, Ont.—Handley-Page, Ltd., $2,500,000.
Chicoutimi, Que.—Saguenay Power Co., $3,000,000.
Bear River, N.S.—Clarke Brothers, Ltd., $1,500,000.
The Pas, Sask.—Finger Lumber Co., Ltd., $1,000,000.
Quebec, Que.—Rock City Tobacco Co., Ltd., $2,500,000.
Eyremore, Alta.—Kleenbirn Collieries, Ltd., $1,000,000.
Windsor, Ont.—Border Cities' Hotel Co., Ltd., $1,000,000.
Sudbury, Ont.—White Rock Mining Co., Ltd., $1,000,000.
Cornwall, Ont.—Triangle Silver Mines, Ltd., $2,000,000.
Halifax, N.S.—Robert Simpson Eastern, Ltd., $2,500,000.
St. Mary's, Ont.—St. Mary's Cement Co., Ltd., $3,000,000.

Fort William, Ont.—Great Lakes Paper Co., Ltd., $8,000,000.

Chatham, Ont.—Crawford Skead Gold Mines, Ltd., $1,000,000.

Edmonton, Alta.—Oliphant-Munson Collieries, Ltd., $3,000,000.

Trois Rivieres, Que.—Three Rivers Realties Co., $1,000,000.

Sarnia, Ont.—Roberts Automatic Connector Co., Ltd., $1,000,000.

Goderich, Ont.—The Lake Huron Steel Corporation, Ltd., $15,000,000.

Coleman, Alta.—International Coal and Coke Co., Ltd., $3,000,000.

Calgary, Alta.—Canadian Western Steel Corporation, Ltd., $2,000,000; Davis Dabro Farm and Ranch Co., Ltd., $1,500,000.

Terrebonne, Que.—Terrebonne Electric Power and Steel, Ltd., $2,000,000.

New Toronto, Ont.—Goodyear Tire and Rubber Co. of Canada, Ltd., $30,000,000.

New Liskeard, Ont.—Premier Gold Mining and Explorations Co., Ltd., $2,000,000.

Peterboro', Ont.—Stickney Motors, Ltd., $1,500,000; the Dickson Co., Ltd., $1,000,000.

Ottawa, Ont.—Standard Paving, Ltd., $2,000,000; Gould Allied Mines, Ltd., $2,000,000.

Oshawa, Ont.—Parkwood Securities, Ltd., $6,000,000; Melrose Securities, Ltd., $3,000,000.

St. Boniface, Man.—Farmers' Packing Co., Ltd., $1,500,000; Western Wheel and Foundries, Ltd., $2,000,000.

Sherbrooke, Que.—Canadian Peerless Jewellery Co., Ltd., $1,000,000; Canadian Connecticut Cotton Mills, Ltd., $6,500,000.

Vancouver, B.C.—Woodward's, Ltd., $1,000,000; Canadian Western Steamships, Ltd., $2,000,000; Vancouver Steamship Co., $2,000,000.

Haileybury, Ont.—Honer-Kirkland Gold Mines, Ltd., $2,000,000; Prospectors Development Co., Ltd., $2,000,000; Ivanhoe-Boston Gold Mines, Ltd., $2,000,000.

Hamilton, Ont.—Electric Bond and Share Co. of Canada, Ltd., $1,000,000; Northern Ontario's Great Mines Developing Co., Ltd., $2,000,000; Porrits and Spencer (Canada), Ltd., $1,000,000; Hoover Suction Sweeper Co. of Canada, Ltd., $1,000,000; Firestone Tire and Rubber Co. of Canada, Ltd., $5,000,000.

Winnipeg, Man.—Northern Copper and Nickel Mines, Ltd., $2,000,000; Canada West Silver Black Fox Co., Ltd., $1,000,000; Clark Milling Co., Ltd., $1,000,000; North Star Oil and Refining Co., Ltd., $1,500,000; Gabrielle Mines, Ltd., $1,000,000; Clearwater Lake Mines, Ltd., $1,000,000; Laura Mines, Ltd., $2,000,000; the Marigold Gold Mining Co., Ltd., $1,500,000; Hudson Mines, Ltd., $5,000,000; Commonwealth Gold Mines, Ltd., $2,000,000; Victory Gold Mines, Ltd., $3,000,000; The Pas Lumber Co., Ltd., $1,000,000.

Montreal, Que.—Kipawa Co., Ltd., $20,000,000; Knox Brothers, Ltd., $1,000,000; Transatlantic Steamship Co., Ltd., $1,000,000; Bishop Navigation Co., Ltd., $1,500,000; United Financial Corporation, Ltd., $1,000,000; Loew's Ottawa Theatres, Ltd., $1,860,000; National Farm and Amusement Co., Ltd., $1,000,000; Casavant Brothers, Ltd., $1,000,000; Compagnie Canadienne Transatlantique, Ltee., $1,000,000; Scottish Canadian Magnesite Co., Ltd., $1,000,000; Dupuis Freres, Ltd., $2,500,000; the Stephens Estate Realties, Ltd., $1,500,000; Phillips Square Theatre Co., Ltd., $1,500,000; United States Rubber Co. of Canada, Ltd., $20,000,000; Doheny, Quinlan and Robertson, Ltd., $2,000,000; Luna Park, Ltd., Montreal Hippodrome Co., Ltd., $1,100,000; (Montreal Hippodrome Co.), F. W. Hackett, J. DeG. Audette, D. B. Smith, P. K. Co., Ltd., $2,000,000; Hugh Doheny and Co., Ltd., $2,000,000; Sir Mortimer Davis, Inc., $10,000,000; Merchants Realty Corporation, $2,000,000; Western Quebec Power Co., Ltd., $1,000,000; the Henry McMullen Co., Ltd., $1,000,000; British Minerals Corporation, Ltd., $1,500,000; British Foundation Ovens, Ltd., $15,000,000; British Refractories, Ltd., $3,000,000; Loew's Metropolitan (Montreal), Ltd., $1,000,000; Alliance Steamship Co., Ltd., $1,000,000; Robinson's Clothes, Ltd., $1,000,000; Dominion Oilcloth and Linoleum Co., Ltd., $5,000,000; Canadian Steel Tire and Wheel Co., Ltd., $1,000,000; International Corporation of Canada, Ltd., $2,000,000; Havana Marine Terminals, Ltd., $30,000,000; the Congoleum Co. of Canada, Ltd., $1,000,000; Great Eastern Paper Co., Ltd., $5,000,000; Benson and Hedges (Canada), Ltd., $5,000,000; Howard Smith Paper Mills, Ltd., $7,000,000; Knit-to-Fit Manufacturing Co., Ltd., $1,000,000; St. Maurice Power Co., Ltd., $6,500,000; Trans-Canada Theatres, Ltd., $3,750,000; Simmons, Ltd., $10,000,000; Dominion Engineering and Machinery Co., Ltd., $3,000,000; United Amusements, Ltd., $1,000,000.

Toronto, Ont.—Canadian Government Merchant Militia, Ltd., $1,000,000; Canadian Fishing and Transport Co., Ltd., $1,500,000; Loew's London Theatres, Ltd., $1,000,000; National Electro-Product, Ltd., $1,000,000; Eureka Molybdenite Corporation, Ltd., $1,000,000; Canadian Cartridge Co., Ltd., $1,000,000; Dominion Sewer Pipe and Clay Industries, Ltd., $1,000,000; Toronto Glencoe Oil Co., Ltd., $1,000,000; Kirkland-Hudson Bay Gold Mines, Ltd., $2,000,000; Nukol Fuel Co., Ltd., $1,000,000; New Porcupine Imperial Mines, Ltd., $3,000,000; Thermos Heating System, Ltd., $1,000,000; McColl Brothers, Ltd., $1.000,000; Border Cities Co., Ltd., $1,000,000; Lakeview Gold Mines, Ltd., $1,500,000; Zimmerman Reliance, Ltd., $2,000,000; the Stamped Metal Products Co., Ltd., $6,000,000; Ontario Barium Co., Ltd., $1,000,000; Clifton Porcupine Mines, Ltd., $2,000,000; British American Mining Co., Ltd., $1,000,000; Greene-Kirkland Gold Mines, Ltd., $3,000,000; Herrick Gold Mines, Ltd., $2,000,000; Goldale Mines, Ltd., $3,000,000; Canadian Luckenbach Processes Co., Ltd., $5,000,000; Lake Matachewan Gold Mining Co., Ltd., $2,000,000; E. T. Stephens, Ltd., $1,000,000; Associated Securities of Canada, Ltd., $1,000,000; Miller-Adair Mines, Ltd., $2,000,000; Allied Packers of Canada, Ltd., $10,000,000; Chase Tractors Corporation, Ltd., $2,000,000; Camburn Silver Mines, Ltd., $1,500,000; Symmes-Young Silver Mines, Ltd., $2,000,000; Granby-Kirkland Gold Mines, Ltd., $2,000,000; Nipissing Extension Mines, Ltd., $3,000,000; Davidson Consolidated Gold Mines, Ltd., $3,000,000; Gold Nugget Products Co., Ltd., $1,000,000; Morse Oil Co., Ltd., $1,500,000; Fairweathers, Ltd., $1,000,000; Savold Tire Corporation of Canada, Ltd., $3,000,000; Canada Petroleum and Refining Corporation, Ltd., $2,500,000; Consolidated Iron and Steel Corporation, Ltd., $8,000,000; Sovereign Production Corporation, Ltd., $1,000,000; Silver Diadem Mines, Ltd., $2,000,000; International Bushings, Ltd., $25,000,000; Lumber and Pulpwood of British Columbia, Ltd., $1,000,000; Canadian Paramount Corporation, Ltd., $5,000,000; Standard Reliance Assets, Ltd., $9,000,000; Chemical Products Corporation, Ltd., $3,000,000; Canada Bitulithic, Ltd., $1,500,000; British Matachewan Gold Mines, Ltd., $3,000,000; the World Mining and Reduction Co., Ltd., $1,000,000; Skead Gold Mines, Ltd., $5,000,000; Canadian Mexican Oil Co., Ltd., $1,000,000; Rockland Cocoa and Chocolate Co., Ltd., $1,000,000; Wilson Canadian Co., Ltd., $1,000,000; K. and S. Tire and Rubber Goods Co., Ltd., $3,500,000; Peace River Petroleums, Ltd., $5,000,000; L. R. Steel Co., Ltd., $2,000,000; Okawaw-Kenda Gold Mines, Ltd., $1,000,000; Northern Oilfields, Ltd., $1,000,000; Inland Oil and Gas Co., Ltd., $1,000,000; Nichols Gold Mining Co., Ltd., $2,000,000; International Pyrite Co., Ltd., $1,000,000; General Building Corporation, Ltd., $1,000,000; Canadian-American Resources, Ltd., $50,000,000; General Examining and Developing Co., Ltd., $1,000,000; Lion Tire and Rubber Co., $2,500,000; Carveth Gold Mines, Ltd., $3,000,000; Hudson-Porcupine Gold Mines, Ltd., $1,500,000; Oakoal Co. (Canada), Ltd., $2,250,000; La Santa Lucia Gold Mines, Ltd., $1,000,000; Kalgoorlie-Kirkland Gold Mines, Ltd., $2,000,000; Bowes Co., Ltd., $1,000,000; Ward Baking Co., Ltd., $1,000,000; Interlake Tissue Mills Co., Ltd., $1,000,000; Salada Tea Co. of Canada, Ltd., $2,000,000; Silver Bullion Mines, Ltd., $1,500,000.

Industrial Bonds

and make use of our thirty-six years' experience.

HANSON BROS.
160 James St., Montreal
Established 1883

Industrial Progress and Peace—

as we see it. Canada's industrial response to war's demands was but a preparation for even greater progress in times of peace.

During the war we financed a number of Canadian Industrial and Public Utility Corporations. Among them were :

Nova Scotia Steel and Coal Company
Canadian Car and Foundry Company
Laurentide Power Company
Riordon Pulp and Paper Company
Mattagami Pulp and Paper Company
Canadian Salt Company

Now, with Peace, our facilities are more than ever at the disposal of Canadian Corporations which desire financing.

We stand ready also to serve discriminating Investors in Mortgage Bonds of representative Canadian Industries.

"Investment Recommendations" is published quarterly and "Investment Items" monthly, by us for Investors. Your name will be gladly added to our mailing list on request.

Canada's State Merchant Fleet in 1919

About Twenty Ships Operating to all Parts of the World—Forty More Being Built and Under Contract—Total Tonnage to be 320,000, and Total Cost About $60,000,000—Profitable Operations—New Routes Being Planned to Southern Ports—Meeting United States Competition—Special Help to our Exporters by Control of Rates.

By. G. W. AUSTEN.

WHILE important begininngs were made in 1918 on the Canadian government merchant fleet, it was in 1919 that the venture was really "put on the map." In the last year nearly twenty ships, aggregating more than 80,000 tons, have been delivered and put into commission. To-day these ships are in ports in Europe, Central and South America, Australia and New Zealand, the West Indies, Newfoundland, and shortly will be callers at Shanghai and Yokohama. The Canadian government merchant marine, to be composed of sixty freighters of 320,000 tons, is, and will be, a great national venture in the promoting of our foreign trade. It marks the real beginning of our nationhood upon the sea.

In the early part of 1918 Hon. C C. Ballantyne, Canada's Minister of Marine and Fisheries, put before parliament his proposals for such a fleet. He had seen the British government placing orders in Canada for steel cargo vessels through the Imperial Munitions Board, and Canada had put up the money. Why, reasoned the Minister, should not Canada be building these ships for herself instead of paying for them for London's account? This country was nationalizing more than half of its railway mileage, and had a great trunk system, with outlets on both oceans. Why should there not be a state merchant marine as a feeder for these railways? Parliament was easily persuaded, and the first vote was for $30,000,000. As berths were cleared of the ships then building for the British government, Canada's ships went on the stocks. The first freighter was launched in November, 1918, at the Vickers yard in Montreal, but it was not until last spring that it was commissioned. On March 2nd, it, the "Canadian Voyageur," left on the first trip, going to the Barbados and other southern islands. Delayed by labor and other shortages, deliveries of other ships were slow, but gradually they were handed over, and on December 1st fifteen were in service. The tonnage of these aggregated about 70,000, but even up to mid-November, the cargo tonnage cleared by them amounted to 116,000 tons.

Many Voyages in Many Directions

Voyages have been made to Havana, Kingston, Trinidad, Demerara, St. John's, Liverpool, London, Avonmouth, and the "Canadian Raider," 5,100 tons, left on December 10th for Australia. In nearly all cases full cargoes have been obtained on the outward voyage and full cargoes on the inward trip from the southern ports. Cargoes from Britain have been light. This has, of course, been but a mere beginning. With only a few ships, on voyages that require a month, or six weeks, an imposing aggregate of tonnage moved is impossible. By spring, however, most of the forty-five ships contracted for originally will have been delivered. Contracts for another fifteen have been or are about to be placed, and large extensions of itinerary will occur over the winter. The large building programme in 1919 gave Canada the distinction of being fifth in the list of shipbuilding nations, and Japan and Italy exceeded this country in tonnage by only a few thousand tons. Substantially, we were behind only Britain and the United States.

In the report of Lloyds' Register, recently issued, it was shown that in June, 1914, Canada was building eighteen vessels of 14,184 tons gross; in June 1917, twenty-six vessels of 75,698 tons gross; in June, 1919, fifty-nine vessels of 155,542 tons gross. Of the latter, forty-three of 134,757 tons were steel. The placing of new contracts to replace those filled should make 1920 a better year with the shipyards than was 1919. Hon. Mr. Ballantyne recently stated that the government could sell the whole merchant fleet at its cost. It was stated afterward that France had made such an offer. But while Canada's state fleet was built partly with the idea of establishing a new industry and partly to assist in overcoming unemployment in Canadian cities, its main purpose was to give Canada more tonnage to serve its trade on the seas. Our merchant marine has already been of notable service to our trade. It has, for instance, brought 35,000 tons of sugar from the West Indies and prevented a sugar famine here. To the end of the year it has carried away at least 150,000 tons of cargo and brought in at least 100,000 tons. Figures on this will be presented to parliament at the coming session. The government was not inclined, therefore, to consider France's offer to buy the ships at cost. It is reported that French interests are willing to pay $170 a ton for new ships. This is the rate at which new Canadian contracts are being placed, and if the financing could be arranged, French contracts may be available to Canadian yards. Hon. Mr. Ballantyne stated some time ago that the government might decide to sell off superfluous ships, reducing the fleet to actual needs as shown by trade demands, but so far the trouble has been to get tonnage, not to get rid of it.

Large Profits on Operations

The profits of the operation of the government freighters will not be disclosed until an official report is made. But the voyages made so far have been very profitable. The Minister said that a year or two of such business would pay for the ships. As ocean rates are still about seven times what they were before the war, and in some instances are ten or twelve times as high, profits accrue very quickly. Canadian experience with the ships now in service may compare favorably with the record made by the Australian government. It bought, in 1916, fifteen ships from British owners, paying $10,000,000 for them. By the end of 1918 they had paid for themselves and piled up a goodly surplus. Rates are much lower than they were in the pinch of the ship shortage, but still are immensely profitable, and are likely to remain so during 1920. The world had, six months ago, 2,500,000 tons more of ships than it had previous to the war, but strikes, dock congestion, coal shortages and other impediments neutralized the advantage. The quantities of material to be moved piled up tremendously. Even now, Australia has five million tons of wheat and several million bales of wool on hand—the accumulated surplus of several years of virtual isolation. The demands of Europe for cargoes are insatiable. The vacuum over the whole of the continent is wide and deep, and both heavy importations and home production for several years will be needed to fill it. In spite of onerous exchange difficulties, we may look for active ocean movements at high rates, and a goodly part of the capital cost of the government ships will have been wiped out before the return to close competitive rate conditions.

Feeder for the Railways

The intention of the government is to operate the fleet as an ocean feeder for the National Railways. By acquiring the Canadian Northern, the Grand Trunk and Grand Trunk Pacific and joining them to the Intercolonial, the government

(Established in 1901)

will have a vast system of about 22,000 miles. The traffic is entirely too thin to make the unified system pay its way, and one way to thicken it is to promote export and import traffic through an auxiliary ocean service. The Canadian Pacific has both Atlantic and Pacific feeders to its system. The government freighters will, therefore, ply specially from the termini of the National system, building up a great through traffic movement. It should be possible to quote close rates on combined railway and ocean haul. The full conversion is likely to occur in 1920, as the taking over of the Grand Trunk will be a long process. In anticipation of this and the new tonnage in sight, representatives of the government marine have been investigating port and trade facilities and opportunities in Brazil, the Argentine and other South American Atlantic countries, and also in Chile, Peru, Mexican and other Southern Pacific countries that can be reached in coastwise trade out of Vancouver. Thus it is likely that the Canadian government fleet flag will soon be venturing into waters never before touched by a Canadian trading vessel. Arrangements have yet to be made for special trading with China and Japan, but opportunities here seem inviting. At present there are nine Japanese steamers operating between San Francisco, Seattle and the Orient, and these carry full cargoes both ways. Space on them is sold up to next spring. Agricultural implements are going forward on a basis of $17.50 a ton, motor trucks $12, autos $13.50, copper ingots $15, iron and steel $12, machinery $16, tobacco $35. Tonnage in the Orient trade is very scarce. As Canada imports immense quantities of silks, teas and other products of China and Japan, and immense trade opportunities await us there, the outlook for larger shipping service in this direction seems to be very promising.

United States Competition to be Feared

If for no other reason, the sudden development of United States shipping enterprise justifies our venture into a similar field. Before the war the merchant marine of the United States was limited to two or three million tons, most of it in the lake and coasting trades. The Stars and Stripes was seldom seen on freight vessels in European or Asiatic waters. But shipping difficulties during the war awoke the United States. Its building programme has created already about eight million tons, and the aggregate will probably be twelve million tons. Britain has only sixteen million tons of ocean-going ships. Before the war United States tonnage carried only 12 per cent. of American exports. Now the proportion carried in American bottoms is about 40 per cent. The inevitable consequence of this development will be the sucking of our export and import trade into American channels unless we have equally efficient transportation services. For years half of our grain has been sent out via New York because of lower costs than in the long Montreal-Halifax-St. John's haul. During the war the British Ministry of Shipping ordered a large number of British vessels into the Canadian service to get our products. But in the shipping competition bound to result from the overbuilding induced by present artificial conditions Canada cannot expect from British shipowners better service than will pay them every time in dollars and cents. We cannot expect British freighters to make special development routings to pioneer for Canadian trade. If Canada has not an adequate specialized ocean service to the outside world, much of its trade will pass through United States channels. Canada does not want that. Probably the United States government marine will fail of economical operation when the test of precarious times arrives. British ships can be operated 30 per cent. more cheaply than American, and Japanese ships 40 or 50 per cent. Our own ships have a lower capital cost than American, and should have a better chance in the hurly-burly of close competition. In any case, they seem to be an economic necessity.

Rate Control Made Possible

One of the chief things in favor of a government merchant marine is the fact that the Atlantic transport trade, when in private hands, was slowed up in combines. The history of the North Atlantic Shipping Conference is notorious. Before the war the Canadian government had become deeply concerned about the sharp increases being made on grain rates to Britain. The pool was doing its work. Investigation by Congressional officials showed the existence of a score of agreements respecting rates. Australia has found that combine methods of private companies in the Australian trade put a premium on shipments from European continental points. That is, rates from British points were higher than rates from Rotterdam or other ports of exit for German goods. Canada has, in the past, been discriminated against in favor of New York. With a Canadian government merchant marine serving the trade of this country rates can be regulated. The service can be operated at cost, if necessary, to encourage our trade and offset superior economies of private companies that have to earn profits. It is only a matter of a year or two before all nations will be competing keenly for external business, when the possession of adequate shipping facilities will be the key to success. During the war Canada has been shipping one-fourth or one-fifth as much products to Europe as the United States. Our exports have mounted to a billion and a half a year—or as much as the value of our agricultural products. To keep most of this is vital to our prosperity, and $60,000,000 invested in the State fleet should be good insurance.

MARITIME INVESTORS FAVOR LOCAL ISSUES

With Excellent War Loan Record, Buyers Have Also Absorbed Many Other Government, Municipal and Corporation Bonds

By J. MacMurray

THE bond market in the maritime provinces for 1919 was most satisfactory, there being a good demand throughout almost the entire year for the more conservative investments. In December, 1918, there was considerable uncertainty as to the trend of the bond market for 1919, particularly as to the market for the first few months of the new year. The magnificent success of the Victory loan 1918, subscriptions for which in the maritime provinces amounted to $54,000,000, which was beyond all expectations by a large margin, created the impression that investors had pretty generally purchased Victory loan bonds, not only for funds on hand at time of the campaign, but for funds which they expected to receive or save during the early part of 1919 at least, and that therefore the demand for investments would be very much limited, particularly during the first few months of the year.

Early Issues

The first issue of importance was that of the city of Halifax, $428,000 6 per cent. bonds due 1952, the bids for which received in December, 1918, ranged from 98¼ to 101.63 These bonds were offered to investors to yield 5¾ per cent. and there was an excellent demand for them, an indication that investment funds had not been entirely exhausted. Possibly some people had not invested all they could in the war loans, feeling that they should keep a good surplus in cash while the war was on.

The next important issue was that of the province of New Brunswick, $450,000 5½ per cent bonds due in fifteen years, being purchased by dealers on February 2nd, at 100.35, showing a considerable improvement in market conditions in about one month's time.

Maritime Investors Want Safety

Investors in the maritime provinces are most conservative, principal demand being for government and municipal bonds, those of local cities and towns being specially favored. During the early part of the year there was a scarcity of good offerings, and this with the excellent demand, was the means of raising prices steadily and by July 1st even small

town bonds were being sold to yield as low as 5.20 per cent., one municipality succeeding in selling in June $100,000 5 per cent. twenty-year bonds direct to investors at par.

The holiday season and the approach of the time of preparation for the Victory loan 1919 had its effect on the market, and the demand for bonds weakened accordingly.

Victory Loan Results

From September 5th investment houses agreed to take on no new issues and not to advertise or submit offerings, in order to devote all their time to organization work for the Victory loan campaign. During the first two weeks of this campaign the subscriptions received were not up to the expectations of the workers and it appeared a difficult task to obtain objectives. During the last week, however, as a result of extra efforts and partly due to the fact that a large number of investors did not put in their subscriptions as early as they did for previous loans, the subscriptions came in in a most gratifying manner, and the maritime provinces exceeded their objective as follows:—

	Objective.	Subscriptions.
New Brunswick	$ 9,000,000	$15,000,000
Nove Scotia	17,000,000	28,000,000
Prince Edward Island ...	1,750,000	3,000,000
	$27,750,000	$46,000,000*

*Approximate figures.

Recent Demand Has Been Good

After the Victory loan subscription lists closed, the first issue of importance, not only in the maritime provinces but in Canada, was that of the province of New Brunswick $2,282,000, fifteen-year 5½ per cent. bonds which were sold at 96.11 and interest, the public offering being 98.12 to yield 5¾ per cent., at least ½ of 1 per cent. higher yield than that at which the issue would probably have sold in June or July last. That this offering was considered most attractive was evident from the fact that the bonds were all disposed of in a very few days.

The educational value of the various Victory loan campaigns is being felt, not only in the maritime provinces, but elsewhere. New buyers are in the market who four years ago did not realize that they could invest their money with safety except in local mortgages. The market for good conservative investments has steadily increased during the last few years and should continue to broaden.

Bonds sold by the provincial governments and by municipalities totalled approximately $7,300,000. A number of corporation issues were also made, the more important being $2,000,000 Fraser Co., Ltd., 6 per cent. ten-year bonds; $1,000,000 Nova Scotia Tramways and Power Co., 7 per cent. three-year notes; $200,000 Nova Scotia Underwear Co. 6½ per cent. first mortgage bonds; $380,300 Maritime Telegraph and Telephone Co. 7 per cent. preferred stock; and $140,000 New Brunswick Telephone Co. ordinary stock.

STOCK EXCHANGE ANNUAL RECORD

Commencing on page 121 of this issue, *The Monetary Times'* annual record of securities listed on the Montreal and Toronto stock exchanges is given. High and low quotations for each security for each month of 1918 and 1919, and total sales for each month, are shown. The securities are given in the order in which they are listed on the exchanges—i.e. classified under stocks, bank stocks, loan and trust stocks and bonds. Another useful record is the page headed "Stock Markets in 1919," which gives a record of high and low prices and total sales for the year on both exchanges.

The new securities dealt in during the year are shown separately. Many of these are, of course, securities which have been outstanding for some time, but which have only during the past year been listed on the exchanges. Some of them were previously dealt in on the Montreal or Toronto stock exchanges, but had either not been dealt in for some time past, or had been removed from the list.

ALBERTA INVESTORS EDUCATED TO BONDS

Good Demand for Government Securities and Growing Interest in Industrials—Municipalities Now Proceeding With Caution

By W. Ross Alger

OWING to the education that the people have received during the last three years as a result of the Victory Loan bonds going into the hands of thousands of people who previously had no knowledge of this class of investment it has proven of considerable benefit to the bond dealers, in that these people realize the advantage of high-class securities in the form of bonds, and are investing their money in same in preference to more speculative ventures.

Market Is a Limited One

There has not, however, been as yet a very large market for other securities than the war loans, as Alberta is dependent greatly on its grain growing to provide the funds that would be available for investment, and, as these come only every fall, they are practically all absorbed in Victory bonds, and there is very little other source of revenue at other times of the year. However, when these government issues are discontinued, there will undoubtedly be a large market here for high-class government and municipal bonds, and there is also developing a clientele for corporation bonds of solid companies with plenty of security behind their issues.

The government of Alberta have, during the last eighteen months, offered 5 per cent. savings certificates, redeemable at any time by the holder, to local investors, and they have been absorbed to a much greater extent than had ever been anticipated. They are particularly attractive on account of their redemption feature, as a great number of these investors can only leave their money for a portion of the year, and these funds would not go into a purchase of long-term bonds on account of their feeling their inability to market them at a fair price when they require the proceeds.

Alberta Issues During the Year

There have been very few bond issues in the province during the current year, as the municipalities and school districts have been going along very cautiously in an endeavor to keep their bonded indebtedness as low as possible while the high rates of interest continue. The government only made a small issue of one million dollars, twenty-year, 5½ per cent. bonds. The city of Lethbridge sold an issue of $35,000 and the city of Edmonton $260,000. There are other offerings of different cities to be placed on the market shortly, among them a three million dollar 5½ per cent. ten-year issue against tax arrears by the city of Edmonton. There has been issued $49,500 by towns and villages, $130,000 in municipal hospitals and $17,844 by rural municipalities to cover the cost of the influenza epidemic. The school debentures total $561,200, made up of one hundred and fifty-three issues, $180,000 by the Calgary school district, $20,000 by town and village districts and $35,000 by consolidated school districts, the balance being issues by rural schools.

Municipal Hospital Debentures

The municipal hospital debentures are a new form of security, the proceeds of which are used for the purpose of building a hospital in the centre of a number of municipal districts which are tributary to it, and it serves the needs of the people in all these districts. By a small annual tax levy against the land they are quite able to pay the operating costs and take care of the payment required on their debentures. They are under capable management, in that each of the reeves of the municipal districts in the hospital area form the board of management. Those that have been in operation are turning out quite successfully and are proving of inestimable value to the community.

Manufacturers and Wholesalers

REGINA has a model wholesale and industrial area, planned and developed to give every advantage to manufacturers and distributors. The district is served by spur track system linked with the three transcontinental railways. It has pavements, water, sewer, electric light and power, and street railway services, all of which are owned and operated by the City. Some seventy new businesses have located here since the beginning of the war, and the City still holds nearly Two Million Dollars of property in this area which is available for manufacturing or warehouse sites on attractive terms to bona fide firms.

Detailed information concerning the above will be furnished promptly on application.

UNION OF QUEBEC MUNICIPALITIES

At a meeting of the executive of the Union of Quebec Municipalities, on December 29th, Mayor Prieur, of Pointe Aux Trembles, secretary of the association, was named as representative to go to Quebec and look after the interests of the municipalities before the legislature. The executive took under advisement a question raised by Mayor Neull, of Grand Mere, that the legislature be requested to prohibit tax exemptions to industries by municipal councils, unless such exemptions have been submitted to the ratepayers. It was unanimously agreed to authorize the delegate to ask the government to place the School Commissioners under a law similar to that now in force for the municipalities respecting borrowing powers.

The Dominion Gresham Guaranty and Casualty Co., Montreal, is opening an office in Toronto.

The Carnegie Endowment for International Peace has estimated the direct cost of the war at $186,000,000,000, and the indirect cost at $151,612,542,560. The latter includes human life, valued at from $2,020 each in the Balkans to $4,720 in United States. These total $33,531,276,280. Property losses on land are estimated at $29,960,000,000, and on sea at $6,800,000,000. $33,351,000,000 is added for civilian losses. The number of dead is estimated at 9,998,771, and the missing at 2,991,800.

"Our experience in western securities has of late been far from satisfactory," said a prominent Toronto bond dealer to *The Monetary Times* a few days ago, "and we are seriously contemplating withdrawing altogether from that market, except in so far as the securities of the provinces, and larger cities, are concerned. Numerous defaults have occurred of late in connection with the smaller towns, and the provincial governments are not, in our judgment, inclined to adjust these matters in a way tending to create continued confidence."

Closer Bonds With United States

In Post-War Development Taking Place in Canada, United States is Playing Leading Part by Furnishing Capital and Immigrants — Not Only Buy Securities, but Make Direct Investments in Industry.

By RALEIGH S. RIFE.

DURING the war there was a large increase in the investment relations between Canada and the United States. Canada, while making its contribution in the world war, turned to the American market for funds. In view of the fact that this development was a temporary condition, it is opportune to make a brief summary of the recent developments in the financial relations between the two countries and to suggest the bases upon which the relations will probably be more pronounced. As would naturally be expected, during the period of transition from a war to a peace basis, Canada would not find occasion to borrow from us as extensively as during the war period; but it is very suggestive that in the latter part of 1919 there have been unmistakable evidences of the greater interest that American industrial and financial leaders are taking in Canada.

Public Issues of Canadian Securities

During the last year there were offered in the New York market Canadian securities, including government, provinces, cities, railways and utility bonds to the total par value of about $150,000,000, of which approximately $100,000,000 were for refunding purposes. Naturally these provisional figures are not complete because there is no way of estimating the amount of capital that has been invested in a private way. Conditions of readjustment and high interest rates in New York have been factors affecting this situation.

In the foregoing reference was made only to loan capital. In making such investment, the lender of capital is interested in security and the regularity of obtaining interest and the assurance that principal will be paid. But there is another type of capital which has always been the most effective means of investing capital in new countries, which may be called "enterprise capital." The early investments of foreign capital in the United States in the colonial period were made by the merchant class who came here and established their business enterprises, managing the business and assuming the risks, and taking in return the rewards for risk-taking. That is the function of the enterpriser in business. It will certainly be a good omen for future relationships between Canada and the United States to have American enterprisers buy and build plants in Canada managed to a considerable extent by people in the United States. These enterprisers are concerned with the Canadian market and are interested from a profit standpoint primarily in the development of the resources of Canada.

Increase in Enterprise Capital Investment

The investment of enterprise capital during 1919 has been, perhaps, more pronounced than in any previous period. This has taken the form of the establishment of affiliated or branch concerns of the parent institution in the United States. The Canadian tariff was the original factor causing American capital to enter the Canadian field in this form. Recently other factors have become more pronounced. First may be mentioned the natural advantages resulting from abundant sources of raw materials and the available hydro-electric power. It is an axiom in business economics that generally the conjunction of sufficient reliable motive power and sources of raw material determines the location of industry. Second, the position won by Canada in the world war has naturally intensified the economic relations between Canada and the mother country and other European countries. Thus the name "Canadian" has won for itself a wider world market and the enterpriser who is keen senses that situation. During the reconstruction period the Canadian government has done a great deal to aid in financing export trade.

The year 1919 stands out as a red-letter year in the increased interest that American industrial concerns have manifested in the Canadian market through the establishment of branch houses and affiliated institutions. It is not the purpose of the writer to give a complete detailed list of these branch concerns, but to point out in particular classes illustrations suggestive of the movement which has generally been under way.

In the field of motor transportation, the General Motors of Canada is expending $15,000,000 on its Ontario plants; the Willys-Overland plant of West Toronto was recently placed on a producing basis, while the Ford Motor Car Co. of Canada has made important extensions to its capacity. With the expansion in their automobile manufacturing plants, the demand for parts, accessories and tires has been increased.

The result of this situation has been that the Goodyear Tire and Rubber Co. of Canada has increased its new Toronto plant from a capacity of 2,500 to 3,500 tires a day; the Canadian Consolidated Rubber Co. is spending $1,000,000 on its plant at Kitchener, Ont., and the Firestone Tire and Rubber Co., of Akron, Ohio, will locate a branch factory at Hamilton, Ontario, entailing an expenditure of more than $1,000,000 in the undertaking.

In the musical instrument field the most notable development has been the acquisition by the Columbia Graphophone Co., of New York, of the extensive plant of the Canadian Aeroplanes, Ltd., of Toronto. The General Phonograph Corporation, of New York, has taken over an existing plant in Kitchener, Ontario, and will expand it, and American interests under the name of the Canadian Phonograph Co., Ltd., are locating a plant in Stratford, Ontario.

Pulp and Paper

Naturally, in the field of pulp, paper and paper products the advantageous location to sources of supply of raw materials would make it particularly attractive for American capital to enter Canada. One of the outstanding enterprises is that of the International Paper Co., at Three Rivers, province of Quebec, which is building a 50-ton sulphite pulp mill and plans to construct later a 160-ton ground wood pulp mill and a 200-ton paper mill. At Peterboro, Ontario, the Nashua Gummed and Coated Paper Co., of New Hampshire, is locating a branch plant.

Other industries which are entering the Canadian field are Robbins and Meyers Co., which is building a plant at Brantford, Ontario, with an extensive capacity. The Western Clock Co. is taking over an existing building at Peterboro, Ontario, and the Hoover Suction Co. is erecting a large plant at Hamilton, Ontario.

The Lindsey Wire Weaving Co. of Cleveland, Ohio, under the name of the Niagara Wire Weaving Co., is constructing a Canadian plant for the manufacture of wire cloth and wire weaving machinery. The Railways Steel Spring Co. of New York, under the name of the Canadian Steel Spring Co., plans to manufacture steel tires for railway equipment. The Elgin Gas Motor Co. of Elgin, Illinois, is erecting a factory in Winnipeg.

The Packing Industry

In the packing industry it is generally very essential to have plants located at the strategic points near sources of production. Undoubtedly Canada has an important future as a producer of animal products. While some of our leading American packing interests have been actively interested in Canada for some period of time, it is evident that during the last year they have been taking a more active part in entering the Canadian market. A part of this is due to the preference that the British buyer has for Canadian products. Recently allied packing interests are reported to have taken over the Matthews Co. and are operating it under the name of the Canadian Packing Co. Within the last few months Wilson and Co. are reported to have purchased the plant of the Chatham Packing Co. of Chatham, Canada. Press information indicates that other packing interests are to enter more actively the Canadian market. The significance of Canada as a source of animal products is further indicated by the recent announcement made of the plans of Armour and Co. to build a large packing plant at St. Paul, Minn., said to be a duplicate of its large Argentine plant. While this plant would not be directly the investment of American capital in Canada, it would depend, probably, to a large extent upon Canadian sources of supply.

American financial capital has been taking an increased interest in the Canadian field—as evidenced, among others, by the formation of the United Financial Corporation with main offices at Montreal, by the Guaranty Trust Co. of New York, in conjunction with the Merchants Bank of Canada, the Royal Trust Co., the Bank of Montreal and individual leaders of finance.

These various illustrations have been taken as merely indicative of the investment of American enterprise capital in Canada which has become pronounced during the year 1919. Judging from inquiries that have been made to various commercial bodies in Canada this is only suggestive of the development that will be continued in the next few years. That Canada offers unusual opportunities is further evidenced by the increasing interest that French capital is taking in the country as well as British capital. Recently, the British Baldwins, Ltd., is reported to have purchased a property which is said to be one of the most extensive electrical furnaces in the world. Further, British capital has been taking an increased interest in the steel and shipbuilding industries of Canada.

Investment in Canadian Farm Lands

The movement of American agriculturists from the middle west to the Canadian northwest has been a strong factor in the development of the Canadian prairie provinces. It has been a characteristic phenomenon in the development of the agricultural areas of the United States for people in settled areas to sell their developed lands and move out into the newer regions and purchase cheaper lands where there were greater opportunities in extensive agriculture, greater economic opportunities and where the returns through the unearned increment were greatest. The agriculturists made profits during the war period and this in combination with high level of prices has resulted in a recapitalization of farm values. Thus it is advantageous now for many people to sell their high-priced developed land in the United States and migrate to Canada, where cheap lands are available.

The case of an Iowa farmer with two sons is quite typical. He was living on his 80-acre farm, with limited opportunities for himself and his sons. He recently sold his farm and bought 640 acres of land in Saskatchewan, which gives him increased opportunity for profit and for work for himself and his sons. During the first eight months of 1919, 17,818 American farmers were reported to have entered Canada. With the construction of new transportation lines in the great Canadian northwest, the migration of agriculturists from the United States to Canada should be more pronounced. This should result in an important investment of American capital in Canada.

Colonization Plans

The policy on the part of the Canadian government to give liberal grants of public lands in the Canadian northwest to her soldiers will result in the further development of this country. The recently announced colonization program of Quebec province indicates the possibility of the settlement of its present undeveloped region. These developments become accumulative in the increase of opportunities for capital, of business and of international trade.

The present economic situation of the world is such that there is a scarcity of foodstuffs and raw materials and pressure, therefore, will be exerted for the development of those areas that have greatest possibilities for development, so that this want of the world may be met.

If we may judge from history, it would appear as if Canada is probably entering a period of expansion and development relatively comparable to that experienced by the United States following the civil war, in which the great areas to the west were settled by the soldiers under liberal land grants, by the influx of people from other countries who were impelled by the call of opportunity under the Homestead Law to acquire title to land and thereby increasing the opportunity for the individual to enjoy a higher standard of living.

Such is Canada's opportunity to-day, and if we make no mistake in interpreting recent events, the conclusion must be reached that the interest American industrial concerns are taking in Canada is indicative of this development which is only getting under way. The United States to-day stands with great financial and industrial strength as a creditor nation. Our financial and industrial leaders are willing to play the part that world opportunity has placed before them, namely, the assumption of the responsibilities of doing their share in developing the resources of other countries. With a people of the strong pioneer type, it is natural that the two countries in a business and economic way must come into closer relations, although socially and politically showing strong and virile national qualities.

MINING PROGRESS IN BRITISH COLUMBIA

MINING remains one of the stable industries of British Columbia, and 1919 witnessed further developments as a result of continued demand, at high prices, for most minerals. In an interview early in December, Fred A. Starkey, of Nelson, B.C., who is a commissioner of the Associated Boards of Trade of eastern British Columbia and a pioneer in mining in the province, said:—

"Mining never showed so much permanency. There are more developments this year than ever before in the history of the interior. Although there will possibly not be such a large output of silver-lead as in previous years, this may be accounted for by the fact that the mines were worked at full rush capacity for war purposes during 1917 and 1918. Throughout the whole of the Slocan district many new properties have been bonded and are now under development. A continuous renewed interest is being taken and many people are in the neighborhood looking for properties. There is much American capital being brought in, but it is anticipated that eastern interests shortly will be aroused in this district.

"At the Silversmith mine at Sandon the ore body recently discovered is said to be the largest discovered in that property and carries with it high values in silver. This mine is improving all the time. The Noble Five is owned by the Hon. James Dunsmuir, who has recently acquired the Rico, an adjoining property, and is now erecting a 1,500-ton capacity mill at a cost of $200,000, which will be used for the large tonnage from the two properties. Clarence Cunningham has erected a large mill, running full capacity, treating ore from the Queen Bess, Sovereign, Wonderful and the Alamo Idaho mines. Roseberry's Surprise Mining Co. at Sandon is carrying on a vigorous policy of development in the newly acquired properties, Canadian, Adams and Ivanhoe groups, in addition to the Surprise and the Bosun.

"In the Kaslo district the Cork Province has been reorganized in order to raise money for further developments for the large ore bodies at depth, also to acquire further water-power, which is needed for the milling plant. The Silver Bell, Index, Gibson, Flint and other properties are also pursuing a vigorous policy of development. All these are new mines opened within the last eighteen months, and are suggestive of the future prosperity of the district. The Old Blue Bell, the oldest mine in the country, the Ainsworth, Florence No. 1 and several others have been sending shipments."

THE EMPIRE LOAN COMPANY

Authorized Capital	$5,000,000.00
Subscribed Capital	671,100.00
Paid Up Capital and Surplus	690,000.00
Assets (approximately)	900,000.00

President, CHAS. M. SIMPSON
Vice-President, WM. BRYDON
Secretary-Treasurer, S. T. JONES

DIRECTORS:

CHAS. M. SIMPSON,	President, Fidelity Trust Company
H. H. BECK,	Director Union Trust Company
WM. BRYDON,	Contractor
A. B. STOVEL,	Stovel Company
JOHNSTON DOUGLASS,	Director, Equitable Trust Company
RICHARD MACKENZIE,	Western Manager, McLaughlin Carriage Company
A. N. McPHERSON,	McPherson, Wilson & Brown

The Empire Loan Company issues Debentures in sums of $100 and upwards for terms of from one to five years, bearing interest at current rates. Sterling Debentures for £25 and upwards, with interest coupons payable in London, England, are also issued. These Debentures are a charge on the Company's Assets, and the Debenture holders are further secured by the deposit of mortgages with a trustee to the amount of one and one half times the total outstanding debenture debt.

Debenture Prospectus may be had on Application.

Moderate Activity In Listed Stocks

Speculation Characteristic of New York Is Absent, but Breaks Have Been Less Severe—Most Stocks Have Advanced During 1919—War-Time Prosperity Has Strengthened Finances of Most Companies — Street Railways Make Bad Showing.

By R. GOLDWIN SMITH

THE aftermath of the war was a dominating factor in the Canadian stock market during the year 1919. Approximately fourteen months ago Germany threw up her hands and the armistice was signed, yet the world is still nominally in a state of war. No belligerent country has as yet declared a state of peace to exist. The British Empire and France have been ready to make peace effective, but recent reactionary developments in Italy, the United States and Germany have served to delay the consummation of victory. On this account Canadian stock markets have not experienced the broad buying movement that would undoubtedly have prevailed had actual peace followed close on the heels of the armistice.

During the latter half of the year 1919 Canadian stock markets enjoyed periods of only moderate activity. A substantial "boom" has not occurred since the fall of 1916, when Canadian stocks went to exceedingly high levels, after which the market collapsed. This experience made the street more than cautious. By slow degrees and under quiet trading conditions securities passed into strong hands, and the process was accompanied by a gradual appreciation in prices. Operators did not have the courage to make a market. The inclination was to allow the public to interest themselves almost entirely in the war issues. This the people did with phenomenal results.

Companies in Good Financial Position

One of the brightest phases of the war period was the steady growth in industrial prosperity in this country. War business created a heavy export trade, and at the same time the people became well-to-do. The result was that the industries were so busy that they were unable to meet both domestic and export demands. Leading industries were able not only to clean up past debts, where these existed, but also to build up strong physical organizations and large treasury balances. Never in the history of the Dominion were industries so strongly fortified as they are at the present time.

Dull stock markets and low prices of securities, in view of prevailing prosperous conditions created an anomaly. In the majority of cases intrinsic merits warranted heavy appreciation in market prices, but no matter how good stocks are they will advance materially only when a market is deliberately made.

It was remarkable that the broad buying market that developed in Wall Street during the past eight months had a very meagre influence on Canadian markets. This proved to be salutary in its effect, for when the severe break came in Wall Street some weeks ago, it also failed to influence Canadian markets in any material way. While Wall Street was top-heavy, our markets remained technically secure. With the exception of a few cases, Canadian securities close the year with conditions favoring the buying side.

One factor that has retarded the long-expected buying movement in Canada has been the disposition on the part of British holders of listed Canadian shares to liquidate, thus taking advantage of the premium on Canadian funds over sterling.

Depression Distant Prospect

For a time following the signing of the armistice, while the industrial readjustment period was under way, a slowing-down of the wheels of industry occurred. This was short-lived, however. For several years ordinary commercial requirements had given place to war demands. Railways, public works and the ordinary needs of the people, such as houses, food and clothing received scant attention from manufacturers. Meanwhile, the buying power of almost every class in the community increased steadily. All the people have had command of more money. While a good deal of money has been placed in deposit in the banks, signs are lacking that the people have developed thrift. Bank deposits stand at close to $2,000,000,000 as compared with less than $1,000,000,000 before the war, yet the people have acquired exceedingly extravagant habits. The sale of all kinds of goods, notably luxuries, in the domestic markets has been large, and it would have been enormous, had it not been for the fact that goods were not available except in limited quantities. The result of such conditions has been that all commodities, luxuries as well as necessities, have remained high-priced, and commercial enterprises in the country have, with few exceptions been prosperous. These conditions are likely to continue for several years. After that reaction appears inevitable. Depression will surely follow. Only the strongly entrenched position into which Canadian industries have placed themselves will preserve them from financial troubles. It would be well if industries conserved their resources wisely for that day.

Reserves Have Been Built Up

During the past two years complaints were heard among shareholders of many industries that the managements of companies had not been more liberal with respect to dividends. The policy of directors' boards was prudent. In most cases common shareholders have received a fairly good but not excessive return on their investment. The directors of leading companies claimed that it would be better to distribute fair dividends over a long term of years than to make over-generous distributions for a brief period. Such a safe policy would serve to maintain strong reserves for future emergencies.

During the last few months, however, companies have been more generous with shareholders than formerly. Milling companies, banks, pulp and paper companies, equipment companies, textile firms and other classes of industry have been able to increase their dividends. This policy, as much as anything else, has acted as a steadying and even a bullish influence in Canadian markets when outside markets were subject to fluctuations.

Steel Companies

Canadian steel securities are representative of both prosperity and conservatism. The leading companies established themselves in a strong physical and financial position during the war. Profits were exceedingly large and treasury surpluses grew to large proportions. Later in the war period the Dominion Steel Corporation, the Nova Scotia Steel and Coal Co., and the Steel Co. of Canada each went on a moderate dividend basis, but in spite of swelled treasury funds no increase was made until recently. These companies have been paying dividends of six and five and six per cent. per annum, respectively, with no extras, until December, when Steel Company increased the rate to 7 per cent. Meanwhile, the sure backing of the shares has attracted investors, with a result that during the past year under a process of quiet buying prices have appreciated gradually. Dominion Steel common sold on December 8th at 73½ as against 62⅜ a year ago, while Nova Scotia Steel was quoted at 75 bid as compared with 66 at the close of 1918, and Steel of Canada brought 82¼ against 63½ a year ago. It will be seen, there-

fore, that these shares continue to yield a return well above bonds.

Milling Securities

The milling securities have enjoyed much greater prominence in the market than the steels. This is because milling companies have prospered in a remarkable manner, ever since the war opened, and because world-shortage of flour assured Canadian companies of continued prosperity for some years after the signing of the armistice. Price appreciation in the case of milling stocks has been conspicuous, not only because companies have made big profits, but because they were able without endangering their future to distribute liberal dividends and bonuses. Extra distributions have not been confined to the past year. In 1917 Maple Leaf Milling paid 9½ per cent. regular and 11½ extra in dividends, while in 1918 the regular rate was 10 and the extra 14, and last year the company placed the common stock on a regular dividend basis of 12 per cent. Ogilvie, which has been on a regular dividend basis of 12 per cent., declared an extra this autumn of 15 per cent. Last year the declaration was 23 per cent., and in 1917 dividends were 25½ per cent. Western Canada Flour Co., which declared 8 per cent. in dividends during the first nine months of the year just closed, added an extra disbursement of 10 per cent. in November. This compares with 10 per cent. in 1918 and 18 per cent. in 1917. Lake of the Woods Milling Co. has been on a 12 per cent. dividend basis all year, as against 7 per cent. in 1918 and 1917. St. Lawrence Flour has been paying at the rate of 1½ per cent. per quarter with a bonus of 1 per cent. These generous distributions, coupled with the strong financial and business status of the companies, serves to explain the marked appreciation in prices of common shares, as the following table indicates:—

	Dec. 8, 1919.	Dec. 31, 1918.	Dec. 31, 1917.
Maple Leaf	199	137	92
Ogilvie	282	215	142
Lake of Woods	...	120	168
St. Lawrence	136	95½	...

Pulp and Paper

Investors have lately become awake to the attractiveness of pulp and paper securities. During the past year a good deal of investment buying has taken place at steadily advancing prices. Companies which were in trouble several years ago, due to incidental conditions, have become strong. There is a big future ahead for well-managed pulp and paper concerns in this country. The following table gives a comparison of rates of dividends paid during the past two years and of market prices:—

	Rate of dividends,		Market prices Dec. 8,	
	1919.	1918.	1919.	1918.
Abitibi*	..	..	190	48
Brompton	5	5	84	60
Howard Smith.	..	2	140	65
Laurentide ...	12	10	253	196
Price Bros. ...	8	8	259	130
Provincial ...	4	4	91	41⅓
Riordon	10	10	152	117¼
Spanish River†	..	..	75½	18
Wayagamack .	..	..	81	54½

*Abitibi paid off 19¼ deferred.

†Spanish River paid off 7 per cent. deferred and refunded balance.

The pulp and paper issues were conspicuous features of the stock market in 1919. Earnings of these companies were comfortable during the latter half of the war period, and satisfactory dividends have been returned to shareholders. The pulp and paper industry in Canada is in an enviable position. Due to careless conservation methods in big consuming countries such as the United States, Great Britain and France, these nations are almost entirely dependent on outside sources of supply for that universally used commodity—paper. Geographical conditions make the United States practically dependent on Canada, and insistent demands come from other countries in various parts of the world. If forest conservation methods are properly carried out in Canada the possibilities of the industry are almost unlimited. During the past decade the industry has experienced astonishing growth. The world must have paper. Canada has pulpwood resources in abundance. It is safe to state that during the next ten years at least Canadian pulp and paper securities will occupy a prominent place in the stock market.

Textile Companies

The textile companies have done well for shareholders. Capacity operations prevailed during the war, and since the armistice large foreign orders have been placed, which, with long-delayed domestic business, has kept plants busy all year. While substantial price advances have been recorded, these have not been greater than was warranted by the earning records of companies and by dividend action. The Monarch Knitting Co. lately increased its dividend. Canadian Cottons is paying at the rate of 6 per cent., Wabasso 8 per cent., Montreal Cottons 4 per cent., Penmans 10 per cent., Dominion Textile 8 per cent., and Canadian Converters 5 per cent.

Equipment Companies

The equipments have done well during the war and since. Ordinary domestic requirements had to wait until war demands were filled, and the latter brought big returns to companies. The close of actual fighting was followed by the placing of large equipment orders by railways and for export account. Various companies which were financially embarrassed several years ago are strongly entrenched today, and the immediate future holds out material promise for continued prosperity.

Bank Shares

Canadian bank shares suffered during the war for no other reason than that they could be more readily liquidated than industrials. Investors who had to find funds to support other investments sold their bank holdings. Meanwhile the banks were extending their business on an impressive scale and building up very strong backing. The signing of the armistice was the signal for renewed buying of bank shares, which had in most cases fallen well below pre-war levels. An added inducement to purchase bank shares was the fact that many of the institutions increased dividends. Commerce, Merchants, Montreal, Nova Scotia, Toronto, Union and Home banks have all increased their regular dividends, while the Dominion and Royal banks each declared extra dividends. As pure investments among stocks, Canadian bank shares have no equals.

Public Utilities

Of the public utilities most of the power stocks have reflected the capacity business done, and large profits made by companies. In many cases demands of industries made it expedient for power companies to extend their plants, thus increasing their earning power. The present shortage of available coal in central Canada renders the future of power enterprises an assured success.

One class of securities that has hardly recovered yet from the adverse effects of war is the tractions. High operating costs, in many cases without a corresponding increase in fares, served to diminish profits to such an extent that dividends were out of the question. Most of the tractions are now slowly recovering their position, and as prices of shares are relatively low some of them may be considered attractive. The list of those tractions which have passed their dividends includes Toronto Railway, Twin City, Duluth-Superior, Winnipeg Electric, British Columbia Electric and Brazilian. The latter company was affected adversely by the exchange rate on milreis, but latterly the rate has improved. Meanwhile the gross and net earnings of Brazilian have increased.

A complete record of transactions and high and low monthly quotations of stocks, bonds, etc., listed on the Montreal and Toronto Stock Exchanges will be found elsewhere in this section of *The Monetary Times* Annual. A record of new securities listed in 1919 is also given.

Increased Recognition of Mining Possibilities

Output of Most Metals Fell Off in 1919, Because of Return of Peace, but Production of Silver and Gold Revived — Several New Discoveries — The Manitoba Field—Some Dividend Records—Stock Trading Was Dull, Though Better Than in 1918.

CANADA'S mineral production during the year just closed amounted in value to approximately $150,000,000. This compares with $210,000,000 during 1918. The final war-year was the occasion for stupendous effort to produce every ounce possible and the result was phenomenal. The record for the Dominion, in 1917, was $190,000,000, and in 1916 it was $177,000,000. The shrinkage in this year's total was due to many causes. Among these was the sudden cessation in the demand for essential war materials. Probably the chief sufferers in this respect were the nickel properties in Ontario, which produced about $12,000,000 as compared with $26,800,000 a year ago. Practically every metal produced in the country showed a marked decrease in volume in 1919, copper, silver, lead, iron and coal all falling far short.

Ontario was the chief sufferer in this respect. Most of its copper comes from the nickel-copper mines of Sudbury, and the volume of production depends directly on the output of nickel. Due to difficult operating conditions incident to gold mining during the war, the output of the precious metal was smaller in 1918 than last year. This is a notably bright feature in an otherwise somewhat adverse mining year. From the standpoint of market prices, the silver mining industry had everything in its favor. The average price of the white metal during 1919 was close to $1.08 per ounce, as compared with about 97 cents in 1918, 81½ cents in 1917, 65½ cents in 1916, and 49½ cents in 1915. In order to take advantage of the prevailing high price of silver, naturally, every silver mine in the country speeded up production. The labor strike in Cobalt camp stopped output altogether for nearly two months, which served to offset the efforts of companies to take advantage of market conditions. Ontario's output of silver for the year approximated $14,000,000, as against $17,364,000 in 1918. In British Columbia the production of gold and silver as well as copper and other minerals was reduced, while in the Yukon there was a marked falling off in gold output. Labor difficulties impeded operations at the coal mines in the maritime provinces for a time, while a slowing down occurred in the output of iron both in eastern Canada and Ontario. As the year drew near its close, however, very definite improvement occurred. Labor conditions became settled, more miners were available and large orders placed for nickel, iron, copper and other metals enabled companies to speed up production.

Canadians may be criticized for knowing too little regarding Canada's resources. Most people are aware in a vague way that this country is rich in minerals. Were they more thoroughly conversant with their own affairs Canadians would be inspired with a more substantial faith in the future of the country.

A Great Mineral Belt

Nature has provided Canada with a mineral belt, the like of which no other nation in the world can boast. Starting with Nova Scotia on the east, a well-defined mineralized zone can be traced across the Dominion to Vancouver Island. This belt which averages between two hundred and three hundred miles in width changes its character in a remarkable manner, as though it were destined that in the fulness of time this country should supply the world with most of the known metals. In the maritime provinces great iron and coal deposits occur; in Quebec are the asbestos and mica areas; in Ontario are the rich silver, gold, copper, nickel, iron and cobalt; Manitoba possesses gold and copper evidently in abundance; in the prairie provinces the most voluminous deposits of coal, probably in the world, occur, while British Columbia is rich in copper, coal, lead, zinc, gold and silver. Oil is found not only in western Ontario, but in great abundance in the prairie provinces and in the far northwest.

As a result of Canada's important part in the war, a world-wide interest in this country has been created, and no phase of Canadian enterprise is attracting such attention as mining. In the eyes of Europe Canada is the new land of giant possibilities. Capital came to this country before the war largely to equip railways, public utilities and manufacturing plants. Money is beginning to come into the country now on an increasing scale to develop our mining resources. Great Britain and the United States are especially interested.

Canadian Investors Are Frightened

Canadian capital has been tardy in developing the mines. This was due to the fact that many investors have suffered financially as a result of improper mining methods. Too much fraud has been practised in connection with the promotion of mines. The Canadian investor who has been "bitten" is inclined to say, "Never again!" The unfortunate thing for him is that immense mineral wealth exists, and if Canadian capitalists are not careful the profits from Canadian mining will go largely to foreign investors. Mining methods are changing rapidly for the better. Provincial laws have been enacted which are serving practically to protect investors. Heavy penalties will be passed on parties convicted of crooked practices. Furthermore, laws provide that a reasonable proportion of moneys invested in mines will go into actual development.

Important factors in stimulating increased interest in precious metal mining in Canada are the exceedingly high price of silver, which is now better than $1.30 per ounce as against an average pre-war price of 62 cents, and the premium paid for gold. The Dominion government in prohibiting export of gold from Canada made provision whereby gold mining companies secure a premium equal to the disparity in exchange of funds between Canada and the United States.

Mining Market Was Dull

From the standpoint of stockbrokers the Canadian mining market proved a decided disappointment during 1919. When the year began there were good reasons to anticipate that a broad buying market would develop. Active periods did occur, but they were of comparatively small dimensions. The year's total sales will be well ahead of 1918, but that year was one of the dullest in the history of the market.

On the Standard Stock and Mining Exchange a few of the leading securities partially recovered ground lost during the war period, on limited investment buying. Speculative operations have been almost entirely lacking. Outside Ontario, only a few large operating concerns gained market prominence. Granby Consolidated and Consolidated Mining and Smelting Company are noteworthy examples. The latter company enjoyed a fairly prosperous year and maintained dividends at the rate of ten per cent., while Granby, which paid quarterly dividends of two and a half per cent. during the first half of the year, passed its autumn distribution.

No industry was so adversely affected by war conditions as gold mining. For a time only the high-grade properties in Ontario could keep going, because, while the selling price of gold remained unchanged, operating costs nearly doubled. Even the Hollinger, which is probably the world's premier gold mine, had to close down for a time and cease paying dividends, while the Dome, an immense low-grade enterprise could not meet expenses. All the other gold mines in Porcupine, excepting the McIntyre and Davidson, were closed down tight. Such properties as the Schumacher, Vipond-North Thompson and Porcupine Crown have not been reopened yet.

AUTHORITY ON PHYSICAL VALUES IN CANADA

Since the beginning of 1919 operating costs at the gold mines were gradually reduced. The chief difficulty has been labor. Mine workers were induced by a few radical agitators to strike, even against their own better judgment. The bigger companies absorbed most of the available efficient labor, and there were not enough to go around. The mining companies made important concessions to their employees, and have done everything in their power to make living conditions comfortable for their men, with very satisfactory results. Labor unrest is pretty much at an end, men are returning to the camps in considerable numbers, and the gold industry is rapidly getting on a solid basis once more.

Outlook For 1920

The new year starts under definitely auspicious conditions. There appears to be no uncertainty this time. As a matter of fact a definite change for the better occurred last fall. This is best exemplified by the fact that Dome Mines had made such headway that the directors were able to resume dividends on the basis of ten per cent. per annum, while the Hollinger had resumed dividends at an earlier date at the rate of seven per cent. The McIntyre-Porcupine has been so efficiently managed that the dividend at the rate of fifteen per cent. has never been in doubt since 1917. The Lake Shore Mine in Kirkland Lake Camp is the only other Ontario producer on a dividend basis. During the strike its dividend, which was at the rate of ten per cent., had to be passed, but this has been resumed since.

Prognostications regarding the future trend of markets must always be made with reserve. Nevertheless, every condition appears to be favorable to a broad buying mining market during the early months of the current year. Technically, probably the market was never in a more secure position. Practically all the floating supply which overhung the market previously has gone into strong hands. It is also noteworthy in this connection that there is plenty of money in the hands of the public, a share of which may be expected to find its way into mining securities.

Mining Production in Ontario

As Ontario has contributed more than any other province in the Dominion in agricultural and manufacturing products, so also it has in mining. The annual output of the province is between one-quarter and one-third of the total for the Dominion. Ontario's total in 1919 was approximately $45,000,000, as compared with more than $62,000,000 in 1918. The estimated value of Ontario's metalliferous production for the year just closed compares as follows with 1918:—

	1919.	1918.
Gold	$10,500,000	$ 8,502,542
Silver	13,000,000	17,364,918
Platinum	2,000	....
Palladium	4,000	....
Cobalt metallic	200,000	887,906
Nickel metallic	3,300,000	1,262,116
Cobalt oxide	600,000	725,105
Nickel oxide	2,000	....
Other cobalt compounds	24,000	73,347
Other nickel	40,000	....
Molybdenite	......	59,067
Lead	72,000	149,841
Copper (blister)	1,100,000	270,430
Copper (in matte)	3,000,000	8,262,360
Nickel (in matte)	7,400,000	26,578,200
Iron ore exported	60,000	624,364
Iron (pig)	1,200,000	1,359,541
Totals	$38,444,000	$66,119,792

Estimate For Canada

The decline in the production of the other provinces has not been as heavy as in Ontario, because no other province produces nickel, the demand for which was severely curtailed when the war ended. The output of copper, which is dependent on the production of nickel in Ontario, was not so seriously reduced in other sections of the country. An approximate estimate of the output of the chief metallic products in Canada, with comparisons, is given herewith:—

	1919.	1918.
Antimony	$ 1,100	$ 1,430
Cobalt	2,500,000	3,368,860
Copper	20,000,000	29,163,450
Gold	16,000,000	14,687,875
Iron (pig)	800,000	1,204,703
Iron ore (export)	300,000	469,352
Lead	3,000,000	4,055,779
Molybdenite	300,000	434,528
Nickel	17,000,000	36,830,414
Platinum	3,500	2,560
Silver	15,000,000	20,597,540
Zinc	2,100,000	2,746,620
Totals	$77,004,600	$113,563,111

The residue of mineral production, which brought the total up to approximately $150,000,000, came from non-metallic sources.

Silver Price and Silver Output

It is worthy of special note that during the readjustment period that followed the cessation of hostilities, while most classes of mining suffered, market conditions for the precious metal industries definitely improved. This is especially so with regard to gold mining. During 1915 the price of silver fell below 50 cents, but the enormous absorption of silver by oriental countries during the past four years, coupled with a steady decline in production of the white metal, created a rather astonishing change. Silver has advanced rapidly until at the present time coins are being melted down, because bar silver is worth more than the face value of the minted currency. As a result producing silver mines of Ontario have prospered. Production has been materially less, but the rate of profit has materially compensated companies.

Many of the larger silver mines in Cobalt have been on the decline. Ore reserves are not keeping up with production. The camp has produced well over 300,000,000 ounces since its discovery, worth over $200,000,000, and nearly $100,000,000 has been distributed in dividends by companies. Cobalt has returned bountifully to those who staked the camp with their capital. The high pinnacle of production was attained in 1911 when more than 31,000,000 ounces of silver were produced. Since then the output has declined steadily. The output in 1916 dropped below 20,000,000 ounces, in 1918 it was 18,000,000 ounces, while last year production amounted to between 13,000,000 and 14,000,000 ounces. The heavy decline last year was due partly to the labor strike which lasted nearly two months, but also to material declines in the ore reserves and output of individual mines. McKinley-Darragh was the only large mine to maintain output, Nipissing, Mining Corporation, Kerr Lake, each showing reductions of about a million ounces in quantity output, while the smaller producers showed a falling off. The smaller output, however, was largely offset by higher prevailing prices.

Cobalt Has Many Surprises

Cobalt camp has been the despair of geologists. It has upset precedents again and again. During 1918, when it looked as if the mines had only a short career ahead, new rich discoveries were made in many of the properties, which gave them a lengthened lease of life. Nipissing, McKinley, Crown Reserve, La Rose, Temiskaming and Beaver have all found rich ore. Eight Cobalt companies declared dividends during the year; Nipissing, 30 per cent.; McKinley, 12; Mining Corporation, 37½ cents per share. Trethewey, 5 per cent., Temiskaming, 4; Kerr Lake, 50 cents a share, plus $1 capital dividend; Coniagas, 10 per cent.; and Buffalo, 25 cents per share.

Gold Production

Of the gold mines, Hollinger has declared 7 per cent., Dome Mines 25 cents per share, McIntyre 15 per cent., and Lake Shore 5 per cent. Due to the heavy output of Hollinger, McIntyre and Lake Shore, and the contribution of new producers, including the Davidson Consolidated, an increase in gold output over 1918 was shown. The gold mines have

added materially to ore reserves and equipment, and barring unforeseen adverse developments, the year 1920 will witness the largest output of gold in the history of the province and of the Dominion.

A remarkable development of the year has been the extension of known precious metal deposits in Canada. Apparently in Ontario a solid area, 60 miles wide and 60 miles in length, carries gold values. This area includes West Shining Tree on the west, and Larder Lake on the east; Matachewan on the south, and Lightning River in the north Abitibi region on the north. There are a dozen camps now where there were two a few years ago, and all of them hold out material promise. The Gowganda silver camp, west of Cobalt, is developing rapidly. The Miller Lake-O'Brien is a proved mine of immense value, and newer properties are being opened up in a much larger area than Cobalt.

Manitoba can boast now of an important mining field, including chiefly copper and gold properties. The field is extensive, and on at least a score of properties important finds have been made. Nickel and gold have been discovered latterly in Quebec province, while the asbestos industry has prospered. On account of the scarcity of available coal in other countries, the coal fields of Saskatchewan and Alberta are attracting more attention. There are large deposits of anthracite and bituminous coal and lignite coal areas are enormous. Oil possibilities of the north-west have commanded the interest of the largest operators of the world, who are prospecting on a big scale in the Peace River and Mackenzie River districts.

The mining industry in British Columbia is also developing rapidly. Recently iron deposits of importance have been located. The coal fields of Vancouver Island and the mainland are being worked on a larger scale. The Granby Consolidated, the Canadian Mining and Smelting Company, and several other companies command immense deposits of copper. The Mining and Smelting Company has developed the most diverse industry probably in North America, by producing copper, lead, zinc, gold and silver. The zinc branch of the organization, which is comparatively new, has proved a success.

Recent Conditions In Mortgage Loan Field

Accumulated Wealth Was Too Convenient for Taxation — Mortgagee Has Also Suffered by Recent Legislation — Demand for Money Exceeds Supply and Rates will Continue High.

By JOHN APPLETON.

RECONSTRUCTION, or the adjustment of conditions to conform to new ideas and forces of which the coming into power of a "farmers'" government in Ontario is but one result, will not be carried out without leaving some mark upon the organizations which have been, and are up to the present, the chief sources from which funds for mortgage advances are obtained. Within a very short time after the commencement of the war, they were amongst the first to be conscripted for national service. The Dominion included them in a select group as victims for "special war revenue," and this revenue was not on the basis of "net income" or "profits," but on gross income. From this tax the mortgage investments of life insurance companies was exempted. It is not the purpose to discuss the equity of the tax or of the discrimination between one private or institutional mortgage lender and another, but it may be of interest to recall that the loan and trust companies were among the first to be looked upon as sources from which taxes could with ease be extorted. That they were so treated is evidence enough of the tendency of politicians to "lean" heavily upon them in moments of acute national emergency. It will also be recalled that at the same time, and for the purpose—mark the protestation of devotion to race and country—of enabling Canadian manhood to freely place itself at the disposal of the military authorities, mortgage contracts, from Ontario westward to the Pacific coast, were specifically put into a sort of statutory cold storage, and the recovery of debts under them, a cumbersome process at any time, was made impossible in some, and practically so in other cases.

Moratoriums Still in Force

Well, a year has passed since the war ended, and it is found that in a province so wealthy as Ontario, and which at the time of writing has just subscribed $350,000,000 to the Victory Loan, a "war measure" still exists which relieves the mortgagor from his "covenant to pay" any part of the principal of his debt. It can hardly be denied that at no time in the history of Ontario has the mortgage borrower been better able to pay his debt than during the war period. The legislation which was camouflaged by the title of "The Mortgagors and Purchasers Relief Act," aided only the speculator and its general terms made it a convenient refuge for those who could honor but elected to dishonor their covenant.

The Ontario legislation was not as vicious in its effect as that in Alberta, which made its appearance in 1916. There interest, taxes and insurance could accumulate and place in jeopardy the security of the mortgagee. After much litigation a mortgagee this year secured a decision from the Supreme Court to the effect that the taking of foreclosure proceedings did not extinguish the mortgage debt, but the legislature promptly changed the law to say that it did. An eminent King's counsel of that province confessed that he now knew of no satisfactory means of making a mortgage debtor pay. This view was confirmed by a lender, when discussing the Alberta legislation, who had practical evidence of the state of affairs. He had made a loan of about $40,000, practically on covenants, and all the parties thereto are men of substance, but they decline to pay and find behind the law such shelter as only dodgers would seek. This is but one of many instances that might be quoted in regard to Alberta, which are in many respects identical with cases arising in British Columbia and Manitoba. A better state of affairs exists in Saskatchewan.

Large Investments Represented

From a mortgage-lending standpoint, there is need of "reconstruction," and as the institutions concerned were among the first to be subjected to war sacrifices and war taxation, they have a good claim to priority of consideration in the changes which legislatures may make with a view to bringing into being conditions that are to be regarded in future as normal.

Until it is quite clear what these changes are to be, the hundreds of thousands who have invested their savings in institutions, which offer them the security of mortgage loans, should and no doubt will, require those who handle their money to adopt a conservative policy. Legislatures in the past have taken advantage of lending institutions by subjecting them to discriminatory taxation, confiscatory legislation and subsidized competition, and have been enabled to do so on the specious pretext of "curbing the corporations." By yielding to unprincipled heelers and ill-informed demagogues the public, unwittingly maybe, victimizes itself. So far as mortgage-lending institutions are concerned and apart from the jackals who trail and usuriously fatten on those who should not be borrowers, they are merely the agencies through which, not thousands, but millions, place part, and in many cases, the whole of their savings.

Of the millions of insurance contracts written many are entered into because the fulfilment of the terms is assured

by having at their back a large investment in mortgage loans. It is not yet generally understood by the holder of a life policy that its value is directly and seriously affected by legislation which impairs the value of the mortgages held, so that the company which issued the policy may carry out its part of the bargain. That policyholder who does not resent the impairment of his contract by so-called "people's representatives" on the pretext of making the "corporations come to time," is not only his own enemy, but is not a friend of the people. When the same "people's party" takes 2 per cent. of his savings invested in insurance, they are taking away part of his profits. If 2 per cent. annually were taken from his savings in the Dominion savings banks, it would have essentially the same effect. There is this difference. If the hands of the legislature were laid upon his savings in the bank to the extent of 2 per cent. annually, he would know about it, and the politicians in the legislature would very soon hear from him.

Services of Loan Companies

If under the new order of things we are to have in reality a candid and sincere "people's party," one which will have respect for contracts made with due regard to such legislation as it creates, and one which will levy taxation with some regard to equity, the future of mortgage-lending institutions need not be a matter of anxiety. Savings, trust and insurance companies are merely agencies controlled and employed by those interested in the security and profitable use of savings. Millions of Canadians make use of them as the agency for the care of part of what they can set aside under such terms as meet the needs of each particular case, and as the exercise of such a function is of first importance from a national standpoint, they ought to be, and are partially subjected to very close governmental supervision. There is room for improvement in this respect, but such inspection as they are subjected to is more thorough than in the case of any other class of financial or commercial institution. Any change which may come as a result of the application of new forces and ideas in the conduct of the state ought to result in relieving the great agencies of thrift and providence, through which homebuilders and producers have been aided to so great an extent by the lending of capital, from the burden of disproportionate and discriminatory taxation, and what is a still greater drawback to them—the statutory impairment of existing contracts.

It is creditable to the rural borrower as a whole in what might be termed the "infected areas" or those where the speculators have moulded for their special protection much of the legislation which has been inimical to the lenders of savings, that he has very generally respected his covenant. One company, which has about $17,000,000, mostly in the west and there chiefly with farmers, reports about 10 per cent. of principal repaid in 1919, and an astonishing record of interest payments. As a matter of fact, despite so much alarmist talk about the poor crop, the farmers there are generally in a much better position than before the war. There are some districts—and it is the case every year—where grain and fodder crops were total failures and some districts are to be found where there have been failures for two and three years in succession. From such, payments are coming only in driblets and sometimes not at all. But this is likely to be the case every year. In these very districts, borrowers with good records, some having to their credit the payment in the past of mortgages in full, find it necessary to further or re-encumber their lands. It is such borrowing that has helped to keep up the demand for loans to an extent that enables the institutions most concerned to get out as much money in that way as they desire.

Heavy Demand for Money

Such is the volume of demand that rates are very much firmer at the close of 1919 than they have been since the outbreak of war. Eight per cent. is the maximum in the west, and is a rate now more generally paid. There does not appear to be much chance of its declining for some years—and certainly no prospect of it so doing in the near future. Provincial securities are finding their way into the market at a price to yield over 6 per cent. and the urban mortgage borrowers are coming into the market to a surprisingly large extent. In Toronto it is not difficult to get 7 per cent. on loans which average larger in amount than western mortgages and are more profitable. The difference in rate of 1 per cent. between a small loan on a western farm and a home loan in Toronto is narrower than it used to be. In fact in eastern Ontario some good loans on farms have been made at 7 per cent. With a good demand for loans at these rates in Ontario, there is not likely to be any great pressure to get the westerner to borrow at 8 per cent., a maximum beyond which lenders now, and wisely, generally decline to go unless the risk is great and the loan small, both being qualities that have nothing to recommend them to a careful lender. The chief factor in warranting the opinion that rates will remain firm, as at present, is the obvious demand for money. Not only are old issues of provinces and municipalities coming on to the market, but the provinces especially will have much new financing to do, and they will have to face the market which they have dodged, to some extent, giving the war as a pretext to use the Dominion treasury as a fairy godmother. That will hardly be acceptable to-day.

By-laws are being voted on by municipalities for authorization of large capital expenditures and the bonds of the same municipalities are to be had to-day to yield a rate of interest that makes a farm mortgage at 8 per cent. less attractive than it has been. There are also the demands of the government for more money, which recalls a conversation in a departmental store elevator about Victory bonds. "I had to take $10,000 for decency's sake," one passenger said to another, "but I'll sell as soon as I can. Why should I hold 5½ per cent. stuff when I can get 8 per cent. with safety?" This was a casual glimpse into the state of the investors' mind. Eight per cent. net to the investor is not generally a safe proposition. But that incident illustrates clearly that with every other commodity high, better returns are being looked for by those with savings to invest.

Tendency to Restrict Supply

Another very important factor in the supply of money is the position of the exchanges. Our mortgage-lending institutions did Canada a very great service in bringing to it United Kingdom money in very large quantities and the amount they handled was supplemented by private agencies. It is now possible to pay off these obligations at a discount of 12 per cent. And many outsiders who sought large returns and invested without the guarantee of responsible institutions would gladly sell at a substantial discount their mortgages in the "infected areas"—that is, where eminent King's counsel can find no reasonable way of collecting such debts. It is well known that large remittances are being made to London, and they will continue so to be made while the exchanges continue as they are. One company with a $10,000,000 mortgage investment wholly in the west contemplates liquidating, because taxes are equal to 50 per cent. and more of its profits. Obviously, as the remaining net profits are very small in comparison with the responsibility assumed, the only thing to do is to liquidate and take advantage of the situation. This particular company's plan of doing business is perfectly sound, but unusual, and as such is exposed to very heavy taxation, and it is in the power of the finance minister to equalize it. But the minister is not disposed to lose ever so small a measure of revenue for the sake of equity in this matter. The effect, however, is very serious and indicates the tendency to drive out capital and build up the foundation for higher rates.

Pressed down by tax burdens, not fair or equitable ones, such as must be borne with equanimity in such times, the agencies of thrift and providence will have serious effects in other ways. It will have been noted that land values in the west have advanced considerably and in the path of such advance comes a demand for larger loans. But the lender is shy. In view of conditions which we have pointed to, he lends up to a low percentage of valuations and is more careful of the district and the man than heretofore. The institutional lender is but the trusted agent of those who save and he must have regard, and does have it, to the honesty of the borrower and the honour of the government

Total	6,281,948	"	$23,912,917.00

Agriculture.

Embraced in the Province are 161,872,000 acres of which it is estimated 1,510,400 acres are covered by rivers and lakes, leaving 160,361,600 acres of land. Allowing approximately 60,000,000 acres for the rough land of the eastern slope of the Rocky Mountains, other mountains and hills, together with certain waste acreage in some small sections of the Province not suitable for cultivation, leaves at least 100,000,000 acres available for cultivation. During the year 1918 about 8,000,000 acres were actually in crop and the estimated value of farm products for that year was $124,934,690.30, details of which are included in the following statement:—

	Acreage	Bushels	Yield Per Acre	Price	Revenue
Spring Wheat	3,848,424	23,090,544	6 bus.	$2.00	$46,181,088.00

Game and Furs					2,250,000.00
Horticultural					200,000.00
Poultry and Products					4,000,000.00
Coal and Coke and Other Coal Products					20,979,392.75
Manufactured Products					40,000,000.00
1918					$271,489,083.05
Increase over 1917 in Live Stock on Hand					53,305,100.00
1918					$324,794,183.05

The following comparative statement indicates the importance of the Province as a wheat-producing country:—

	Spring Wheat 1916	1917	1918	10-Year Average 1908-1917
	Bus. per acre	Bus. per acre	Bus. per acre	Bus. per acre
All Canada	16.85	15.50	11.00	19.05
United States	8.8	14.1	15.5	14.
Alberta	24.95	18.25	6.00*	22.34
Minnesota	7.5	21.5	21.00	14.00
Iowa	13.00	21.5	18.7	18.7
South Dakota	6.3	14.0	18.9	11.4
Kansas	10.5	6.0	14.1	13.8
Nebraska	12.5	16.5	11.3	17.1
Wisconsin	16.6	21.2	24.2	19.8
Manitoba	10.88	16.75	16.35	17.78
Saskatchewan	16.33	14.25	11.5	17.66

*As will be noted from the column of 10-year averages, the yield in 1918 was phenomenally low, due to a combination of circumstances, but especially attributable to a rather severe frost in July—a very rare occurrence in Alberta.

The world's record wheat yield from one thousand acres previously held by Colfax County, Washington, U.S.A., has been beaten in Alberta by an average yield of Fifty-four (54) bushels and Twenty-three (23) pounds from C. S. Noble's one-thousand-acre tract at Nobleford.

The average yield per acre of Oats in Alberta also ranks amongst the highest, the 1918 average having been 36.24 bushels.

Wool Growing.

"We find now that in the Province of Alberta we are rapidly approaching first place in the production of wool, and an enormous increase in the number of sheep has been noted both on the farm and on the range." (Extract from Budget Speech of Hon. C. R. Mitchell, delivered March 17th, 1919).

The following statement shows the results for the last four years:—

	1915	1916	1917	1918
No. of pounds handled	1,570,053	2,048,340	2,086,633	2,709.584
Prices realized, cents	.25¼	.30½	.57	.60
No. of producers	860	950	1.150	1,088
Value	$396,438.38	$624,743.70	$1,189,380.81	$1,625.750.40

Dairying.

Within the last five years the dairying industry has become firmly established throughout the Province and the output of the creameries and home dairies is increasing very rapidly from year to year—in fact the development of this industry has been very pronounced.

The value of the dairy products has increased from $148,064.74 in 1910 to $27,500,000 in 1918. Natural advantages, with technical education along the best scientific lines under Government supervision, is bound to make Alberta as famous in the production of butter and cheese as Denmark and Wisconsin.

within whose jurisdiction the security is situated. By care in this respect the lending institutions of the Dominion have weathered a trying period with remarkable success, and those entrusted with their direction may be looked upon as safe pilots during the period of reconstruction, when the state ship may be in the hands of new navigators. There has been within the year but one wreck, the causes of which now being disclosed by official investigation show the carrying out of a policy totally alien to that which is characteristic of the lending institutions in Canada as a whole. While the hand of the taxgatherer has been heavy and inequitable, and that of the lawmaker also, it may be well to recall, at the close of the war period and within its compass, that no question has arisen as to excess profits, or as to undue advantage having been taken of the situation by lenders in areas within which they were not under special restrictions. They have minded their affairs prudently and presented to those interested an unimpaired capacity for useful service.

LOAN COMPANY ASSETS NEAR QUARTER BILLION

LOAN companies doing business in Canada have, according to the table given herewith, assets totalling $245,302,208. The figures are for the year ended December 31, 1918, as financial statements of loan companies are generally made up for the calendar year, and those for 1919 are not yet available. The figures given are obviously not complete, but an effort has been made to eliminate possible errors in those which are given.

Some of the loan companies, it will be noticed, date back several decades before 1900, and in point of age, therefore, compare favorably with Canadian banks, insurance companies, trust companies and other financial institutions. While some have gone down, the proportion is not large, and the management of many of the loan companies is distinctly conservative. The premiums at which some loan company shares are selling are very large.

Reserve, it will be noticed, is very nearly 60 per cent. of paid-up capital, and this does not include profit and loss accounts. Some companies leave large sums to the credit of profit and loss, and the figures, therefore, do not entirely show the financial strength in these cases.

Liabilities to the public, it will be seen, amount to about $124,000,000, as represented by deposits of $23,549,559 and debentures outstanding to the amount of $110,524,076. Owing to the high rates of interest obtainable during recent years on high-grade investments, such as government and municipal bonds, the loan companies have been confronted with substantial difficulties as regards the supply of funds. Large withdrawals were made for war loan subscriptions, and the loan companies themselves have a good record in this connection. On the other hand, the demand for mortgage loans during the war years was not so great as it would have been normally, and this to some extent counterbalanced any falling off in the supply of money.

The figures of profits for the year are apparently very incomplete, but some of the smaller companies are comparatively inactive, and did not make large profits.

Canadian Bond Market in 1919

Big Demand but Poor Supply at the Opening—Sterling Exchange a Factor—Record of Prices of Government, Provincial and Municipal Securities for Over Twenty Years—1919 Levels Lower Than 1918.

By C. H. BURGESS.

THE bond market for January, 1919, opened with a rush. The war was over, and most of the restrictions that had been placed upon the market were withdrawn. The Victory Loan of 1918 which was placed in such a record fashion was being absorbed, and the market committee, that had been appointed by the Minister of Finance to stabilize conditions, was abandoned at the end of February as it was impossible for them to supply the bonds that the dealers desired to secure.

There was a big demand for bonds, and practically none were on the market because institutions and municipalities had cut their expenditures to the minimum, and there was nothing ready to float. The consequence was that all bonds advanced rapidly in price. In the beginning of the year, provincial bonds which in June six months before were selling under a 6 per cent. rate, were soon purchased at about a 5.50 per cent. rate. The first large issue to come on the market were the bonds of the province of Alberta, 5½ per cent., twenty-year, sold at 99.

Market Closed for Victory Loan

The market advanced so rapidly that by May, the Victory Loan bonds, due 1937, sold as high as 107, and the Victory Loan, due 1933, sold as high as 106⅜. About this time rumors were abroad that the Dominion of Canada was contemplating putting an issue out in New York, which was afterwards done, to the extent of $75,000,000 bearing 5½ per cent., at 97 in New York. As there is about 3 per cent. difference in the exchange rate it meant that buyers in Canada could purchase these at a 5.50 per cent. rate. This upset the market very badly, and from June on the contemplated Victory Loan for 1919 was in the air, and very little confidence was felt in the prices then prevailing. However, about June when business really stopped, in view of the coming Victory Loan, prices of Dominion of Canada bonds were, for the 1937's about 106, for the 1933's about 105, and for the 1922's, and 1923's about 101. Province of Ontario bonds were selling to yield 5.10 per cent., western provinces about 5.20 per cent., Ontario towns and cities about 5.10 per cent. to 5.05 per cent., large Ontario towns and the smaller cities were selling at 5.25 per cent. to 5⅛ per cent., small Ontario towns to yield about 5⅜ per cent. to 5½ per cent., large cities in the west about 5¾ per cent. to 5⅝ per cent., large towns in the west about 6 per cent., school districts in the west about 6.25 per cent. to 6⅛ per cent.

Victory Loan Achievement

By the time the Victory Loan was launched in August there was very little business being done, and there were many expressions of doubt as to whether the loan could be floated. The Minister of Finance called in for consultation the Dominion Executive of the 1918 Loan on the 1st of August, and announced that it was decided then that the loan would be subject to income tax, the rate of interest would be 5½ per cent., the terms would be five and fifteen years, and that the date of issue would be about October 27th to November 15th. Immediately work was commenced on the organization, and after one of the most magnificent campaigns of this kind in any country, the result showed that they had secured on the last day $675,000,000. It was an achievement of which Canada may well be proud, because it was practically the only successful bond issue by any of the countries which had been engaged in the war, that was made after the war was over, that was a pronounced success.

After the loan was over the situation in connection with sterling exchange, which had been becoming very troublesome all year was most pronounced, and coupled with this, the fact that no one knew what the market was in connection with the flotation of the issue, made a very trying time for the first two weeks after the loan was over. However, three very large issues were put on the market at the time, and showed considerable drop in prices. The city of Toronto issued $2,295,000 of 5½ per cent. serial bonds. They were bought by a syndicate of American dealers at about a 5⅞ per cent. rate, and were retailed to the public at 5.75 per cent. The Ontario government had made an issue of bonds and sold to one of the banks just about the time it lost power, while the Victory Loan was in progress. This came on the market and was offered at a 5.75 per cent. rate. The province of New Brunswick issued $2,282,000 of bonds, bearing 5½ per cent., and maturing in ten years, and these were sold to the public at 5.75 per cent. These bonds were rapidly taken, and indicated to the bond dealers what might be expected, and also showed that there was a lot of money still open for investment. Large towns and small cities would have a market value of 5⅞ to 6 per cent. at the end of the year, and prospects for a good market in the coming year. The most confusing thing, however, was the sterling exchange, which enabled large blocks of Canadian bonds to be brought over here at a particularly low figure.

Approximate Prices Since 1896

The following is a record of prices of Canadian securities since 1896:—

1896-1897

Turning point from depression in Canada following collapse of real estate boom and succession of crop failures.

Provincial Governments (Ontario, Quebec and Nova Scotia), 3⅛ per cent. to 3¼ per cent.

Large cities and Ontario counties (Toronto, Montreal, London, etc.), 3¼ per cent. to 3⅜ per cent.

Large Ontario towns and townships, 3½ per cent. to 3⅝ per cent.

Village bonds, 3¾ per cent. to 4 per cent.

1899-1900

Provincial Governments, 3½ per cent. to 3⅝ per cent.

Large cities and counties, 3¾ per cent. to 3⅞ per cent.

Large towns and townships, 4 per cent. to 4⅛ per cent.

Village bonds, 4⅛ per cent. to 4¼ per cent.

1901-1904

1902.—Great industrial and stock speculation.
1903.—Reaction from speculation of year before.

Provincial Governments, about 3¾ per cent.

Large cities and counties, 3⅞ per cent. to 4 per cent.

Large towns and townships, 4⅛ per cent. to 4¼ per cent.

Village bonds, 4⅜ per cent. to 4½ per cent.

1905-1906

Provincial Governments, about 3½ per cent. to 3⅝ per cent.

Large cities and counties, 3⅞ per cent. to 4 per cent.

Large towns and townships, 4 per cent. to 4⅛ per cent.

Village bonds, 4¼ per cent. to 4⅜ per cent.

1907-1908

1907.—Panic year.

1908.—Recovery year.

Provincial Governments, 4 per cent. to 4¼ per cent.

Large cities and counties, 4½ per cent. to 4¾ per cent.

Large towns and townships, 4¾ per cent. to 5¼ per cent.

Village bonds, 5½ per cent. to 5¼ per cent.

1909

Great prosperity and real estate boom in Canada commences.

Provincial Governments, about 3⅞ per cent.

Large cities and counties, 4 per cent. to 4¼ per cent.

Large towns and townships, 4¼ per cent. to 4⅜ per cent.

Village bonds, 4½ per cent. to 4⅝ per cent.

1910

Provincal Governments, about 3.90 per cent.

Large cities and counties, 4 per cent., 4¼ per cent. to 4⅜ per cent.

Large towns and townships, 4½ per cent. to 4⅝ per cent.

Village bonds, 4⅞ per cent. to 4¾ per cent.

1911

Provincial Governments, 4 per cent. to 3.90 per cent.

Large cities and counties, 4⅛ per cent., 4¼ per cent. to 4⅜ per cent.

Large towns and townships, 4½ per cent., 4⅝ per cent. to 4¾ per cent.

Village bonds, 4¾ per cent. to 4⅞ per cent.

At the end of the year prices for Ontario bonds were about as follows:—

Provincial Governments, 4 per cent. to 3.90 per cent.

Large cities and counties, 4⅛ per cent., 4⅜ per cent. to 4½ per cent.

Large towns and townships, 4½ per cent., 4¾ per cent. to 4⅞ per cent.

Village bonds, 4⅞ per cent. to 5 per cent.

1912

Real estate boom commenced to fail.

Provincial Governments, 4¼ per cent. to 4 per cent.

Large cities and counties, 5 per cent. to 4½ per cent. Counties selling at about 5 per cent. City of Toronto 4½ per cent. to 4⅜ per cent.

Large towns and townships, 5¼ per cent. to 5 per cent.

Village bonds, 5½ per cent. to 5⅜ per cent.

1913

Real estate boom collapsed. Hard times.

Provincial Government debentures sold as low as a rate to yield 4.40 per cent.

Large cities and counties at 5¾ per cent. to 5 per cent. (Counties selling at about 5½ per cent., city of Toronto at about 5¼ per cent. to 5 per cent.).

Large towns and townships from 6½ per cent. to 6 per cent.

Village bonds from 6¾ per cent. to 6½ per cent.

1914

August 1st.—The commencement of the great war. German rush for Paris.

About March to May, 1914, the prices for debentures ranged as follows:—

Provincial Government debentures, 4⅜ per cent. to 4¼ per cent.

City of Toronto, 4¾ per cent. to 4⅝ per cent.

Ontario counties, 4⅞ per cent. to 4¾ per cent.

Large Ontario towns and townships, 5¼ per cent. to 5 per cent.

Ontario village bonds, 5½ per cent. to 5⅜ per cent.

Western city bonds, such as Calgary, Edmonton and Regina, 5⅜ per cent. to 5¼ per cent.

Smaller western towns sold from 6 per cent. to 5¾ per cent., and smaller places still from 6¼ per cent. to 6 per cent.

School districts and western villages from 7¼ per cent. to 7 per cent.

1915

Great war and deadlock on west front. German advance against Russia.

From March to about May prices reached their highest level or lowest yield rate. At this time, Ontario provincial bonds were selling to yield about 4.80 per cent.

City of Toronto, 4.95 per cent.

Ontario counties, 5 per cent.

Moderate Ontario cities, 5¼ per cent. to 5⅛ per cent.

Large Ontario towns and townships, 5⅜ per cent. to 5¼ per cent.

Ontario village bonds, 5⅝ per cent. to 5½ per cent.

Western city bonds (Calgary, Edmonton, Regina, etc.), about 6 per cent.

Smaller western towns, 6¼ per cent. to 7 per cent.

School districts and western villages, 7¼ per cent. to 7 per cent.

However, it was not long until these prices were materially changed, so that in the fall of the year the prices were about as follows:—

Provincial Government bonds (such as Ontario), 5¼ per cent. to 5⅛ per cent.

City of Toronto, 5⅜ per cent.

Small Ontario cities, 5⅝ per cent.

Good Ontario towns, 5¾ per cent.

Western cities (such as Saskatoon, Calgary, Edmonton), 6¼ per cent.

School districts, 7½ per cent.

Villages, 8 per cent.

1916

Supply of municipals limited; demand from a new market, the United States, large. After marketing of war loan in the fall, prices stiffened.

Dominion Government bonds yielding 5¼ per cent. to 5⅛ per cent.

Province of Ontario bonds yielding 4.80 per cent.

British Columbia and Alberta bonds yielding 5½ per cent. to 5.30 per cent.

City of Toronto and Montreal bonds yielding 4.90 per cent. to 4.85 per cent.

Saskatchewan, Manitoba and medium-sized Ontario cities bonds yielding 5.20 per cent. to 5.10 per cent.

Ontario towns and townships bonds yielding 5⅜ per cent. to 5¼ per cent.

Ontario village bonds yielding 5⅝ per cent. to 5½ per cent.

Western city bonds (Calgary, Edmonton, Regina, etc.), yielding about 5¾ per cent.

Western school districts bonds yielding about 6½ per cent.

1917

United States entered the war in spring of 1917, so that Canadian borrowing in that field practically ceased. Similarly no help could be derived from the United Kingdom.

Canada Industrial Bond Corporation, Limited
17 St. John Street, Montreal

Canada had, therefore, to be financed at home, and a domestic war loan of over $400,000,000 was successfully floated in November.

Dominion, 5½ per cent. to 5⅝ per cent.

Province of Ontario, 5.90 per cent.

Large cities and counties, 6 per cent.

Medium-sized cities and towns in Ontario, 6¼ per cent. to 6⅛ per cent.

Saskatchewan, Alberta and British Columbia provinces, 6½ per cent. to 6¼ per cent.

1918

Province of Ontario 6's, par to 100½.

Western Provinces bonds, to yield about 6¼ per cent. to 6.20 per cent.

Ontario large cities, to yield 6 per cent. (Toronto, Hamilton, London, etc.).

Ontario large towns and small cities, to yield 6¼ per cent. to 6⅛ per cent.

Ontario counties, to yield 6 per cent.

Ontario small towns and townships, to yield 6½ per cent. to 6¼ per cent.

Large cities in the west, to yield 6¾ per cent.

Large towns in the west, to yield 7 per cent.

School districts in the west, to yield 7 per cent.

1919

Province of Ontario, to yield 5.10 per cent.

Western Provincial bonds, to yield about 5.20 per cent.

Ontario towns and cities, to yield about 5.10 to 5.05 per cent.

Large Ontario towns and smaller cities, to yield 5.25 to 5⅛ per cent.

Small Ontario towns, to yield about 5⅜ to 5½ per cent.

Large cities in the west, to yield about 5¾ to 5⅝ per cent.

Large towns in the west, to yield about 6 per cent.

School districts in the west, to yield about 6.25 to 6⅛ per cent.

GROWING BOND MARKET IN MIDDLE WEST

Victory Loan was Big Event in 1919—Some Other Financing—Economy Now Looked For in Municipal Administration

By F. J. James

THE western demand for municipal debentures was not keen in the early spring of 1919, as many of those usually having funds for investment at that period of the year were already filled up; in fact had extended themselves beyond normal in order that the west's subscription to Canada's second victory loan might be swelled to the highest possible total. This is borne out by the very satisfactory amounts raised in each of the four western provinces. This condition was in a measure offset by the fact that there were comparatively few issues of western bonds marketed during the same period. Indeed it may be stated that issues of debentures by both large and small western municipalities were restricted to even below actual requirements throughout the borrowing season of 1919. Several reasons might be offered in explanation, the chief being that many aldermanic and other council boards were elected at the close of 1918 on a platform of rigid economy, even to the point of forgoing many improvements much needed and long overdue. Further, it was realized that whilst the armistice was signed in November, 1918, there was every reason that the policy of curtailment of public expenditures should be continued during the year to follow.

Telephone Extensions Required Funds

Perhaps the only public expenditure of note by municipal organizations, during the year in the west, was in extending the rural telephone systems. Only those having an intimate knowledge of life on the prairie farms can appreciate how valuable and even necessary is this convenience of comparatively modern times. It has, without question, been the means whereby many an isolated farm home has been brought into daily touch with the outside world. It has contributed in no small measure to the personal comfort, convenience and safety of those who by their physical efforts are converting our boundless prairies into attractive homesteads, and the future granary of the empire.

The summer season had scarcely passed when the finance minister made his announcement relative to the flotation of Canada's third Victory loan. This was followed by the virtual closing of the bond market. Outside of the sale of a few rural issues, no sales were effected during the autumn.

For some time prior to the opening of the campaign, all energies throughout the west were directed toward making this final war loan effort a success. The west went well beyond its allotment. Indeed the total of over twenty-one million dollars, rolled up in the province of Saskatchewan, was beyond the anticipation of the Victory loan workers, who were mindful of the fact that this province had within its bounds thousands of acres upon which little or no crop had been raised owing to the visitation of drought, hail and grasshoppers; and of the fact that the same territory had taken up some twenty-one millions of dollars of the 1917 Victory loan, and over twenty-six millions of dollars of the 1918 Victory loan, making a grand total of almost seventy millions of dollars raised in Saskatchewan during the past three years. This money had been raised from what heretofore had been considered a borrowing rather than a lending territory.

Future Financing More Conservative

Western people, as a whole, are looking forward to the coming year as a year of reconstruction and general progress. It is reasonable to expect that municipal borrowings may be in excess of the borrowings of any year during the past five years. The need for extensions of sewer, water and light facilities to thousands of urban dwellers is most urgent, and it is unquestionably in the interest of each community as a whole that these necessary improvements, for which many have waited several years, should be carried out.

The rural districts will need money, too, for the building of new roads and bridges, and for other public works postponed during the war period.

Again, the tide of immigration held up during the war period may flow in considerable volume. This, in itself, will call for an expenditure of much public money, but is it not a wise investment?

There is no doubt that the authorities spending money in the west will give careful consideration to all estimates for public improvements. The years of the war have added many recruits to the conservative element throughout our western country, and it is safe to say that improvements, suggested, that are not actually necessary, will be considered as "out of bounds."

When one considers the amount of money required for necessary development throughout the world, there would seem little prospect of money becoming plentiful or interest rates reaching a lower level than at present prevailing, and it would be well for municipalities to investigate the probability of a successful flotation of any bonds they propose placing on the market before actually submitting money by-laws to the ratepayers.

STANDARD STOCK EXCHANGE

At the annual meeting of the Standard Stock Exchange, Toronto, held on January 28th, 1919, a surplus for the year of $16,447 was reported. The following officers were elected for the year: President, L. J. West; first vice-president, P. W. Cashman; second vice-president, D. G. Lorsch; secretary-treasurer, J. P. Cannon; directors, W. J. Chalmers, H. A. Fleming, J. T. Eastwood, P. G. Kiely, J. A. McCausland.

THE CANADIAN APPRAISAL COMPANY

Limited

DURING the past fifteen years the Canadian Appraisal Company, Limited, has appraised more than 4,000 properties, scattered over every part of the Dominion of Canada.

These include the leading and most representative plants of every manufacturing industry of the Dominion.

Our appraisals are prepared in such detail as to become an authoritative exhibit of values existing before a fire loss, and, therefore, a tangible, satisfactory and instantly available basis of adjustment when such a loss occurs. Our findings are impartial and equitable, and for this reason are almost invariably accepted by insurance adjusters as fair and final evidence of a loss by fire.

Owing to the wide interest which has been taken in Canada as a field for investment, our services have been in constant demand amongst the leading financial houses in the Dominion and elsewhere who have required our certificates for prospectuses issued in connection with Bonds and other securities for flotation in the English, as well as other financial markets.

Our valuations comprise land, buildings, plant, machinery and equipment, tools, water powers, etc.; in fact, all the permanent working plant of any manufacturing or other industry. Our certificate, therefore, in conjunction with the certificate of profits and liquid assets prepared by qualified accountants, furnishes a complete verification of a Company's assets.

The Canadian Appraisal Company's Service has won large and wide recognition as an important factor in modern business management, and we point with particular pride to the accompanying list of "Representative Appraisals" as evidence of this fact.

WANTED—A NATIONAL CAMPAIGN FOR THRIFT

While Vendors of Luxuries Are Conducting Successful Campaigns, Savings Institutions Make Little Effort to Encourage Thrift

By D. McEachern

> "Shoppers are spending more freely than a year ago—the public does not scrutinize the price tickets so closely."
> —Extract from a late report from Bradstreets.

It is a fact of history that war and pestilence have always waste and luxury among the other evils that follow in their train. History is to-day repeating itself in our midst, and, unfortunately for this young country, the riot of extravagance occurs at a time when every ounce of energy and every dollar of capital is sorely needed for the development of resources and the extension of foreign trade. The practice of thrift being vital to the future of the country as well as to the individual, national progress will be made only in proportion to the degree of power and willingness to save possessed by the masses.

How can a real and lasting desire for the accumulation of savings be created amongst the people? The answer may be condensed to one word—education. The savings pass-book, when properly advertised, carries an attractive appeal to the widest possible circle of the public. Is the little book getting the publicity it deserves?

Little Appeal for Saving

During a recent month chosen at random the London "Free Press," one of Canada's leading dailies, circulating in the rich and thickly settled counties of western Ontario, carried a daily average total of 295 lines of bank advertising, a space about seven inches square!

What a meek and uncertain sound on behalf of thrift compared with the thunderous roar of the page upon page of alluring, purse-emptying appeals adorned with up-to-the-minute illustrations to be found in the same publication! The story of thrift and of the savings pass-book needs to be put across in a big way—and it needs it badly. An army of savers, tens of thousands strong, was recently brought into being by means of Victory loan advertising. The most casual observer can now see the rapid demobilization in progress. Not only is surplus income that should be saved being extravagantly spent, but in some cases Victory Bonds are being sold to provide funds for further revels.

Every Inducement to Spend

In a few years many millions of war bonds and savings stamps will mature. At the present rate of progress the holders will, by that time, have become masters in the art of spending. What a harvest of dollars will be garnered by the designing vendors of luxuries and questionable investments! During the war good progress in the education of savers was made, but the pressure of action-compelling argument having been removed, we now see the result. The pockets of the luxury manufacturer, the amusement-hall proprietor, and the fake promoter are fast being lined with war savings. Just here it may be in order to point out that the conscience of the man who writes savings advertising needs no shot of morphine each time he sits down to the job. The ethics of his proposition are beyond all question.

A story is told by John Stuart Mill of the experience of the Jesuits in their efforts to civilize an improvident tribe of South American Indians. Oxen were supplied to the aborigines to encourage the tilling of the soil, but it was soon found that unless carefully watched the Indians would, at the close of a day's work, kill and eat the animals, excusing their action by saying they were hungry. Simply a case of lack of ability to think for the future.

The present-day hunger is for more money to spend upon pleasure, ease, comfort and luxurious living. The lean years which may come are quite forgotten—money which should be carefully conserved is being treated like the Indians' oxen and thoughtlessly used to gratify passing whims.

Financial advertising of the human interest type being of such recent origin, the field is as yet largely undeveloped. It will take many long and weary years of individual bank effort to properly awaken Canadians to the need of thrift. The massive power of the present-day "spend-your-money" advertising descends like an avalanche upon the scattered thrift-promoting energies of individual banks, nullifying them by forceful vigor and animation of argument. The performance of a great public service awaits the powerful touch of combined financial effort. An earnest co-operative educational campaign spread over a long period should be started without delay.

The blessings of thrift should be extensively advertised by the use of big space and intensively carried to the homes of the people by the branch financial units of each community. Industry and commerce of the future await the accumulation of the savings of the present. Our war-savers are slipping—they need wise counsel, advice and inspiration. What shall the answer be—indifference? Or shall it be—a helping hand?

WAR BONDS FAVORED IN MANITOBA

Also a Small Market for Other Good Bonds, But Possibility of Extensive Sales is Doubtful

By J. A. Anderson

The bond market in Manitoba is interesting mainly from the standpoint of its vagaries and uncertainties. It is doubtful if what could legitimately be called a "bond market" exists in the province. Prior to the 1917 Victory loan, the number of bond buyers was exceedingly small outside of the limited number of institutions and trusteeships habitually engaged in the purchase of government and municipal securities.

The Victory loan campaigns have largely increased the number of bondholders, and it is probably a fact that in Manitoba there is now a larger holding of Victory bonds than the original subscription amounts; but that any considerable number of these buyers have permanently, even for small amounts, become investors is still uncertain, and the effect of the Victory loan campaign in creating a permanent class of investors in Manitoba is yet to be proven.

Limited Market for Corporation Issues

A small market has existed for high grade, high yield, established utilities and industrials. It is extremely doubtful if issues of new companies have participated to any considerable extent in this demand, but in the aggregate there have been considerable sales of the bonds of sound established utilities and industrials.

The margin of gross profit in the business of selling government, municipal and high grade bonds, does not permit in a rural community of the expensive method of personal solicitation in distribution; the hope of any considerable extension of the bond market here rests with the farmer, and until he learns that high-grade bonds cannot be sold by the same methods as can be applied to stocks of divers unestablished enterprises, the future is uncertain, although not without signs of continued gradual improvement.

MONTREAL STOCK EXCHANGE

At the annual meeting of the Montreal Stock Exchange, held on May 9th, 1919, Edgar M. Smith, of Smith, Fairbanks and Co., was re-elected by acclamation chairman of the governing committee, while C. Simpson Garland was returned unopposed to the post of vice-chairman. C. J. Hodgson was re-elected secretary-treasurer, with the following chosen as the six members of the committee: Purvis McDougall, of McDougall and Cowans; Major Hartland B. Macdougall, of Chas. Meredith and Co.; E. Ernest Gault, H. A. Ekers, of Ekers, Cushing and Co.; C. H. Branchard, of L. G. Branchard and Co., and G. W. S. Henderson, of Burnett and Co.

PROVINCE OF MANITOBA

Scientific Accounting

Scientific Accounting is the basis of the financial position of the Province of Manitoba.

The system known as the "Cash System," which lends itself so readily to misrepresentation, is a thing of the past. In its place is a revenue system of the most modern character.

The Balance Sheet is a true and correct exhibit of the public accounts, corelating all departments.

Accounts outstanding and unpaid as at the end of the fiscal year are shown under the head of Accounts Payable.

Interest on the bonded indebtedness of the Province is charged to the date of the statement and shown as a liability.

Revenue received in advance of its having been earned is also shown as a liability.

In short, the balance sheet of the Province is just as exact and scientific as that of any of our banks or large corporations.

Salient Features of the Last Budget

Revenue surplus for the year	$ 322,867.00
Surplus of assets over liabilities	$34,200,000.00
The revenue bearing debt is	$19,300,000.00
Cash on hand and capital investments, including Dominion of Canada Victory Loans issues, provincial bonds, municipal bonds and school bonds	$ 7,600,000.00
The Net Debt (after deducting sinking funds)	$13,000,000.00

Average rate of interest paid during the war period on short term loans 5.42%
Average rate of term bonds during the war period 5.88%

Conserving Its Patrimony

In the Province of Manitoba it is provided by statute that all moneys coming into the Treasury as the proceeds of property disposed of may not be treated as revenue, but shall be invested in liquid securities as the Lieut.-Governor-in-Council may direct. This policy applies to minerals, as well as to lands, forests, etc. etc. Thus a fund is being built up to offset the debt of the province. In short, ORDINARY SOUND BUSINESS PRINCIPLES are being applied to the conduct of provincial affairs.

LEGAL DECISIONS AFFECTING INVESTMENTS

Dividend Declaration as Affecting Bondholders—What Constitutes Subscription for Stock

QUESTIONS relating to the issue of bonds and stocks, contracts between borrower and lender, the dealings of a broker with his clients and similar matters, are continually being handled by our courts of law, and frequently the points involved are so intricate that the higher courts are reached. A number of important decisions of this kind were handed out during 1919.

Bonds Issued for Construction Work

The case of Hyde vs. Scott, decided by the Quebec King's Bench Court, arose out of a rather interesting state of facts and the judgment of the courts lay down some important principles of company law. It appeared by the evidence that the Great Northern Construction Co. had been incorporated for the sole purpose of contracting with the Great Northern Railway Co. to build a section of the latter's line, and a sub-contract for the work was given to Ross and Co., a firm of railway contractors. The Great Northern Railway Co. was to pay for the work by mortgage bonds of the railway company of the par value of about a million and a quarter dollars, a transfer of certain provincial and federal subsidies, and also certain common stock of the railway company. The Great Northern Construction Co. was to pay Ross and Co., the sub-contractors, $450,000 cash, Great Northern Railway Co. bonds for $500,000, a mortgage on certain car shops in Quebec, and also a transfer of the federal and provincial subsidies and the common stock received by the Construction Co. In addition contracts were made with other contractors amounting to over $200,000.

From time to time calls were made on the shareholders, totaling 25 per cent., and on June 12th, 1899, a resolution was adopted by the board of directors of the construction company authorizing the collection of call number one. Three days later, June 15th, the board passed the following resolution:—

"That a dividend be and is hereby declared out of the net profits of this company earned and being earned under the contract between this company and the Great Northern Railway Company, and Ross and Company, payable in bonds of the Great Northern Railway Co. to the amount of $1,500,000 of said bonds pro rata to and as the holders of stock of this company pay in the amount of the call on the said stock."

Some Calls Paid on Stock

Under this resolution, Scott, who had paid calls totaling $2,000, received bonds of the par value of $6,000, and, after the construction company went into liquidation, Hyde, the liquidator, brought an action against Scott to compel him to return the bonds, on the ground that the construction company, contemporaneously with the subscription for and payment of its stock distributed not only the prospective profits which it might earn on the completion of the construction of the railway, but also the assets which represented the investment of its cash capital. In other words, that it not only distributed its profits, but the capital which should remain as security for its creditors, and that the only works undertaken by the construction company were the works in connection with the Great Northern Railway Co., and that the only assets were the claim for a return of the bonds sought to be enforced against Scott and the other shareholders, and possibly some shares of the common stock of the Great Northern Railway Co., of no value.

The statutory law of the province of Quebec governing the transaction provided that "no company shall declare a dividend the payment of which infringes upon or lessens the capital of the company. No dividend shall be declared or paid which has not been actually earned by the company," and the liquidator contended that the payment of the dividend or the distribution of the bonds as set forth above was illegal, for, as one of the judges expressed, "it was a case of not only counting one's chickens before they were hatched, but of cashing in on the chickens before the eggs were laid."

"At the time the construction company began to distribute these bonds among its shareholders, as profits earned and being earned, not a dollar had been paid in on the subscribed capital stock of the company, and the railway had not been constructed," said the Court. "The result of the operation was that the shareholders paid in one dollar with one hand and drew out bonds of the par value of three dollars with the other. These bonds, though at the time of doubtful value, were the only assets the company had, and it does not require a professor of mathematics to establish the result of such an operation often repeated. No provision was made for contingencies which might happen, and did happen. These shareholders were playing safe; they did not risk anything and they could not lose.

"The dividend declared by the resolution of June 15th, 1899, was not a dividend then actually earned by the company. The prospective paper profits were at most only eventual, presumed and fictitious, which a multitude of subsequent events might diminish or destroy, and the effect of such a distribution of bonds, concurrently with the payment of calls on the stock, gave the shareholders a chance for future gain without any risk of loss. I should hesitate to put the seal of judicial approval on a transaction of the character in question, and it appears to me that a distribution of the bonds amongst the shareholders of the construction company in the manner and at the time the same was made, whether considered under English law, French law, American law, or our own statutory law, was illegal and should be so declared."

Pretended Subscription for Stock

In the case of Henderson vs. Strang, decided by the Ontario Supreme Court, it appeared from the facts in evidence that Henderson was carrying on business in Toronto, and was the agent of Strang and Son, of Glasgow, Scotland, and that Henderson and William Strang, a member of the Glasgow firm, agreed to form the Henderson Co., Ltd., to take over the Henderson business, with a capital stock of $100,000 of which Strang was to have $51,000 and to pay for it by depositing that amount with the Glasgow firm as security against any advance made to the Henderson Co., Ltd.

The question then was whether Strang was a paid-up stockholder, or whether the company could proceed against him, and the Ontario Supreme Court held that such a pretended subscription was invalid and beyond the powers of the company.

"That the plan was one which the company could not act upon, I can have no doubt," said the Court. "The Act requires payment for stock, payment with interest at 6 per centum per annum upon all arrears; and, as it seems to me, it is a waste of energy to contend that there was, or was intended to be, any kind of payment in this scheme; the defendant Strang was to have the position, or power, of a paid-up stockholder without having paid anything in any real way for the stock; but there was nothing fraudulent or morally wrong in that, because he was not to be paid dividends, nor was he to obtain any other money advantage, through such nominal ownership. The plan being *ultra vires*, the defendant Strang cannot retain the position of a paid-up stockholder; nor, on the other hand, can the company put him in the position of the holder of stock upon which nothing has been paid, for the stock was not so taken, it was taken only as a part of the whole plan; neither the company, nor the Court, has any power to make, or enforce against him, a new and different contract; if the plan fall to the ground, it must fall altogether."

According to an estimate made by *The Monetary Times* in May, 1919, there were at that time 388 branches of American manufacturing plants in Canada, representing an investment of about $265,000,000. Since that time branches have been opened at the rate of about two weekly, and the present number probably reaches 450.

FINANCIAL RESULTS OF RAILWAYS

From the accompanying statistics of steam railways in Canada, which are compiled by the Department of Railways and Canals, Ottawa, it will be seen that there are over 50,000 miles operated and that the total railway capital is nearly two billion. The comparison below shows that a small increase in the mileage and in the paid-up capital took place during the year. The operating expenses, it will be observed, increased more than the gross earnings, so that net earnings show a decrease. The comparison is as follows:—

	1917.	1918.
Total mileage operated	51,359	51,881
Capital stock	$1,089,114,875	$1,094,063,495
Total railway capital	896,005,116	1,991,880,503
Gross earnings from operation	310,771,479	330,220,149
Operating expenses	222,890,637	273,955,435

5% First Mortgage Coupon Bonds

OF THE

Manitoba Farm Loans Association

Issued under the authority of "The Manitoba Farm Loans Act," Cap. 33, 7 George V, enacted March 9th, 1917.—An Act to Foster and Encourage Agricultural Development by Providing for Loans upon Farm Mortgages at reduced rates of interest.

Bonds issued in denominations of $25 and upwards to suit purchaser in terms of one to ten years. Interest payable half-yearly. In addition to the security behind the Bonds of First Mortgages on Improved Farm Lands, these Bonds are further

GUARANTEED AS TO PAYMENT OF PRINCIPAL AND INTEREST BY THE GOVERNMENT OF MANITOBA

4% CERTIFICATES OF DEPOSIT also issued by the Association under the powers of the Act for moneys repayable on demand. Principal and Interest guaranteed as above. Both Bonds and Certificates are free from Provincial, Municipal, School and other taxation, except duties under "The Succession Duties Act."

ELECTRIC RAILWAYS HAVE FINANCIAL TROUBLES

The accompanying statistics of electric railways in Canada, for the year ended June 30th, 1918, when compared with those for the preceding year, show that results were not as favorable in 1918. These statistics are compiled by the comptroller of railway statistics, Department of Railways and Canals, Ottawa. The corresponding figures for the year ended June 30th, 1919, are not yet complete, but the expenses of the railways have increased, whereas only in a few places have entire rates been granted. The volume of business continues to increase, but the financial results remain unsatisfactory.

The comparison of the above figures with those for the preceding year shows that very little additional money has been invested in enterprises of this kind. The mileage is just about the same and the capital shows very little change. The amount of bonds outstanding increased by about $5,000,000. Gross earnings show a reduction of $6,000,000, and net earnings a reduction of over $3,000,000. Several of the smaller systems, it will be noticed, did not have sufficient earnings to meet operating expenses. Total income from operation, which is made up of the net earnings and of miscellaneous incomes such as revenue from street car advertising, trackage rights, etc., was less than in 1917 by over $3,000,000. After paying interest on bonds reserve for appreciation and other fixed charges, a substantial operation of the companies realized a loss, and net income for all companies exceeded net loss by less than $3,000,000.

The amount paid out in dividends was $1,671,358, which is just over two per cent. on the paid-up capital stock. Some further items, classified as reserves and special charges, reduced the net returns still further. Surpluses totalled $1,114,490, and deficits $1,327,171, so that assuming that no more than the necessary provision was made for depreciation, sinking funds, etc., the electric roads were worse off at the end of the year than at the beginning.

INSURANCE

Labour Turn-Over is Costly

The chief executive of any large industrial organization has a pretty fair idea of the tremendous loss of time, effort and money occasioned by what is termed "Labour Turn-over"—that is, the extensive degree of change in personnel which is constantly going on in any large staff.

The hiring of new employees and their "breaking-in," until their efficiency becomes normal, is an expensive proposition. Various establishments have figured out the cost at all the way from $40 to $75 for each change, and in large concerns the proportion of turn-over is anywhere from fifty to a hundred per cent. of the entire list of employees during the year. Thus the overhead cost of labour turn-over would be anywhere from $20 to $75 per capita of the total list of employees.

Obviously, it is worth while to consider seriously any legitimate plan which will, to any considerable extent, help to reduce the percentage of labour turn-over.

To achieve such a result one thing is essential, and that is to give the employee a reasonable inducement to stay in his present employ. The simplist, most effective and most practical way of doing this is by means of Group Insurance.

Wherever it has been tried, it has achieved a notable success along these lines.

Group Insurance helps the employer because it helps the employee. It offers the worker, as a reward for continued service, something substantial, definite, timely and beyond the possibility of being juggled away from him. There is nothing visionary about it ; it is a hard, cold cash guarantee, of which he holds in his own hands the life assurance company's acknowledgment.

Group Insurance costs infinitely less than the saving it effects in labour turn-over and increased efficiency. This is proven by the experience of those who have tried it.

It will cost you nothing to look into the question. Write to

Remarkable Volume of Life Insurance Business

Figures of New Business for 1919 Will Probably Exceed Those for 1918 by 75 per cent.—Good Reasons for This Increase—Attitude of the Companies and Expectations of the Policyholder—Higher Status of the Agent and Increasing Financial Rewards.

By M. P. LANGSTAFF, A.I.A., F.A.S.

1914	$217,006,516	1917	$282,120,430
1915	$221,119,558	1918	$313,251,556
1916	$231,101,625	1919	$540,000,000

THE accompanying figures tell their own story. They indicate a volume of life insurance written during 1919, far surpassing anything before recorded in the annals of Canadian life insurance. The increase alone over the amount written in 1918—itself a banner year—is greater than the total amount actually written in any year before 1916. The causes of this great increase in business may be briefly stated:—

1. Depreciation in value of money and consequent need for greater amount of insurance to afford protection corresponding to that furnished by former standard of values;
2. Higher wages and general prosperity, fictitious and transient though latter may, to some extent, be;
3. Influenza epidemic with its impressive insurance lessons for the public;
4. Great advertising life insurance has received through: (a) Vast amount of insurance companies' funds invested in war loans; (b) Incalculable benefit rendered by claims paid to beneficiaries during war and influenza epidemic; (c) Governments' endorsement of life insurance implied in amounts placed on lives of soldiers.
5. Inculcation of habits of thrift during exigencies of war.
6. Greater efficiency of insurance salesmen.

Experience More Favorable

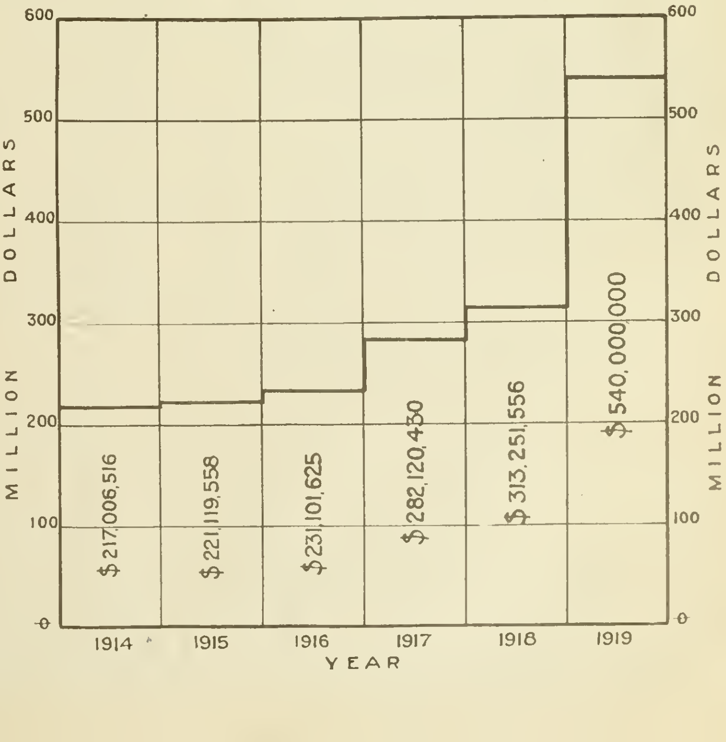
The year 1919 in life insurance was noteworthy too, for other factors besides its new business. The year 1918 had not only its lights but its very strong shadows; the year 1919 was one of universally favorable experiences. In 1918, the insurance companies were staggered by two tremendous blows, dealt in rapid succession, the like of which they had never before experienced, viz., the war claims arising from the terrific fighting when Germany made her last agonized effort in the summer of that year, and the still more numerous death claims caused by the influenza epidemic in that autumn and early winter. No stronger proof of the impregnable position of Canadian life insurance companies could be found than the vigorous manner in which they withstood these really titanic buffets. Truly did DeMorgan say, "There is nothing in the commercial world which approaches even remotely the security of a well-established life insurance office."

Nevertheless the strain of that experience was intense and the opening of 1919 found insurance officials nervous as to the possible trend of mortality for that year. It was thought that the war and epidemic, striking as they did at the young and robust lives, might have left a preponderating proportion of impaired lives on the companies' books. It was thought, too, that the autumn of 1919 might see a recrudescence of the influenza epidemic. Fortunately their forebodings were not realized and 1919 closes with an exceptionally light mortality, enabling the companies to add large amounts to their surpluses from their mortality allowances. From figures before me, I find that the actual mortality strain among the various companies is approximately only 60 per cent. of that allowed for in their premiums.

The following is a comparison of ratios of actual to expected mortality for the years 1918 and 1919, of the leading Canadian companies. (The figures for the year 1919 are a close approximation.)

Company.	1918.	1919.
A	122%	51%
B	110%	70%
C	96%	75%
D	110%	60%
E	95%	65%
F	120%	55%
G	114%	50%
H	95%	55%
I	101%	76%
J	105%	65%
K	97%	58%
L	103%	55%

NEW BUSINESS, YEARS 1914-19



Turning to a consideration of other factors, we can say, in respect to expense that, in spite of the rapidly rising cost in living expenses, very little increase in the cost of obtaining business has taken place in 1919 over that experienced in 1918. Agency expenses follow roughly the trend of commission allowances, which do not vary markedly from year to year, and, while general expenses in both field and head office advanced somewhat, the increase should be fully compensated for by the greatly increased business production.

From the investment standpoint, too, the companies have reason to be well satisfied with the year just closed. They have again been able to fill their coffers with gilt-edged government bonds, bearing good interest rates, and certain to show appreciable advances in price. It is true that these advances may be somewhat postponed owing to the extraordinary conditions that prevail at the present time. It is, perhaps, not so much the aftermath of the war that is responsible for the industrial unrest which we have been witnessing during the past twelve months as it is the prolonged period of rapidly rising prices which always carry in their train unrest, discontent, strikes, and riots, the reason being due to the simple axiom that wages never rise as fast or as much as prices and the cost of living. Rising prices of commodities encourage, too, speculation in commodities and stocks, and have a tendency to discourage honest industry. While, then, rising prices may result in what is real prosperity for some industries, for the nation, as a whole, the prosperity evidenced is more superficial than real. Fortunately, life insurance, from the nature of its business, is not vulnerable, to any extent, in periods of reaction, much as it may fully participate in periods of expansion. We think, too, that the dollar has reached the nadir of its price, and that its recovery will be gradual rather than violent. However, that is a problematical matter for the future to reveal. So far as 1919 was concerned, the life insurance companies belonged to the institutions that enjoyed real, not fictitious, prosperity, and are certainly not threatened with any present reversal of fortune.

Does Not Mean Higher Dividends

In view of the favorable factors I have just enumerated, we may well ask ourselves, "Is the policyholder looking forward to 1920 as a year of increased dividends from the life insurance companies?" He may very naturally do so in pursuance of the accounts he has heard of life insurance in 1919—the boom year for insurance. We fear he is doomed to disappointment so far as immediate profits are concerned. The nature of life insurance is such that every new policy put on the books creates a temporary deficit rather than a surplus. The causes for this are two-fold; firstly, the heavy first-year commission and other charges, one important item of which is the government tax which falls directly on the policyholder; and secondly, the necessity to set aside the first-year reserve on the basis required by the insurance department. In the second and later years the charges against the policy are comparatively small and a surplus is soon built up. Eventually, therefore, new business is profitable to the company and its policyholders, but temporarily imposes a greater or less strain on the company's resources corresponding roughly to the proportion which the new business bears to that already on the books. In a year like 1919 where new business literally poured in, a severe though temporary strain is thrown on a company's surplus, a strain which will lead in some cases to an advisable reduction in dividends during 1920. Combined with this feature will also be the determination of the companies to keep their reserves sound and substantial to meet any and all adverse contingencies that may arise. They have seen that epidemics and scourges can sweep devastatingly over the country in this enlightened twentieth century, as did the black plague in the middle ages. A substantial reserve in such times will be a very present help in time of trouble. In this connection it might be said that a great step in this direction would be made if companies could be induced to discontinue the practice of paying arbitrary annual dividends in the early years of a policy before such dividends have been earned.

A large new business, then, does not necessarily mean a concomitant increase in the dividend allotments, and it may be asked whether a large access of business such as that experienced in 1919 is altogether an unmixed blessing. I am aware that in many insurance quarters it is rather regarded as a menace. I have heard it argued that the strain on the companies' surpluses and resources in procuring this large business is so great as to amount to a positive danger. At the risk of being thought lacking in proper conservativeness, I must confess that I fail to see the soundness of this view of the question, assuming of course that proper safeguards are taken in respect to the new business. We must not look on the agency force as occupying the role of the fisherman in Arabian Nights, who removed the seal of Solomon from the bottle he fished out of the ocean and was threatened with extinction by the Jinn who emerged out of the escaping fumes. The spirit of the new business is a good spirit, even though it does put a good deal of extra labor on the head office staff, and we trust it will stay among us and not require recorking. It will ultimately show good returns in the years to come. However, the question of how much new business a company should write is a complicated one and cannot be satisfactorily treated in the short space available.

Insurance and Price Levels

But whether entirely good or not in its effects, the big inrush of business is with us. I have heard agency superintendents claim that they have, to a certain extent, tried to stem it, to get it on a more moderate level, but without avail. The public insists on being insured and in substantial amounts, and will take no denial. Several interesting articles have appeared in the financial and insurance papers during the past year dealing with the question as to the length of time we may expect this big rush of new business to continue. Among these, one of the most instructive is that of Philip Burnet, president of the Continental Life Insurance Co. of Wilmington, Delaware, who, in a paper read before the Agency Superintendents' Convention in Chicago, pointed out that the trend in the cost of living will be one of the great factors which will determine the amount of new life insurance which will be written on this continent during the next few years. The paper is an extension of a pamphlet Mr. Burnet wrote a few years ago, where, basing his views on the striking parallel between the curve of commodity prices in the United States from 1860 to 1880, following the civil war, and the curve of new life insurance written during the same period, and gauging the manner in which new business should, on the same principle, follow the course of commodity prices during and subsequent to this recent war, he was able to make a remarkably true prediction as to the trend of new business for the succeeding years. The consensus of opinion seems to be that there will be no material slackening in the new business production for some considerable time. In Canada, moreover, the entry of several of the companies into the field of group insurance should mean considerable accessions to the gross amounts of business written.

High Returns for the Agent

In closing this article I cannot refrain from making a more extended reference to one of the causes already given for the great increase in new business. I refer to the increasing efficiency of the insurance salesman. His evolution in the last few years has been truly remarkable. Not so very many years ago, the insurance field was looked upon as a gathering place for broken-down ministers, worn-out teachers, and failures in any walk of life. The impression was an erroneous one, but still it was there. To-day the insurance salesman is recognized as a specialist with a profession. The commanding lead he took throughout Canada and the United States in the Victory loan campaigns, stamps him as a solicitor par excellence. In the Carnegie Institute School of Life Insurance Salesmanship, in the Salesmanship Courses by individual companies, in the various conventions staged by the Underwriters' Association, he obtains a thorough training for following a profession in which the monetary rewards are not inconsiderable for those who attain the necessary skill. "Who wouldn't be a life insurance agent?" says Canadian Finance and quotes the following extract from the Toronto Globe: "Tables compiled by the Insurance Field show that out of approximately 200 leading life insurance agents in the United States, 48 have incomes in excess of $100,000 a year, 11 have incomes in excess of $200,000 a year, four have incomes in excess of $300,000, and two have incomes in excess of $500,000. One of the $500,000 incomes falls less than $5,000 short of the $600,000 mark. These incomes are earned wholly from commissions paid on life insurance, and are exclusive of the earnings of the same agents in other lines of insurance. E. A. Woods, of Pittsburgh, general agent of the Equitable Assurance Society, received the largest amount paid to a life insurance agent by an insurance company in 1918. Mr. Woods was paid over $595,000. He has been the leader of the agents of the world for a number of years, but his income last year was a record breaker. It is expected that his commissions this year will establish a new record."

And these figures refer to the year 1918, not to the year 1919 where insurance production was increased 75 per cent.

Canadian Fire Losses Still High

Estimate for 1919 Is, However, Eight Million Less than for 1918—January Was Worst Month—Many Large Fires in December — List of Conflagrations — Fewer Fatalities than in 1918.

According to *The Monetary Times*' record, fire losses during 1919 amounted to $23,207,647, as compared with $31,815,844 in 1918, and $20,086,085 in 1917. Although there is a decrease of over $8,000,000 as compared with 1918, the average for 1916, 1917 and 1918 is exceeded by more than $6,000,000.

The loss per capita for 1919 is figured at approximately $2.90, which shows a considerable decrease as compared with 1918, but is very unfavorable as compared with former years. Various measures which have been adopted by the Dominion and by the provincial governments, with a view to the reduction of fire losses, are described elsewhere in this issue. It is as yet too early to estimate the effectiveness of such efforts, as the reduction of losses for 1919 as compared with 1918 may be merely the result of changed industrial conditions. In 1918, it will be remembered, there were several conflagrations in munition plants, involving heavy losses. As was pointed out by the Superintendent of Insurance, G. D. Finlayson, in his report for 1918, the insurance companies were very little affected by these losses, as they did not insure such risks as a general rule.

During 1919 there were two hundred and eighty-eight fires with a loss of over $10,000, which, compared with the 1918 figure, shows a considerable increase. The following are some interesting comparisons of fire waste in Canada:—

	1916.	1917.	1918.	1919.
Average monthly loss	$1,707,292	$1,673,840	$2,651,320	$1,933,970
Loss per capita..	$2.56	$2.60	$4.11	$2.90
Fires with damage of $10,000 or over	216	238	256	288

The Monetary Times' record of the past four years shows the following monthly losses:—

Month.	1916.	1917.	1918.	1919.
January	$ 1,649,217	$ 1,918,660	$ 2,688,556	$ 3,915,290
February ..	3,275,600	2,009,953	2,243,762	1,091,834
March	1,406,501	2,050,650	1,682,286	2,154,095
April	1,460,437	1,317,714	3,240,187	1,080,070
May	1,850,205	1,163,110	3,570,014	1,785,030
June	494,557	1,184,627	3,080,982	3,337,530
July	3,039,634	1,101,734	3,369,684	1,118,377
August	1,057,109	1,230,183	3,110,445	1,374,495
September ..	981,703	1,301,700	917,286	1,940,272
October	1,077,815	704,605	5,119,145	1,023,288
November ..	923,235	959,049	1,059,580	2,339,870
December ..	3,271,496	5,144,100	1,733,917	2,047,496
Totals ...	$20,487,509	$20,086,085	$31,815,844	$23,207,647

The following table gives a list of fires of $10,000 and over, month by month, compared with five previous years:—

Month.	1914.	1915.	1916.	1917.	1918.	1919.
January	41	35	28	28	43	25
February	45	25	30	31	21	18
March	28	24	30	26	16	28
April	31	22	13	13	24	26
May	29	23	23	11	27	20
June	23	18	9	17	19	31
July	29	11	13	16	24	22
August	16	10	14	14	23	16
September	13	20	12	10	14	17
October	18	17	14	15	12	19
November	11	13	14	26	14	25
December	18	19	18	31	19	41
Totals	302	237	218	238	256	288

The largest monthly loss was in January, when two large automobile plants were destroyed in Montreal with a loss of $1,500,000. Some of the larger conflagrations during the year were:—

$1,000,000,	Cadillac Motors workshop, Montreal, Que.
500,000,	Jennings and Co.'s auto plant, Montreal, Que.
500,000,	C. B. Mill's lumber yards, Restigouche, Que.
500,000,	Terres and Racine block, Quebec, Que.
450,000,	timber at Sardis, B.C.
500,000,	timber destroyed by bush fires, near Vancouver, B.C.
400,000,	town of Oromocto, N.B.
800,000,	Brown Lumber Mills, Trois Pistoles, Que.
350,000,	University of Montreal, Que.

Besides the above-mentioned, there were forty-eight fires with a loss of $100,000 and over, ranging up to $300,000.

Fewer Fatalities

There were fewer fatalities in 1919, the figure being 225, compared with 241 for the previous year. The following table, compiled by *The Monetary Times*, shows deaths caused by fire during the past eight years:—

Month.	1912.	1913.	1914.	1915.	1916.	1917.	1918.	1919.
January	27	14	26	3	10	21	28	13
February	11	21	18	11	23	19	87	26
March	24	22	27	23	23	20	34	9
April	15	11	22	14	6	15	7	27
May	18	33	8	5	14	12	10	15
June	6	18	12	2	6	9	9	28

Totals	203	236	175	142	531	207	241	225

HAIL INSURANCE PREMIUMS AND LOSSES

Losses in Some Cases Exceed Premiums—Results in Alberta Better than in Saskatchewan

THE insurance departments of Saskatchewan and Alberta have compiled figures of the premiums and losses of companies writing hail insurance in 1919. These returns are of course subject to correction when final reports for the year are secured. They give a fairly reliable indication of the results for the year, however, which were not satisfactory. The figures, with the loss ratios, are as follows:—

Alberta

Company.	Premiums.	Losses.	Loss ratio.
Alliance Assurance Co.	$ 16,427	$ 6,437	39.1
British America Assurance Co.	3,319	1,138	34.1
British Crown Hail Underwriters	48,021	15,642	32.5
British Traders' Insurance Co.	10,015	5,071	50.6
Canada Security Assurance ...	81,915	36,434	44.4
Canadian Indemnity Co.	6,978	2,270	32.5
Car & Gen. Ins. Corp., Ltd. ..	31,529	10,377	32.9
Connecticut Fire Ins. Co.	12,040	7,089	58.8
Continental Ins. Co. of N.Y. ..	13,933	7,626	54.1
Dominion Fire Insurance Co. .	9,733	2,156	22.1
Eagle, Star & British Doms. ..	20,712	7,210	34.3
Employers' Liability Ass. Corp.	26,104	22,498	86.1
Excess Insurance Co.	20,578	5,832	28.3
Farmers Fire & Hail Ins. Co.	34,303	16,474	48.
Federal Ins. Co. of N.J.	13,950	21,065	151.
Fidelity Fire Underwriters ..	31,094	18,139	58.3
Fidelity-Phenix Fire Insurance	9,849	6,648	67.4
Fifty-fifty Mutual Hail Ins. Soc.	9,926	4,393	44.2
General Accident Assur. of Can.	9,235	542	.58
Glens Falls Insurance Co.	12,040	7,089	58.8
Great North Insurance Co. ...	29,018	9,075	31.2
Hartford Fire Insurance	34,688	11,151	32.1
Home Insurance Co.	112,193	46,976	41.8
Nova Scotia Fire Underwriters	38,741	16,097	41.5
Rochester Underwriters	17,767	7,897	44.4
Scottish Canadian Underwriters	4,530	647	14.2
Union Ins. Society of Canton .	7,784	1,389	17.
United Assurance Co.	39,989	12,822	32.
Winnipeg Fire Underwriters .	23,820	28,479	119.5
Westchester Fire Insurance Co.	12,040	7,089	58.8
Western Underwriters	6,844	338	.42
Total	$ 749,115	$ 346,098	46.2

Saskatchewan

Company.	Premiums.	Losses.	Loss ratio.
Acadia Fire Insurance Co. ...	$ 72,866	$ 55,035	76.9
Alliance Assurance Co.	56,715	54,979	96.94
British America Assurance Co.	52,646	47,874	87.97
British Crown Hail Underwriters	99,712	69,470	69.67

Winnipeg Fire Underwriters .	17,791	8,976	50.39
Total	$2,277,819	$1,784,896	78.3

HAIL EXPERIENCE VARIES GREATLY

The loss ratio of companies writing hail insurance in Saskatchewan has varied from 23.19 per cent. in 1914, to 132.06 per cent. in 1916, according to figures of the provincial insurance department. This year it was 78.43 per cent., and considering the fact that the cost of carrying on business is about 30 per cent. of premium income, the results were not satisfactory. The yearly ratios for eleven years have been as follows:—

Year.	Per cent.
1909	64.12
1910	43.34
1911	67.68
1912	72.07
1913	61.96
1914	23.19
1915	32.18
1916	132.06
1917	48.74
1918	41.95
1919	78.43

BURGLARY INSURANCE IN CANADA

By F. J. Lightbourne

Burglary insurance is one line that has had comparatively slight attention from underwriters in Canada, until the year 1918. In 1893 one company issued burglary policies. A second followed in 1905, and in 1910 five companies were operating, and at the end of 1919 seventeen companies were licensed to do burglary business, and practically all of them were issuing policies. For the year 1918, the last date for which government figures are available, the premium income of all companies amounted to $179,995, and it is expected that the figures for 1919 will show a very considerable increase.

Burglary policies were originally issued covering only the contents of assured's residence, or his mercantile stock, but their scope has been gradually extended, and now special forms cover "payroll robbery," "messenger and interior robbery," "contents of safes," and "banks."

The necessity for burglary insurance has greatly increased since the war, and we may look for greater activity on the part of the professional burglar and hold-up man in this field, owing to the fact that many of the states are taking drastic measures to round up criminals of this nature; it is constantly becoming more dangerous to operate in their old haunts, and it is feared that many of them may come to Canada as a comparatively new field.

All companies writing burglary insurance are members of the Burglary Underwriters' Association of Canada, and the business is being conducted with regard to sound underwriting.

SASKATCHEWAN SEEDED ACREAGE LEVY

Necessary to Levy Additional Tax Under Legislation Passed at 1919 Session

LEGISLATION providing for the levy of an excess seeded acreage rate, under the provincial hail insurance scheme, was passed at the 1919 session of the Saskatchewan legislature, and the poor results experienced by the municipal system, as well as by the companies doing this business, justified this extra provision. In a recent statement, E. C. Hingley, secretary of the Saskatchewan Municipal Hail Insurance Association, reviewed the results for the year, after outlining developments up to the end of 1918, as follows:—

"The 1918 hail insurance convention, recognizing that the four-cent rate would not in future years provide sufficient revenue to pay all the losses in full, adopted the following resolution practically unanimously: 'That this convention is in favor of the revenue of the association being increased by the continuation of the present flat rate of four cents per acre, together with an automatic seeded acreage assessment.' The provincial government acceded to the request and in February, 1919, legislation was passed permitting the association to 'fix an additional rate per acre to be levied on all the land of an owner under cultivation in excess of forty acres, such rate to be collected in the same manner as the flat rate.'

"It may be well to point out here that the Act and the affairs of the municipalities operating under the Act are administered by a board of directors who are all elected by the representatives of the municipalities attending the annual convention. The board of directors did not decide to put into force the powers necessary without first getting instructions from the annual convention.

Provided for Excess Rate

"The annual convention held in Regina, March, 1919, debated the matter very fully and finally adopted the following resolution:—

"'That this convention recommend to the board of directors that provision be made to levy a seeded acreage assessment if necessary to meet the losses and the expenses in full for the year 1919, provided such assessment does not exceed 25 cents per acre.' In accordance with the wishes of the convention the board decided that if an additional rate was necessary this year the same would be levied.

"The principal features of the Act in the spring of 1919 were these: The flat rate of four cents per acre would still be collected; an additional rate upon the cropped land would also be collected; the indemnity would remain the same, $5 per acre for total loss. The withdrawal privileges were still further widened. Any farmer could withdraw his land, paying no hail insurance taxes whatsoever and date of withdrawal was extended to June 15th, so that any farmer that had his crop blown out before that date could withdraw his land and escape payment of the tax when it was levied. A considerable number of farmers in different municipalities did withdraw their lands, some for the full period of ninety-nine years.

Damage Was Very Heavy

"The year 1919 proved to be a very disastrous year for hail losses. The heaviest storm occurred on July 1st, this storm cost the association over $1,000,000, the losses in nine municipalities amounting to over $900,000. The municipalities suffering the heaviest losses this year are those which have not during the past seven years sustained serious loss, and they have provided a large proportion of the moneys used to pay the losses in previous years to the farmers in other municipalities. The most unfortunate part of the situation has arisen through so much crop having been destroyed by wind, drought, grasshoppers, insects and gophers. Some farmers cannot see why they should be called upon to pay hail taxes when they have no crop themselves, so that some other farmer may be paid for his hail loss. No doubt it will be a serious hardship to some farmers to pay the tax imposed, but how can they now be relieved when they did not withdraw their lands at the proper season?

"The taxes which are now imposed cannot be cancelled by either the council of the municipality or the association. To do so would be a breach of faith, as there would not be enough taxes collected to pay the farmers who have sustained actual hail loss. If any taxes are cancelled because the farmers have no crop, then the only logical conclusion would be to cancel all the taxes, which would leave the 1919 claimants with 35 cents in the dollar as a settlement of their claims."

Amendments to be Requested

The new situation was considered at a convention held in Regina on November 13. The present law and its administration was approved, and it was also decided to ask the government to amend the Act to permit the annual convention to fix a maximum additional rate, which it was suggested should be 30 cents per acre. Regulations necessary for the securing of information, with suitable penalties, were also considered. New rules as to withdrawal may also be asked. It was also agreed that commissions for the work of assessment and collection should be paid direct to the municipal council rather than to the secretary-treasurer. The amount to be paid was left to the directors, who are of the opinion that it should not exceed one-fifth of a cent per acre upon all assessable land in the municipality. An amendment will also be asked empowering the association to levy for the purpose of building up a reserve. The amount to be raised for this purpose was left to the directors, but the consensus of opinion was that such an assessment should be made only in years of small losses.

ALBERTA TRIES OUT FIRE PREVENTION ACT

In a review of fire prevention activities in Alberta during 1919, R. L. Nicolson, who was deputy fire commissioner for the province until January 1st, when he resigned to enter the service of the Union Casualty Co., of Winnipeg, said:—

"The Fire Prevention Act was brought into force by proclamation July 1st, and a campaign was at once initiated by the department for the purpose of making the citizens acquainted with the danger attached to various fire hazards, the enormous loss by fire waste and the very considerable improvement that could be effected by the taking of ordinary care. Literature was prepared and distributed, arrangements were made for the observation of fire prevention day, October 9th, and an inspection crew was placed on the road to visit towns and villages and give advice and help in cleaning up.

"Fire prevention day was observed throughout the province, particularly by the schools and higher educational institutions, where addresses and demonstrations were given by officials of the fire prevention branch, of the city fire departments, and also by local municipal authorities throughout the province.

"Through the distribution of educative literature and newspaper ads dealing with the main causes of fire and suggested means of precaution, a great deal of interest has been awakened among the local fire chiefs and their assistants in districts organized for fire protection, and also among the officials of municipal districts in unorganized vicinities. In both cases the department has greatly assisted by their willing co-operation.

"In the few months the Act has been in force the inspectors in the field have covered a large part of the province taking in approximately ninety towns and villages. The 'clean-up' orders given by them have, generally speaking, been complied with and a very commendable spirit shown both by the local officials and the citizens of the respective vicinities."

At a meeting of the Winnipeg Life Underwriters' Association on December 29th, it was decided to raise the annual fee to an amount sufficient to meet expenses, instead of meeting deficits by voluntary contributions, as had been done for several years past.

FOREST FIRES IN THE WEST

All Four Provinces Had Heavy Losses—Fire Ranging in Forests and on Railways

OWING to an unfortunate combination of adverse factors, the present fire season has proved to be one of the most disastrous to the Canadian forests over a period of twenty years. In the first place there was very little snow last winter and when this disappeared early in April it was followed by an abnormal period of drought and continuous, high, variable winds, which in some parts, and more particularly in southern and central Alberta, have continued up to the present time. Coincident also with this failure of precipitation, the water in the lakes and streams has never before, in the memory of old settlers, been so low as during the past spring and early summer. In the Canadian Forestry Journal for September a useful summary of forest fires during the year, in the western provinces, was given, as follows:—

Manitoba

"The first serious fires to attack or threaten the forest reserves broke out along the east side of the Porcupine Forest Reserve in Manitoba early in May. These appear to have been settlers' clearing fires that by accident or design got beyond control and resulted in very heavy loss of merchantable timber in licensed berths and of young growth outside. In the other Manitoba reserves no fires of serious magnitude have as yet occurred, although the danger has been acute and many small fires have been fought and extinguished. A factor which increased the difficulty of protecting the reserves is that the labor famine during the past two or three years has made it almost impossible to maintain the boundary fireguards as efficiently as is necessary.

Saskatchewan

"During the latter half of May extensive and serious fires raged throughout northern Saskatchewan and did great damage to the forest reserves. It is now believed, however, that the loss is not so great as at first feared, but so far the forest officers have been so busy in patrolling and in fighting incipient fires that definite reports are still awaited. The reserves south of Prince Albert appear to have escaped any considerable injury this year up to date. The most noteworthy cause of the widespread fires in northern Saskatchewan appears to have been the unregulated use of fire by settlers, in clearing their lands. The excellent "Forest Fire Act" of Saskatchewan is in this regard largely a "dead letter," because as yet the provincial government has made no organized provision for requiring the settler to secure a fire permit before setting out fire. It is to be hoped that this important section of the Act will hereafter be enforced.

"In summing up the general situation in Saskatchewan, the district inspector says in an interim report dated June 11th: 'Starting about a month ago one was, in travelling about the country, amazed at the number of land and meadow clearing fires set out and apparently running at will along the southern boundary of our reserves and fire ranging districts from one side of the province to the other. These fires during the last three weeks swept north almost in a solid line into the reserves and ranging districts. With the extreme weather conditions at the time all efforts to check them were futile. The loss on the reserves and fire ranging districts cannot at the moment be even guessed at, but it is certain that it is large. Every one of the northern reserves was to a large, but unknown extent, burned over. However, I am of the opinion that when we have had an opportunity to map in the burned areas these will probably not be as large as at present is feared.'

Alberta

"Coming next to Alberta we are confronted with an exceedingly grave condition of affairs. By the middle of May the reserves in southern and central Alberta had become dry as tinder, and indeed the fire situation generally throughout Alberta became extremely serious. By careful patrolling and good fortune the Crowsnest forest was kept free of fire until early in June, when a destructive fire which killed at least fifteen million feet of valuable timber, broke out in the Porcupine hills. This fire was finally extinguished after a three weeks' fight.

"Perhaps the worst fire so far reported on any of the reserves is the Sheep Creek fire in the Bow River forest. This tremendously destructive conflagration originated through the carelessness of a railway laborer who failed to properly extinguish a fire made to boil a pot of tea. It escaped into the Lineham Lumber Company's slash on May 22nd, and continued to spread until about July 15th, in spite of every effort by hundreds of men to get it under control. In the interval the timber loss has been enormous, as several timber limits have been wiped out and very large areas of promising young growth destroyed. It is estimated that fully fifty million feet of fine saw-timber has been killed by this fire up to date.

"Near the end of May a second great fire broke out on the Stony Indian Reservation west of Calgary, and soon spread to the forest reserves in the Ghost River Valley. This very destructive fire has been fought by a small army of men for seven weeks, and, the latest report received, dated July 16th, states that it is not yet under effective control. Again, in early June another large fire started in the Sarcee Indian Reservation and finally spread westward up the Elbow River, extending, however, only a short distance into the forest reserve. It was finally placed under control on July 13th. Meantime another very large fire started farther north, between the Red Deer and Clearwater Rivers. Our latest report, of July 16th, shows this fire running south into the Bow River forest and so far defying all efforts at control. As to the exact extent of the damage occasioned by any of these fires, no definite reports are yet available.

"The Brazeau and Clearwater forests appear to have sustained very considerable damage, at least three large fires having occurred on each, but owing to rather more favorable rainfall conditions farther north the Athabaska and Lesser Slave forests have fortunately escaped so far with comparatively light fire losses.

British Columbia

"On the British Columbia reserves also the fire hazard for a time was considerable, but our protective organization succeeded in carrying them through this danger period without experiencing any serious fires.

Fire Ranging Districts

"With the exception of the districts in British Columbia an abnormally serious fire situation is reported to have occurred on all the fire ranging districts. The chief fire ranger at The Pas says: 'This is the worst fire season that the west has seen for twenty years—woods all dry as tinder even in the muskegs.' In Prince Albert fire ranging district heavy losses are reported, and in the Battleford district twelve large fires had occurred before the end of April, covering some 55,000 acres. No Battleford May or June reports are yet in hand, but it is certain that they will tell of still more widespread destruction in this part of the west, In regard to the region north of Edmonton, the district ranger says: 'All through this district large fires have occurred.' One of these fires destroyed the town of Lac la Biche. and the chief ranger reports that another—the one which swept timber berth No. 1900—killed some fifty-five million feet of merchantable timber. A May report from Fort McMurray shows that the same condition of danger and loss from fire has been experienced this season even in the Mackenzie Basin.

Railway Fire Ranging

"From reports received, it is evident that the Railway Fire Ranging Service has done some excellent work this season. For instance, of the numerous fires reported in April, practically all were extinguished before burning over more than 10 to 30 square yards, thus demonstrating the efficiency of the patrol system employed. With reference to the fires on forest reserves in general, and those in Alberta in particular, it must not be forgotten that the war greatly depleted the administrative and ranger force and also largely stopped the construction and proper maintenance of pro-

A True Business Story

Two business men in Toronto adopted several safeguards for protecting their business.

They installed automatic sprinklers. They bought a cash register and a cheque protector. They bonded their employees. They carried fire policies. They bought an expensive safe. In fact, they adopted nearly every safeguard that they could think of, and felt sure that nothing less than an earthquake could interfere with their progress and prosperity.

Business was good and the bank and the wholesale houses were giving them considerable credit.

But, something happened—something they had not counted on to happen for many years to come. Pneumonia carried off one of them.

The wholesale firms made inquiries as to whether the business was to be continued. The bank asked to have a note taken up at maturity without fail. The widow decided to withdraw her late husband's share of the business. To make a long story short, the business was closed at a loss to the surviving member, a loss to the widow, a loss to the bank, a loss to the creditors, in fact, a loss to all concerned.

The partners had overlooked one of the most important means of protecting their business—a Canada Life

Commercial Protection Policy.

That would have saved the business. The spot cash would have cleared off the bank note in full. The widow would have received the value of her husband's share without loss. The creditors would have been satisfied. And the surviving member would have had surplus cash on hand.

No business is fully protected without Commercial Protection Insurance.

tective improvements such as trails, telegraph lines, lookout towers, and fire-guards. With normally effective protective machinery and good laws properly enforced governing the burning of slash by lumbermen and settlers, there is every reason to believe that even in such an abnormally dangerous season as the present, the forest can be adequately safeguarded from fire loss."

CANADIAN HAIL UNDERWRITERS' ASSOCIATION

At the annual meeting of the Canadian Hail Underwriters' Association, held in Regina on November 20th, W. A. Smart and H. H. Campkin, both of that city, were elected chairman and secretary, respectively. Mr. Campkin has been secretary for some time past. H. E. Anderson, of Moose Jaw, was elected vice-president, and the following will constitute the executive for 1920: Manitoba representatives, W. H. Hurd and W. J. Wilcox; Saskatchewan, C. W. Bolton and the chairman; Alberta, J. H. Redding and J. H. Johnson. Figures were submitted showing that the companies had had a varied experience this year, the loss ratio ranging from 45 to 120 per cent. of the premium income. Thirty-two of the thirty-five companies doing business in the three provinces were represented.

LIFE COMPANIES' WAR LOAN RECORD

On page 182 will be found *The Monetary Times*' record of war loan subscriptions of life insurance companies doing business in Canada. This shows the amount subscribed and allotted for each loan, including conversions, and the figures therefore, do not show exactly the amount of new money subscribed for each loan. Many of the companies in addition to turning in some of their bonds on new loans, also resold some upon the market.

The totals subscribed by and allotted to the life companies were as follows:—

	Subscription.	Allotment.
First war loan	$ 14,322,500	$ 13,967,500
Second war loan	17,542,700	9,843,400
Third war loan	31,020,000	21,247,800
First Victory loan	51,967,400	45,068,100
Second Victory loan	49,390,550	39,190,550
Third Victory loan	70,871,000	53,221,000
Totals	$235,114,150	$182,538,350

MEASURES FOR MORE PROVINCIAL REVENUE

The report of the Assessment and Taxation Commission of Manitoba is now in the hands of the provincial treasurer. It recommends, it is understood, a provincial income tax, an increase in succession duties, and the levying of school taxes by municipalities instead of school districts, as is the present method. A tax on the net income of business houses in the province will also be recommended. At the present time taxes are levied by municipalities generally on a percentage of the actual value of the property. It will be recommended, in the report, that all taxes be levied on the true valuation of the land and that the necessary valuators be appointed by the government.

The plan to establish a civic income tax scheme for Winnipeg is to be taken up at a special session of the city's legislative committee. Practically the same basis as was proposed last year, which affects all persons earning $1,000 or more per year, is to be adopted and submitted to the legislature for approval.

Winnipeg's fiscal year is to be changed to begin with January 1st, 1920, which will mean taxes being paid next August instead of in October and November, as hitherto. Civic estimates will have to be handled in January and February.

RAILWAY BOARD HAD BUSY YEAR

Application of Bell Telephone Company, and of Express Companies, For Higher Rates Were Among Work of the Year

ALTHOUGH very few extensions were made in 1919 by Canadian railways, or by other public services over which the Board of Railway Commissioners exercises supervision, nevertheless a large number of important questions came up for settlement. Two of these, the applications of the Bell Telephone Co. and of the express companies for higher rates, resulted from rapidly rising costs of operation. temporary increases were granted to the Bell Telephone Co., but no decision based on the extensive evidence received in connection with the express companies case has as yet been announced. The large number of new factories being built, and existing plants extended, also brought numerous applications for sidings, etc., which occasioned much detail work for the board.

Important Decisions

The following is a list of the more important judgments issued by the board in 1919:—

(1) Judgment of Chief Commissioner Sir H. L. Drayton, March 15th, 1919, in re Railway Freight Rates; this was in connection with freight rates on sugar consignments.

(2) Judgment of Commissioner McLean, April 24th, 1919, in re Bell Telephone application for increase in Rates, also Commissioner Boyce's judgment in the same matter.

(3) Judgment of Commissioner McLean, June 26th, 1919, in re Rates on Newsprint paper; this was in connection with the complaint of the Ontario Paper Co. against the rate of 22 cents per 100 pounds, charged by the Grand Trunk on newsprint from Thorold, Ont., to Chicago.

(4) Judgment of Chief Commissioner Sir H. L. Drayton, July 17th, 1919, in re Express Case.

(5) Judgment of Chief Commissioner Drayton, August 1st, 1919, in re Switching Charges on Grain.

(6) Judgment of Assistant Chief Commissioner McLean, September 9th, 1919, in re Increased Passenger Fares.

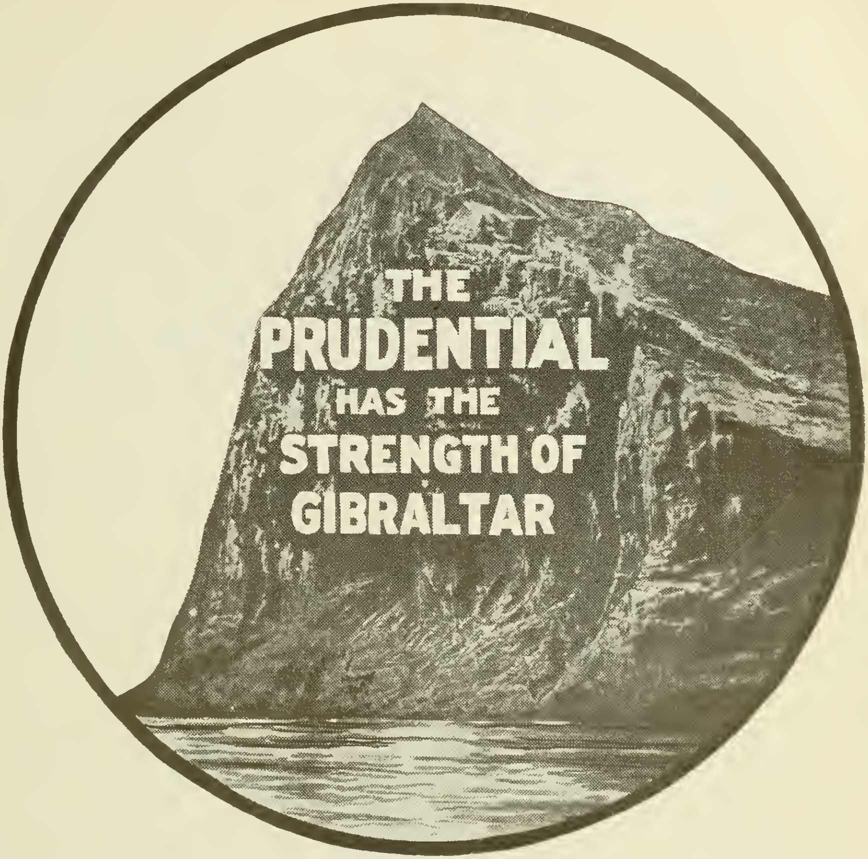
(7) Judgment of Commissioner Goodeve, September 9th, 1919, in re Track Scale and Dunnage Allowance.

INDUSTRIAL INSURANCE IN 1919

"So far as can be judged at the present time, the year 1919 has been one of the most prosperous in the history of industrial life insurance in Canada," said W. B. Robinson, agency supervisor of the industrial branch of the Mutual Life and Citizens' Insurance Co., in an interview with *The Monetary Times*. "For a time, the general strike in Winnipeg, and the sympathetic strikes which spread throughout the west, and to a more limited extent to the east of Canada, had an adverse effect, and for a period considerably curtailed production. However, the recovery was rapid and so complete that the effect of the strikes proved only a minor incident in the operations of the year as a whole. When the final figures for the year are completed it will be found that the increase in premium income is probably the largest of any year in the history of industrial life insurance in the Dominion. The substantial progress being registered during the final quarter of this year would appear to indicate a most prosperous year for 1920. There has been no material change in the form policies issued by any of the leading companies."

GREENSHIELDS TO OPEN TORONTO OFFICE

The Montreal stock brokerage firm of Greenshields and Co. is about to open a branch in Toronto, where premises situated in the central part of King Street have been secured. The formal opening of the new office, it is expected, will take place in the near future. The branch will be under the managership of Lieut.-Col. J. Fred. McParland, D.S.O., who served with the Canadian Field Artillery in France.



The Prudential is Popular in Canada

because it sells good life insurance; it pays claims promptly; it furnishes employment to hundreds of Canadians; it invests heavily in Canadian securities; it furnished money to hundreds of Canadian homes in the "Flu" epidemic; it paid claims on hundreds of Canada's war heroes; its policies are backed by hundreds of millions of dollars assets.

LOOK UP THIS PRUDENTIAL POLICY:

It gives life insurance protection, with Monthly Income for life, in case of total disability, and many other benefits, all at low cost.

Head Office, Waterloo, Ontario.

Fifty Years of National Service

Our Golden Jubilee

FOR a life insurance company there is no such thing as "old age." The older the company the more strength and energy it acquires, that is, if the company has experienced a normal and healthy development such as characterized the first half century in the life of "Canada's only Mutual."

This company was incorporated in 1868, organized in 1869, and began writing business in 1870. The steady and consistent progress of the company from that time to the present has been phenomenal. The progress has been as uninterrupted as the growth of a tree. The figures from the successive reports suggest the rings that form year by year in the trunk of a sturdy Canadian Oak.

The growth of the Mutual is evidenced in the different office buildings occupied during the half century. The preliminary meetings were held in a conveyancer's office in the upper story of the structure shown in the lower illustration. After a few months a larger suite was secured and there the early years of struggle were passed. A permanent home was erected in 1878, and in the year 1912 the present office was occupied—but although more than adequate then an enlargement has already become necessary.

The Birthplace of The Mutual of Canada.

The distinctive principles of the Mutual are such as strongly to recommend it in these days when mankind is turning to co-operative effort. The Motto of the Mutual is "Each for all and all for Each." This more and more expresses the spirit of the age and insures the continued popularity of the company.

The Mutual Life

Assurance Company of Canada

Waterloo, Ontario

PULP AND PAPER TRADE GROWING

Price of Newsprint and Amount to Be Retained in Canada Is Still a Problem—Orders of the Paper Controller

NEWSPRINT has continued in good demand during 1919, supplies have been low and the Canadian mills have made good progress. Other products of pulp and paper have enjoyed a fair market. The price of newsprint in Canada is still regulated by the paper controller, R. A. Pringle, K.C., but no satisfactory price has been fixed. Some of the smaller papers, especially in the west, complain of the difficulty of securing a supply. Manufacturers, on the other hand, urge that the price fixed in Canada should correspond to that in the United States. The contract price for both American and Canadian-made paper in the United States for 1920 supply ranges from $80 to $90 a ton. The Canadian manufacturers, however, are still compelled to supply Canadian publishers with paper at $69 a ton, and claim that they are thereby deprived of the opportunity of obtaining from $11 to $21 a ton more for it in the open market. Since Canada is consuming about 85,000 tons of newsprint a year, this is said to work out at a loss to the manufactuers at the rate of from $935,000 to $1,785,000 a year, depending upon whether the maximum or minimum price is taken as the basis of calculation.

Annual Production Increased

Canadian paper mills are turning out approximately 800,000 tons of newsprint a year, of which, as has been stated, not more than 85,000 tons are consumed in Canada. The great proportion of the remainder is exported to the United States. Exports of paper for the first nine months of 1919, not all newsprint, reached a total value of $42,884,409, an increase of $10,862,144 as compared with the corresponding period of 1918. They average more than $1,000,000 a week. The manufacturers claim they have always made concessions to their Canadian customers, whether under government compulsion or not. They say, however, that every attempt to restrict the price in the home market has had a corresponding ill-effect in the export market. They instance the fact that in the States an agitation is on foot to retaliate against Canada's discrimination in the price of paper by creating a similar discrimination in the price of Amercan anthracite coal supplied to this country, Congress having already been petitioned to take action to that end. They also say that in New Zealand the newspaper publishers have asked their government to rescind certain tariff preferences accorded imports from Canada on account of the fact that Canada sells paper cheaper at home than it does in New Zealand, arguing that the cheap price given to Canadian publishers is made up in part by an excessive price charged against New Zealand customers. Other countries are taking a similar attitude.

The manufacturers also say they cannot understand why an industry which is creating foreign business for Canada at the rate of $5,000,000 a month, chiefly in the United States, and performing a valuable service in helping to offset the present adverse trade balance against Canada in that country, should not be permitted to export to its fullest ability. They say that the troubles between themselves and the publishers and the government in Canada will never be definitely settled until the situation is looked at and treated from an international standpoint and not from one of domestic convenience only.

Latest Government Order

Early in December the government empowered the Minister of Customs to stop the exportation of newsprint paper from any manufacturer in Canada who fails to comply with any order issued by the paper controller. This is the second time that an embargo on the export of newsprint has been invoked in order to enforce the rulings of the controller. The new order arises out of attempts by the paper controller to compel the manufacturers to continue supplying Canadian newspaper publishers with paper at a price considerably below that obtainable for the same paper sold for export, and the notification, served upon the controller by certain of the manufacturers that they would cease on the first of January to supply paper in Canada on any such conditions.

Certain western newspaper publishers, who had difficulty in obtaining their supplies of paper at the government fixed price, also invoked the powers of the Board of Commerce in Winnipeg with a view to getting that body to determine what is a fair maximum profit for a ton of newsprint. The board had already laid the foundation for such interference by formally declaring newsprint to be a necessary of life within the meaning of the Act constituting the board, which it is empowered to do with any community. Should the board proceed upon the request of the western publishers, it may undertake to determine the selling price of newsprint in Canada, despite the fact that a controller already exists for that purpose, and that the controller's findings are already subject to appeal to the paper control tribunal, a court specially set up and authorized to deal with the subject. This control has been in existence for nearly three years, and was originally instituted as a war measure under the authority of the War Measures Act.

On December 18th the paper controller, R. A. Pringle, K.C., announced that the price would be raised to $80 per ton at the new year in place of $69 per ton as formerly.

REVIEW OF THE UNLISTED SECURITIES MARKET

Some Large Advances Recorded in Shares, Including Bank Stocks, Not Traded in on Stock Exchanges

IN their summary of the unlisted securities market during the year 1919 A. J. Pattison, Jr., and Co., say: A great deal has been said about the advances that have been made by many of the stocks on the stock exchange, but the unlisted market is not without its interest or its spectacular advances, most of which have been made in a quiet way, and unless attention was particularly drawn to the individual cases they would probably pass without notice.

On Decemcer the 31st, 1918, Abitibi Power was traded in the unlisted market at $49 to $50 per share. It has recently sold on the stock exchange at $280, showing an increase of $230 per share, or an advance of almost five times its price of a year ago. Atlantic sugar common was traded in at $17.50. It has recently sold at $77 on the stock exchange, or almost five times its price of a year ago. British America Assurance has doubled in value, going from $8 to $16. Collingwood Shipbuilding common, which was offered at $27 per share, is now $48 bid without any offerings. Imperial Oil was quoted at $320 per share and on a basis of four of the new shares for one of the old, its present price is equal to $600, or an advance of 100 per cent. McDonald common has more than doubled in value, going from $20 to its present market price. Pressed Metals common was offered at $26 per share, and is to-day quoted at better than $335, selling for almost fifteen times as much as it was selling for a year ago. Western Assurance has more than doubled in price, selling at $16, whereas a year ago it sold at $7.

The unlisted bank stocks have improved in price, and there has been a good demand and the appreciation in price has been slow but steady.

Owing to the break in sterling exchange, Dominion Iron and Steel Consolidated 5's which were selling a year ago around 82½ are to-day quoted at 77. Cockshutt Plow preferred which a year ago was quoted at $80 per share is today selling at $70. Here are two securities where there has been considerable improvement in the financial and physical conditions of both concerns, where the securities are without a doubt worth more money, and on account of the exchange market can be bought for considerably less than they were selling for a year ago.

The year 1920 promises to be very active and interesting. We are of the opinion that the time has come when the investor should more than ever satisfy himself about the security behind his investment, and also that his income from his investments will be steady through any period of contraction of business. Six or seven per cent. interest with safety is better than a higher rate with risk.

HEAD OFFICE - - TORONTO

Sound as the Dominion

Incorporated by Special Act of the Parliament of the Dominion of Canada

Licensed by the Dominion Insurance Department

Sound as the Dominion

The solvency of a company licensed by the Dominion Insurance Department is thoroughly investigated each year by trained auditors from the department. No policy-holder of a Dominion chartered company has ever found his policy insecure.

Each Dominion chartered company is compelled to maintain reserves considered adequate to guarantee its ability to meet its obligations.

One of the many stringent conditions required of companies seeking a Dominion license is a deposit of $50,000.

Along with all other companies operating in Canada under a Dominion charter and license, the Commercial Life Assurance Company of Canada complies with these conditions.

Group Life Business Makes Good Progress

Two Months of Business Finds Many Contracts Put Into Effect— Firms Pay Premiums in Most Cases—Some Examples of Contracts— Steps Leading up to Authorization of Group Insurance in Canada.

ABOUT November 1st, insurance companies began writing group insurance in Canada, following upon an announcement from the Department of Insurance to the effect that the writing of this class of business had been made legal. Up to December 31st, the following life insurance companies had expressed their willingness to transact group life insurance in Canada, and had filed their rates with the department:—

Sun Life Assurance Co., Montreal, Que.; Aetna Life Insurance Co., Hartford, Conn.; Equitable Life Assurance Society of the United States, New York; Metropolitan Life Insurance Co. of New York; New York; Travellers Insurance Co. of Hartford, Hartford, Conn.

Arrangements were also being made by the Canada Life and other companies for handling business of this kind.

The subject of group life insurance was opened with the Dominion government in a letter from the Insurance Department of the Canadian Manufacturers' Association, dated September 19th, 1917, as a result of requests from several members that facilities for transacting group life insurance should be provided. After considerable investigation and correspondence, the results were reported to the executive council on April 24th, 1919, on which date the council passed the following resolution:—

"That the Insurance Committee proceed to take the necessary steps to have the Insurance Act amended so as to provide more satisfactorily for the transaction of Group Life Insurance in Canada."

What Group Life Insurance Is

In a circular dated December 29th, the Canadian Manufacturers' Association explains group life insurance as follows:—

"Briefly, group life insurance is the insuring of all the employees of a company by the company. No medical examination is necessary. The insurance companies, however, usually insist that at least 75 per cent. of the employees be covered. Individual policies are issued. The company pays the premiums for all its employees.

"The Insurance Committee believe that the only form of insurance which is practicable on the group plan is the one-year renewable term insurance. All other forms are found to be too expensive to be borne by the employers alone. There is no equity under an annual term policy unless its renewal is maintained, which accounts for the low premiums charged.

"The advantages of group life insurance have been proved to be very great in the United States. It has the effect of doing away with a great many labor troubles, discouraging strikes and generally improving the relations between employers and employees.

"There is no fixed type of contract. An employer may insure his employees for the amount of their annual wages or for an arbitrary amount. A favorite plan in the United States is to start the insurance at $500 per employee with annual increments to reward continuous service. It is usual not to insure any employee until he has been a certain time with the company, say six months. This plan has been found to do away to some extent with the problems of casual labor. The rates charged are extremely low, but, of course, increase each year with the age of the individual employee. For example, the rate per $1,000 on a man of twenty-five years of age is $6.27 per annum.

"The Insurance Committee, of course, does not recommend any particular type of group life insurance, nor does it endorse the qualifications of any particular insurance company for transacting this type of insurance. The Association merely informs its members that facilities for transacting group life insurance have been provided by the Dominion government for those who wish to take advantage of them."

Efforts Are Successful

Efforts of the insurance companies to write group insurance contracts in Canada are meeting with considerable success. During the two months since it was authorized several firms have adopted the plan, the firm paying the entire premium in almost every case. It is noticeable that a considerable portion of the firms taking this step are located in the smaller manufacturing cities and towns, where the relations with the employees are naturally more intimate, and where the firm has had to assume more or less responsibility for the maintenance of its employees. A case of this kind is that of the Tillsonburg Shoe Co., of Tillsonburg, Ont., which has just written a contract with the Metropolitan Life, placing insurance on every one of its 105 employees. Starting with $500 each, an additional $100 is placed for each year in the company's service.

Four other group contracts announced by the Metropolitan are as follows: The Louis K. Liggett Co., comprising 240 employees, in amounts varying from $500 to $3,000, according to length of service; contract effective from December 24th. The Ottawa Paint Works, Ltd., 90 employees, for amounts equivalent to one year's salary and covering each employee with six months' completed service. The Almonte Knitting Co., 130 employees, for amounts varying from $500 to $2,000, commencing after six months' completed service. The Rosamond Woollen Co. of Almonte, Ont., in similar amounts to the Almonte Knitting Co., comprising 230 lives.

A group contract concluded by the Aetna Life was on the Murray-Kay Co., a large retail departmental store in Toronto. Approximately 500 employees are covered in the policy. Those of from three months up to one year of service are insured for $500, and the plan is on the progressive system, the amount being $100 higher for each year of service to a maximum of $1,000. The scheme is also retrogressive, that is, employees are credited at the outset with the period they have been in the firm's employment.

T. Eaton Co. Insurance and Pensions

On January 1st, the T. Eaton Co., Ltd., Toronto, with over 10,000 employees, announced a plan for insuring and pensioning employees. The announcement, which does not indicate whether this is carried by the firm itself or placed with an insurance company, says:—

"At the close of our Golden Jubilee year we are pleased to announce that commencing January 1st, 1920, life insurance of $1,000 will be placed year by year on all members of the staff who have completed, or may later complete, six months' continuous service, and the premium for this insurance will be paid by the company.

"Also a plan will be presented whereby those who have completed, or may later complete, one year's continuous service may take out additional life insurance for certain amounts, subject to the rates, conditions and privileges applying generally to life insurance; and to the insurance so taken the company will supplement a further amount in accordance with a schedule based on length of service and wages, and pay the premium for such supplementary insurance.

"And, further, pensions will be provided for men and women on attaining certain ages, and on completing a certain number of years' continuous service, which will be in proportion to length of service and wages received.

"The insurance benefits paid by the company under the above plans will continue only during service with the company.

"Further details and conditions applying to the plans as outlined, with any modifications, will be available at a later date."

Some Other Contracts

The McLagan Furniture Co., Ltd., and the Stratford Chair Co., of Stratford, Ont., have insured their employees under a group policy, in amounts from $500 to $1,000, as follows: Less than one year of service, $500; one year, but less than two years' service, $600; two years, but less than three years' service, $700; three years, but less than four years' service, $800; four years, but less than five years' service $900; five years' service and over, $1,000—the maximum.

The employees of Messrs. Scythes and Co., manufacturers, 22 Church Street, Toronto, have each been presented with a life insurance policy for an amount which will increase with each succeeding year of service. This gift was arranged through the Sun Life Assurance Co. on the group insurance plan, is the first instance of a Canadian manufacturing concern associating itself with a Canadian life assurance company in extending the benefits of life insurance to all its employees on the group system.

The Taylor-Forbes Co., Ltd., of Guelph, Ont., has insured the lives of all its employees, under a group contract with the Aetna Life of Hartford, as follows:—

Employees in continuous service, three months to one year, $500; one year to two years, $600; two years to three years, $700; three years to four years, $800; four years to five years, $1,000; five years to six years, $1,200; six years to seven years, $1,300; seven years to eight years, $1,400; eight years to nine years, $1,500; nine years to ten years, $1,600; ten years' service, $2,000. For each year after eleven years $100 per year will be added, until the sum of $3,000 is reached. When an employee has served 19 years he receives a policy for $3,000. Employees who were in the service of the company on or before April 1st, 1902, will receive a $3,000 policy.

On December 24th, McDonald and Wilson, Ltd., Toronto, put a group policy into effect on the lives of their employees. The amount is graded according to length of service, gradually increasing from $500 for those who have been less than one year in the employ, to $3,000, to those who have been with the company for a period of 25 years or over. Should the employee die, the family or such other beneficiary as is named will receive the amount of the insurance. Employees under 60 years of age who may be wholly or partially disabled are also provided for, and any who may become ill have the services of a nurse free of charge.

All Classes of Business Covered

Hamilton B. Wills, mining broker, Toronto, took out a group policy last month in the Aetna Life, covering all his employees to an amount practically equal to the yearly salary received. "My idea in insuring the lives of my daily associates in this organization is to bring them closer together than ever," said Mr. Wills, "as well as to provide extra protection for those dependent upon them at the time of their greatest need, and is furnished to each of my employees at no expense to them. In thus providing extra protection to the families of my associates, I only hope it will promote among all a closer bond of fellowship and good will, resulting in greater co-operation, as well as efficiency." This group policy includes about 100 employees in the Hamilton B. Wills' offices in this city, as well as in New York, Rochester, Buffalo, Syracuse, Detroit, Cobalt and Timmins.

Five Orillia factories have put into operation group insurance for their employees; the Tudhope Carriage Co., Canada Wood Specialty Co., and Orillia Furniture Co., each giving its employees a free policy of insurance on a graded scale varying from $500 to $2,000, according to length of service; J. R. Eaton and Sons, Ltd., who employ 150 men in their large sash and door factory, and C. J. Miller and Sons, who operate the Couchiching tannery, have adopted the plan. The Eatons have arranged an unusually generous scale of insurance, running from $500 for three months' service up to $3,000 for employees who have been with them thirty years or more. The Miller schedule runs up to $2,000 for thirty years.

GREAT EXPANSION IN AUTOMOBILE INSURANCE

Consequent Upon Increase in Number of Motor Cars—Coverings Should be Combined

By Hedley C. Wright

The indications are that given freedom from strikes and the adequate delivery of the raw material required, the year 1920 will surpass all previous records in the history of Canada's automobile industry. The market abroad is attractive and the demand for cars at home is unparalleled. These facts particularly interest insurance companies operating in Canada, for the automobile manufacturing industry like every other important industry is inseparably linked with the business of insurance. Ten years ago the industry was comparatively unknown in the Dominion, there being barely 5,000 cars in operation. To-day Canada actually owns over 300,000 automobiles, one car for every 25 persons, comparing relatively favorably with the United States which owns one car for each 18 persons. It is but a few years back that the automobile insurance premium income of the companies was insignificant. In 1910 the automobile premiums in Canada amounted to less than $100,000. For 1919 the premiums exceeded $2,250,000. Automobile insurance, therefore, is becoming one of the great staple insurance lines of the country. The business will expand in proportion to the thoroughness with which the policy benefits are explained to and understood by the automobile owners, many of whom even to-day are not appreciative of the fact that an automobile policy enables them to cover an unknown hazard by a fixed charge in the form of a very moderate premium payment.

One of the big mistakes that the companies have made is the splitting up of the hazards and offering for sale several automobile coverings instead of one. The separate coverings which when combined afford the protection which an automobile owner needs are as follows:—

Separate Coverings

Liability insurance is the most important of all. It assumes the liability of the assured by indemnifying the assured against loss by reason of the liability imposed upon him by law for damages on account of bodily injuries accidentally sustained by any person or persons. The policy undertakes to defend for the assured any suits which may be brought against him on account of such injuries, including suits which are false or fraudulent. The usual limits of a liability policy are $5,000 for injuries to one person, and $10,000 for injuries to more than one person as the result of one accident. Higher limits are sold for an additional premium.

Property damage covering assumes the liability of the assured for damage done by his car to the property of other people. The usual limit for this covering is $1,000.

Collision insurance reimburses the assured for the expense of repairs for damage done to the assured's car as the result of colliding with another object, whether moving or stationary.

Fire insurance covers the monetary loss for damage done to the injured car by fire from any cause wherever the car is located.

Theft insurance, as its name implies, covers the assured for loss of or damage to his car by reason of theft.

Transportation insurance is sold as a part of and in conjunction with the fire covering, and pays the assured for the loss or damage to his car, while being transported by rail or water, due to the wrecking or sinking of the railroad car or vessel.

The premiums are moderate and are varied by such factors as the limits of the insurance company's liability, the make, horse power and age of the car, and also the locality in which the car is operated.

There is no sound reason why a car owner should buy one of the automobile coverings and not another. He needs them all. The daily press bears constant testimony to the number and variety of automobile accidents and thefts. It is poor business to sell and poor business to buy anything but a policy giving all the coverings outlined above.

Progress in Organized Fire Prevention

Two Notable Conventions Held in Canada—Dominion Government Takes Up Work, and Provinces Extend Activities—Lower Fire Losses Indicate Some Success—Measures Re-enforced by Criminal Legislation.

CANADA was honored in 1919 by two conventions of international organizations engaged in fire preventive work. The first was the annual meeting of the National Fire Protection Association, held in Ottawa, May 7th to 9th, and the second was that of the Fire Marshals' Association of North America, held in Toronto, August 26th to 29th. Canada secured favorable publicity from these gatherings, as the delegates were favorably impressed in both cases, the necessity for fire prevention was emphasized to the public, and Canadian officers and others interested in the work had excellent opportunities to secure information. Building conditions are so similar in Canada and the United States that the two countries are practically one field from this viewpoint.

The National Fire Protection Association is made up of firms and individuals interested in mechanical appliances for fire fighting and fire prevention, and in building, in so far as it affects fire losses. Fire underwriters' associations, including the Canadian Fire Underwriters' Association, state and provincial fire marshals, etc., also belong. Fire insurance rates vary in accordance with the construction of a building, and allowance is also made for sprinkler equipment, etc., so that the achievements of this organization are of real interest to fire insurance men.

The Fire Marshals' Association includes fire marshals of most of the States which maintain such offices, and of Ontario, which is the only Canadian province which thus far has established a fire marshal's office. Where another officer, such as an insurance commissioner, does this work, these are also eligible for membership, and a good proportion of the States, and Manitoba, Alberta and Saskatchewan, are represented in this way.

Dominion Fire Prevention Association

One of the outstanding events in this field has been the decision on the part of the Dominion government to take up fire prevention work by co-ordinating the efforts of the provinces and supporting them by suitable legislation. Following meetings held towards the end of last year, at which officials of the Department of Insurance of Canada consulted with representatives of the Canadian Manufacturers' Association, Canadian Credit Men's Association, etc., a Dominion Fire Prevention Committee was formed, with W. H. Shapley, chairman of the Fire Insurance Committee of the Canadian Manufacturers' Association, as chairman, and G. D. Finlayson, Superintendent of Insurance for Canada, as secretary. The name was later changed to the Dominion Fire Prevention Association. Numerous organizations are represented in its membership and on the executive.

Following these plans, a Dominion fire insurance commissioner was appointed in the person of J. Grove Smith, formerly with the Commission of Conservation. His efforts have included tours of various parts of the Dominion, during which he has addressed boards of trade and similar organizations in most of the cities of Canada; the distribution of literature, including self-inspection blanks for factories and other industrial establishments; and co-ordination of provincial work, such as the preparation of a model Fire Marshals' Act.

Carelessness Now a Crime

Criminal legislation is solely in the hands of the Dominion government by the provisions of the British North America Act, and civil penalties only can be imposed by provinces and municipalities for violations of the regulations which they may pass. An amendment to the Dominion Criminal Code was accordingly enacted at the 1919 session of parliament, and was assented to by the Governor-General on June 6th. This amendment provides as follows:—

"Every one is guilty of an indictable offence and liable to two years' imprisonment who by negligence causes any fire which occasions loss of life or loss of property.

"The person owning, occupying or controlling the premises in which such a fire occurs, or on which such fire originates, shall be deemed to have caused the fire through negligence if such person has failed to obey the requirements of any law intended to prevent fires or which requires apparatus for the extinguishment of fires or to facilitate the escape of persons in the event of fire, if the jury finds that such fire, or the loss of life, or the whole or any substantial portion of the loss of property, would not have occurred if such law had been complied with.

"When any Dominion, provincial or municipal fire officer or authority recommends to the owner, lessee or other person controlling or operating any building, structure, factory, shipyard, vessel, dock, wharf, pier, sawmill, or yard in which logs or lumber are stored or held, that any reasonable change, alteration or addition should be made in or to such building, structure, factory, shipyard, vessel, dock, wharf, pier, sawmill, or yard with a view to safeguarding life or property from destruction by fire, or that any material should be removed therefrom with such view, or that any apparatus should be supplied therefor with such view; and if such recommendation is approved by an officer in the service of His Majesty, thereto, authorized by the Governor-in-Council; and if notice of such recommendation and approval has been personally served upon such owner, lessee or other person; and if, after the expiration of thirty days from the receipt of such notice, such owner, lessee or other person refuses, neglects or otherwise fails to carry out such recommendation to the satisfaction of the officer in the service of His Majesty hereinbefore mentioned, such owner, lessee or other person shall be guilty of an indictable offence and shall be liable to a fine not exceeding one thousand dollars, or to imprisonment for any term not exceeding six months, or to both such fine and imprisonment."

To Prevent Conflagrations

Some of the Dominion Fire Commissioner's views, outlined in "Conservation," are as follows:—

"The measures popularly advocated to control the spread of fire are four in number, namely fire prevention, fire limits, fireproof construction and fire departments. None of these alone can prevent a conflagration, and records show that together they have failed in almost every instance.

"Fire prevention is the attempt to reduce the frequency of fires. The preponderance of disasters from unknown and trivial causes appears to forbid hope of controlling conflagrations by strictly fire prevention methods. It has been previously pointed out that, on the average, only one in 20,000 fires has reached the magnitude of a conflagration. That one fire is the problem demanding solution. If fire prevention successfully reduced the occurrence of fires in Canada to 100 per annum, there is no assurance that the spreading fire would not be one of the hundred. That depends largely upon the location of the outbreak and the character of its environs. When a small frame dwelling in Hull, Que., caught fire, that was the identical place where Hull and Ottawa began to burn. A similar occurrence in an isolated farm dwelling in a country district would have been equally serious so far as the individual building was concerned, but it could not have resulted in the partial destruction of two cities. To debar conflagrations, therefore, fire prevention must not only

SUCCESS FOLLOWS SERVICE

"Greater Service To Policyholders" is our motto for the new year. It begins before writing the Application and does not end with the payment of claim after death of the Assured. It aims to sell the form of policy best suited to the Prospect's needs, and extends to Beneficiaries—to administering Policy proceeds, or giving invaluable expert advice regarding their protection and safe investment.

During 1919 The Continental Life's business increased rapidly, gaining about three times the amount gained in 1918. The Company issue all desirable, modern forms of policies for personal, family or business protection at pre-war rates; and have attractive openings for salesmen of good records and character. diminish the frequency of fires, but also establish the confines of the occasional outbreaks that occur."

December 9th was fairly well observed as fire prevention day throughout Canada in accordance with practice in the United States, a proclamation being issued by the Governor-General-in-Council. Literature was also distributed by the Dominion Fire Commissioner and by the provincial officers, who also used the schools to encourage the observance of the day for a general clean-up.

Further details of the work carried on in Ontario are given in the article by E. P. Heaton, provincial fire marshal, elsewhere in this section.

Work in Saskatchewan

During 1919 the work of fire prevention in the province of Saskatchewan was energetically carried on by A. E. Fisher, fire commissioner, and the members of his staff. Individual inspections of property in the mercantile area of the towns and villages were made, the work in the cities having been carried on by the paid fire chiefs. Fifty-nine towns were inspected, the average number of buildings inspected in each town being 20. 185 villages were visited by the departmental inspectors, the average inspections in each totalling 10. Of the many hamlets in Saskatchewan 132 received the attention of the fire commissioner's staff, the average inspections being three in each hamlet.

An extract from a report made by one of the inspectors to the fire commissioner may prove of interest:

"On arriving at the place to be inspected we first made an inspection of buildings in the mercantile area issuing the necessary orders. We also gave general instructions to the occupants of the various buildings and good reasonable suggestions to practise for fire prevention in their buildings. We gave them advice relative to the storage of gasoline, conditions of stove pipes and chimneys, removal of rubbish and disposition of oily rags and the lighting system. After having completed the inspection we interviewed the mayor, over seer or secretary-treasurer and if there was a fire chief we interviewed him also. We explained to these municipal authorities matters pertaining to the risks in the places, and made inquiries as to their local by-laws. We always made it a point in places where they had fire equipment to make an inspection of it with the fire chief, mayor or overseer, when we endeavored to find out if they understood their equipment, such as running it or recharging it. We gave them information with regard to practical fire fighting and relative to the handling of their equipment, arranging to see that it was kept in good order and regularly tested. We have come across fire chiefs who did not understand their equipment and could not recharge their chemical engine. It should be noted that towns and villages with no water system rely on chemical engines for fire-fighting equipment. We have encouraged the installation of chemical extinguishers in places of business and in small villages and hamlets.

"It is encouraging in our work to note the interest our citizens are taking in fire prevention work. Generally speaking people are pleased to have their places of business inspected, and to be advised regarding dangerous conditions which may exist on their premises."

Manitoba Fire Losses Reduced

Considerable effort has also been put forth in Manitoba by legislation, regulations and propaganda, to reduce loss by fire. Alex. Inch, deputy fire commissioner, describes the work in 1919 as follows:—

"The measures taken by this department during the past year to control the fire waste are varied and many, and in some respects it might be said that radical methods were adopted. The success of our efforts is shown by the fire prevention progress we have been able to make this year.

"At the session of 1919, the Fire Prevention Act was amended in some particulars; the most important and far reaching being—the giving of authority to the Fire Commissioner, to order the suspension or cancellation of all existing fire insurance when he considers the fire hazard unsatisfactory, or when necessary improvements have not been made as ordered.

"The inauguration of a campaign of inspection, departmental and co-operative, has reduced the number of fires; a systematic check of the fire-fighting units in the province has reduced the fire loss; careful investigation of fires has had very beneficial results, and full advantage has been taken by the department in getting the subject of fire prevention before the public.

"Fire prevention day of October 9th served to centralize the minds of the people on fire prevention, and the cooperative spirit of the citizen was made manifest by the activities displayed along this line, and by the valuable services rendered in the inspection of properties by fire departments, fire insurance agents and fire insurance companies, boy scouts, and members of the citizen body in conjunction with this department.

"It is gratifying to report that considerable headway has been made in this work principally because people are beginning to understand that the prevention of fires is everybody's business, that they benefit by this co-operation and not the insurance companies.

"As a result of this campaign of fire prevention commencing on January 1st, this year, the fire loss of the province has decreased approximately a million-and-a-half, and the total property loss for 1919 will not exceed the indemnity fund amounting to $1,900,000 paid by the companies in 1918. With the further development of fire prevention work in the province, it is hoped that a greater reduction in the fire losses will be accomplished."

GROWTH OF FIDELITY AND SURETY BUSINESS

Increase in Business Shows Appreciation of Bonds—United States and British Companies Still Get Most Business

By Henry E. Rawlings

THE past three years, and particularly the last, would seem to have reflected a slowly growing appreciation by financial, commercial and industrial firms, as also certain provinces and municipalities, of the merits of a fidelity bond upon their officers and employees occupying positions of trust, and likewise there has grown, from the same sources, a wider demand for surety bonds, in lieu of other security, to guarantee the completion of various undertakings by reason of their convenience of handling and the financial benefit and advantage to the principal without curtailment of his resources. However, the Dominion government, with the exception of the Department of Marine and Fisheries, prefer in such latter regard to continue the requirement that all tenders for contracts be accompanied by accepted cheques on chartered banks.

The Abstract of Statements of Insurance Companies in Canada for the past three years shows an increase in the number of companies transacting the above class of business, which now number twenty, and an increase in the premium revenue of from approximately $800,000 to $948,000, which for the year ending December 31st, 1918, was divided as follows:—

Three Canadian companies whose control is invested in Canada, approximately	$181,000
Four Canadian companies whose control is invested out of Canada, approximately	82,000
Eight British companies, approximately	302,000
Five United States companies, approximately	382,000
	$947,000

The Abstract does not indicate what percentage of such premiums is fidelity and what percentage is surety, and it is possible that it is towards such end that the Superintendent of Insurance has addressed a letter to the various companies, requesting their views as to separating the two classes of hazard in their annual statements to him, as, in the United States, is a matter of departmental requirement.

Provincial Workmen's Compensation Boards

Accident Prevention and First Aid Emphasized in 1919 — Employees of Dominion Government Now Included — Payments to Foreigners Reduced for Benefit of Canadians — Association of Workmen's Compensation Boards.

By F. W. HINSDALE.

An interesting criticism of the administration of workmen's compensation laws in Canada was recently made to me by a gentleman prominent in business and financial circles: "I have one serious fault to find," said he, "with the manner in which these laws are administered, and I confess that I fear its effect. No word of complaint ever reaches me," he continued, "and the whole business is conducted with such extraordinary efficiency and economy and apparently gives such complete satisfaction to all parties concerned, that I fear that it will be cited as a proof that the government can administer any large business fully as efficiently and as cheaply as any private interest, and that the principle of governmental administration may be extended into other fields."

My friend would have felt that he had far greater grounds for his fears had he known that instead of conducting the business only "as cheaply" as private interests, so far as the workmen's compensation boards are concerned, they have so administered their laws that already in Canada the savings to employers and the extra benefits received by workmen can each be measured in millions of dollars.

Formation of Boards

The secret of the marked success of all of the workmen's compensation laws in Canada, which provide for their exclusive administration by boards appointed by the government, and without the intervention of any insuring agencies, is to be found not only in the exceedingly earnest and efficient work of the individual members of the boards themselves and their several staffs, but great credit is due to the very able and disinterested manner in which this form of legislation was investigated, by the governments of Ontario, Nova Scotia and British Columbia, before their acts were passed. Under the system prevailing in Canada, as contrasted with the method obtaining in the United States, the whole expense of the investigations was paid by the provincial governments and the ablest legal talent was available at the expense of the government to draft the laws, and they were brought in and passed as government measures.

The boards themselves were appointed by the governments for long terms of service, but they were left completely unhampered by any government control as to the appointment of the members of their staffs, and without any entanglement with the civil service, thus freeing them, to the greatest possible extent, from the paralyzing influence of political control. So far as the boards with whose work I am most familiar are concerned, there is no surer way for an applicant to fail to secure an appointment than to base his application on the fact that he has a letter from a member of parliament, or is a friend of a minister of the Crown. The boards well know that it is much easier to refuse to employ such an applicant at the start than it is to discharge an incompetent clerk who has powerful political friends. They also know that any applicant who thinks he has to rely on political influence instead of upon his own personality and record in order to secure a position, is probably incompetent. Business efficiency is not usually the reason why men are able to secure recommendations from politicians. Given a law as well considered and a board carefully selected and so free from political control, and my friend may well fear, if he likes, that any business, no matter how large, that may be entrusted to such a board, will be most efficiently adminstered and at an immense saving to the public at large.

During the present year, especially, the work of accident prevention has been earnestly and effectively prosecuted by the British Columbia Board. Most gratifying results were promptly shown in the statistical records in which the costs of accidents are tabulated according to cause. Certain types of accidents, as from gears and unguarded machinery generally, and accidents to the eyes from grinding-wheels, have shown a marked decrease, both in number and in the extent of resulting disability. In the work of shingle mills, for instance, owing to the rigidly enforced requirements as to the installation of practical and inexpensive safety guards, serious accidents are now rarely reported, though in the earlier years of administration a distressing number of serious mutilations and losses of hands were constantly occurring. This work is still claiming the unremitting attention of the board, and clearly expresssed, practical safety regulations, especially applicable to logging and a number of other special industries, have now been prepared and will shortly be given the force of legal requirements. In Ontario this exceedingly valuable work is conducted by safety associations maintained by a number of the separate classes of industry and operated under the supervision of the board. This work of accident prevention has already resulted in saving to the employers of hundreds of thousands of dollars a year in assessments, and no part of the work of the boards gives them so much satisfaction as the certainty that their work in this direction has saved, and will continue to save, an untold amount of suffering.

Prompt and intelligent administration of first aid has been earnestly sought, and in British Columbia legal requirements upon employers in this respect have been included in the regulations of the board. All employers of ten or more workmen are required to provide themselves with specified supplies of first-aid material, and where fifty or more are employed, it is required that someone possessing a St. John's Ambulance, or other, certificate of competency be included in the staff. More extensive requirements as to first-aid equipment and the maintenance of a safety-first committee are provided in all cases where large numbers of workmen are employed. Employers generally have given the board their hearty co-operation in all this work, which has already shown most gratifying results.

Extended to Dominion Employees

Under Dominion legislation passed last spring provision was made for the payment of compensation through the provincial compensation boards to men injured in the various departments of government work, as in the Post Office, Customs, Fishery Patrol, Dominion Railways, and in the work of the Soldiers' Re-establishment Department. The benefits paid on account of accidents in the different provinces were to conform to the provisions of the several Acts which differ in many important particulars. Varying arrangements have also been made with the different boards as to the method of disbursements in such cases.

The Acts differ materially in regard to the payment of awards in cases where men killed in the different provinces leave dependents in foreign countries. In Ontario such payments are made only in cases where the dependents live in countries whose laws would be equally favorable to Canadian widows if the situation had been reversed. In British Columbia, where many Orientals are employed, it was urged that it should cost employers just as much when an Oriental or other foreigner was killed as it would if a Canadian were killed, as otherwise there might be a tendency to give preference to the employment of foreigners. By means of an amendment to the Act past at the last legislative session

C. R. DRAYTON, Manager for Canada

in British Columbia, an ingenious method was devised of preventing this possible distinction as to employments; and the board is permitted to pay foreign dependents only in proportion to the relative cost of living in each country as compared with the cost of living in Canada. The present value of the reduction of the pensions found payable to foreign dependents on this basis is distributed as a bonus or extra dividend to dependents residing in Canada, with the result that widows residing in this country have so far been paid thirty-five dollars per month instead of twenty, and all dependent children have received seven and a-half dollars per month, instead of five dollars, limited to four in one family. Payments to mothers and other dependents have been increased in proportion. In Ontario, where similar conditions do not prevail, pensions to widows were raised by amendment, from twenty dollars to thirty and to children from five to seven and a-half dollars.

Some of the Acts also vary greatly in the maximum benefits payable to the workmen, and in the rates and methods of collecting assessments upon employers. For the purpose of studying and co-ordinating means for the prevention of accidents and most effectively promoting safe conditions of employment, and with a view to improving methods of administration and office procedure and securing, if possible, legislation tending to a greater degree of uniformity in the compensation laws, the Association of Canadian Workmen's Compensation Boards has just been organized. A conference of the chairmen of the Canadian boards met in Vancouver on December 1st, and a permanent organization was effected. Samuel Price, chairman of the Ontario Board, was selected president, E. S. H. Winn, chairman of the British Columbia Board, vice-president, and N. B. Wormwith, secretary, of the Ontario Board, secretary; the executive committee consisting of the president, vice-president and J. T. Stirling, chairman of the Alberta Board. The next convention of the Association of Canadian Workmen's Compensation Boards will be held in Toronto on the first Monday in October of next year.

Plate Glass Is An Unprofitable Line

1918 Figures Showed a Loss Ratio of Over Sixty per cent.—Price of Glass Continues Abnormal—Business Now on Yearly Basis—Large Volume This Year.

WHILE companies continue to solicit plate glass insurance business, recent figures of losses and premiums show this line to be unprofitable. Some solution must therefore be found, probably in the form of higher rates, but in the meantime the situation is causing considerable concern. In an interview with *The Monetary Times*, John Good, secretary of the Guardian Insurance Co. of Canada, said:—

"Very few, if any, of the companies have derived much profit from their plate glass department during the last few years, owing to the continuous rise in the price of glass. While rates have been increased generally, the present premiums are nothing like sufficient to take care of the higher prices charged by the glaziers. It is at least open to question if the glaziers can altogether justify their existing prices, and it would also be interesting to know if they can satisfactorily explain the reason why, after allowing for freight rates, there should be so much variation in the cost of glass in the different cities, namely, Montreal, Toronto, Winnipeg, Regina, Moose Jaw, Saskatoon, Calgary, Edmonton and Vancouver.

"The losses of the various companies during the past year have, on the whole, been heavy, and the public has not been slow to recognize the absolute necessity of securing glass insurance at a trivial cost compared to the great expense of having broken glass replaced.

Changes in Underwriting Practice

"The tariff companies have made several changes in their underwriting, although policy forms have not been altered to any great extent. Business is now only accepted on a yearly basis, the companies having ceased to issue three-year policies as was formerly the case in several provinces. Automobile garages which have proven very disastrous so far as glass insurance is concerned, are now subject to an extra charge of 50 per cent. of the tables. In cases of losses paid or replaced by the company, a reinstatement charge is now made for the continuation of the insurance of the new glass. This additional premium only applies to the broken light, the remaining glass covered not being affected.

"In the province of Quebec deplorable conditions exist owing to competition amongst certain companies, and the expressed statement of one company that their glass department is being used as a means to increase their connections for their other departments. The rates now being secured are totally inadequate, being in many instances considerably less than one-half of the premiums for 1918, notwithstanding that even in that year, the business proved unprofitable for many underwriters.

Cost of Glass Almost Trebled

"Below we show the cost of glass in the larger cities in Ontario and Quebec for the year 1913 as compared to the present time:—

1919.	Size.	1913.
$ 60.75	60 x 84	$22.40
99.50	84 x 96	37.80
127.90	96 x 108	48.60
218.00	108 x 120	76.50

"The glass supply houses freely admit that prices will continue to go much higher during the next twelve or eighteen months, while plate glass is becoming alarmingly scarce. With these conditions prevailing, glass insurance is a form of protection which property owners and tenants of stores and even dwellings, cannot afford to neglect."

Similar points were brought out by A. W. Eastmure, managing director of the Casualty Co. of Canada, in an interview with *The Monetary Times*. Mr. Eastmure said:—

"There is doubtless no class of property more legitimately a subject for insurance than plate glass, especially at this time of greatly enhanced values, more congested areas, increased traffic and a multiplicity of hazards. The great war has demonstrated what a serious handicap it is to any country to be dependent upon outside sources for a staple commodity. In Canada the impossibility of procuring plate glass at prices approximating to those ruling in normal times is an example. It is not manufactured in this country and, previous to the war, our market was in Belgium and northern France. In 1914 their people forsook peaceful pursuits to entertain the boche during a long period of destruction from which it will take some time to recuperate. Consequently we have been dependent for our supply upon the few plants in the United States, where the cost of production is very much greater, and the recent fuel situation there has caused our dealers no small concern.

Results for 1918

"On a premium income of $381,053 the twenty-one companies operating plate glass insurance in Canada in 1918 show a loss ratio of 65.2 per cent. The necessary data are not yet obtainable for 1919, but it is hoped the results will prove more favorable to the companies. It has been found necessary to increase the premium rates to meet the greatly advanced cost of replacements, but there is every reason to believe that the unusual conditions prevailing will not continue always and the companies are merely trying to make ends meet until normal conditions are restored."

New Developments in Burglary Insurance

Policies to be Divided in Accordance With English Practice — Good Field for Residential Burglary Insurance— Expansion in Mercantile Open Stock and in Messenger Hold-up Insurance

By A. E. KIRKPATRICK

WITH the rapid development of burglary business in Canada, especially during the last year, the companies doing this business have given more study than ever to the requirements of the insuring public, and especially in connection with the development of residence burglary it has been decided to adopt the method of burglary insurance for dwelling houses similar to that in force in England.

That is to say, the policy will be divided into two items, the first covering jewelry, furs and other extra valuable and easily removable articles and the second item covering household furniture and effects. In the United States, underwriters, in order to secure an adequate amount of insurance in proportion to the value of the property insured, have always leaned towards the insertion of co-insurance clauses in their policies. This the Canadian underwriters object to as being difficult to understand by the average assured and misleading in its effect and they propose to change their policies to follow more closely the English system which requires the insured to carry a certain proportion of the insurance value of the property, which proportion will probably not exceed 50 per cent. By this action the underwriters will be able to make rates which on the whole will be more advantageous to the insured and will do away with the old custom of issuing a very small policy, of say only $1,000, where the value of the contents of the residence might run to $10,000 or $20,000.

It is believed that the popularity of residence and mercantile burglary insurance will grow very rapidly in the immediate future and that, as is done in England, most householders will consider burglary insurance and place it in effect simultaneously with the placing of their fire insurance.

Money Covering Eliminated

The underwriters in England have long since eliminated money covering from residence policies, with a good effect on the loss ratio and the consequent cheapening of the cost of insurance to the consumer. Also jewelry and furs are not covered by their policies during the vacancy of a residence, and it is believed by the underwriters in England, and Canadian underwriters feel the same towards this matter, that people leaving their houses vacant for any length of time should not invite robberies and theft by leaving valuable jewelry and valuable furs in their residences, but that during the period of non-occupancy these should be deposited, in the case of jewelry, in a safety deposit box and in the case of valuable furs in a cold storage warehouse.

It is also the intention of the underwriters to make differentials in rates, based on experience according to different centres, so that certain centres which have a high loss ratio will bear their proper share of the cost of insurance, while locations having an extremely favorable record will receive the advantage in the matter of rates. Ultimately it is hoped that with the increase of the business under the new principles adopted a considerable decrease in the cost of burglary and theft insurance to the insuring public will accrue.

It is impossible in such a short article as this to more than touch on one branch of burglary insurance, but equally careful attention on the part of the underwriters is being given to mercantile or open-stock insurance throughout Canada, with the idea of placing this branch on a better footing and the same remarks apply to messenger hold-up insurance, for which the demand has increased a hundredfold since the commencement of 1919.

The extraordinarily good service given by some companies doing business in Canada, in rounding up a gang of international crooks who had commenced a series of bank robberies in Canada, has called the attention of the large financial houses in Canada to the desirability of patronizing exclusively companies thoroughly established in Canada, with large assets in Canada, and who have shown their capability for handling the investigation and protection features which are so valuable to the banking houses in Canada.

Speaking generally, never has the burglary situation been so satisfactory as at the present time, nor the prospects for the future more satisfactory.

EXPLOSION INSURANCE NOT APPRECIATED

"The outstanding feature regarding explosion insurance is that the public do not want it until a strike is imminent in any particular city, and then the insurance is only wanted in that city," said R. Hampson, of R. Hampson and Sons, Montreal, when asked by *The Monetary Times* as to new developments in this field in 1919. "The rate of insurance under these conditions is generally treble what it is in normal times. The cost of this form of insurance is very light, and with the generally unsettled state of affairs, it seems the part of prudence that all property owners should have such insurance in addition to their regular fire cover. We understand that in the United States it is becoming the custom for all large manufacturers, merchants and bankers to have such protection in the regular course of business."

DOMINION FIRE CHIEFS' ASSOCIATION

The 1919 convention, which was the eleventh annual convention of the Dominion Association of Fire Chiefs, was held in Calgary, Alberta, August 19th to 22nd. Considering the fact that the meeting place was so far west, the attendance was good. Fire Chief R. Pritchard, of Chatham, Ontario, who was president of the association for 1918-1919, occupied the chair. The president for 1919-20 is Emile Berthiaume, fire chief of Three Rivers, Quebec. The position of secretary has been for several years filled by James Armstrong, fire chief of Kingston, Ontario. The activities of the association and its membership are recorded in a yearbook issued annually.

The principal attention of the association at its annual convention and throughout the year is directed to fire fighting organization and equipment, and to building construction as affecting fires. One of the points discussed at the 1919 convention was the possibility of utilizing gas masks of the war type in this work.

Other questions which have occupied the attention of fire-fighting officers this year have been the double platoon system, which has recently been put into operation in Toronto, Chatham and some other cities. This method requires a larger staff and a higher wage bill. Another question has been whether employees of the fire department, along with other civic employees, should be permitted to organize unions, and affiliate with outside labor organizations. This was one of the issues in the Winnipeg strike and the city authorities held that such affiliation at least should not be permitted; the election of the mayor by a narrow majority in December last indicates that public opinion on this question is not unanimous. Firemen's unions, however, have been permitted in some other cities, and the general opinion is that such organizations should be permitted, but that all disputes should be settled if necessary by arbitration and no outside authority should be able to call a strike of such public servants.

If You Are Saving Money

—however small an amount each year—you are naturally anxious to secure the best possible returns from those savings. Have you considered the benefits of Life Insurance from a money-saving point of view?

Only a few weeks ago The Great-West Life Assurance Company received a letter from a Policyholder saying that his Policy, just matured, turned out the best investment he had ever made. This gentleman had, for many years, been engaged in operations that gave him unusual facilities for investing money to advantage—yet, when sixty years of age, he found his Great-West Policy the best investment he had ever made.

The Great-West Life has singular opportunities for investing the Policyholder's funds. For many years over 7% has been earned on investments, and this in the safest of securities.

A Life Policy, moreover, gives the safe protection for dependents that is to be had in no other way.

SUCCESS OF FIRE PREVENTION WORK

Influence of Publicity, Education, Criminal Legislation and Investigation of Suspicious Fires in Reducing Our Fire Losses

By E. P. Heaton

FROM the last obtainable information we learn that the fire waste of the North American continent for the first ten months of 1919 amounts, in round figures, to $218,000,000, against a total aggregate for the same period of 1918 of $290,000,000, or, in other words, a reduction of 25 per cent. —New York Journal of Commerce. From the details submitted month by month in *The Monetary Times*, Canada's share in the fire waste in the same period is estimated at $19,000,000, against a total of $29,000,000 in the corresponding period of 1918, or a reduction of 34½ per cent., so that Canada as a whole shows a material improvement.

Ontario's Position

According to the full returns furnished by the Ontario Fire Marshal, as published in the Public Service Bulletin, month by month, the fire waste for the first ten months of 1919 (the latest figures available) was under $8,000,000, against a total of over $14,000,000, or a reduction of 43 per cent. The loss to fire insurance companies, licensed and unlicensed, in Ontario for the same period also shows a reduction of about 40 per cent. less than the preceding year.

Ontario's record, which, roughly speaking, is one-half that of the Dominion, therefore, for 1919 stands out as decidedly hopeful and encouraging.

Another view of Ontario's hopeful situation is found in the number of fires in the province, which have decreased from 8,551 for the ten months of 1918 to 7,720 for 1919, and that notwithstanding a great increase in population and properties of the province by reason of the rehabilitation of the army now returned to residence and occupation within the province.

Influence of Fire Prevention Propaganda

He would be a bold man who would have the audacity to attribute this gratifying reduction to the fire prevention propaganda, but he would be wilfully blind who failed to acknowledge that it must be credited with some influence upon the improved situation.

Three important things are doubtless contributive to the reduction: first, the cessation of munition work, and of all day and night work in our factories. Second, the passage of the amendment to the Dominion Criminal Code and the appointment of a Dominion Fire Prevention Commission, in both of which directions material assistance has been given to the work. Third, the increasing fire investigation work of the province and the enlarged scope given to the office by the amending Act of 1919 in the direction of fire prevention.

Ontario Publicity

In the early part of the year 185,000 copies of "Fire Prevention on the Farm and Elsewhere" were printed and distributed throughout the province, and, while many of these met with the usual result of pamphlet education, the effect must have been salutary.

The "Cleanup" campaign, inaugurated under the proclamation of the Governor-General of the Dominion, was enthusiastically taken up throughout the province. A series of nine advertisements, dealing with all phases of fire prevention day, and directed toward various interests, appeared in the daily papers throughout the province on September 29th and October 2nd, 4th, 7th 8th and 9th; in the weeklies for three weeks prior to October 9th, and in the monthly and weekly magazines once a week for four issues prior thereto. (In the case of the monthlies, of course, the appearance was once a month.) The press throughout the whole province did everything possible to cooperate, and used much space in their news and editorial columns on behalf of this propaganda.

A prospectus for the day was prepared, published and distributed to all schools and principals of schools throughout the province; to municipal officials, fire chiefs, the members of the Ontario Fire Prevention League, and others. Ten thousand copies of lithographed fire prevention hangers were distributed throughout the province, chiefly to chiefs of fire departments. These were of an artistic and educational nature, and have been displayed, and, even at this writing, appear in many places. Special gold and silver medals were offered to the pupils of schools throughout the province for the best essay on the subject of "Fire Prevention," following teaching lessons in many schools on the same subject. The award of these medals will shortly appear, but the work of judging essays entitled to prizes, owing to the number received, is a task of heavy magnitude.

The work of education, which has been conducted through these channels, and which it has been arranged to continue in a more extensive manner, must produce corresponding results.

Ontario Fire Prevention League

The organization and development of this league is proceeding as rapidly as the organizing force of the office is able to attend to it, and it is safe to say that the most hopeful results must be expected from the organization of branch leagues throughout the province. It is our hope, under the authority conferred by the last legislature, to have a branch of the league in every city and town in Ontario, so that a local supervision and interest may be given to the work of inspection by uniformed firemen, by Boy Scouts, and by other officials, who, armed with the amendment to the Dominion Criminal Code, may be able to remove fire menaces, and thus prevent the occurrence of fires.

It is particularly gratifying the way such fire departments as Toronto, Ottawa, Hamilton, London, Port Arthur, Fort William, Kingston, Brockville, Oshawa, and a host of others are entering into the inspection system, and, while the results so far accomplished are truly wonderful, we are sanguine enough to hope that the future will not only continue to show a more marked improvement, but that this fair province may have removed from it a stigma which has so long attached to us in connection with our fire waste.

SICKNESS INSURANCE RATES TOO LOW

Recent Experience Has Been Unsatisfactory—Standard Policy with Higher Premiums May be Adopted

By John A. Jessup

GENERALLY speaking, all lines of insurance in Canada show a good increase in volume during the past year, and this also applies to sickness premiums. Unfortunately, the experience on this particular class of business has, during the past four or five years, been very unsatisfactory, and the loss ratio was very materially increased by the influenza epidemic of 1918.

It has been apparent for some time that companies have not been charging enough for this form of insurance, and the liability of the companies has been increased from year to year, owing to competition of new companies entering the field, who, in their zeal to build up a premium income quickly, have thought it necessary to add new features, such as nurses' fees, increased hospital indemnity and partial disability.

The time has arrived, however, when the companies cannot ignore conditions, and as a result of the very unsatisfactory experience, a meeting was held recently in Toronto, where it was practically decided by the majority of companies that they would launch a "standard" accident and sickness contract, and would endeavor to give the public a clear-cut contract at a premium sufficient to warrant the expectation of a reasonable profit at the end of the year.

Twenty-One Years of Undeviating Adherence to an Investment Policy Has Brought its Own Reward

When THE NATIONAL LIFE was established twenty-one years ago it was decided that an investment policy which would be a positive safeguard to the policyholder would be adopted. In pursuance of this policy the funds of the Company have been invested exclusively in Government, Municipal and School District Bonds, and a few Bank Stocks.

These Twenty-One years have been fraught with great difficulties for the young life insurance company. There have been several periods of great financial depression; the greatest war in all history has been waged and won, and an epidemic has been experienced which caused more deaths in three or four months than the war itself.

But through it all The National Life has stood the unexpected financial strain without impairment of any of its financial resources. Owing to the exceptional quality of the investments of the Company, wide distribution, judicious selection, and the prompt unfailing payment of both principal and interest as they became due, the Company is stronger today than ever before in its history.

GREATER DEMAND FOR INLAND TRANSIT INSURANCE

Shipments of Securities Increasing, as More Wealth Is Now Held in This Form—Losses on Parcel Post Business Have Been Too Heavy

By J. E. Proctor

Inland transportation insurance is divided under the following headings:—

1. Stocks, bonds and securities sent by express or registered mail.
2. Merchandise forwarded by registered mail.
3. Merchandise forwarded by parcel post, both registered and non-registered.
4. Merchandise forwarded by freight and express.

There has been a considerable increase in the volume of business tranacted under the first heading owing to the large Victory loan issues that have been put out in Canada, and owing to the large increase of wealth and prosperity in the country there has been quite a large volume of securities sent from point to point and these are consequently insured in transit.

There has been a considerable increase in the volume of parcel post insurance. This method of merchandising is becoming increasingly popular. The losses on this class of business have been exceptionally heavy and certain corrective measures ought to be applied to circumvent the smaller losses that occur constantly through the disappearance of packages sent through the mails unregistered.

There is very little insurance placed on general merchandise shipped through the railway companies or express companies, the bill of lading of both institutions making them responsible for the goods while they are in their possession.

There has been no change in the cover offered or the risks it is necessary to insure against, with the exception that loss or damage by strikers, rioters, etc., has been introduced and can be insured against for an additional premium. This insurance was not taken advantage of on transit risks by the shippers in Canada but in the United States we are advised that a considerable volume of business was done.

FATAL INDUSTRIAL ACCIDENTS IN 1919

Deaths which take place in the course of industry are increasing in Canada, according to the table reproduced herewith. The total for the nine months of 1919 was 758, as compared with 693 for the first nine months of 1918. The total for 1918 was 1,222, compared with 1,195 in 1917, and 950 in 1916. The railways, mines and lumbering are responsible for about 50 per cent. of the deaths. Comparing the individual classes, increases are found in lumbering, miscellaneous transportation, public utilities and public and municipal employment; decreases are found in mining, pulp and paper, steam railways and machinery trades.

These figures are compiled by the department of labor with the assistance of provincial governments, and are made as correct as differences in provincial methods will permit. The principal agencies through which the information is secured are: The Board of Trade Commissioners of Canada; the Department of Public Works and Mines and the Workmen's Compensation Board of Nova Scotia; the Provincial Factory Inspector for New Brunswick; the Bureau of Mines of Quebec; the Workmen's Compensation Board, the Bureau of Mines, and the Chief Factories Inspector for Ontario; the Ontario Railway and Municipal Board; the Temiskaming and Northern Ontario Railway Commission; the Bureau of Labor, and the Workmen's Compensation Board of Manitoba; the Chief Factory Inspector and the Chief Inspector of Mines for Alberta; the Workmen's Compensation Board, and the Department of Mines, British Columbia.

PROSPECTS FOR MORE LIVESTOCK INSURANCE

Very Few Changes in Recent Years, Although Volume of Business Has Increased Since 1915

By Ernest S. Carman

THERE has been little change in livestock insurance since 1915, except a small increase of premium income. In consequence of the war the department's income depreciated in 1915 60 per cent., as compared with 1913. This will be easily understood on reference to the report of the Canadian national livestock records. We rely for new business mainly on imported pure-bred breeding stock, that is to say, horses and cattle to which the Yorkshire livestock policies are confined.

In 1913 there were 1,490 head of pedigree horses and cattle for breeding purposes imported from Great Britain and Europe and in 1915 the total was 188. A large business was done in the spring of the year in shipments of horses from Ontario to the northwest for sale to settlers and homesteaders. This business for the same reason has almost disappeared. Indoor horse shows were also dropped.

Fewer Horses in Use

The carriage horses have been replaced in large cities by automobiles. Tractors in the prairie provinces have in many cases replaced the heavy horse for breaking up the large tracts of land. Racing has also been discontinued which has been the means of depriving the company of a considerable source of its income. The Stallion Enrolment Acts in the majority of provinces have gradually eliminated the grade stallion.

Movements are now on foot to do away with the scrub bull. This, of course, means a decrease in the number of animals insured but has also been the means on the other hand of enhancing the value of the pure-bred sire. Farmers are gradually being educated to breed from pedigree female stock and to select the best sire.

A considerable amount of insurance is being asked for on individual animals which is steadily increasing, especially dairy cattle. Fabulous amounts are being paid for bulls from celebrated strains, and we find the dairyman on realizing the value of his dairy stock is now appreciating the benefits of livestock insurance, which until the last two years he has failed to do.

The demand for saddle horses is increasing, which in my opinion is attributed to the demand for horses for military purposes. Another cause is that the successful business man owns an automobile and takes very little exercise and in order to keep himself in good health may be seen in Montreal during the week-end taking riding exercise, whereas up to five years ago he was never on a horse. With the hope for the return of racing next year we naturally anticipate an increase of business, judging by the high figures given in the United States and in England for yearling thoroughbreds. The heavy draft horse in large cities is being steadily replaced by motor vehicles. The cab horse is also being replaced by the taxi, all of which affects livestock insurance. Prospects, therefore, are confined to the pure-bred stallions, mares of various breeds, to the dairy cattle and to race horses.

Old Country Contracts Followed

There is little or no change in policies and contracts. The business is written on practically the same lines on which it is being conducted in the Old Country. The most important consideration is the moral hazard. The sum insured is restricted to an amount not exceeding two-thirds of the market value of the animal. The policy is one of indemnity limiting the company to two-thirds of the insured's loss. One branch of this class of insurance in Canada has been dissatisfying, and that is the company's policy covering the mare and the unborn foal. In England this forms by far the largest proportion of the business, but in Canada it is a negative quantity. In spite of every effort on the company's part farmers and breeders take little or no interest in this particular line. The policy insures the mare for a period of thirty days commencing with the act of foaling. The unborn foal can also be included. The amount of insurance is $10.00 and $15.00 to each $100.00 insured on the mare. For a small additional premium the period of insurance on the foal can be extended and the sum insured increased after a certain age.

PERSONAL ACCIDENT AND SICKNESS INSURANCE

Volume of Business Shows Good Increase, and All-Sickness Policy is Now in Demand

By W. Fearnley

A STEADY and substantial increase in the volume of new business in this department has taken place during the first ten months of 1919. This gratifying experience seems to be due to several causes. In the first place, large numbers of men whose insurance was discontinued when they went overseas, are now back in Canada, and have lost no time in seeking the protection they formerly carried. Another reason is that while many men are earning very much larger salaries than formerly, they realize that the purchasing power of the dollar has very largely diminished, and the necessity for protection against loss of salary resulting from accident or sickness disablement is being borne in upon their mind as never before.

Yet another reason is the demand for all-sickness policies to replace the low-priced but insufficient limited-health policies, and the experience of thousands of men who, during the recent influenza epidemic, carried such policies, was such as to cause them not only to seek the fuller covering but to increase the amount of their insurance.

It would be interesting to know just how many men were unable to make any claim for weeks of sickness, because the limited policy they carried did not include influenza in its coverings. There must have been thousands of such cases.

Sickness Claims Have Been Heavy

The increased volume of business to which reference has been made, is no doubt responsible for some increase in the number of claims paid during the ten months, but the fact is that the Dominion of Canada Guarantee and Accident Insurance Co. has, during this period, paid over six hundred more claims than during the same ten months in any year since the outbreak of the war, and, as an evidence of the value of an all-sickness policy in preference to any limited covering, it may be mentioned that during the twelve months, 15th October, 1918, to 15th October, 1919, the company paid no less than 2,159 claims amounting to $65,856.91 for disability resulting from influenza and its sequelæ.

Annexed are some interesting figures from the company's claims register, and the "hilarious" times the claims department had during the height of the influenza epidemic will be apparent to those who carefully note the figures for the last two months of 1918, and the first two months of 1919:—

Total Claims Paid.

	1917.	1918.	1919.
January	213	196	504
February	214	222	384
March	264	232	303

May	191	207	227
June	162	191	193
July	155	162	203
August	134	144	165
September	147	192	191
October	189	201	227
November	155	585	...
December	165	562	...
	2,230	3,161	....

The Price of Success

is Service. The Manufacturers Life deserves success because for over three decades it has rendered Service to an ever-growing body of satisfied Policyholders.

Service builds an institution. It doesn't grow with haphazard or unbusiness-like methods. Back of our Service, we stand foursquare on the principles of sound Life Insurance.

The year 1919 has been the most remarkable ever experienced. The new business has far surpassed that of any previous year, while the payments to Policyholders in dividends and maturities is the largest on record. We prize very highly the confidence of our Old Policyholders, thousands of whom increased their protection with the Company of their choice, to offset the declining value of the dollar. If you are uninsured, or underinsured, write the Company or its nearest representative, for particulars of our guaranteed plans.

LIFE UNDERWRITERS' ASSOCIATION IS GROWING

Much Educational Work Done in 1919, and May be Legislation This Year—Membership Campaign

By J. H. Castle Graham

TO answer the question, what has the Life Underwriters accomplished in the past year, is indeed no easy one, in some ways, but on the other hand several marked developments have taken place. The association has a policy which takes in work of legislation, education, and publicity, and treats also ethical practices. Steady progress has been made in all of them with rapid growth along educational lines.

Due to the reconstruction period we have just been passing through, there has been very little legislation requiring attention, but a great deal is expected in the coming months when the interests of the policyholders will be carefully watched.

Educational Developments

A very important forward movement took place when the London organization undertook an educational congress, attended by agents from all sections of western Ontario. The congress lasted two days with one session thrown open to the public. This idea was again worked with success in central Ontario, and it has had great effect in stimulating and aiding the insurance men in those sections. This phase of education is bound to play a very important part in the association's endeavor to raise the status of the profession.

The London Association developed the idea still further by combining with the Ad Club of that city in putting on a series of lectures by the noted Arthur F. Sheldon, of Chicago.

Other Helps for Agents

To meet the growing and urgent need for fuller information both as regards the subject-matter of life insurance and salesmanship, the Life Underwriters' Association of Canada has secured for the agency force of the country, the Indianapolis Research and Review Service which is nothing short of a literary digest. In addition, they have secured a very thorough and complete salesmanship course, which fills a long-felt need, being the means of overcoming what is probably the greatest weakness of the field force.

The official organ of the Association, "The Life Underwriters' News," has been greatly increased in size, with several new departments added to it, with a corresponding increase in value to the members.

A certificate of membership has been prepared and many other small helps worked out for the benefit of the Association which has been reflected in an increase in membership of approximately 1,000, with plans for an extensive Dominion-wide membership campaign at the opening of the New Year, with the idea of adding at least another 1,500 to this. This being accomplished, the Life Underwriters' Association of Canada will have practically every live life insurance man enrolled.

The value of this co-ordination and co-operation cannot be estimated to the companies, the agents themselves, or to the public whom they serve. The present prosperity and the era of reconstruction is bringing responsibilities and opportunities and changes which demand the best thought and action which united effort can produce through the Association.

PROGRESS IN THE ACCIDENT AND SICKNESS FIELD

Increasing Volume of Business Written, But Loss Ratio Unfavorable—Higher Rates Intimated

By George Weir

IN the matter of benefits and special features, accident and sickness policies perhaps have not progressed in as great a degree in 1919 as in former years. The reason for this is that the modern accident and sickness policy has already been loaded considerably over the safety point and the time has now come when the pendulum must swing the other way if the business is to be placed on a safe and sane foundation.

Every company writing this class of insurance has up to recently vied with every other company in an effort to offer the public a more liberal policy than its competitor. The natural result has been an overloading of benefits, which, together with the abnormal waves of sickness that have passed over the country, has meant that practically no company has made any money on accident and sickness business during the past few years.

The influenza and smallpox epidemics have certainly left their impression on the loss records of the casualty companies. The loss ratio has been steadily increasing, and it need hardly be said that the past experience has been unprofitable, as the premiums have not been increased with the increased benefits, the high cost of administration and the heavy loss ratios.

Recent Experience Not Improved

In 1918 the total amount of accident and sickness premiums written in Canada amounted to $3,735,000. The 1919 figures, of course, are not available at this early date, but it is safe to say that a large increase has taken place during the past year, with no better experience than former years.

The companies generally have been quite alive to the fact for a long time that a change was very necessary and desirable, not only from the companies' point of view, but from the point of view of the insured. Discussions have been had from time to time and at the moment it is felt that the desideratum long looked for as to policies, rates, etc., may be brought into immediate effect. The coming year I think should see the accident and sickness business put on more sane and sound business lines than unfortunately it has been for many years.

MANITOBA AMENDMENT TO INSURANCE ACT

Agents' Commissions Not to be Divided—Returns Required by Superintendent—Licenses Issued

THE Manitoba Insurance Act was amended at the last session of the provincial legislature. Some of the more important clauses provided for the filing of returns by the companies, prohibited misleading advertisements, and prohibited rebating. The terms of the amending Act are as follows:—

1. Paragraph (*dd*) of section 2 of chapter 98 of the Revised Statutes of Manitoba, 1913, being "The Manitoba Insurance Act," as enacted by section 5 of chapter 33 of 5 George V, is hereby repealed and the following paragraph substituted therefor:—

(*dd*) The expression "agent" means an acknowledged agent, sub-agent, or any person, firm or corporation who shall in any manner transact the business of insurance by negotiating for, or placing risks, canvassing or soliciting insurance except the officers and *bona-fide* salaried employees of a company who are not solicitors and who do not receive commissions or salaries in lieu of commissions.

2. Section 3 of the said Act is hereby repealed and the following section substituted therefor:—

3. Only sections 2, 5 to 20, 44, 45, sub-sections (3) and (4) of 51, and sections 53, 64 and 72 to 94 of this Act shall apply to a company licensed by the Dominion of Canada.

3. Section 19C of the said Act, as enacted by chapter 52 of 4 George V, is hereby amended by adding thereto at the end thereof the words "and a power of attorney to the superintendent of insurance in like manner as in sub-section (*b*) of section 9."

4. Sub-section 3 of section 31 of the said Act is hereby amended by striking out the word "shall" in the eleventh line and the word "appointed" in the thirteenth line thereof and by substituting therefor the words "may" and "nominated," respectively.

Filing of Annual Returns

5. Section 51 of the said Act is hereby amended by adding thereto the following sub-sections:—

(3) Every company registered under this Act shall file annually with the superintendent of insurance not later than the first day of April a statement of business written, premiums collected, losses paid and risks in force, on such forms as the Provincial Treasurer shall approve.

(4) Every company shall file annually with the superintendent of insurance on or before the fifteenth day of March a list of the names and addresses of every appointed agent, and shall also notify the superintendent of every cancellation of agency and new appointment monthly on or before the fifteenth day of each succeeding month.

(5) No company shall publish or issue any financial statement which does not in substance agree with the statement filed with the superintendent of insurance.

(6) No company or any officer, agent or employee of any company shall issue, publish or circulate any advertisement, letterhead, postal card, account or document purporting to state the subscribed capital as being actually and in good faith subscribed which contains any untrue or false statement as to the incorporation, control, supervision, management or financial standing of such company, and which is intended or calculated or likely to mislead or deceive any person dealing or having any business transaction with the said company, or with any officer, agent or employee of the company.

6. The said Act is hereby amended by adding thereto the following section:—

51A. Any company whose officer, agent or employee shall be guilty of any violation of sub-section 6 of the preceding section shall be liable on summary conviction to a penalty not exceeding two hundred dollars and not less than fifty dollars.

7. Section 81 of the said Act is hereby amended by inserting the words "or offer to undertake any contract" after the word "insurance" in the second line thereof, and by striking out the words "or purely mutual fire and hail insurance companies incorporated in the Province of Manitoba" where the same occur in the fifth and sixth lines thereof, and by adding thereto the following sub-section:—

(2) The certificate of authority issued to a partnership, firm or corporation shall include the *bona-fide* partners or officers of such partnership, firm or corporation where they devote their entire time to the interests of such partnership, firm or corporation holding such certificate of authority.

8. Paragraph (1) of section 91 of the said Act is hereby amended by adding thereto at the end thereof the words "(*d*) in case of mutual fire insurance $3.00."

Provision Against Rebating

9. The said Act is hereby amended by adding the following section:—

91A. No agent or other person representing, or doing business in the province for any company registered or licensed under this Act shall, directly or indirectly, divide or offer to divide his commission or other remuneration, or any other matter or thing or value with any person whose life, safety, health, fidelity, property or insurable interest he may be insuring or seeking to insure, or with any person having or claiming or appearing to have any influence or control over the person for whom insurance is sought to be placed unless such agent holds a subsisting certificate of authority.

10. Section 92 of the said Act is hereby amended by striking out the figures "91" in the second line thereof and by substituting therefor the figures "91A."

11. The said Act is hereby amended by adding thereto the following section:—

95. When in any mortgage or agreement for sale there is a term requiring the mortgagor or purchaser to insure the premises therein described and no specific insurance company is named, such term shall be sufficiently satisfied save as to amount by the production by such mortgagor or purchaser of a subsisting policy of insurance in any insurance company licensed to carry on its business in Manitoba.

12. This Act shall come into force on the day it is assented to.

License Changes

The following two companies were licensed during 1919:—

Greater Winnipeg Mutual Fire Insurance Co.	Fire
Canada Security Assurance Co.	Fire

The following companies registered:—

Car and General Insurance Corporation, Ltd.	Fire, accident, automobile, hail and sickness.
Girard Fire Insurance Co.....	Fire and tornado.
Newark Fire Insurance Co....	Fire and automobile.
Scottish Metropolitan Insurance Co.	Fire, accident, automobile, burglary, guarantee and sickness.
Western Casualty Co.	Accident and sickness.
American Equitable Assurance Co.	Fire.

No licenses were cancelled.

BURGLARY UNDERWRITERS' ASSOCIATION

At a meeting, held in Montreal on November 24th, the Canadian Burglary Underwriters' Association was formed. The following officers were elected for the year 1920: President, A. E. Kirkpatrick, Toronto; vice-presidents, W. H. Burgess, Toronto, and R. Welch, Montreal; secretaries, H. G. Humphries, Toronto, and T. D. Hutchins, Montreal; treasurer, H. F. Roden, Montreal. A constitution was also drawn up and by-laws passed.

Canada's Foremost Life Assurance Company

FIRST to operate on Scientific principles whereby an absolutely "Square Deal" is given to every policy-holder irrespective of the age of the assured, or the plan of assurance he buys. Thus we are known as "Canada's first Scientific Life Assurance Company."

FIRST to provide free medical attention to policy-holders in times of epidemics. Our action during the recent "Flu" plague saved many lives.

FIRST to issue Life Assurance policies WITHOUT MEDICAL EXAMINATION.

FIRST to give the public TEN YEARS TO PAY for Dominion of Canada Victory Bonds.

FIRST to provide a borrower with the certain means whereby in the event of death such DEATH CANCELS MORTGAGE. The value of such a provision to a borrower's family is supreme and life-giving, for it removes worry.

FIRST to provide for the automatic cancellation of policy loans in the event of death. This is also a prime factor in the removal of worry and anxiety from the mind of the assured.

OUR MOTTO IS—"WE EXIST TO SERVE."

The Northwestern is a young Company—yes, and we are proud of it—proud of our youth, our strength—our virility—but the strength of any commercial or financial institution depends not upon its size or age, but upon the proportion of assets to liabilities. When subjected to this test the Northwestern stands

Among the Strongest Life Companies on the North American Continent.

Largest ratio of Policy Reserves of any Company. Generous Annual Dividends are now being paid. Most liberal policy conditions. Women at same rates as men. Specially attractive policies for railroad employees. Write for our descriptive literature.

The Northwestern Life Assurance Co.

WINNIPEG

H. R. S. McCABE, Managing Director. F. O. MABER, Secretary-Treasurer.

ALBERTA AMENDS HAIL INSURANCE CONDITIONS

One Company Incorporated This Year—Many Enter the Province, and Several Withdraw

THE Alberta Insurance Act was amended at the 1919 session of the Provincial Legislature, as regards hail insurance. The amendment is as follows:—

1. Schedule D (Hail Insurance conditions) of the said Act is amended—

(*a*) By striking out all that part of paragraph 7 thereof before the word "hereinafter" in the fourth line of the said paragraph and substituting therefor the following: "A person claiming under a policy shall when demanded in writing by registered letter from the company furnish within fifteen days after receipt of such letter (unless such time is extended by the company)a statutory declaration";

(*b*) By repealing paragraph 13 thereof and substituting therefor the following:—

"13. The insurance, if on the cash plan, may be terminated by the insured by giving written notice to that effect to the company by registered letter at its head or branch office or the general agency from which the policy was issued and upon the surrender of the policy, in which case the company may retain a customary short rate applicable to hail insurance for the time the insurance has been in force and shall repay to the insured the balance of the premium paid; if on the note plan, the insured shall pay the company the earned portion of the premium and on payment or surrender of such amount the company shall return the premium note."

New Companies in the Field

One company was incorporated by the Alberta legislature during the year; this was the Fifty-fifty Mutual Hail Insurance Society, with head office at Didsbury, Alta.

The following companies have been licensed since January 1st, 1918:—

1918

Northwestern Underwriters.
Minnesota Underwriters.
Merchants and Traders Assurance Co.
Farmers Fire and Hail Insurance Co.
Union Insurance Society of Canton, Ltd.
Maryland Assurance Corporation.
British Crown Hail Underwriters, Ltd.
Vulcan Fire Insurance Co.
New Hampshire Fire Insurance Co.
Boston Insurance Co.
Union Casualty Company of Winnipeg.
Capital Life Assurance Co.
Ridgely Protective Association.
Alliance Insurance Company of Philadelphia.
Queensland Insurance Co., Ltd.
British Traders Insurance Co., Ltd.
Columbia Insurance Company of Jersey City.
Car and General Insurance Co.
Standard Fire Underwriters.
Sterling Fire Underwriters.

1919.

Canada National Underwriters.
Fire Insurance Company of Canada.
Canadian Indemnity.
Merchants Fire Assurance Corporation of New York.
Scottish Metropolitan Assurance Co., Ltd.
Newark Fire Insurance Co.
Fifty-fifty Mutual Hail Insurance Co.
Western Casualty Co.
Federal Insurance Co.
Stuyvesant Insurance Co.
Girard Fire and Marine Insurance Co.
New Jersey Insurance Co.
National Union Fire Insurance Co.
Royal Victoria Mutual Fire Insurance Co.
United States Fire Insurance Co.

The following companies withdrew during 1918:—

British Columbia Life Insurance Co.
Hamilton Fire Insurance Co.
La Sauvegarde Life Insurance Co.
Canada Hail Insurance Co.
National Union Fire Insurance Co.
Saskatchewan Life Insurance Co.
Western Canada Accident and Guarantee Co.
Farmers Mutual Fire Insurance Company of Edmonton.

NO LEGISLATION IN ONTARIO

The feature of the insurance business in Ontario this year was the publication of the Masten report on fire insurance, after an investigation lasting from August, 1916, to January, 1919. It originated in allegations that the profits in the business were too high, and that some of the practices of the companies were arbitrary. Justice Masten, K.C., in his report, which was submitted to the provincial legislature in March, almost entirely vindicated the companies and the Canadian Fire Underwriters' Association. Several recommendations were made, however, and some new legislation may follow this year.

Below is a list of companies newly registered in Ontario during the year 1919:—

American Merchant Marine Insurance Co. (Marine).
American Equitable Assurance Co. of New York.
Boston Insurance Co. (Marine).
Car and General Assurance Co.
City of New York Insurance Co. (Marine).
Federal Insurance Co. (Marine).
Fire Insurance Co. of Canada.
Merchants Fire Insurance Corporation of New York.
Motor Union Insurance Co., Ltd.
Newark Fire Insurance Co.
New Jersey Insurance Co.
Scottish Metropolitan Assurance Co., Ltd.
Western Life Assurance Co.
Old Colony Insurance Co. (Marine).
Queensland Insurance Co., Ltd.

INSURANCE CHANGES IN SASKATCHEWAN

Legislative Amendments Aim at Stricter Control—Hail Companies Must Provide Reserves—Many Fire Companies Enter the Province

DURING the 1918-19 session of the Saskatchewan legislature several amendments were made to the Saskatchewan Insurance Act. These amendments may be summarized as follows:—

1. The officers and agents of any company licensed under the Insurance Act, and adjusters, when required by the Superintendent of Insurance, must furnish full information relative to any contract of insurance in Saskatchewan, or relative to any settlement or adjustment under a contract of insurance.

2. All policy forms must be approved by the Superintendent of Insurance.

3. All licensed companies shall print, stamp or write on the face of every insuring document the words "licensed under the Saskatchewan Insurance Act."

4. All deposits of provincial licensees shall be re-adjusted on or before May 1st in each year.

5. Provincial mutual fire insurance companies licensed only for the insurance of farm buildings, their contents, and of isolated risks other than mercantile and manufacturing risks, and provincial mutual hail insurance companies are not required to make deposits under the Act.

Valuation of Securities

6. The minister in charge of the insurance department may valuate the securities deposited under the Insurance Act and may certify the value at which such deposit will be accepted.

7. Power of attorney for the counter-signature of Saskatchewan contracts cannot be given by resident agents of Saskatchewan to outside agents.

8. Provincial hail companies must set aside as a hail insurance surplus fund at least 50 per cent. of the profits of business during the year and continue to do so until the surplus fund is equal to at least 50 per cent. of the net hail premiums received during the preceding calendar year, at which proportion it must be maintained.

9. Sections were added to the Insurance Act stating in what securities a provincial company may invest its surplus and reserve funds.

New Licenses Issued

The following is a list of companies to whom licenses were issued during the year 1919:—

British Traders' Insurance Co., Ltd.....	Toronto.
British Underwriters' Agency of the British Colonial Fire Ins. Co.	Montreal.
Car and General Ins. Corp.	Montreal.
Canadian National Underwriters' Agency of the Union Casualty Co	Winnipeg.
Columbia Insurance Co.	Jersey City.
Fire Insurance Co. of Can.	Montreal.
Federal Insurance Co.	New Jersey.
Merchants Fire Assurance Corp.	New York.
Middle West Insurance Co.	Moose Jaw.
Newark Fire Insurance Co.	Newark.
National Ben Franklin Fire Ins. Co...	Toronto.
New Jersey Insurance Co.	Newark.
Northwestern Mutual Fire Ins. Co.	Weyburn.
La Societe Des Artisans Canadien-Francais	Montreal.
Standard Fire Underwriters' Agency of the Phenix Fire Ins. Co.	Montreal.
Stuyvesant Insurance Co.	Toronto.
United States Fire Ins. Co	New York.

Fire insurance companies, it will be noticed, predominate in this list. Many of the companies, of course, write casualty lines in addition to fire insurance.

ALBERTA MUNICIPAL HAIL INSURANCE

Over Twelve Millions Carried in 1919—Losses Five Hundred Thousand—Protection May be Increased

UNDER the terms of the Municipal Hail Insurance Act, 1918, seventy-three Alberta municipal districts formed themselves into a hail insurance district. The administration of the Act is in the hands of an elected board of nine members, which meets at Calgary, under the chairmanship of E. H. Malcolm. The municipalities are authorized to carry on hail insurance and to collect a tax upon the crop area for the payment of losses and expenses. R. V. Nicolson, deputy superintendent of insurance for Alberta, has written *The Monetary Times* giving the following results for the year:—

"Crops insured June 15th, approximately 2,000,000 acres.

"Withdrawn up to July 20, approximately 500,000 acres.

"Total insurance carried throughout year over $12,000,000 (over 93 per cent. was insured at $8.00 per acre).

"Total losses for the year approximately $506,000.

"The rates of hail tax per acre for the year 1919 as fixed by the Hail Insurance Board are as follows:—

"Crops insured at $8.00 per acre for entire season, six per cent. or 48 cents per acre.

"Crops insured at $8.00 per acre but withdrawn as per section 26, subsection 2, between June 15th and June 29th, four cents; between June 29th and July 6th, eight cents; between July 6th and July 13th, 12 cents, and between July 13th and July 20th, 16 cents per acre.

"The rates for $6.00 insurance are three-quarters of these amounts.

"In setting the rate provision was made for: (1) Payment of awards in full; (2) all other expenditures for the year; (3) a surplus of approximately $100,000 or 20 per cent. of the losses.

"The hail insurance assessment shows about $780,000 due from the municipal districts. From this will have to be deducted the taxes on soldiers' lands. We cannot tell yet how much this will be. One municipal district claims rebate of 104 quarter sections, but I think this is exceptional.

"The cost of obtaining the insurance will be about $25,000. We propose to pay a flat rate per township for getting out the notices, etc., and a commission of about two per cent. of the tax. These payments will be made to the municipal districts, generally to the secretary-treasurer.

"You will notice," adds Mr. Nicolson, "that the total insurance carried was over $12,000,000. This at the rate charged by the stock companies would mean a premium of over $1,000,000, which is larger than the combined operations of all the companies."

It is probable that amendments to the Act will be made at the next session of the legislature. Many farmers desire more protection, some claiming that the protection should be doubled. This would, of course, involve higher premiums.

FINDS TWENTY-YEAR POLICY POPULAR

In commenting on results in 1919, A. Martin, High Court Secretary of the Ancient Order of Foresters, said to *The Monetary Times*:—

"The life insurance department of the Ancient Order of Foresters is a separate mutual life institution, established in 1898, and constituted upon similar level premium principles to the ordinary life insurance companies. All the A.O.F. policies are profit-bearing. Every five years substantial dividends are declared, thus making the net cost of our insurance particularly economical.

"During 1919, the new business issued has almost trebled that of 1918. The most popular policies are those of 20-pay life and 20-year endowment. The demand for joint life has also been greater than in former years. The call for our infantile $100 20-year endowment and $250 20-year endowment has also exceeded our expectations."

Dominion Insurance Changes in 1919

Fraternal Societies Must Become Solvent, and Submit to Annual Examination by Competent Actuary — Many Insurance Companies Incorporated—List of New Licenses Issued—None Cancelled

THE only general Act relating to insurance passed by the parliament of Canada during the sessions held in 1919 was an Act amending the Insurance Act, 1917, respecting fraternal benefit societies. The Act comes into force on January 1st, 1920, with the exception of a section enabling the department to deal with societies heretofore licensed which are shown to be unsound.

The objects and provisions of the Act may be summarized as follows:—

The object of this Act is to provide additional safeguards for the members of fraternal benefit societies operating in Canada, and to make it necessary for foreign fraternal benefit societies to obtain licenses under the Insurance Act, before transacting business in Canada.

The Insurance Act as passed in 1917, and as it has existed since 1885, exempts from its provisions fraternal benefit societies, and at the present time the only fraternal benefit societies licensed under the Act are those societies which have been incorporated by the Dominion parliament and whose charters require them to obtain such licenses. Of these there are at present seven. There is in addition one provincially incorporated society which has voluntarily submitted itself to the provisions of the Act.

Sixteen Foreign Societies

In addition to these societies there are operating in Canada sixteen foreign fraternal societies and a large number of fraternal societies incorporated by the legislatures of the various provinces. The Dominion parliament has jurisdiction to require the foreign societies to obtain licenses before transacting business in Canada and this requirement is imposed by the Act. For foreign societies not now transacting business in Canada the Act provides that they must be actuarially solvent before obtaining licenses.

For the sixteen foreign societies now transacting business in Canada, many of which are actuarially insolvent, the Act provides that they may receive licenses up to 1925, provided they properly secure their new members by deposits in Canada held for their protection exclusively. After 1925, however, the societies must be entirely solvent if their licenses are to be continued. Foreign societies now transacting business in Canada which are unable to get a license, may continue business in respect of existing policies without incurring penalty.

Parliament has not the same jurisdiction in respect of the provincial societies, and the provisions of the Act are that these societies may obtain licenses under the Act if they are actuarially solvent, but they are not compelled to do so. If such a society applies for a license and is not actuarially solvent, it may obtain a license until 1925, if it either deposits with the minister securities to fully protect new members, or creates a separate class, whose fund is actuarially solvent, into which new members will be admitted. After 1925, the license will be continued only if the society as a whole is actuarially solvent.

Actuary Must be Competent

One of the most important provisions of the Act is that requiring annual valuations by an actuary and an annual certificate by an actuary that the society is actuarially solvent. The standing of the actuary is assured by requiring that he shall be a Fellow of the British Institute of Actuaries, or the Faculty of Actuaries of Scotland, or the Actuarial Society of America. It is believed to be essential that the many serious problems facing these societies should be dealt with by actuaries of the highest standing.

The Act repeals certain sections of the Act respecting Assessment Companies under which the licensed societies have been operating and which have been for some years more or less inapplicable to these societies, and substitutes a new Part IIA, applicable solely to fraternal societies. The Act also repeals the exemption granted to fraternal societies.

Acts of Incorporation

Private Acts incorporating insurance companies or amending existing Acts of incorporation were passed as follows:—

1. Canada Accident Assurance Company.—This Act changes the name of the company to the Canada Accident and Fire Insurance Company, in order to better describe the classes of business transacted.
2. The Canadian Merchant Service Guild.—This Act incorporates the guild as a fraternal benefit society for the purpose of uniting fraternally all persons employed in ships operating in and out of Canadian waters and to provide for the insurance of the members in accordance with the provisions of the Insurance Act.
3. The Commercial Life Assurance Company of Canada. —This Act provides for the change of name of the Alberta-Saskatchewan Life Insurance Company to the Commercial Life Assurance Company of Canada.
4. The Empire Life Assurance Company of Canada.—This company was incorporated in 1911, but did not obtain a license prior to the outbreak of war, since which time little progress has been made in organization. The Act extends until April 4th, 1920, the time within which a license may be obtained under the Insurance Act.
5. The Fire Insurance Company of Canada.—This company was incorporated in 1916, and licensed in 1918. The Act provides for the use of the French equivalent of the English name, namely, La Compagnie d'Assurance du Canada contre l'Incendie. It also authorized the company to transact additional classes of insurance to those authorized by its original Act of incorporation.
6. The Grain Insurance and Guarantee Company.—This Act incorporates the company with head office in Winnipeg, and with power to transact fire, guarantee, accident, burglary, sickness, inland marine, inland transportation, automobile and plate glass insurance.
7. The North Empire Fire Insurance Company.—This Act authorizes the company to transact additional classes of insurance and validates certain transactions which took place in the year 1912, by which the company took over the business and acquired the shares of the Canada West Fire Insurance Company and issued shares of its own capital stock to the shareholders of the Canada West.

New Licenses Issued

During the year 1919, licenses were issued for the first time under the Insurance Act, 1917, to the following companies:—

American Alliance Insurance Company, for fire insurance and automobile insurance (limited to the province of British Columbia); to the Halifax Fire Insurance, Antigonish Farmers' Mutual Fire Insurance Company, Cumberland Farmers' Mutual Fire Insurance Company, Kings' Mutual Fire Insurance Company, Pictou County Farmers' Mutual Fire Insurance Company, The Mutual Fire Association of Canada, for fire insurance; (limited to the province of Nova Scotia), to the Girard Fire and Marine Insurance Company for fire and tornado insurance; to the Motor Union Insurance Company, Limited, for fire, accident and automobile insurance and to the Western Casualty Company for accident and sickness insurance (limited to the provinces of Alberta, British Columbia, Manitoba and Saskatchewan); to the American Equitable Assurance Company of New York, for fire insurance; and the China Fire

Insurance Company, Limited, for fire insurance (limited to the province of British Columbia).

There have been no licenses of insurance companies cancelled during the year.

Licenses for Additional Lines

The following companies previously licensed have obtained licenses for an additional class or classes of insurance as indicated:—

The Eagle, Star and British Dominions Insurance Company, Limited, and to the London Guarantee and Accident Company, Limited, for hail insurance; to the General Animals Insurance Company of Canada, for plate glass insurance; to the Dominion Fire Insurance Company, for hail and automobile insurance; to the Canadian Surety Company, for insurance of automobiles against fire; to the Canadian Fire Insurance Company, for automobile insurance; to the General Accident Assurance Company of Canada, for fire and hail insurance; to the Globe and Rutgers Fire Insurance Company, for automobile and inland transportation insurance; to the Alliance Assurance Company, Limited, for burglary, hail and plate glass insurance; to the Great American Insurance Company, for explosion insurance; to the New Jersey Insurance Company, and the Newark Fire Insurance Company, for automobile insurance; to the Scottish Union and National Insurance Company, for explosion insurance; to the Continental Insurance Company and Fidelity-Phenix Fire Insurance Company of New York, for explosion and hail insurance; to the Providence Washington Insurance Company, to the Westchester Fire Insurance Company and to the Liverpool-Manitoba Assurance Company, for explosion insurance; to the Union Assurance Society, Limited, for automobile insurance; to the Glens Falls Insurance Company, for explosion and inland transportation insurance; to the Alliance Insurance Company of Philadelphia, and to the Springfield Fire and Marine Insurance Company, for automobile insurance; to the Merchants' Fire Assurance Corporation of New York, for hail insurance; to the American Surety Company of New York, for burglary insurance; to the Federal Insurance Company, for hail insurance; to the General Animals Insurance Company of Canada, for automobile insurance; to the Dominion Gresham Guarantee and Casualty Company, for inland transportation insurance; to the United States Fire Insurance Company, for fire, automobile (excluding insurance against loss by reason of bodily injury to the person), explosion and tornado insurance to the Ætna Insurance Company, for inland transportation insurance; to the Employers' Liability Assurance Corporation, Limited, for explosion insurance; to the Northern Assurance Company, Limited, for accident, automobile and sickness insurance; to the Equitable Fire and Marine Insurance Company, for explosion insurance; to the Hartford Fire Insurance Company, for automobile insurance (excluding insurance against loss by reason of bodily injury to the person); to the London and Lancashire Guarantee and Accident Company of Canada, for automobile insurance; to the Northern Assurance Company, Limited, for guarantee and plate glass insurance; to the Northwestern Mutual Fire Association, for automobile insurance (excluding insurance against loss by reason of bodily injury to the person), limited to the province of British Columbia.

EXPERIENCE OF ALLIANCE NATIONALE

"We do not remark any extraordinary event during the year 1919," said Charles Duquette, chief agent of the Alliance Nationale, Montreal, to *The Monetary Times*, when asked as to their experience in sickness insurance in 1919. "We do notice, however," he continued, "that the Insurance Department of the Dominion is taking more interest in the question and seems to prepare itself to control efficaciously this kind of insurance. We appreciate this movement of the Dominion."

Another observation is that during 1919 the claims are reduced in a large proportion. Referring to his own society, Mr. Duquette said that it does not issue policies or certificates for sickness benefits, this kind of insurance being ruled by the society's by-laws.

NOVA SCOTIA REGULATIONS STRICTER

Fire as Well as Life Agents Now Require Licenses—Insurance Companies More Heavily Taxed

At the last session of the Nova Scotia legislature, certain amendments were made in respect to the law governing insurance companies. The principle requiring insurance agents to have certificates of authority was extended to include agents for fire as well as those for life and accidents, the statutes in this regard being chapter 14 of the Acts of 1919. Chapter 13, Acts of 1919 also amended the Supplementary Revenue Act regarding the amount of tax payable thereunder. The clauses of this Act applying to insurance companies were as follows:—

5. (1) Every insurance company shall pay on or before the first day of June, A.D. 1919, a tax of one and three-quarters per cent. and thereafter annually a tax of two per cent., calculated on the gross premiums received by the company in respect of business transacted in Nova Scotia; provided, however, that if such a tax would amount to a sum less than one hundred dollars, a minimum tax of one hundred dollars shall be paid.

(2) In case of reinsurance by an insurance company, the company reinsured shall be exempt from the tax imposed on the portion of the premium paid to the reinsuring company, but the reinsuring company shall be liable for the tax in respect thereof as part of its gross premiums. Where the reinsuring company does not transact business in Nova Scotia or has no principal or head office therein, the company reinsured shall retain in its hands so much of the premium for reinsurance as is equivalent to the tax imposed in respect of such premium, and shall be liable for the tax and for the payment to the Provincial Treasurer.

How Tax is Calculated

(3) In estimating the amount of the tax payable under this Act by an insurance company, every premium which:

(a) is by the term of the policy or a renewal thereof, or otherwise, payable in Nova Scotia; or

(b) is paid in Nova Scotia; or

(c) is payable in respect of insurance of a person or property resident or situate in Nova Scotia at the time of payment, whether such premium is earned wholly or partly in Nova Scotia or elsewhere, and whether the business is transacted in respect of such policy or the payment of such premium is made wholly or partly within Nova Scotia, or elsewhere,

shall be deemed to be a premium in respect of business transacted in Nova Scotia.

(4) There shall be kept at the head office, or in the case of an extra-provincial insurance company, at the principal office or place of business in Nova Scotia, a book or books in which shall be entered premiums mentioned in sub-section three of this section, and all other income of the company in respect to insurance business transacted in Nova Scotia. In case of an extra-provincial company having no principal place of business within the province, such records shall be kept by the registered agent of the company as the Provincial Treasurer may require and every company making default shall be liable to a penalty of not less than five hundred dollars and not more than one thousand.

PLATE GLASS INSURANCE IN 1919

"The price of plate glass continues to increase," said H. F. Roden, casualty manager of the Canada Accident and Fire Insurance Co., Montreal, in an interview with *The Monetary Times*, "and, as the insurance companies have not charged a corresponding increase in premiums, the results, from an underwriting standpoint, have not been at all satisfactory. In fact, it will surprise me if any of the companies will show a profit in this particular branch of their business. If the price of glass continues to hold, the companies must increase their rates if they expect to show a balance on the right side."

Save and Succeed

"If you want to know whether you are going to be a success or a failure in life," said James J. Hill, "you can easily find out. The test is simple and infallible. Are you able to save money? If not, drop out. You will lose. You may not think it, but you will lose as sure as you live. The seed of success is not in you."

This is a hard saying, but nevertheless the truth. It is doubly true to-day when the purchasing power of the Dollar is only from 40 to 50 per cent. as great as that of five years ago. Save your dollars, therefore, for the time when they will be twice as valuable as now.

Furthermore, you should increase your Life Insurance for exactly the same reason—what you now have is insufficient under the new scale of values. You are saving in the most effectual way when you take out a Life Insurance Policy. Live or die, you get full value; you cannot fail to win.

BRITISH COLUMBIA CHANGES IN 1919

Several Legislative Amendments—Statutory Conditions Adopted—List of License Changes

At the 1918-19 session of the British Columbia legislature several insurance amendments were passed. The first of these was Bill No. 74, which provides as follows:—

1. This Act may be cited as the "Insurance Act Amendment Act, 1919."

2. Section 2 of the "Insurance Act," being chapter 33 of the statutes of 1913, is hereby amended by striking out the words "'Minister' means the Minister of Finance and Agriculture," and substituting the words "'Minister' means the Attorney-General, except in subsection (1) of section 17, and in sections 18, 22, 24, 31, 34, and 35, where it means the 'Minister of Finance.'"

3. Subsection (1) of section 20 of said chapter 33 is hereby amended by striking out the word "Minister" in the fourth line, and substituting the words "Minister of Finance."

4. Section 32 of said chapter 33 is hereby amended by striking out the word "Minister" where it occurs in the third and ninth lines, and substituting in each case the words "Minister of Finance."

Fire Insurance Act Amended

Bill No. 68 put in force a number of fire insurance amendments. It provides:—

1. This Act may be cited as the "British Columbia Fire Insurance Act Amendment Act, 1919."

2. Section 2 of the "British Columbia Fire Insurance Act," being chapter 113 of the "Revised Statutes of British Columbia, 1911," is hereby amended by striking out the second line thereof, and substituting the following:—

> "'Minister' means the Attorney-General, except in sections 14, 15, 17, 25, 28, and 29, where the word shall mean the Minister of Finance."

3. Said chapter 113 is hereby further amended by adding thereto as section 5c the following:—

"5c. Fire-insurance contracts shall not exceed the term of three years; and the insurance of mercantile and manufacturing risks shall, if on the cash plan, be for a term not exceeding one year, but any policy may be renewed by the delivery of a renewal receipt or a new premium note."

4. Said chapter 113 is hereby further amended by adding thereto as section 8a the following:—

"8a. Every licence issued under this Act shall expire on the thirtieth day of June in each year, but may be renewed from year to year."

5. Section 23 of said chapter 113 is hereby amended by striking out the word "him" in the last line, and substituting the words "the Minister of Finance."

6. Section 26 of said chapter 113 is hereby amended by striking out the word "Minister" where it occurs in the third and ninth lines, and substituting in each case the words "Minister of Finance."

7. Section 50 of said chapter 113, as enacted by section 6 of chapter 39 of the statutes of 1914, is hereby amended by adding thereto as paragraphs (*h*) and (*i*) the following:—

> "(*h*.) For annual renewal of licence, five dollars:
>
> "(*i*.) For a licence to do business, where the company is licensed under the 'Insurance Act' a fee of fifty dollars in lieu of the fee under paragraph (*b*) hereof."

Statutory Conditions

Another important piece of legislation was the "Fire-insurance Policy Act" which repealed the "Fire-insurance Policy Act," of 1911, and also repealed the "Fire-insurance Policy Amendment Act, 1916." This Act requires the printing of statutory conditions on fire-insurance policies. The conditions required are practically identical with those required in the other western provinces, and need not, therefore, be repeated here. The western conditions, it may be remarked, vary somewhat from those required in Ontario, Quebec, New Brunswick and Nova Scotia. None are required in Prince Edward Island but the practice of the companies doing business there is to use policies with the statutory conditions required by some other province such as New Brunswick, so no special policies need be issued for the Island.

The clauses of the Act itself are as follows:—

1. This Act may be cited as the "Fire-insurance Policy Act." R.S. 1911, c. 114, s. 1.

2. Where, by reason of necessity, accident, or mistake, the conditions of any contract of fire insurance on property in this province, as to the proof to be given to the insurance company after the occurrence of a fire, have not been strictly complied with, or where, after a statement or proof of loss has been given in good faith by or on behalf of the assured in pursuance of any proviso or condition of such contract, the company, through its agent or otherwise, objects to the loss upon other grounds than for imperfect compliance with such conditions, or does not, within a reasonable time after receiving such statement or proof, notify the assured in writing that such statement or proof is objected to, and what are the particulars in which the same is alleged to be defective, and so from time to time, or where for any other reason the Court or Judge before whom a question relating to such insurance is tried or inquired into considers it inequitable that the insurance should be deemed void or forfeited by reason of imperfect compliance with such conditions, no objection to the sufficiency of such statement or proof, or amended or supplemental statement or proof (as the case may be), shall, in any of such cases, be allowed as a discharge of the liability of the company on such contract of insurance wherever entered into. R.S. 1911, c. 114, s. 2.

3. Where the loss (if any) under any policy has, with the consent of the company, been made payable to some person other than the assured, as mortgagee, the said policy shall not be cancelled, altered, or otherwise dealt with by the company upon the application of the assured without reasonable notice to the said mortgagee. R.S. 1911, c. 114, s. 3.

4. The conditions set forth in the schedule to this Act shall, as against the insurers, be deemed to be part of every contract, whether sealed, written, or oral, of fire insurance hereafter entered into or renewed or otherwise in force in British Columbia with respect to any property therein, or in transit therefrom or thereto, and shall be printed on every policy of fire insurance, with the heading "Statutory Conditions." R.S. 1911, c. 114, s. 4.

Conditions May be Varied

5. If any insurance company or other insurer desires to vary the said conditions, or to omit any of them, or to add any new condition, there shall be added immediately after such conditions words to the following effect, which with any such variation, addition, or reference to omissions shall be printed in conspicuous type and in red ink:—

VARIATIONS IN CONDITIONS.

> This policy is issued on the above statutory conditions, with the following variations and additions:—
>
> These variations [*or* as the case may be] are, by virtue of the British Columbia Statute in that behalf, in force so far as, by the Court or Judge before whom a question is tried relating thereto, they shall be held to be just and reasonable to be exacted by the company.

Provided, however, that the provisions of this section shall not authorize a company or other insurer to vary, omit, or add to the statutory condition 22: 1916, c. 29, s. 2.

Provided also that a policy may contain a coinsurance clause, but in such case there shall be printed or stamped across its face in conspicuous type and red ink the works: "This policy contains a coinsurance clause."

6. No such variation, addition, or omission shall, unless the same is distinctly indicated and set forth in the manner or to the effect aforesaid, be legal and binding on the assured; and no question shall be considered as to whether any such variation, addition, or omission is under the circumstances just and reasonable; but, on the contrary, the policy shall, as against the insurers, be subject to the statutory conditions only, unless the variations, additions, or omissions are distinctly indicated and set forth in the manner or to the effect aforesaid. R.S. 1911, c. 114, s. 6.

7. In case a policy is entered into or renewed containing or including any condition other than or different from the conditions set forth in the schedule to this Act, if the said condition so contained or included is held by the Court or Judge before whom a question relating thereto is tried to be not just and reasonable, such conditions shall be null and void. R.S. 1911, c. 114, s. 7.

8. A decision of a Court or a Judge under this Act shall be subject to review or appeal to the same extent as a decision by such Court or Judge in other cases. R.S. 1911, c. 114, s. 8.

Reference to Superintendent

9. Notwithstanding the provisions or conditions contained in any contract of fire insurance within sections 2 and 25 of the "British Columbia Fire Insurance Act" or any agreement or other document relating to any such contract, to the contrary, now or hereafter entered into by any insurance company carrying on business in the province of British Columbia, the insured shall, in the event of the charges and expenses of adjusting losses under any such contract or agreement not being in the opinion of the insured just and reasonable, have the right to refer the items of said charges and expenses to the Superintendent of Insurance, appointed under the provisions of the "British Columbia Fire Insurance Act," for adjustment, and the said Superintendent shall thereupon consider the same and shall have full power to reduce or increase the amount of said charges and expenses, and the decision of the said Superintendent shall be final and binding upon all parties concerned. 1916, c. 29, s. 5.

10. Nothing in section 4 of this Act contained shall be construed to compel the printing of the conditions set forth in the schedule to this Act on policies of fire insurance before the first day of January, 1920. (*New.*)

11. The expression "premium paid," where used in clauses 10 and 11 of the statutory conditions, shall not be deemed to include premiums paid by an insurance agent to his company in pursuance of the contract of agency between them if the premium has not in fact been paid by the assured or other parties in interest to such agent.

12. The "Fire-insurance Policy Act," being chapter 114 of the "Revised Statutes of British Columbia, 1911," and the "Fire-insurance Policy Act Amendment Act, 1919," being chapter 29 of the statutes of 1916, are hereby repealed. (*New.*)

Licenses Under Fire Insurance Act

The following companies were licensed under the British Columbia "Fire Insurance Act" since January 1st, 1919:—

*Canadian Surety Co.	Toronto
China Fire Insurance Co., Ltd	Hong Kong
*General Accident Assurance Co. of Canada	Toronto
*Guardian Insurance Co. of Canada	Montreal
Scottish Metropolitan Assurance Co., Ltd.	Edinburgh
United States Fire Insurance Co.	New York

*These companies had been transacting miscellaneous insurance business in the province under license under the "Insurance Act," but have now obtained supplementary licenses to transact fire insurance.

No companies transacting fire insurance withdrew from the province in 1919.

The Gresham Life Assurance Co., Ltd., London, England, ceased to transact business in the province in June last.

Companies Licensed Under Insurance Act

The following companies were licensed under the "Insurance Act," for classes of insurance as indicated:—

Ætna Life Insurance Co., Hartford, life.
†Alliance Insurance Co. of Philadelphia, Marine and automobile (excluding insurance against loss by reason of injury to the person).
†American Alliance Insurance Co., New York, automobile (excluding insurance against loss by reason of injury to the person).
†Continental Insurance Co., New York, tornado and explosion (including riot and civil commotion).
†Fidelity-Phenix Fire Insurance Co., New York, tornado and explosion (including riot and civil commotion).
†Firemen's Insurance Co., of Newark, marine.
†General Accident Fire and Life Assurance Corporation., Ltd., Perth, Scotland, automobile (excluding insurance against loss by reason of bodily injury to the person).
†Glens Falls Insurance Co., Glens Falls, hail, tornado, automobile, inland transportation and explosion (including riot and civil commotion).
†Globe and Rutgers Fire Insurance Co., New York, inland transportation, automobile (excluding insurance against loss by reason of bodily injury to the person) and explosion (except upon steam boilers, pipes, fly-wheels, engines and machinery connected therewith or operated thereby).
†Hartford Fire Insurance Co., Hartford, hail, explosion (including riot and civil commotion), inland transportation, cyclone or tornado, sprinkler leakage, and insurance against loss or damage to automobiles by accident, burglary or theft.
†Liverpool-Manitoba Assurance Co., Montreal, explosion (including riot and civil commotion).
†National Benefit Assurance Co., Ltd., London, Eng., marine.
†Newark Fire Insurance Co., Newark, marine and automobile (excluding insurance against loss by reason of bodily injury to the person).
†New Jersey Insurance Co., Newark, automobile (excluding insurance against loss by reason of bodily injury to the person).
New Zealand Insurance Co., Ltd., Auckland, marine.
†Northern Assurance Co., Ltd., London, marine, accident, sickness, automobile, plate glass and guarantee.
†Northwestern Mutual Fire Association, Seattle, automobile (excluding insurance against loss by reason of bodily injury to the person).
Scottish Metropolitan Assurance Co., Ltd., Edinburgh, accident, sickness, guarantee and automobile.
United States Fire Insurance Co., New York, automobile (excluding insurance against loss by reason of bodily injury to the person) and explosion (including riot and civil commotion).
United States Lloyds, Inc., New York, marine.
†Westchester Fire Insurance Co., New York, explosion (including riot and civil commotion).
Western Casualty Co., Denver, Colorado, accident and sickness.
Western Life Assurance Co., Winnipeg, life.

†These companies had been transacting fire insurance business under license under the "British Columbia Fire Insurance Act," but this year obtained supplementary license under the "Insurance Act" as above.

NEW COMPANIES IN NEW BRUNSWICK

Companies doing insurance business in New Brunswick are not licensed, but are taxed an annual fee which has almost the same effect. Lists of the companies doing business appear in the public accounts, and these for the last fiscal year ended October 31st, 1919, are not yet available. Comparison of the accounts for 1918 with those for 1917 shows that the following companies had commenced or resumed business in 1918:—

Accident and Guarantee Companies.

Dominion Gresham Guarantee and Casualty Co.
Maryland Assurance Corporation.
Masonic Mutual Accident Co.

Fire Insurance Companies.

Alliance Co. of Philadelphia Insurance.
Allied Underwriters Agency of the Acadia Fire.
Insurance Co. and the Phœnix Assurance Co., Ltd., of London.
British Traders' Insurance Co., Ltd.
Eagle, Star and British Dominions Insurance Co., Ltd.
London Assurance Corporation.
North American Accident Insurance Co. (Fire Branch).
Queensland Insurance Co., Ltd.
Union of Paris Fire Insurance Co., Ltd.

Leading Life Insurance Decisions of 1919

Dominion Trust Co. vs. New York Life — Robinson vs. London Life — Re Hewitt — Foxwell vs. Policy Holders Mutual — Belanger vs. L'Union Mutuelle—Standard Life Assurance vs. Kraft — Sun Life vs. McLean

DURING the year 1919, the Courts of Canada handed down a number of important life insurance decisions, and in order to make this review complete, it is necessary to include a number of cases decided in 1918, but not reported in the official law reports until the present year.

Referring first of all to life insurance decisions, probably the leading case is Dominion Trust Company vs. New York Life, a Privy Council decision which has already been covered in our columns, but which may be briefly referred to here in order to make the list complete. In this case, it will be remembered, the insurance company resisted payment on the ground that Arnold, the assured, had committed suicide, and the question was whether the evidence was sufficient to establish the fact that Arnold had not died a natural death.

The Privy Council decided that the defence of suicide was established on two grounds. First, that the evidence of Arnold's financial state proved a strong motive for self-destruction; and, secondly, that the evidence of the circumstances surrounding his death all pointed strongly to the same inference; in fact, that the evidence precluded any other reasonable explanation.

When Does Contract Go Into Force?

In the case of Robinson vs. The London Life Insurance Company, a decision of the Ontario Supreme Court, Appellate Division, the facts are rather interesting, as it appeared that on the 24th of February Robinson handed in to the agent of the London Life his application for a one-thousand-dollar policy and the premium, which the agent forwarded to the company the same day. On the next day, February 25th, Robinson died. On the 26th the application and cash reached the head office, the medical report was approved on the 27th, the policy actually written out and put on the list for mailing the following day, when the company became aware of Robinson's death, and refused to send out the policy or to pay the claim.

In this case the decision was in favor of the company on the ground that in order to constitute a valid contract of life insurance the company must tender a policy which must be accepted by the assured. "The plaintiff has in my opinion failed to show that an insurance contract on the life of her husband was in force at the time of his death, and the judgment in her favor should be set aside with costs," said the Court.

Jurisdiction of Provincial Law

Re Hewitt, a decision by Judge Latchford of the Ontario Supreme Court, concerned a soldier's will, it appearing that James D. Hewitt, then living in Manitoba, took out a policy in favor of his mother in the Crown Life Insurance Company, having its head office in Toronto. Later on Hewitt moved to British Columbia, enlisted, married, made a will in favor of his wife on the usual form for a soldier's will, adopted officially, and, Judge Latchford says, "stupidly," by which he bequeathed all his personal property to his wife.

When Hewitt was killed in France his mother claimed the policy, setting up the claim that the will changing the beneficiary named in the policy would be governed by the laws of British Columbia and that according to the laws of that province the change by the will was not sufficient. Judge Latchford held, however, that the laws of Ontario and not the laws of British Columbia would govern and decided in favor of the wife.

Liability Under Lapsed Policy

In another Ontario case, Foxwell vs. Policy Holders Mutual Insurance Company, the policy provided that premiums should be paid on or before the sixteenth day of the month in which they fall due, that a grace of one calendar month from the actual due date would be allowed for the payment of all premiums, that when a premium was not paid within the one month's grace the policy should lapse and become void, but that it could be revived on production of evidence, satisfactory to the company, that the insured was in good health and on payment of any overdue premiums, with interest. The policy also contained an indorsement that no receipt for premium payments should be valid or binding upon the company except those issued from the head office in Toronto, upon the company's printed forms, signed by certain designated officers of the company, but that premiums, when not overdue, may be paid to an agent of the company in exchange for the official receipt signed as provided above and countersigned by the agent.

Premium Was Overdue

In this case the Foxwell policy had been overdue since the 15th of July, and on August 21st, Mrs. Foxwell, the wife of the insured, paid the overdue premium to Marsh, an agent of the company, for which he gave her his personal receipt with a statement therein that the official receipt would follow. Marsh handed in the money to the bookkeeper of the company, and on August 22nd the bookkeeper sent Foxwell the official receipt properly signed and countersigned, but with a statement therein that "agents are not authorized to receive premiums after the expiration of the thirty days of grace. Any person making such payment does so on the agreement that the acceptance thereof for the company shall not be claimed or regarded as evidence of waiver of any of the terms or conditions of the policy."

At the time the official receipt was sent out Foxwell had been ill for about a week and died on August 22nd, the day the official receipt was mailed. As soon as the company was notified of this fact it repudiated all liability and endeavored to return the identical money which remained in an envelope until Marsh should return to the head office, and subsequently the company defended a suit brought on the policy on the ground that the policy had not been revived as provided by its terms, and that there had been no waiver on the part of the company of those terms in accepting the overdue premium.

The decision of the Court was in favor of the company. "The policy had lapsed; it was incumbent on the insured to show that it was revived; and she is confronted with abundant notice of the conditions under which alone it could be revived," said the Judge. "The money never 'got home' to the company, in the sense that it was accepted by them and went regularly through their books. It was entered in the cash-book only, but never entered on the policy card, and it did not form part of the bank deposit of that day. As I said before, it remained in the envelope until Marsh should come back, and then efforts were made to return the money in specie, as before set forth."

Mutual Benefit Life Insurance

The case of Belanger vs. l'Union Mutuelle, decided by the Quebec Court of Review, was one in which a Mutual Benefit Society was sued on a policy of life insurance, and the rules of the society required that premiums should be paid promptly on a certain date, and the society set up the defence that the dues of the deceased member had not been paid according to the by-laws, but the Court decided against the society as it could not prove that it had ever enforced these by-laws, and on the contrary had established a custom of accepting payments at any time from members in arrears.

"We say there is no violation," said the Court. "The record shows that nearly every one of the members were

at one time or another in arrears and not one of them was ever suspended. There was no violation then because there never was any effort to enforce the rule. We say the society created a custom of accepting arrears which was so well recognized that all the members believed and knew that even if they were in arrears the money would be taken any time they would pay, and gladly taken. Having created that custom, the society cannot now invoke a rule or regulation which, by that custom, is absolutely destroyed, and thereby escaped liability under the conditions of the policy, as during the whole time the assured was a member of the society he paid his dues in arrears, which arrears were accepted by the society without question. The agents of the society were instructed to collect arrears from the members, and one of the agents, a few days before the death of the assured, collected arrears from him, which the society had retained. The society is bound by the custom which it created and followed, and the assured at the time of his death was a member in good standing. The society never suspended him or notified him that he was suspended."

Changing the Beneficiary

In the case of the Standard Life Assurance Co. vs. Kraft, decided by the Ontario Supreme Court, one Kraft took out a life insurance policy payable to his father, Dilman Kraft, and later on the son married and the father assigned his interest in the policy to the wife. The husband and wife failed to agree, the son directed that the policy be payable to the father, died, the widow claimed the insurance, and the question was whether the widow or the father was entitled to the money.

The decision of the Court was in favor of the father on the following grounds:—

"All that passed to her by the assignment was what the assignor was then entitled to. If no subsequent direction had been made by the deceased, she would have been the person entitled to the insurance money; but the deceased, in the exercise of his statutory right, determined that it should not go to her, but should go to his father, and so directed. The right of the father under this subsequent direction was a different right from that which had been assigned to the appellant. There is no room for the application of the doctrine of estoppel; that doctrine is applicable to a case where a person acquires it, and, by the application of that doctrine in such a case, the assignment passes the interest acquired, and it is said to 'feed the estoppel,' and the assignment then takes effect in interest and not by estoppel. That doctrine has no application where some interest has passed by the assignment, as was the case here."

Beneficiary Under Endowment Policy

Section 171 of the Ontario Insurance Act contains the following provisions:—

"Every person of the full age of 21 years shall have an unlimited insurable interest in his own life and may effect bona fide at his own charge insurance of his own person for the whole term of life, or any shorter term for the sole or partial benefit of himself, or of his estate, or of any other person, whether the beneficiary has or has not an insurable interest in the life of the assured, and the insurance money may be made payable to any person for his own use or as trustee for another person.

"The assured may designate the beneficiary by the contract of insurance or by an instrument in writing and may by that or any such instrument, and whether the insurance money has or has not been already appointed or apportioned, from time to time, appoint or apportion the same, or alter or revoke the benefits, or add or substitute new beneficiaries, or divert the insurance money wholly or in part to himself or his estate, but not so as to alter or divert the benefit of any person who is a beneficiary for value, nor so as to alter or divert the benefit of a person who is of the class of preferred beneficiaries to a person not of that class or to the assured himself or to his estate."

Sun Life Assurance Co. vs. McLean was a case where the assured took out an endowment policy payable to his mother, with the usual options should the assured survive the endowment period. About eight years later, the assured directed that the policy should be payable to his wife, and when the policy matured in 1918, the assured being alive, the company issued a check in favor of the wife for the amount of the policy with profits, and sent it to the assured to be delivered to the wife.

The assured returned the check and filed with the company a new designation making the policy payable to his mother, and in a contest between the wife and the mother the Court decided in favor of the latter.

"The company's contract is with the assured," said the Court. "He is the assured, and, whether his designation of the wife as beneficiary had the effect of designating her merely as the person to receive the money in case of his death or designated her also to receive the money (or, instead of receiving the money, to receive—e.g., some money and a new policy) in case he lived, I cannot find in the statute anything to deprive him, during his life and prior to the discharge of the policy by payment or otherwise, of his statutory right to substitute a new beneficiary. Notwithstanding the fact that the company had issued a check, which had not reached the hands of the wife, if she was the proper person to receive payment, the policy was a subsisting policy, and the company's contract with the assured had not been discharged, when, in November, 1918, he attempted to revoke the benefits theretofore conferred upon his wife and to substitute his mother as beneficiary; and I think that his attempt was successful, and that whatever rights the wife had theretofore possessed passed to the mother."

MISCELLANEOUS INSURANCE DECISIONS IN 1919

Robb vs. Merchants' Casualty Co.—North American Accident Insurance Co. vs. Newton—Morran vs. Railway

THE Manitoba Court of Appeals in the case of Robb vs. Merchants' Casualty Company dealt with a policy providing for payment for accidents "caused solely and exclusively by injuries covered by this policy and sustained while riding as a passenger in the enclosed part of any public passenger conveyance provided for the exclusive use of passengers and propelled by steam, compressed air, gasoline, cable or electricity, or while riding as a passenger on board a steam or gasoline vessel for the regular transportation of passengers, and such injuries shall be due directly to or in consequence of the wrecking of such car or vessel." The insured was accidentally killed while being conveyed as a passenger in an elevator in the Marshall Field Annex Building in Chicago, and the question was, whether the injuries were "sustained while riding as a passenger, within the enclosed part of any public passenger conveyance," within the meaning of the policy.

The decision of the Manitoba Court was that the circumstances of the case did not bring it within the terms of the policy and that the company was not liable. "I cannot come to the conclusion," said the Chief Justice of Manitoba, in delivering judgment, "that the provisions of the policy were intended to include a passenger elevator in a building such as the one in which the accident took place. There is a further condition in the clause, which, unless explained away, is fatal to the right of the insured to recover. This condition is in the following words: 'and such injury shall be due directly to or in consequence of the wrecking of such car or vessel.' The elevator car in question was not wrecked, and the accident was not due to any such cause. Clearly, I think, the condition, that the injuries must be due to the wrecking of the car or vessel, applied to this case."

Liability for Personal Injury

In the case of Morran vs. Railway Passengers Insurance Company, a decision of the Appellate Division Supreme Court of Ontario, the facts, briefly stated, were that Morran was insured by an accident policy in the usual form providing that it covered bodily injury through accidental means and as the direct result of some cause not attributable to the

assured's state of health. The assured was permanently injured in a fight, started by "the other fellow," and the decision of the Court was that the insurance company was liable although the assured's health may have been slightly affected before that time and without his knowledge, and that the fact that the assured had changed his occupation to one falling in a more hazardous class without notifying the company did not in this case render the policy void.

"I am satisfied, upon the evidence, that the assured was a land agent, and this only, when the policy was obtained," said the Court. "When the last renewal receipt was issued and thereafter, he was occasionally engaged in handling cattle. This was because land agency business was almost at a standstill. He had not abandoned the calling of a land agent, and he perhaps occasionally put through an occasional transaction, but he was occupied for the time being in what was once one of his regular callings. He was not injured while so engaged. His injuries had no relation to what he had in the meantime been engaged in."

North American Accident Insurance Company vs. Newton, decided by the Supreme Court of Canada, was a case where the insurance company issued an employer's liability policy undertaking to indemnify the firm of N & F against loss from liability for damages on account of bodily injuries suffered by their employees, one condition of the policy being that no action could be brought against the insurance company unless it should be brought for loss actually sustained and paid in money by the assured in satisfaction of a judgment against them for personal injuries to the employee, and after a trial of the issue. An employee of N & F was injured and started suit against them. While the suit was pending N & F made an assignment for the benefit of their creditors under the Manitoba Assignment Act, and when the suit was decided judgment was given in favor of the employee and against N & F. Then B, a friend of the employee, paid to the assignee of N & F the amount of the judgment which the assignee paid to the injured employee in satisfaction of his claim, and then the assignee brought suit against the insurance company for the full amount of the judgment so paid. Then the insurance company set up the defence that, under the circumstances, it was not bound to pay any larger amount than the dividend which the employee would have received from the insolvent estate of N & F if there had been no insurance policy.

The Supreme Court of Canada decided, however, that the insurance company was bound to pay the full amount of the judgment under the terms of the policy. "The contention of the company is that this contract is not only a contract of indemnity but also of previous payment by N & F," said the Court. "But in this case there was a previous payment which had been made and we are not concerned with the question whether that payment had been rightly or legally made by the assignee. The condition of previous payment has been fulfilled, and the company cannot pretend now that it is not bound to reimburse the amount which has been paid by the assignee."

Leading Fire Insurance Decisions in 1919

Shepard vs. British Dominions and Glens Falls Companies — Wetmore vs. British and Canadian Underwriters — Rodgers vs. General Fire and Mercantile Fire Companies — Roth vs. Farmers Mutual — Forsyth vs. Walpole Farmers Assurance Co. — Scott vs. Crinnian — Ross vs. Scottish Union and National

A RATHER interesting fire insurance case is Shepard vs. British Dominions General Insurance Company and Glens Falls Insurance Company, a decision of the Supreme Court of Saskatchewan, where it appeared that the insured property was burned on April 1st, a rather bad and serious joke on the assured, and on April 5th the manager of the Merchants Bank of Canada, to whom the loss was payable, verbally notified the agent of the two companies who sent adjusters to investigate the loss, and, as it appeared to have occurred under suspicious circumstances, the companies refused to pay. Then there was considerable correspondence between the companies and the bank, and finally in October the claim was placed in the hands of the solicitors for the bank who furnished a formal notice and proofs of loss as required by the policies in February and started suit in March.

Proof of Loss

The policies contained the usual conditions providing that the insured "is, forthwith, after loss, to give notice in writing to the company," and is to deliver, as soon afterwards as practicable a proof of loss, containing the particulars set forth in the policy, and the Glens Falls policy provided that the loss should not be payable until thirty days after the completion of the proofs of loss, and the British Dominions policy provided that the loss should not be payable before sixty days after such completion of the proofs. The company set up the defence that the provisions in the policies relating to notice and proofs had not been complied with.

The Court held that while the notice and proofs of loss were not given according to the terms of the policies, the assured was released from that defence under the Saskatchewan Fire Insurance Policy Act, which provides that "where, by reason of necessity, accident or mistake, the condition of any contract of fire insurance as to the proof to be given to the insurance company after the occurrence of a fire has not been strictly complied with, no objection to the sufficiency of such statement or proof shall be allowed as a discharge of the liability of the company."

The assured was therefore in as good a position as if he had given the written notice of loss required by the policies, but he failed to recover, as the proofs were given on February 29th, and the action commenced on the 22nd of the following March, so that thirty days (in the case of the Glens Falls policy), and sixty days (in the case of the British Dominions policy), had not elapsed, and the action was not therefore, brought as required by the policy, the Court holding that this condition must be strictly complied with, and threw the case out of court.

On appeal to the Supreme Court of Canada, however, that Court held that when the trial judge granted the assured the relief which he did under the Saskatchewan Fire Insurance Act, the effect was to put the assured in the same position as if proofs of loss had been furnished "forthwith," and that the provision of the policies that action could not be brought until a certain time after furnishing the proofs, would be of no effect, and that the assured could, therefore, recover.

What Constitutes Notice of Loss

A similar case is Wetmore vs. British and Canadian Underwriters, a decision of the New Brunswick Supreme Court, where it appeared that by the provisions of the policy the assured was required to give notice in writing forthwith after the loss, that he did not do so but verbally notified the agent of the company and the agent of the company notified the company, and the Court held that it was a substantial compliance with the requirements of the policy, and that the assured could recover, in view of the New Brunswick Fire Insurance Act which provides that, "where, by reason of necessity, accident or mistake, the conditions of any contract of fire insurance on property in this province as to the proofs to be given to the assured after the

occurrence of fire, have not been strictly complied with, the liability of the company shall not be discharged."

"It appeared, therefore, by the evidence, that while the insured did not himself give notice in writing to the company, he informed the agent who had solicited the insurance from him and that agent notified the company in writing," said the Court. "In my opinion, that is a substantial compliance with the provision that any person entitled to make a claim under the policy should forthwith, after loss, give notice in writing to the insurer. In any event it is a partial compliance or attempt at compliance with that provision, and I think it might be regarded in that light by the trial judge, but if he was of the opinion that the condition had not been strictly complied with, he had full authority under the New Brunswick Insurance Act to regard it as having been made by mistake and refuse to allow the objection to the sufficiency of the notice."

Meaning of Additional Insurance

In the case of Rodgers vs. the General Fire Insurance Co. and the Mercantile Fire Insurance Co., a decision of the Appellate Division of the Ontario Supreme Court, it appeared that the General Fire Co. issued a $1,000 policy on Rodgers goods in store number one specified in the policy, and later on, by a declaration signed by the authorized agent of the company, it was stated that the property insured under the policy had been removed to store number three, and that such property should in future be held insured in the said store and not elsewhere. Rodgers also had a $1,000 policy in the Mercantile Fire Insurance Co. in store number two, with an indorsement signed by the authorized agent of the company authorizing the removal of the said goods to store number three.

Both policies, however, contained a statutory provision providing that "if the insured now has any other insurance on any property covered by this policy which is not disclosed to the company or hereafter effects any other insurance without the written consent of the company, he shall not be entitled to recover in excess of 60 per cent. of the loss or damage in respect to such property," and the insurance companies set up the defence that the consolidation of the new stock in store number three was "additional insurance" within the meaning of the above statutory condition which would prevent Rodgers from recovering more than 60 per cent. of the loss.

The Court decided in favor of Rodgers, however, holding that such a consolidation, with the consent of the duly authorized agent of the insurance company, was not "additional insurance" within the meaning of the statutory provision quoted above.

"It did not appear to me that this view—namely, that the consolidation of the stock created a 'second insurance,' was open to argument; the insurance having been placed properly upon the goods in separate buildings, the authorized removal afterwards to the one building could not make void a policy which was valid at the time the insurance was taken. There was, in fact, no further insurance," said the judge who tried the case.

Liability When Houses Vacated

In the case of Ross vs. Scottish Union and National Insurance Co., decided by the Supreme Court of Canada, it appeared that the policies covered a number of houses "while occupied by .... as a dwelling and situated on .... on the east side of Peel Street, Toronto, and known as house number ...." At the time the policies were placed the houses were vacant, and after they were completed they were leased to tenants, some of whom moved out, all the houses were burned, and in an action brought on the policies the Scottish Union defended on the ground that, while the insurance might have been in force as long as the houses were unoccupied, when they were once tenanted and then vacated, the vacancy clause applied, so that the insured could not collect in respect to those houses, and the Supreme Court of Canada upheld this view.

"It may be," said the Court, "that, having regard to the circumstances, had one or more of the houses been burned before it had become tenanted, assuming the lapse of time not to have been greater than the parties might have reasonably taken to have contemplated for the completion of the building and securing of a tenant, the Court would have held the insured entitled to recover in respect to it. But I am quite satisfied that as soon as each house became occupied the suspensive restriction in the policy on it applied, and vacancy thereafter, as long as it lasted, took that particular house out of the risk."

Property Over Insured

In the case of Forsyth vs. Walpole Farmers Assurance Co., the company insured Forsyth against loss by fire on the contents of a barn to the extent of $1,600, and the application stated that not more than two-thirds of the cash value of any building or personal property could be insured by the company in connection with any other company or otherwise, and the policy referred to the application as forming a part of the policy. While the policy was in force the barns were burned, and the insured contents at that time were of the actual cash value of $850, and the company contended that its liability was limited to two-thirds of the actual cash value at the time of the fire.

As the company did not plead or prove that the application contained any misrepresentation, and as the Ontario Insurance Act provides that "the application shall not as against the insured be deemed a part of or be considered with the contract of insurance except in so far as the Court may determine that it contains a material misrepresentation by which the company was induced to enter into the contract," the Appellate Division of the Ontario Supreme Court decided in favor of the assured.

Vendor's Lien Against Property

In the case of Scott vs. Crinnian decided by Judge Falconbridge of the Ontario Supreme Court it appeared that by an agreement of sale between Scott and Crinnian the former sold to the latter certain land, with a house thereon, for $21,000, to be paid in instalments as specified in the agreement of sale, and another clause in the agreement provided that the buyer covenanted with the vendors to insure and to keep insured the said house for its full insurable value, the said insurance to be made out in the name of the buyer with the loss thereunder, if any, payable to the vendors as their interest may appear, in fact, the usual insurance clause which is generally inserted in mortgages of real estate.

The question then was whether the vendors under the above circumstances were entitled to have the insurance money applied as in the case of mortgage money, and the judge decided that they were, on the ground that the Mortgage Act of Ontario providing that "mortgage shall include any charge on any property for securing money or money's worth," applies to the case of a vendor's lien.

Damage Followed Lightning Loss

In the case of Roth vs. Farmers Mutual Insurance Co., the company insured Roth against loss or damage by fire or lightning. Lightning struck the barn, tore out the end, and in five or ten minutes afterwards a violent wind practically destroyed the entire building, which would not have happened had the lightning not given the wind an inlet, and the question for the decision of the Ontario Supreme Court was whether Roth was entitled to recover the total damage, or whether he was limited to the actual amount of damage done by the lightning alone. The decision in this case was in favor of the assured on the ground that the injury caused by the lightning was throughout the operating and continuing cause, the approximate cause of the final damage to the building.

PRINCE EDWARD ISLAND

No new legislation affecting insurance was passed in Prince Edward Island in 1919, and no new licenses were issued. The companies pay a flat rate tax for which they get receipt annually.

INDUSTRIAL

Vancouver

Canada's Fourth City

The Gateway of the Dominion for Trans-Pacific Trade

Australasia and **India**

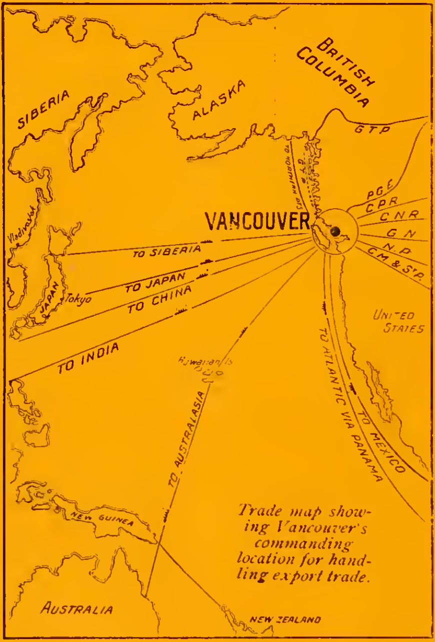
An unexcelled location for Industries Looking for Export Markets

Harbor open the year round.

Climate—Exceptionally favorable—Outdoor work usually possible throughout entire year.

Raw materials from Mine—Forest—Sea—Land in abundance.

Assistance given legitimate industries by Provincial Government.



Trade map showing Vancouver's commanding location for handling export trade.

Fuel Supply—abundant and never failing-Coal and Oil by water transport.

Ample supply of Electric Power.

Water supply of exceptional purity.

Rail connections—Pacific terminus of Canadian and States transcontinentals.

Industrial Sites on Government controlled property, only 9 blocks from city's retail business district, available on long lease at low rental.

Bonafide enquiries from intending manufacturers will receive careful attention. State definite points on which information is desired. Address

VISIT VANCOUVER—SEE FOR YOURSELF

Manufactures In First Peace Year

Plants Have Been Kept Busy in Almost All Industries, but Increase in Production is Chiefly Due to Higher Values—Iron and Steel Industry Is Exception—Attention Turned to Export Trade.

By W. L. EDMONDS.

THAT 1919 was a year which in many particulars differed from any that preceded it in respect to the manufacturing industry of the Dominion there can be no doubt. It is equally certain that preconceived opinions as to what the experience of the industry would be have in the main been the opposite of that anticipated.

When 1919 opened less than seven weeks had elapsed since the signing of the armistice and the concurrent cessation of hostilities. Consequently the manufacturing industry had scarcely entered upon the task of converting its activities from war to peace conditions. As to what might happen during the ensuing period of conversion, manufacturers were, therefore, practically in the dark.

Manufacturers hoped there would, in view of the shortage in nearly all lines of merchandise the world over, be at least a fair measure of trade activity. But there was no certainty about the matter, it being recognized that notwithstanding the anticipated need there would be for manufactured goods, both at home and abroad, there were so many complex factors in connection with the machinery of trade and commerce, each of which must harmoniously function if business was to be transacted with freedom, that it was just about as wise to toss a copper as to venture a guess regarding the potential possibilities of the year which lay before them.

The Problem of Finance

The problem of finance was one which was particularly mystifying. Those who best understood the potential financial strength of the country were the most confident of its ability to meet contingencies at least not beyond the ordinary in character. True, manufacturers as a class were in a much stronger position financially than they were when hostilities began a little over four years before. Not only had a great many of them surpluses to their credit in place of large current liabilities formerly existing, but a great number had prepared for the possible advent of a "rainy day" by investing substantial sums out of war trade profits in securities which could readily be turned into cash should adverse conditions demand it. But while this undoubtedly provided a reserve of strength it did not determine how the world's mechanism relating to money and exchange would function during the period of readjustment upon which industry had entered concurrently with the cessation of hostilities.

To Canada the matter of finance was of particular importance. During the four years preceding the war, of the total security flotation of $1,186,481,332, only $131,328,682, or about 11 per cent., had been contributed by home investors. On the other hand, during the four years ending December, 1918, out of a total of $2,195,520,530 borrowed by federal and provincial governments, municipalities, railways and industrial corporations, $1,561,619,000, or over 71 per cent., came from the pockets of the Canadian people. In view of such an undertaking, and particularly by a country ranked in the debtor class, it was only natural that financiers and manufacturers should at least possess a measure of concern as to how the financial mechanism of the Dominion might function during the strain that the period of readjustment might put upon it.

The Labor Problem

Among other problems of importance to which the manufacturers were giving considerable thought a year ago was the problem appertaining to labor. The return of 300,000 to 400,000 soldiers to peace-time vocations was in itself sufficient to give concern. But plus this there was an approximately equal number of persons who had been employed on war trade work. These necessarily had to be provided for in the readjustment process. To such an extent was the public mind obsessed with this two-fold labor problem that the federal and the provincial governments and municipalities gave much thought and attention to the consideration of ways and means for its solution.

That the year which has just passed into history has not been without its disturbing factors there can be no doubt. Some of them were in fact nothing short of alarming. This is particularly true of the revolutionary enterprises launched at several industrial centres by the extreme radical element which had obtained control of organized labor, and were only prevented from subverting constitutional authority by the co-operative effort of the sane citizenship of the country and the assumption of leadership by the conservative element in the ranks of labor.

But this was a species of disturbance that was not anticipated, or at any rate to the extent it occurred for a few weeks during the summer months. What was generally feared at the dawn of 1919 by those who were giving thought to the possible eventualities of the year were a surplus of labor, a gradual, if not a sharp decline in market prices, a period of unsettlement of domestic trade, and a marked decline in exports, and particularly in manufactured products. That in practically none of these respects have the anticipations of a year ago been realized the experience of the past twelve months amply proves.

Experience of Manufacturing Industries

Manufacturers as a whole have during the year had more business on their books than they have been able to fill with promptitude. This has been particularly true of the key industries such as manufacturers of pulp and paper, lumber, textiles, clothing, boots and shoes, and furniture. Practically the only key industry whose experience was not in accord with that of those outlined above was the iron and steel industry. Being engaged more fully than any other in the production of war material, it naturally followed that the iron and steel industry of the country stood to experience the largest measure of disturbance during the period of readjustment. But that which contributed more than any other factor to the quiet trade experienced during the year was the belief on the part of buyers that a gradual decline in the abnormal prices obtaining for steel of all descriptions must follow the cessation of the demand on munitions account. Consequently they naturally bought as sparingly as possible.

Decline in Quantity Production

But while from the standpoint of value the aggregate output of the factories of the Dominion during the past year was probably equal, owing to the abnormal market prices ruling, to that of any previous year in the history of the manufacturing industry of the country, that it was equal in tonnage or quantity to that of two years ago is scarcely probable. Factory production in 1917, according to the special census taken for that period, had an aggregate value of $3,015,506,869, an increase of $1,608,369,729 over 1915.

To the probable decrease in quantity of output during the past year in the factory output of the country there have been two contributing factors; or rather, to be strictly accurate, one factor with two distinct operating phases. The one was the scarcity of labor, a condition that was entirely different from that anticipated a year ago. This was particularly true in respect to skilled labor. According to authorities consulted, the number of work people employed in the factories of the Dominion during 1919 was practically no larger than five years ago, when the aggregate productive capacity of the plants of the country was much smaller than at present.

Why Labor Is Scarce

When one resorts to a study of the situation in respect to labor the shortage obtaining is not a matter of surprise. There are sixty thousand men who will never return, fully that number having surrendered their lives as a sacrifice to the cause of freedom during the war. But while this is a substantial contributing factor to the inadequacy of the supply of labor, there is a still more potent one to be taken into account. And that is the enormous decline in immigration which has been experienced during the past five years. For example, during the ten-year period preceding the war the annual average number of immigrants to enter the Dominion was 250,000, while in the year 1913 it ran as high as 402,432. On the other hand the total for the four years ended 1918 was but 347,774, and these were mostly farmers.

The second disturbing phase in the labor situation affecting the manufacturing industries of the Dominion during the year was the inefficiency which characterized workmen. During the war period skilled labor employed in the factories of the Dominion demonstrated that it was as high in the quality of efficiency as that employed in the factories of any other country in the world. In fact, if there was any difference it was in favor of the Canadian workmen. But since the armistice was signed the same psychological phenomenon has settled upon the Canadian workman as has possessed the mind of his confreres the world over.

Not only is he less disposed than ever to render 100 per cent. efficiency per hour of service, but less concern is manifested as to the quality of the product he turns out for his employer, thus on the one hand increasing the unit of cost in respect to production and on the other hand lowering the quality of the article produced. That all workmen have not become possessed of these fallacies follows of course. But the trouble is that a larger average than ever before are thus possessed, and to such an extent that sane and intellectual leaders among organized labor, as well as employers, are endeavoring to persuade men of this class that such practices are suicidal for themselves and menacing to the industrial welfare of the country.

That this spirit of inefficiency, both in respect to quality of service and quality of product, has been one of the most immediate disturbing factors in the manufacturing industry during the past year there can be no doubt. It has not been something deemed possible. It has been an actual experience. And unfortunately there is no clearly defined evidence that the tide of this mental fallacy has taken a turn toward a saner and sounder economic condition.

Expansion in Industry

Notwithstanding the scarcity and inefficiency of labor and the extent to which factories have been taxed to fill orders on home and on foreign account, the past year has been one of expansion rather than contraction. Not only by the manufacturing of new lines has the Dominion become more self-sustaining, and therefore less dependent upon foreign markets, but (and that which is more important still) a number of new industrial corporations have come into existence.

In the pulp and paper industry there has been a decided forward movement. Not only has there been during the year an enlargement of existing mills, leading in certain instances to the doubling of output, but several new corporations have appeared in the field and have plants under construction. Two years ago the pulp and paper output of the country had a total value of $96,340,324, an increase of $50,000,000 in the short period of two years. That it is now substantially greater there can be no doubt.

What has just been said of the pulp and paper industry applies equally to the automobile manufacturing industry. Between 1915 and 1917 the value of the output more than doubled, standing at $54,668,255. But the enormous plants which are now being erected at points in western and eastern Ontario would indicate that this particular industry is on the eve of a still greater period of expansion. And that which is particularly noteworthy is the fact that in the expansion which is taking place provision is being made for the manufacture of parts which were hitherto imported from the United States. It is estimated that when the plans now under way are completed over one-half of the parts entering into the production of an automobile will be of home manufacture.

In respect to the iron and steel industry of the Dominion the most outstanding features of the year were the resumption of building operations on the plant of the Canadian branch of the United States Steel Corporation at Ojibway, estimated to cost about $40,000,000; the bringing to near completion of the ship-plate plant of the Dominion Steel Corporation at Sydney, N.S., and the purchase of the big plant of British Forgings, Ltd., Toronto, by Baldwins, Ltd., Swansea, Wales, for the purpose of entering upon the manufacture of tin plate and other sheet metals.

Shipbuilding

A year ago it was anticipated, owing to the cessation of hostilities, that a serious curtailment would take place in the shipbuilding industry, which came in for such extraordinary development three or four years ago. True, there has been a lull in the yards on the Pacific coast, but taking the Dominion as a whole the industry has been maintained upon a high scale. A statement issued from Ottawa during the last month of 1919 showed that the Dominion government had nearly sixty steel steamers on order with the various yards of the country, giving employment to about twenty thousand men.

One significant thing in connection with the manufacturing industry is the increased interest which American manufacturers are taking in the Dominion as a site for branch factories. The writer is informed by one authority that these new branch factories are being at present established at the rate of two to three a week.

Export Trade in Manufactured Goods

When hostilities ceased it was generally anticipated that, with the elimination of the trade in munitions, which during the fiscal year 1917-18 reached $386,340, there would be a serious curtailment in the export trade in manufactured goods. This anticipation has not been so far realized. The latest available figures are those covering the twelve months ended October, but these are sufficient to show that while there have been decreases in certain lines there have been increases in others and that nothing approaching a debacle has been experienced. As a matter of fact a great many manufacturers have been compelled to turn down large export orders because their activities were more than fully occupied with the demand on home account.

The export trade in iron and steel increased during the twelve months ended October last by over $20,500,000, the total amounting to $66,748,000. Printing paper increased from $36,916,000 to $46,959,000; wood pulp, from $31,366,000 to $35,516,000; automobiles, from $3,692,000 to $11,291,000; manufactures of rubber, from $3,814,000 to $8,204,000; canned meats, from $2,146,000 to $5,027,000.

The changes made in the tariff in June last, affecting over forty items, was on the whole beneficial to the manufacturing industry of the country. Even in the case of agricultural implements compensation for the reduction in the tariff was accorded by lowering the duty on certain raw materials and the securing of lower freight rates to competing points in western Canada. Naturally, pending the result of the coming revision of the tariff, a more or less feeling of unsettlement obtains among manufacturers, and particularly in view of the free trade propaganda being carried on by the farmers. As a result of this unsettled feeling instances are not wanting where expansions of plants are being held in abeyance pending the outcome of the agitation. Obviously, the sooner the task of revision is completed the better will it be for all concerned.

Conservation In Post-War Year

Work of Canadian Commission of Conservation Embraces Agriculture, Forestry, Power and Other Primary Industries—Much Valuable Information Gathered—Importance in Country's Future.

By JAMES WHITE.

THE only prophets whose reputations escaped injury during the war were those who studiously avoided the pitfalls of military uncertainties and confined themselves to the safe and patent prediction that the conclusion of peace would find every combatant nation confronted by critical domestic conditions. This inevitable outcome of years of turmoil needed no penetrating vision to foresee, and the first year of peace has amply fulfilled the prophecy in the number and gravity of the national problems that have arisen. While we in Canada have had our share of urgent difficulties to contend with, we have also been extremely fortunate in that our task has been essentially one of readjustment rather than of reconstruction, such as faces great areas of Europe.

The work of the Conservation Commission is intimately associated with the solution of many of our most pressing problems, and it is gratifying to record the very satisfactory progress of different branches of activity during the past year. Special effort has been devoted to the continuation of the immense task of making an inventory of our natural resources. It is realized that authentic data respecting its material assets, both potential and developed, is essential to sound, national growth at all times, and is decidedly at a premium during this period of readjustment. The business community has evidenced the keenest appreciation of the Commission's labors along these lines. Such a stock-taking is indispensable not only to the proper guidance of industrial expansion but equally so to the intelligent determination and exercise of public policies in respect to the administration of our forests, mineral lands, water-powers and other resources.

Forestry Investigations

The report by R. D. Craig and Dr. H. N. Whitford, on the forests of British Columbia, recently published, comprises the results of one of the most important investigations undertaken by the Commission to date. It has been pronounced by the forestry profession and by lumbering interests throughout Canada and the United States as the most complete work available in regard to extent and character of the timber wealth of any province or state on this continent. Approximately 41 per cent. of the area of British Columbia, or about 145,000 square miles is absolute forest land. Of this area, roughly one-seventh is in the coastal region, but, as compared with the interior, it is much more heavily timbered, comprising over 11,000 square miles of timber-land, carrying 10 M. or more b.f. per acre as against less than 3,000 square miles with an equally heavy growth in the interior region. The total resources of raw material in the province are estimated at 350 billion b.f., of which 214 billion b.f. is in the Coast belt. There is also about 16 billion b.f. of material suitable only for piling, poles, pulpwood, etc., making a grand total of 366 billion b.f. as the total visible stand of merchantable timber in the province.

Resources Not Inexhaustible

Stupendous as this total sounds, this splendid natural resource is by no means inexhaustible. Although the annual growth at present is much greater than the annual cut, the permanence of this favorable condition depends entirely on efficient protection of the forests from fire. Two-thirds of the lands once forested, carrying probably 665 billion b.f., has been already swept by fire. Insect enemies must also be guarded against. It must further be borne in mind that; where the forest reproduces itself, it frequently grows up to trees of inferior species. The quality, as well as the quantity, of this natural reproduction is a vital factor.

It is encouraging to note that the forest survey work of the Commission of Conservation meets with the outspoken approval of the men most directly interested. The Canadian Lumbermen's Association, at its eleventh annual convention, passed a resolution endorsing the Commission's work and urging the government to provide the necessary financial support to carry the work to completion. The information gathered is as useful to the government itself as to the operators. To administer our forests wisely, we must know: (1) What lands should be set aside definitely and for all time as forest lands, (2) the amount of timber available for cutting, (3) the annual cut, (4) the rate and character of reproduction and growth, (5) the accessibility of the stands, (6) the best means of "making the forest safe for trees" by controlling fires and insect pests. R. D. Craig is now conducting a similar study of Ontario, and the field work of a Saskatchewan survey is already completed. Some years ago, the Commission published the results of a Nova Scotia survey, the field work for which was conducted by the provincial government.

Pulp and Paper

Owing to the world-shortage of newsprint and the spectacular development of Canada as a source of raw material to meet the demand, exceptional importance attaches to the pulpwood reproduction studies now being conducted under the immediate supervision of Dr. C. D. Howe. These are being carried on in Quebec, Ontario and New Brunswick. The Dominion Entomological Branch is at the same time making a study of insect damage to trees over the same areas.

The support and hearty co-operation accorded to the Commission by the Riordon, Laurentide, Abitibi and Bathurst companies bears witness to the commercial value and necessity of such research. The primary object is to determine the rate of growth of spruce and balsam under different conditions, and the character of the stands which form the second growth as affected by fire and by the various methods of conducting logging operations.

Not only has the growth of pulpwood been shown to be much slower than was formerly supposed, but the constant cutting of conifers only is, over great areas, causing the less valuable hardwoods to become the predominant type. As these hardwoods, in the more remote districts, can seldom be logged at a profit, it becomes a difficult problem to preserve the character of the limits as a source of pulpwood supply.

The crucial question of forest fire protection has been well to the fore during the past season, which has been a particularly bad fire year. Obviously, unless the scourge of fire is kept under control, all efforts to conserve our forests through improved cutting methods will be nullified. Although considerable progress has been made, we still need a much better organized fire protection service. In this connection, the increasing tendency to eliminate the patronage evil is a gratifying feature. Encouraging results have followed experiments with aeroplanes as fire patrols. Mapping of the forests can also be carried on by aerial photography. This will be a useful field of activity for the new Royal Canadian Naval Air Service.

Power and Fuel Problems

There has never been a more pressing need than exists to-day in Canada for thorough examination of our power and fuel resources. A notable contribution to the literature on this subject is the recent publication of "Water Powers of British Columbia," by Arthur V. White. This compendium, dealing thoroughly with both the extent of the water resources in that province and with the manifold factors affecting their efficient use, has been in the greatest demand from engineers, promoters of industrial enterprises, municipal and government authorities and others associated with the development and management of water powers. It is the final volume of a series published by the Commission of Conservation to afford as complete an inventory as could be obtained of the water-power possibilities of the entire Dominion.

While these reports deal largely with potential water-power resources, the power developments already in existence have not been neglected. These have been catalogued in a separate report, "Electric Generation and Distribution in Canada," by Leo G. Denis. Of 565 plants reported, 358 are in private and 207 in public ownership. Classified as to prime movers, there are 270 hydraulic, 201 steam and 94 internal combustion. The total capacity of all the plants is 2,107,743 h.p., of which 1,806,618 h.p. is developed in the hydro-electric concerns. The demand for power purposes is nearly double that for light, being 632,996 k.w. for the former and 338,253 for the latter. The total length of transmission lines is 5,490 miles.

Special Inquiry in Alberta

A study has been made by the writer of the power situation in Alberta, and a paper on this subject, which was presented to the industrial congress at Calgary last August, has been published in pamphlet form. There are, at present, three important sources of power in that province, namely, coal, water and natural gas. Of these, the first is the most dependable and, having in view the great advance made during recent years in the production of steam power, would be usually also the most economical. Hydro-electric development is hampered by low-water conditions. Natural gas is not suitable for wholesale development of power as it is certain to become exhausted before many years. This gas, once exhausted, cannot be replaced except by manufacturing artificial gas, and hence it should be valued at least as high as coal gas, than which it has a higher heating value. As to petroleum, sufficient quantities have not yet been discovered to make it an important factor, but the chances of such discovery are not remote and he would be a rash man who could venture to predict what may or may not happen in this regard in the near future.

One aid to the solution of Canada's fuel problem, namely, the use of pulverized fuel, is the subject of a treatise by W. J. Dick, till recently mining engineer to the Commission of Conservation. By drying and grinding to an exceedingly fine dust, coal can be made to burn like a gas, after being blown into the fire-box by compressed air. This method eliminates the formation of clinkers and burns the coal most thoroughly, so that no cinders are emitted from the smokestack. Its great importance to Canada lies in the field which is thereby opened up for extending the use of lignite coal and also for using up unmarketable slack. The great disadvantage of lignite coals, that they will not bear transportation, due to disintegration after drying, is entirely overcome by the use of pulverized fuel.

Housing and Town Planning

Mr. Thomas Adams, town planning adviser to the Commission, who is also adviser to the Housing Committee of the Cabinet, has been actively engaged in work connected with the framing and administration of the Dominion Housing Act, whereby $25,000,000 is lent to the various provinces at 5 per cent. for the promotion of better housing in towns and cities. In Ontario, more than 90 municipalities have applied for grants, and over 60 have already undertaken building operations. About 1,300 houses are under construction and very little remains to be allotted of the Ontario grant of $10,000,000. Other provinces where much progress is reported are Nova Scotia, Manitoba, New Brunswick, British Columbia and Quebec.

The vital connection between town planning and housing is most intimately realized in Quebec, where the policy adopted is that of lending money only for town planning schemes. Such schemes are being shaped at Sherbrooke, Ste. Anne de Bellevue, Kipawa, Hull and Three Rivers, and an interesting project is in hand for the building of a confederation garden suburb at Quebec.

It speaks well for the effectiveness of the propaganda work of the Town Planning Branch that, whereas, when the branch was inaugurated in 1915, only Nova Scotia and New Brunswick had town planning acts on their statute books, today seven provinces have this necessary legislative framework and it is practically certain that before long the remaining two provinces will enact similar measures.

Agricultural Work

Through its agricultural adviser, F. C. Nunnick, the Commission has co-operated with the New Brunswick Department of Lands and Mines in the work of soil classification. That department is conducting a forest survey on its Crown lands and is obtaining as much data as possible respecting the suitability of the soil for agriculture. Such a survey is a primary need to avoid the costly and disastrous error of allowing the colonization of areas which are not and never will be adapted for permanent agriculture. Indiscriminate settlement on unsuitable land is an economic blunder for the country and a tragic experience for the settler.

An account book published as an experiment by the Commission and especially designed for the use of *bona fide* farmers has enjoyed a remarkable degree of popularity and shown conclusively that the average farmer is keenly alive to the value of a thoroughly practical method of bookkeeping. There is, of course, room for tremendous expansion in the number of farmers who keep proper accounts, but it is clear that the lack of properly designed and practical account books has hitherto been a decided factor in retarding improvement in the business side of agriculture.

The illustration work previously inaugurated in Dundas County has been continued with very satisfactory results. The various projects of this nature initiated by the Commission have left no doubt regarding the efficacy of demonstrating the advantages of modern methods of agriculture right at home on the farmer's own place or on his neighbor's.

Wild Life and Fur Farming

The proceedings of the National Conference on Conservation of Game, Fur-bearing Animals and other Wild Life, which was held last February, have been published by the Commission. This conference was attended by representatives of the Dominion and provincial governments, and of various game protective associations, as well as by delegates from the United States. As a result of the conference it is expected that better co-operation will take place in future, both between the various authorities themselves and also with sportsmen and others most directly concerned, especially in the administration of such laws as the Migratory Birds Convention Act, which has an international importance.

Conservation and Reconstruction

It will be observed from the foregoing resumé that the Conservation Commission's activities are intimately related to many of the most vital questions of the hour, such as the increase of our primary production, the development of new sources of power, the conservation of our fuel supply, and the provision of homes to overtake our present serious housing shortage. In the serious times of readjustment that lie ahead of us, it is quite evident that we shall need all our resources, but if our problems are scientifically, as well as courageously, tackled, there is no need for pessimism in the outlook.

TORONTO STOCK EXCHANGE

At the annual meeting of the Toronto Stock Exchange, held on June 17th, 1919, the following officers were elected:—President, G. W. Blaikie (G. W. Blaikie and Co.); vice-president, E. G. Wills (Brouse, Mitchell and Co.); secretary, H. Franks (Osler and Hammond); treasurer, C. E. Abbs (A. E. Ames and Co.); committee, J. C. Fraser (F. H. Deacon and Co.), D. S. Cassels (Cassels and Biggar), O. Heron (Heron and Co.).

RECENT PROGRESS IN CANADIAN INDUSTRY

Destructive Influences Have Been Defeated—Room for Application of Science—Preserve Home Markets and Promote Trade Abroad

By Sir John Willison

CANADA to-day is fortunate in the enjoyment of industrial peace. The civic elections at Winnipeg have resulted in another victory for the general public and for constitutional forces, and we may rejoice that One Big Unionism has met with another defeat. As Winnipeg experienced and revealed the destructive effects of class despotism, it is fitting that it should enjoy the further discomfiture of those who would have introduced Bolshevism into Canada and have overthrown established institutions. But great as the services of Winnipeg have been, credit should not be denied to Hon. Gideon Robertson, to the Canadian manufacturers who displayed such public spirit at the industrial conference at Ottawa, and finally to Mr. Tom. Moore, Mr. P. M. Draper, and the other moderate and influential leaders of organized labor who received such striking endorsation at the annual Trades and Labor Congress at Hamilton where the organized workers of the Dominion finally and overwhelmingly denounced One Big Union leaders and followers.

Granted no unwise interference with the tariff, the way now seems clear for thorough industrial reconstruction. The human rights of labor have been recognized. The movement so strongly supported by the Canadian Reconstruction Association and by public-spirited and influential groups and individuals to improve the relations between employers and employees has met with considerable success. Now that we have industrial peace, the reconstruction motto of Canada might well be "Efficiency, Economy and Production." The tremendous increase in national finance obligations during the war period makes thrift imperative. The net national debt is now $1,750,000,000, a per capita charge on every man, woman, and child in the Dominion of $197.85 as compared with $43.49 five years ago. For the same reason new wealth must be created both through increased output from fields and factories and from scientific investigation and utilization of our natural resources.

Much Loss Through Waste

The Canadian Reconstruction Association believes that there should be more generous federal and provincial contributions to scientific and industrial research. The value of such investigations have been amply proved by the Research Council at Ottawa. Already it has demonstrated the commercial feasibility of utilizing the lignite deposits of the prairie provinces as domestic fuel. As a result of its investigations into the utilization of fish waste it has discovered that the annual yield of the Canadian fisheries can be increased by over twenty-five per cent. It estimates the loss in fat and proteins in the 300,000 tons of waste that are thrown away yearly at $10,000,000, and in oil at $2,000,000. It is conducting other important investigations, all designed to make new wealth. Its work has as great value for agricultural as it has for industrial communities. For the past three years it has been conducting very important experiments to produce a variety of wheat less susceptible to the present dangers of early frost and rust-fungus.

Among the supreme considerations of the reconstruction period are the development of home and foreign markets. The experience of the Canadian Trade Commission has already provided abundant proof that there are large new markets for Canadian farm produce and manufactured products if necessary financial credits can be arranged. It rests with the industrial, financial, and business interests to provide the necessary credit machinery. New markets we must have. The Canadian Reconstruction Association strongly supported the action of the federal government in appointing the Canadian Trade Commission at Ottawa and the Canadian Trade Mission in London, and in sending a special Economic Mission to Siberia. It advocated and approved the establishment of export credits with foreign countries for purchases in Canada, and it has persistently urged the creation of industrial groups for the development of foreign trade. In the domestic field it has conducted a comprehensive campaign for purchase of Made in Canada products and development of the home market. It has shown full-size bill-posters throughout the cities and towns in the Dominion, and it has circulated over 5,000,000 specially prepared small pictorial cards amongst employees and purchasers, all advocating public support of the home market. In addition it has made extensive use of motion pictures to stimulate public interest in the national value of industrial development. The pictures deal with various industries and illustrate not only final processes of manufacture but also stages of progress from the employment of raw materials to the finished products. The variety of the subjects is illustrated by the titles, which include the iron and steel, woolen, agricultural implements, pulp and paper, sugar, and cocoa and chocolate industries. The pictures are being shown in seventy-five per cent. of the cities, towns, and villages throughout the Dominion which have moving-picture theatres, and it is estimated that they are seen by over three-quarters of a million people weekly.

Tariff Protection Is Necessary

The Association has emphasized the danger to labor, to production, and to industry of any radical revision of the tariff downward, and has repeatedly called attention to the international economic movement towards protection, and the determination of the great nations of the world to preserve their own markets as far as possible for home industries. Among its general educational activities it has conducted an active campaign against Bolshevism, and its publications this year include:—

> Bolshevism.—The Poison of Production; A Unity Programme for Canadian Women; Standardization and Specialization; Co-operation or Conflict; Tariff, Labor and Unity; Trade and Tariff in the United States; Better Houses for Canadians; Canada Needs Protection; Women of To-day and To-morrow; Bolshevism, the Lesson for Canada; What Shall I Do Now? How to Work for Canada in Peace.

In addition to the above activities, the Association was one of the leading factors in opposing the proposed double taxation by the United States of Canadian branches of American firms. On January 1st, it appealed through the head office and its eastern and western committees, to municipalities and boards of trade throughout Canada to provide "buffer" employment during the reconstruction period by construction at the earliest possible moment of all necessary public works. In February, it appealed again to boards of trade to call reconstruction conferences of representative elements in their communities. It has issued a bulletin service periodically for the information of its members and a weekly press service.

CANADIAN SHIP TONNAGE

Besides the building of ships for the Dominion government merchant marine, described in the article elsewhere in this issue, many additions were also made in 1919 to the Canadian Pacific Ocean Services, Ltd., operated in connection with the Canadian Pacific Railway. Among these are three large passenger ships which will shortly be added. They will be of the "Minnedosa" type, and will be named the "Montcalm," "Matapedia" and the "Montmorency." All three are being built in Scotland, the first two by John Brown and Co., on the Clyde, and the third by the Fairfield Shipbuilding and Engineering Co., Govan, Scotland. They are to be in use before the end of 1920. The "Empress of Britain," which has been under the Imperial government for transport of troops and dependents, is now being reconditioned, and will next season be restored to the St. Lawrence traffic. She also is being fitted up as an oil-burner. The "Melita" and the "Minnedosa" have both been borrowed by Britain for service to India.

Development of the Packing Industry

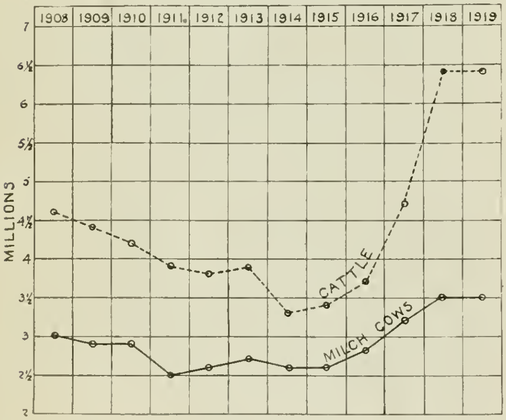
Trade Figures of Recent Years Illustrate Importance of Packing Houses in Livestock Industry—Total Live Stock Reached Maximum in 1918—Some Disturbing Factors in Price and Markets

By S. E. TODD.

ANY review of the packing house industry in the Dominion is essentially a review of its livestock industry. It is, moreover, allowing for the fluctuations caused by the rapid changes in the cost of feeding grains in the past year, its best index, because the packing houses find the best and steadiest outlet for by far the greater number of cattle, hogs and sheep. What is interesting is the undeviating rate of increase in the livestock export trade for the last few years. This is attributable chiefly to the expansion of packinghouse activities. Indeed, throughout this matter it is imperative to keep in mind the close relationship of the livestock field and the development of the commercial and mechanical means by which the farmers' products find their best outlets, either in the growing home markets or the still greater world markets that they can reach only when prepared therefor in the most modern method and meeting the keenest foreign competition.

No apology is needed in *The Monetary Times* for the massing of figures to show this interdependence of two mighty factors in Canada's national prosperity: a balance sheet must always remain, one supposes, two-thirds figures, yet it is the best presentment of a business. One preliminary remark perhaps might be made. If, as the minister of finance stated, "the increase of Canadian exports is the best way of paying off our war debt," our exports of bacon alone prove that the linking of farmer and packing house is of greater importance to the Dominion than many of the general public and too many of the daily newspapers seem willing to acknowledge.

CHART A.



Unquestionably, the most important feature of the livestock industry is the rapidly increasing popularity of the packing plant as a farmers' market. While for a considerable period in the last decade the total numbers of meat animals on farms decreased and the total increase since 1908 is still relatively small, the proportion marketed through the packing houses over the same period has shown astonishing increases. It demonstrates the efficiency of the packer as the one necessary medium between producer and consumer in a way which cannot be refuted. This will be seen at a glance in the comparison of the percentages below:—

	Cattle.	Sheep.	Swine.
Per cent. of increase in total meat animals on farms, 1908-19 ...	31.2	20.8	19.8
Per cent. of increase in slaughterings in packing plants, 1909-19	197.6	107.5	52.2

This may be verified from the tables below, the first showing the last available record of the numbers of meat animals in the Dominion and their distribution by provinces:—

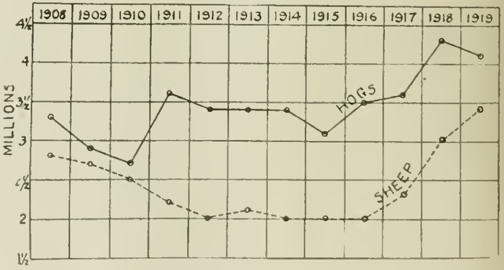
	Cattle.	Milch cows.	Sheep.	Swine.
British Columbia	194,644	51,594	44,985	44,960
Alberta	1,247,448	336,596	364,498	445,858
Saskatchewan .	1,005,501	374,062	146,911	432,367
Manitoba	553,899	227,872	167,170	261,542
Ontario	1,786,175	1,140,016	1,101,740	1,695,487
Quebec	1,213,297	1,056,347	1,007,425	935,425
New Brunswick	211,964	153,053	212,745	104,939
Nova Scotia ...	243,831	162,230	261,529	69,982
P. E. Island ..	79,815	45,662	114,955	49,510
Canada	6,536,574	3,547,432	3,421,958	4,040,070

Livestock totals slaughtered at Canadian inspected establishments since 1909:—

Year ended March 31.	Cattle. No.	Sheep. No.	Swine. No.
1909	298,241	191,792	1,532,796
1910	384,789	257,049	1,261,496
1911	411,308	329,017	1,452,237
1912	408,401	376,437	1,852,997
1913	450,390	455,647	1,607,741
1914	531,994	499,280	1,799,060
1915	530,425	447,173	2,598,338
1916	542,154	403,147	2,363,693
1917	648,859	416,575	2,245,511
1918	739,085	336,987	2,129,682
1919	887,773	397,961	2,333,354

The accompanying charts, A and B, show the fluctuations in live stock since 1908. The steady drop in numbers, especially of cattle and sheep, until the first year of the war, is noteworthy. Both hogs and cattle appear to have reached the "peak" in 1918.

CHART B.



Packers' Purchases

The following is the volume of live stock purchased on public stockyards by Canadian packers, from January 1st to December 4th, 1919, inclusive:—

	Cattle.	Calves.	Hogs.	Sheep.
Toronto	220,856	23,335	413,628	207,461
Montreal, Pt. St. Charles	56,906	63,626	78,121	69,499
Montreal, East End ...	59,946	49,882	46,478	49,645
Winnipeg	100,518	10,486	215,418	26,071
Calgary	71,869	......	68,623	12,354
Edmonton	11,257	2,270	19,215	2,196
Totals	521,352	149,599	841,483	367,226

For comparison the following tables of the totals for three preceding (full) years are given:—

Cattle.	1918.	1917.	1916.
Toronto (Union Yds.).........	302,856	292,972	269,508
Montreal (Pt. St. Charles)	62,762	57,198	60,419
Montreal (East End)	65,092	58,289	60,595
Winnipeg	273,443	256,523	147,245
Calgary	133,793	81,210	71,087
Edmonton	45,099	30,980	......
	883,025	777,172	608,854
Calves.			
Toronto (Union Yds.)	55,737	46,756	45,804
Montreal (Pt. St. Charles) . .	63,127	54,083	46,066
Montreal (East End)	48,874	40,773	45,554
Winnipeg	12,169	12,196	11,640
Calgary	5,813	......	......
Edmonton	5,417	5,272	......
	189,137	159,080	149,064
Swine.			
Toronto (Union Yds.)	363,525	445,312	527,489
Montreal (Pt. St. Chas.)	78,131	79,919	86,927
Montreal (East End)	53,047	48,816	64,643
Winnipeg	313,232	278,943	317,683
Calgary	138,549	118,010	121,568
Edmonton	44,284	24,273	......
	990,768	995,273	1,118,310
Sheep.			
Toronto (Union Yds.)	169,420	165,658	157,818
Montreal (Pt. St. Charles)	67,418	73,603	59,149
Montreal (East End)	63,064	50,650	55,299
Winnipeg	36,141	20,665	20,583
Calgary	51,729	19,826	25,087
Edmonton	5,137	3,416	......
	392,909	333,858	316,935

Meat Exports

The quantities and values of the classes of Canadian meats exported in the fiscal year ending March, 1919, were as below:—

	Lbs.	Value.
Bacon	120,622,092	$39,046,058
Beef, chilled, fresh or frozen ...	125,802,733	26,223,955
Beef, pickled, etc.	2,007,561	370,859
Mutton and lamb	1,933,308	441,221
Other meats	5,895,181	588,305
Total, meats, extracts, game, etc.		$85,590,161

The distribution of the total exports of meats in the fiscal year 1919 and for the seven months ending October 31st was:—

	Fiscal year, 1919.	Seven months.
To British Empire	$74,174,938	$49,158,089
To foreign countries	11,415,223	10,312,053

Distribution by Countries

A table showing the countries to which Canadian meats were exported in the year ending in March, and for the first seven months of the present fiscal year exhibits a swing of considerable volume to allied and neutral countries and adds to the assurance that home supplies in these countries as well as in the former enemy lands have been heavily depleted.

	Twelve months ended March 31, '19.	Seven months ended Oct. 31, '19.
Exports of Meats to British Empire Lands:		
United Kingdom	$73,613,471	$48,934,265
Bermuda	46,139	18,087
British South Africa ...	......	92
British Guiana	3,021	1,814
British Honduras	4,650	5,150
British Oceania:		
Australia	34,358	25
New Zealand	1,942	......
British West Indies:		
Barbados	17,598	21,037
Jamaica	2,017	151
Trinidad	10,198	6,670
Other B.W.I.	11,721	4,539
Egypt and Sudan	109,800	......
Hong-Kong	38,487	36,450
Malta	......	270
Newfoundland	281,536	129,539
Foreign Countries:		
Austria-Hungary	......	800
Belgium	9,000	185,368
China	129	33
Cuba	......	986
Denmark	......	292,183
Greenland	802	......
France	1,569,173	99,804
St. Pierre	16,316	6,456
Germany	......	29,235
Greece	......	1,107,474
Haiti	......	1,041
Italy	757,690	3,915,268
Japan	140	44
Netherlands	34,500	124,675
Norway	32,014	67
Panama	......	260
Russia	78,097	16,735
Sweden	......	64,122
United States	8,916,737	4,446,639
Alaska	625	20,863
	$85,590,161	$59,470,142
Recapitulation:		
British Empire	$74,174,938	$49,158,089
Foreign countries	11,415,223	10,312,053

Exports of live animals have a close relation to the packing house. The stockyards are the outcome of the centralized demand of the packer. Therefore it is not surprising that the exports of live animals through the stockyards showed an increase of 190 per cent. in butcher cattle, 143 per cent. in stockers and feeders, 100 per cent. in sheep and 63 per cent. in lambs. There was a decrease in hogs by 226 per cent. compared with the same figure for 1918.

In the returns for the 10 months ending October 31st, of live animals exported there is an interesting sidelight on one of the secondary benefits of the stockyards which were made possible on the present scale largely by the steady purchasing for the packers. The official figures show:—

	Cattle.	Calves.	Sheep.	Swine.
Total exports	299,380	70,234	130,177	28,616
Purchased at Canadian yards	201,087	24,893	52,872	1,090
Purchased from farmer direct	98,293	45,341	77,305	27,526

Uncertain Bacon Prices

The fluctuations in the overseas bacon market in 1919 have been, to say the least, disconcerting. In January, when the submarine peril was finally over vast quantities of foods that had been stored up for emergencies in Great Britain were released in a flood and the British food controller announced that he had ceased to buy, at least for a time. There followed a period in which there was actually no movement of Canadian products of pork. Later, when the British markets reopened on a pre-war basis, British and other European buyers came into the American field and purchased heavily. Suddenly, and in an unforeseen way, prices for live hogs soared until the highest point ever touched, $25, was reached. This alarmed the British food controller, who again "took hold," reimposed food control and started national buying, bringing prices down even below what would, if left to itself, have been a normal market. In this way Canadian packers, who had bought roundly 17,000,000 pounds of pork at high live hog prices, were faced with a net loss of over $500,000.

Another disturbing element came from the orders of the Board of Commerce. The board's orders added to the uncertainty of the market and their effect in this respect has not yet been fully felt. They are reacting adversely on the farmer who is all too rapidly disposing of his sows especially. Hog breeders are very anxious over the situation and at the directors' luncheon on December 11th at the Provincial Winter Fair at Guelph, submitted the following resolution which was carried by a unanimous standing vote:—

"We, representing the livestock producers, protest against the action of the Board of Commerce in restricting the selling price of pork and its products, while making no attempt to restrict the price of the commodities which control the cost of production.

"Further, we desire to call the attention of the authorities to the fact that the hog industry in this country is in a most precarious condition because of these restrictions, which interfere with the regular channels of trade and result in thousands of brood sows being sent to the slaughter. Only prompt action will prevent thousands more from going the same way.

"If the maximum production is to be secured and a strong export market built up, we feel that it can only be accomplished by the removal of all restrictions which hamper and discourage individual enterprise."

Stable Conditions Desirable

The difficulty of prices remains this: So long as packers are subject to the erratic and artificial changes in prices for their products that have taken place during the past year, it is impossible for them to do anything towards creating stabilized conditions in the livestock markets.

On the other hand, taking a longer view, the situation never has been so favorable for the building up of the livestock industry in Canada. The tremendous losses of breeding stocks in Europe created a void which Canada should help to fill. The British consumers' marked preference for Canadian bacon assures the continued demand necessary for the healthy expansion of the industry. The one prime necessity is that production shall be increased so that a steady supply may be maintained.

INLAND TRANSPORTATION

One of the most important developments in shipping operations during the year now closing has been the consolidation of the Canada Steamship Lines, with the result that from an inland water transportation company it has been converted into an ocean traffic corporation as well. The establishment of the Compagnie Canadienne Transatlantique, for which the Canada Steamship Lines are the agents on this side, gave it a direct link with France, both for passenger and freight traffic, and the acquisition of the old Quebec Steamship Co., which operated between New York and the West Indies, opened up another service which is attracting much attention in Canada, both as to passenger and freight traffic. But the Canada Steamship Lines have gone further in the latter respect by becoming agents for a big group of steamship lines that are operating between New York and the West Indies, so that any intending passenger to that part may obtain information here on all lines.

UNCERTAIN OUTLOOK IN IRON AND STEEL

Much Buying, Which Was Postponed in Expectation of Lower Prices, Must Have Effect of Stiffening Market—Attitude of the Federal Government

By J. Frater Taylor

In accordance with my forecast of last year, conditions in the iron and steel trade have been erratic. The sudden suspension of the steel demand for munitions purposes and the hope, rather than the expectation, that prices would fall were the contributing factors. Those who have held off buying in the belief that lower prices would sooner or later prevail must admit that they have miscalculated with the result that, apart altogether from current requirements of steel and steel products, the demand has been and will be somewhat intensified through the aforesaid holding off. The general situation in Canada is very much influenced, naturally, by conditions in the United States.

Orders Ahead of Supplies

Within the last few months the steel business there has been more or less in a state of suspension on account of the strike. The consequence is, that in the States there is an accumulation of orders against a limited steel supply so that the steel business in the United States will have busy times in front of it, also in the direction of making up arrears caused by the diversion of steel to other purposes over the war period.

Railway Situation

The railway situation has an important bearing upon the latter phase, as once the tangle is straightened out there will, of necessity, be considerable buying of iron and steel products by the railways alone, and it must be kept in mind that it is not only steel rails that are involved, but all classes of steel products, notably such as are required in the building of cars, bridges, etc. In connection with cars alone, it is reported that the American car plants will be filled up with the domestic supply to the extent that, even on favorable conditions, comparatively little foreign business can be undertaken. Coming, therefore, to the situation in Canada, the last few months have shown a very distinct improvement, with the result that the steel plants, generally, have either good business booked or in prospect. It is stated, for instance, that one western steel plant is actually booked up until July next.

Domestic Output Should be Encouraged

To anyone interested in the steel business and in the general industrial situation in Canada, the most important element in the whole situation is the necessity for Canada becoming self-contained in the matter of its basic requirements. The writer, in his personal experience, has seen industrial and manufacturing activities held up and suppressed through dependence upon foreign sources of supply. The serious exchange situation is a factor, and nothwithstanding hopes to the contrary it cannot bring about its own solution by making imports too costly, so long as Canadian manufacturers, if they mean to remain in business, are bound to go out of the country for their raw materials. The writer has preached the doctrine of aggressive government action in this connection with a view, especially, to aiding and stimulating the development of Canada's basic industries. It is gratifying to note that, in the east, there will be a modern up-to-date plate mill shortly in operation, that Ontario's central steel plant is better equipped than ever before, through its new by-product coke ovens, and that at Algoma they are actually rolling alloy steel and all classes of shapes up to 15-in., and that they have considerable development in this direction in hand. The writer cannot refrain, in an article upon the iron and steel situation, from calling attention to the fact, once more, that if encouragement could be given to the mining and treatment of Canada's low-grade ores, the backbone of Canada's imports and dependence upon the United States for this basic of all elements would be broken.

Canadian Trade in War and Peace

Restoration of Peace Has Produced Great Changes, But Peace Commodities Have Replaced War Supplies—Exchange Rates Now a Considerable Factor—Canada's Favorable Balance Has Been Retained — Trade With United States, the Empire and Other Countries.

By W. G. CATES.

IN external trade the year 1919 was for Canada a very satisfactory one. During its course the Dominion took a long step forward into new, distant and fruitful fields. To some extent there was an application to trade of the spirit of daring that so much characterized the course of the Dominion in all matters relating to the war. There was a bold bid for trade not only in France and Belgium, but in the Balkan States, in which effort the aggressiveness of expert salesmen was well backed up by substantial national credits. Through the rapid building of new tonnage Canada also gave evidence, during the last year, that she intends to be more of a direct importer than a buyer through intermediary nations. In the volume of her trade she did not set up new figures; indeed, the general volume of her operations was considerably less than in the preceding year, but it showed decided gains in that losses in exports of war supplies, amounting to several hundreds of millions of dollars, were so largely counterbalanced by increases in exports of peacetime products. For the twelve months ending October 31st last there was a favorable trade balance of $349,788,433.

A review of the external trade of Canada during the past year, since it is a study of post-war trade conditions, must necessarily take into consideration the causes that produced the abnormal state under which trade has been conducted since the middle of 1914. To take the returns of imports and exports for either the last fiscal or calendar year and compare them with those for the preceding period would serve but little purpose. In the Canadian trade returns there are certain phenomena that excite both interest and concern. During the war the volume of trade assumed surprising dimensions, and on every hand the question is asked, Will these continue, or will there be a marked decline?

Fluctuating Exchange

In the adverse rate of exchange a new factor has appeared which is bound to affect very materially both the volume and the direction of the trade of the Dominion. To most persons the operations of this factor are surrounded with an air of mystery. Even among those who do to some extent understand international exchange, it is very doubtful whether there is anything like a due appreciation of its importance. Already it has proved to be one of those unforeseen factors that have so upset calculations during recent years.

If the conclusions arrived at are to be of value they must be drawn from the latest possible data. For this purpose the statistics for the last fiscal year, which ended on March 31st, 1919, are not sufficient. Those for the first seven months of the fiscal year, 1919-20, will be examined, which, bringing the subject down to November, will thus make possible the survey of conditions during almost a year from the signing of the armistice.

The new and aggressive attitude assumed towards foreign trade is to be attributed to two causes: the larger conception of national policy that has resulted from Canada's achievements since 1914, and to stern necessity. Having done big things in war, Canada has decided to do equally big things in peace. Having, in point of raw materials, one of the richest countries in the world, she is preparing to work these up, not for one market, but for many. The vision of a rapidly increasing commerce has caused her to provide a national mercantile marine. The will to make these departures has been born of the war.

Balance Has Been Reversed

But necessity has been an important factor in this decision. In the fiscal year, 1912-13, Canada's total trade was $1,047,157,421, but by March 31st, 1918, it had climbed to $2,548,691,639. This tremendous growth changed, within five years, an adverse balance of trade amounting to $293,072,711 into a favorable trade balance of $623.626,046. The huge export trade thus built up has been so profitable that naturally there is a desire to maintain it at high levels. Indeed, leaders in the financial and industrial life of the Dominion are continually declaring that upon this our future prosperity depends. Hence, the large credits to certain overseas customers, such as Great Britain, France, Belgium, Rumania and Greece, and the aggressive pushing after new export business.

Large Trade Maintained

This aggressiveness, together with a continuance of high prices, has maintained trade figures to a surprising degree. It is true that during the fiscal year that ended on March 31st, 1919, the total trade was but $2,176,378,717 as compared with $2,548,691,639 for the previous fiscal period; but the wonder is that, with such a heavy falling off in the export of war supplies following the signing of the armistice, trade has retained the proportions it has. The returns for the last nearly three years are as follows:—

	Fiscal year ending March 31st, 1918.	Fiscal year ending March 31st, 1919.	Twelve mos. ending Oct. 31st, 1919.
Total imports....	$ 962,521,847	$ 916,443,432	$ 902,353,525
Total exports....	1,586,169,792	1,259,935,285	1,252,141,958
Total trade....	$2,548,691,639	$2,176,378,717	$2,154,495,483

Of the decrease of exports during the last fiscal year, amounting to $326,234,507, no less a sum than $141,000,000 is represented by the decline in the shipments of cartridges alone. The exports of breadstuffs also fell off to the extent of $289,000,000. Going into particulars, it is found that the value of wheat exports dropped from $366,341,565 in 1917-18 to $95,905,320 in 1918-19, due not to a lessened demand or to a reduced price, but to the fact that, with the ending of the war and the release of tonnage, the United Kingdom was able to draw wheat from other sources than North America. The classes showing increases were animals and their products, $25,000,000; the forest and its products, $18,000,000; fisheries, $4,500,000, and minerals, about $4,000,000.

Exports Have Been Maintained

Coming to the exports for the first six months of the present fiscal year, that is, to September 30th, and comparing them with those for the first six months of the preceding year, it is found that they actually exceed the latter to the extent of $377,386. The exports of Canadian produce fell off $5,812,419, but those of foreign produce advanced slightly over $6,000,000 This is a surprising showing when it is recalled that, owing to the ending of the war, the exports of chemicals and allied products, which includes explosives, fell from $157,568,066 in the first period to $18,450,527 in the second, and that the exports of non-ferrous metals, etc., dropped from $41,444,110 to $23,072,776. The large decreases were practically offset by increased exports, chiefly vegetable products, roughly aggregating $68,000,000, and animals and their products to the extent of $56,500,000. As for imports, they fell off about $34,000,000 as compared with those for the same months of the preceding year, the decreases being: Supplies for the army and navy, $34,600,000; iron, other metals and non-metallic minerals, $27,000,000. Against these are set off certain increases.

The general conclusion is that during the last eighteen or nineteen months the export trade of the Dominion has, all things considered, held its own remarkably well. The total trade has fallen possibly $375,000,000 below the record mark of the fiscal year, 1917-18; but through substantial increases in exports it has been held at these figures, and this in spite of the fact that in 1918-19 alone the shipments of explosives fell off to the extent of $140,000,000, while those of all grain exports also went off $295,000,000. Indeed, in that year the total loss indirect war trade could hardly have been less than $575,000,000, and yet increased exports in other lines made up for $200,000,000 of this.

The United States

Dealing with particular countries, the United States receives first consideration, because Canada's trade with that country is, on the 1918-19 figures, equal to 56 per cent. of her total with all the world. The republic takes but 37 per cent. of the Dominion's total exports; but, on the other hand, supplies 80 per cent. of all the goods that this country imports. This makes trade with the United States a matter of great importance. The great war has interlocked the commercial relations of these two countries in a manner that seemed quite impossible eight years ago, and the relationships thus established will undoubtedly continue, to some extent, for a considerable time.

Heavy Adverse Balance

Trade between the two countries is manifestly very one-sided, but during the year it developed steadily in what most Canadians consider to be the right direction. That is, the volume of exports was appreciably increased, while that of imports was, to an even greater extent, contracted. The truth is that for two years this movement has been making itself felt far more powerfully than most people have imagined. From the high point, during the fiscal year 1917, when the balance of trade against Canada was $373,640,880, the adverse balance has steadily declined. For the fiscal year that ended on March 31st, 1919, it was $269,191,850; and on the very latest twelve months' period, which ended on October 31st, the balance had dropped still further to $275,000,000. As compared with the imports, the exports are still too low, but while this is true, some consolation is to be found in the fact that forces are working to reduce the difference. At the present time, with a volume of trade that is over twice as large as it was during the fiscal year ending March 31st, 1913, the balance of trade against this country on the latest returns available (year ending October 31st, 1919), was actually $9,000,000 less than it was for the 1912-13 period. If imports to-day bore the same proportion to exports that they did in 1912-13, then the balance of trade against Canada on last year's trade would be about $850,000,000. That it is only about 30 per cent. of this is the best possible evidence that conditions are gradually righting themselves.

Balance Reduced This Year

As the balance of trade between the two countries is a subject that is receiving much attention, the following table of imports and exports, covering a period of nearly eight years, is of interest:—

Fiscal year ending March 31st.	Imports from United States.	*Total exports to United States.	Excess of imports over total exports.
1913	$435,769,050	$150,961,675	$284,808,406
1914	395,565,328	176,948,299	218,617,029
1915	296,632,486	186,342,850	110,289,656
1916	370,496,574	216,669,262	153,827,312
1917	664,219,653	290,578,773	373,640,880
1918	791,906,125	441,390,920	350,515,205
1919	746,937,509	477,745,659	269,191,850

*Includes both Canadian and foreign products.

What was Canada buying when, in the fiscal years 1916 and 1917, imports from the United States suddenly jumped from $370,496,574 to $664,219,653 and $791,906,125? She was then drawing from a great natural storehouse raw and semi-manufactured materials required in the war and necessary to the production of munitions, the sale of which helped to lay the foundations of Canada's great war industries. In 1917 articles imported for the army and navy were valued at $148,164,280, whereas in 1916 they amounted to but $36,646,716, and in 1914 to no more than $125. In 1918 the value of these classes of imports still stood at $129,242,053. In 1917 and 1918 more coal was required for munition plants, and so the importations rose from $30,656,938 in 1916 to $42,061,834 in 1917, and to $74,285,676 in 1918. Huge quantities of metals and minerals had to be imported for the making of munitions, and thus the value of these imports increased from $96,250,836 in 1916 to $156,333,801 in 1917 and to $197,668,527 in 1918. Textiles, which formerly had been imported from several countries, were, during the war, to be had most readily from the United States, and so the imports of these went up from $40,689,947 in 1916 to $62,519,710 in 1917, and to $79,810,187 in 1918.

It may also be said that it was not until the United States got into the war that Canadian exports to that country began to assume the proportions they have during the last three years. In the fiscal years 1917 and 1918 the Americans began to buy very heavily from this country munitions and other war supplies. This explains why exports jumped to $441,390,920 in 1918 and to $477,745,659 in 1919. In 1917 the United States took $9,449,496 worth of explosives, in 1918 she took $11,629,036, and in the fiscal year ending March 31st, 1919, $57,144,900 worth.

Buying More Canadian Goods

From the Canadian standpoint the most satisfactory feature of the present trade between the two countries is that the abnormal imports from the United States, which were a feature of the war period, are being reduced, while exports to that country are being steadily increased. There seemed to be a danger that as the former fell off the latter would, too, since war supplies formed a considerable percentage of the exports during the fiscal years 1918 and 1919. But such has not been the case. During the twelve months ending October 31st last the exports of munitions and war supplies decreased greatly, but instead of general exports to the United States dropping, as they did to the United Kingdom, they were increased from $424,179,972 in the preceding twelve months to $439,341,339. This is not as rapid an increase as could be desired, but it indicates that the future of this country's export trade with the United States is bright, because the increase recorded since the war has been on peace-time, rather than on war-time, products.

This increased demand from the south may be attributed largely to two factors: First, the possession by Canada of certain natural products which the United States must have; secondly, to the rate of exchange, which, during the latter part of 1919, being as high as 10 per cent. in favor of the republic, has made it very profitable for Americans to purchase in this country.

Newsprint in the Lead

Among the exports that show increase, newsprint paper stands out prominently. During September last Canada sent to the United States $3,636,070 worth, or an amount equal in value to over one-third as much as was sent during the whole of the fiscal year, 1913-14. In wood and wood products the September exports were $10,355,691, or equal to about 30 per cent. of the value for the whole of the 1913-14 fiscal year. During the six months ending September last the exports of animals to the United States totalled $17,097,930 as compared with $6,518,102 for the whole of 1913-14. The export of newsprint, great as it already is, will continue to grow, for American newspapers are doubling their consumption and the American pulp wood areas are being rapidly depleted. The demand for lumber also continues to increase. With the United States embargo against Canadian wheat and flour lifted, appreciable increase in these exports may also be expected. These considerations confirm the belief that, even under present tariff conditions, the export trade with the United States is on a solid basis, and must grow. It is quite probable that with the decline in prices, such as is bound, sooner or later, to come, the money value of exports may fall; but the nature of the more important products now going south warrants the conclusion that their volume will increase rather than diminish as time goes on.

Effect of Exchange

During the past year the adverse rate of exchange undoubtedly stimulated exports to the United States, but hardly to the extent that it probably will do in 1920, the present prospect being for a uniformly higher rate on New York funds than prevailed through 1919. To the extent that the rate of exchange is against a country, to that extent are its exports stimulated, and for the very good reason that a neighboring state, in whose favor the exchange runs, finds it thus more profitable to buy in the other country. And such will be the attitude of the United States towards Canada. While the rate of exchange is against this country Americans will buy certain commodities here because they can get more for their money than they can get at home. The rate of exchange will not right itself completely until the United Kingdom is able to make prompt settlements for what she buys from Canada, and this is unlikely to eventuate during the present year.

The United Kingdom

Trade with the United Kingdom during the last eighteen months has naturally been much reduced through the cessation of hostilities, the difficulty of securing tonnage and the adverse rate of exchange. During the fiscal year 1917-18 the total trade was $942,435,802, while the revised figures for 1918-19 are $613,774,993 or a total decrease of $328,660,809. During the first seven months of the present fiscal year, up to October 31st, the decline continued, though the process of recession was much less marked. During 1918-19 the total exports fell from $861,073,069 in 1917-18 to $552,009,116; imports also fell from $81,302,403 to $73,024,016. Indeed, imports came within $2,341,000 of the lowest mark in ten years, namely, 1909.

In this connection the following statement of trade with the United Kingdom for the period 1914-19 merits attention:—

Fiscal year	Imports for fiscal year ending March 31st.	Total exports, fiscal year ending March 31st.	Excess of exports over imports from United Kingdom.
1913-14	$132,070,362	$235,253,969	$103,183,607
1914-15	90,083,178	211,757,718	121,674,540
1915-16	77,370,682	463,081,241	385,710,559
1916-17	107,071,181	756,071,059	648,999,878
1917-18	81,302,403	861,073,399	780,777,996
1918-18	73,024,016	552,009,116	478,985,100

An examination of the exports is instructive, for it shows how greatly they were swelled by the demands arising out of the war. For example, the decline in exports has been due entirely to the falling off in the shipments of munitions and wheat. In explosives alone exports fell from $261,125,855 in 1917-18 to $165,861,073 in 1918-19; wheat, from $303,776,038 to $85,696,571, and wheat flour from $62,875,839 to $56,270,225. On the other hand, exports of fish rose about $2,000,000; butter, $2,500,000, and wood and its products, $3,300,000. As the preference granted by the Imperial government to certain commodities produced within the empire did not come into operation until September 1st, naturally its effects have not been felt during the period under consideration.

The decline in imports, totalling $8,300,000, is accounted for principally through reduced purchases of beverages and spirits, $1,500,000, which has been more than made up during the last seven months; foodstuffs, $1,200,000; rubber goods, $1,000,000; textiles, $5,000,000; tobacco, $370,000. As compared with 1917-18, the imports of textiles fell off to the extent of $16,000,000. On the other hand, the imports of supplies for the army and navy were increased by $2,200,000 and metals and minerals by $1,500,000.

The total trade returns for the first six months of the present fiscal year, that is, to September 30th, contain a much more hopeful story. It is true that they show a decline of $18,000,000 as compared with the returns for the first six months of the preceding year; but, considering the falling off in the demand for war materials, the wonder is that exports have held their own so well. To begin with, exports of explosives declined from $101,555,378 to $425,475; but increases in other products made up for this. As compared with the same period in 1918-19, the principal increases were as follows: Grains of all kinds, $39,500,000; flour and milled products, $12,200,000; sugar, molasses and confectionery, $9,624,000; fish, $4,300,000; meats of all kinds, $24,000,000; total wood products, including lumber, $16,000,000; iron and steel, $4,100,000. The large increase in the exports of lumber was due to the credit of $50,000,000 made by the Dominion government to the United Kingdom to finance these sales. On the six months' period the total exports to the United Kingdom were $15,600,000 below those for the first six months of 1917-18, whereas imports were up $6,194,000.

British Empire

Canada's trade with the British Empire at large during the fiscal year 1918-19 shows a decrease of 25 per cent. as compared with that for 1917-18, due chiefly to the heavy decline in shipments to the United Kingdom. However, the portions of the empire outside of the Mother Country increased their purchases 50 per cent. in 1918-19, going from $43,408,307 to $64,408,812. Australia increased her purchases by 75 per cent.; South Africa much more than doubled hers; Newfoundland came nearly quadrupling hers; while New Zealand's purchases also went up 50 per cent. In 1918-19 the trade with the empire as a whole stood at $750,056,788, or equal to about one-third of Canada's total trade with the entire world, 86 per cent. of it being with the United Kingdom. So far during the present fiscal year, considerable increases are recorded with South Africa, Gibraltar, Newfoundland, Australia and New Zealand, to say nothing of the United Kingdom.

Foreign Countries

Trade with foreign countries, which constitutes 65 per cent. of the Dominion's trade with all the world, declined from $1,501,859,433 in 1917-18 to $1,425,303,572 in 1918-19. However, in a relative sense, this trade bulked larger in the latter than in the former year. In 1917-18 it was equal to but 58 per cent. of the total trade, whereas in 1918-19 the percentage of the foreign to the total trade had risen to 65, at which point it still remains. It should, however, be remembered that 85 per cent. of this trade means trade with the United States. Outside of the latter, Canada last year did only $200,000,000 worth of business with foreign countries. The falling off in 1918-19 as compared with 1917-18 was due to the decline in exports to France from $201,053,676 to $96,103,142 following the conclusion of the war. Exports to Belgium also declined $4,000,000. On the other hand, there was a considerable increase in exports to Cuba, the Dutch East Indies, Italy, Japan, Norway and Russia. The first six months of the present fiscal year would have reported a decided increase in this branch of trade had it not been for the restrictions placed on importations into France, which caused exports to that country to fall off $22,500,000 as compared with those for the first six months in the preceding year. During these same periods exports to Belgium increased from nothing in 1917-18 to $4,271,963 in 1918-19; those to Greece, from $3,218 to $6,800,278; to Rumania, from nothing to $2,302,024; to Italy, from $3,744,725 to $10,227,745.

OUR TRADE WITH THE UNITED KINGDOM

Government Commissioner Reviews Year's Developments—British Branch Plants Here—The Imperial Preference

"ONE of the results of the war has been to give both Canadian and British manufacturers a greater appreciation of the value to them of the various markets and natural resources of the British Empire," said F. W. Field, British Trade Commissioner in Ontario, in an interview with a representative of *The Monetary Times Annual.* "Canadian manufacturers and exporters have materially increased their sales in the United Kingdom, which is Canada's best market," he continued. "There is also a marked desire on the part of Canadians to purchase more merchandise in the United Kingdom rather than in foreign countries, when the merchandise cannot be bought at home. We are only beginning to realize what a vast trade can be built up within the British Empire if each unit of that Empire makes itself familiar with the products of the others. Frequently our offices are consulted by Canadian importers and manufacturers for lists of manufacturers or exporters of various commodities in the United Kingdom or one of the other dominions. This is a notable development in business currents and is likely to lead to important trade expansion.

"The post-war readjustment in Canada has been comparatively easy, for obvious reasons, with the result that few industrial difficulties have been experienced here. In the United Kingdom, it has been extremely difficult. Despite the numerous obstacles to the return of more nearly normal conditions, important strides have been taken. Substantial gains have been registered in Great Britain's export trade, and when a further improvement occurs in domestic conditions, her ability to compete in the markets of the world will again be demonstrated.

British Labor Not Revolutionary

"As to labor, it is almost safe to prophesy that labor in Great Britain will, in the future, as in the past, show by its action that it has faith rather in evolution than revolution. The inhabitants of the United Kingdom are mostly of British birth. In the industrial unrest prevalent throughout the world to-day racial solidarity is an asset of the first importance where, as in the United Kingdom, the majority of the community is endowed with sanity and sobriety of judgment.

"Many Canadian business men, manufacturers and representatives of industrial organizations visited the United Kingdom during 1919, with satisfactory results, in most cases, for Canadian export trade. At the same time, we have had a number of British manufacturers, their export managers, directors, and selling agents on visits to Canada. They have come to gather first-hand information as to the possibilities of this valuable and expanding market. It is the best way for the manufacturer to appreciate the position. Representatives of British interests who have made a trip to the Dominion during the past year have been numerous and representative of a wide range of industries and businesses. A delegation of the Managers and Overlookers' Association of Bolton, Lancashire, were also visitors to Montreal and Toronto, under the auspices of Lord Leverhulme. They were interested in the development of the Canadian cotton industry. The present year will undoubtedly see a larger influx of business and financial visitors from the United Kingdom. A delegation of a manufacturers' association of Great Britain have plans under consideration for a tour of the Dominion early in 1920. The Chambers of Commerce of the British Empire will meet in Toronto in August next, and this will be a commercial event of great importance to all sections of the Empire.

Policy of Branch Factories

"During 1919," continued Mr. Field, "there were probably more inquiries in this market than at any previous time, by British firms having in mind the possible establishment of branch plants. One of the largest mills in Wales decided to establish an important branch at Toronto for the manufacture of tinplate which has hitherto not been made in Canada. Other branch plants of British firms were established in various parts of Ontario for the manufacture of felts for paper-making machines, elastic hosiery and web, and silk and cotton labels. There are already branch plants here of British firms making steel sash, cranes, electric motors, window glass, gelatines and glues. British and Canadian capital have joint control of two concerns in Ontario, one making gloves and the other carpets. The tendency is for British capital to take a more direct interest than hitherto in the manufacturing development of the Dominion.

"While, for many reasons, the number of branch plants in Canada of United Kingdom firms will not equal those of United States firms, there is a likelihood that others will be established. In the majority of cases, however, it is probable that British manufacturers will be able best to cater to this market by manufacturing in and exporting from the United Kingdom.

"Several important trade organizations were formed and relations strengthened during the past year. The Federation of British Industries made an arrangement with the Canadian Manufacturers' Association for the exchange of information and views. The Canadian Association of British Manufacturers and their Representatives was organized with branches at Montreal and Toronto, as a result of action taken by the British Trade Commissioners in Canada. The membership is almost 200, representing more than double that number of Birtish firms interested in the Canadian market.

Work of Trade Commissioners

"Many of the Canadian government trade commissioners from British and foreign markets visited the Dominion last year, conferring with manufacturers from Atlantic to Pacific. Under the British government's Department of Overseas Trade (Development and Intelligence), there are three British trade commissioners in Canada, one each at Montreal, Toronto and Winnipeg. A fourth may be appointed later at Vancouver. The duties of a trade commissioner, in a general way, are: to keep in close touch with the government and state authorities in the Dominion to which he is attached; to visit the principal commercial centres in his area and establish touch with the members of the commercial community; to study and report upon the tariff laws, and customs regulations, as well as legislation affecting banking, patents and copyrights, shipping, harbors, etc.; to watch the imports into the Dominion, to furnish reports on the best methods of meeting foreign competition, and to furnish reports on financial and trade conditions; to make an annual general report on the conditions and prospects of trade in his area, and to supplement it by special reports dealing as exhaustively as possible with particular questions which are likely to be of interest to British firms.

"These functions are more or less of a general character. The broad idea of the service is to see that a regular flow of commercial information of value is maintained, and to put Canadian importers and, to some extent, Canadian exporters in touch with manufacturers and others in the mother country and other parts of the Empire.

How many men in *your* line of business are represented in this list?

WHATEVER your business may be, run your finger down the columns in this panel. You will find your business listed there; and with it the number of men in it who are moving to larger success with the help of the Alexander Hamilton Institute's Modern Business Course and Service.

If you feel that your business is different, that what may help others cannot help you, see how many men in your own business are already subscribers to this Course. They have realized that the fundamentals underlying all businesses are the same. They want to know these principles—and how to apply them.

Some of the men whom you have envied are there. Some of the men of whom you have said: "I know as much about our work as he, why is he lifted into an executive position while I stay here?"

And this is the answer:

Executive responsibility demands more than knowledge of one department of business; it requires the all-round knowledge of all departments, which is so rare that the men who have it are *always* in demand.

What department of the business are you in?

FOR years the Alexander Hamilton Institute has specialized in just one thing. It has only one Course. Its business is to train men for the higher executive positions in business.

It takes the man who knows one department—whatever it may be, and adds a knowledge of organization and sales, of merchandising, of credits, of corporation finance, of advertising, of investment, of accounting, of traffic and of costs. It puts at his disposal training and experience that would otherwise take years to acquire.

The test:—Your ability to act

This is a tragic fact about life—that most men have good resolutions, but only a few have the capacity to act.

Of all the men who have read the advertisements of the Alexander Hamilton Institute, and have intended to enrol, over 105,000 have acted by enrolling.

To-day, the opportunity is open to you to act. Of any two men who will read these words, one will act, the other will delay. And in that moment each man will—unconsciously—have passed judgment on himself.

Business and educational authority of the highest standing is represented in the Advisory Council of the Alexander Hamilton Institute.

Advisory Council

THIS Advisory Council includes Frank A. Vanderlip, the financier; General Coleman duPont, the well-known business executive; John Hays Hammond, the eminent engineer; Jeremiah W. Jenks, the statistician and economist; and Joseph French Johnson, Dean of the New York University School of Commerce.

"Forging Ahead in Business"

—a book for men of action

THE Alexander Hamilton Institute does not seek drifters as its subscribers. It will not knowingly enrol a man who has not in him the capacity for progress. Its successful subscribers are the foundation of its preeminence.

To sift out of the many who are merely curious, the few who have the capacity for success, the Institute has prepared a I16-page book entitled "Forging Ahead in Business." It has proved immensely valuable to over 105,000 men; it contains information of value to any man who is earnestly asking himself: "Where will I he ten years from now?"

If you are such a man; if you have in you the serious purpose to put yourself among the successful executives of business, there is a copy of "Forging Ahead in Business" without obligation for you.

Only *you* can decide the question. The coupon gives you the opportnnity; send for 'Forging Ahead in Business" now.

REVIEW OF THE WHEAT SITUATION, 1919*

Government Guaranteed Price of $2.15—Board of Grain Supervisors Succeeded by Canadian Wheat Board

By F. J. Anderson,
Retiring President, Winnipeg Grain Exchange

AT the last two annual meetings of this exchange my predecessors discussed the effects of the war upon the grain trade. With your permission I desire to continue the story and particularly to note how the grain trade has been affected during the past year. On September 5, 1918, the government issued an order-in-council extending the authority of the Board of Grain Supervisors. Certain agreements were then reached between the board, the Wheat Export Co., and the trade, which enabled the trade to some small extent to resume business. Exporters and shippers delivered wheat to the Wheat Export Co. at the Atlantic seaboard—they supplied flour mills in eastern Canada with wheat, and, during the winter months when there were no buyers in the market, they carried and financed the wheat—and for these services they were paid stipulated rates of commission. To this extent the grain trade were enabled to do business, and to this extent the conditions were better than the previous year.

Wanted Open Wheat Market

All the efforts of this exchange during the year were directed towards the restoration of the open markets. We knew that the Board of Grain Supervisors was going out of existence as soon as it could wind up the transactions involved in the handling of the crop. That being the case the main obstacle in the way of opening the markets was the method of buying adopted by the Royal Wheat Commission of Great Britain. There would have been no use in opening the Winnipeg market had that commission decided to put one buyer in the market to buy all the wheat needed both by the United Kingdom and its allies in Europe. What we needed in order to open the market with some prospect of success was that the Royal Wheat Commission should buy the wheat from the grain trade not nearer than the Atlantic seaboard. We considered, too, that, as the war was ended, the British Wheat Commission should not purchase wheat for any country except the United Kingdom, but should leave each country to do its own buying, and we took steps to have our views brought to the attention of the British authorities through Canada's officials in London. The British authorities agreed to buy the wheat from the grain trade at the Atlantic seaboard, and to leave other countries to make their own arrangements for trading, except in the case of France and Italy, and even in regard to these two countries the attitude of the British authorities was not altogether unfavorable to our point of view.

On July 7th, the government announced that the grain markets would be reopened. The chief objection to opening the markets at that time was the probability that if the markets were opened the price of wheat would fall to a degree that would injure the producers. This belief was founded upon the then prospects of the new wheat crops of the United States and Canada. Up to that time record crops were expected in both countries. The estimate for the United States was about a billion and a quarter bushels, and for Canada about three hundred million bushels, and it was argued that because of these abounding crops, and because of the existing stocks of wheat in various parts of the world, the price of wheat was likely to fall considerably, and in addition it was predicted that if the Canadian markets were opened American speculators would bear the price down to $1.40 per bushel for certain purposes of their own. All these things were duly considered, but the decision was that government control of the marketing of wheat should cease and that the markets should be reopened.

Government Reversed Decision

The Winnipeg market was opened on July 21st. In the meantime the estimates of the new crops both in the United States and Canada had been greatly modified. It was estimated that the drought had caused a loss of about four hundred million bushels of wheat in the United States and perhaps of one hundred and fifty million bushels in Canada. When the market was opened this condition immediately reflected itself—instead of the price of wheat falling, it soon showed an increase, until it reached $2.45.

On July 29th the market was closed by the orders of the government. It had been opened only six days, and it was closed in a somewhat peculiar way. The government called a conference in Ottawa on July 28th—a conference at which this exchange was not represented. There was no investigation apparently of the transactions that had taken place while the market was open. No questions were asked of this exchange about the amount of trading done or about the quality of the trading. Without such investigation the government directed that the market should be closed. Further, no provision was made with regard to such trades as had been negotiated. As the market had been opened on the authority of the government, and as it was closed by the government, it is reasonable to assume that the contracts made in good faith will be duly honored.

Why did the government change its plan? It opened the market when all the probabilities pointed to a fall in the price of wheat, and it closed the market when as the result of six days of open trading the price rose to $2.45. Naturally the suggestion is that this increase in price was what led the government to change its plan.

It has been stated that the farmers were in favor of closing the markets, and of the government undertaking to buy and sell the wheat. The farmers are very well organized and they have very many ways of making their views known and effective, and their views on the methods of marketing their produce must always command full consideration. It is probable that so long as there were bumper crops in sight and so long as every indication pointed to a fall in the price of wheat, farmers desired some measure of protection against loss.

The farmers are not ignorant of the effect of the supply of wheat upon the price. They were quite well aware of the loss both in the United States and in Canada caused by drought. They were quite alive to the change in the prospects, and I do not know of any association of farmers, whether local or provincial, that demanded the closing of the market after it had been opened, and after the price had shown a marked tendency upwards. There is no evidence whatever that the producers of grain at that stage asked the Canadian government to close the markets.

It is equally certain that the grain trade did not ask the government to close the market, and so far it has not been stated that the British authorities had changed their proposal to purchase the wheat as they needed it from the grain trade at the seaboard.

What influences were brought to bear upon the government we do not know. So far, however, as exporting the surplus wheat of this country is concerned, we in the grain trade know very well that we could have sold this year's surplus without much difficulty. If the large crops expected had come to maturity, if the United States crop had reached a billion and a quarter bushels and the Canadian crop three hundred millions, as was estimated when the government opened the markets, the sale of our surplus at a high price would have been difficult—but those of us who have been in this business for years know that the selling of fifty to seventy million bushels under present conditions would have been easy. We do not believe that the government was led to close the market either by requests from the farmers or by the difficulty of selling our surplus wheat.

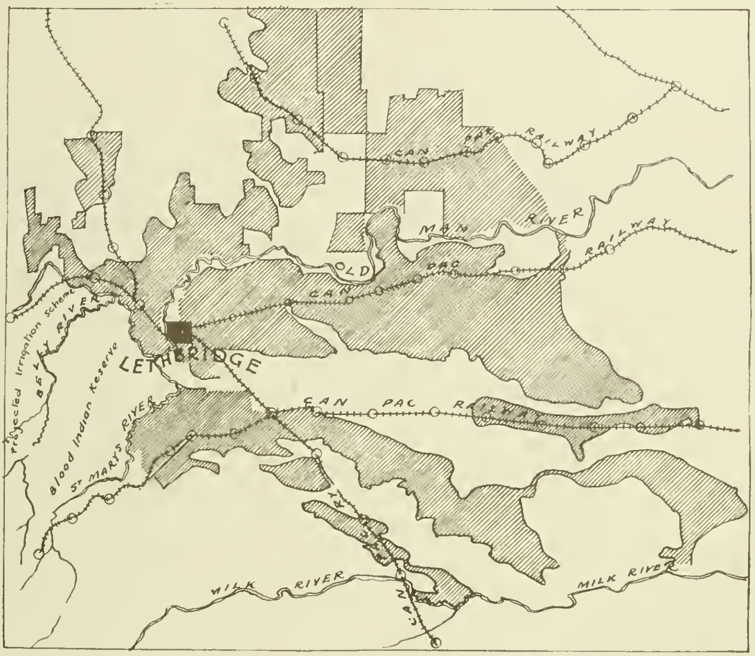
Marketing 1919 Wheat Crop

The armistice was signed on November 11, 1918, and the peace treaty was signed by the Germans on June 28, 1919. Most of us in the grain trade hoped that we should

---

*An address at the annual general meeting of the Winnipeg Grain Exchange, September 10, 1919.

LETHBRIDGE, ALBERTA



Lethbridge is the centre of the largest irrigated farming district in Canada. The shaded portion of the map shows lands that are now irrigated and irrigable. Over 100,000 acres has been irrigated for many years and its annual production in crops is valued at $100.00 and over per acre. Another 100,000 acres scheme has been voted on and is in a position to be bonded, and construction work is planned to go forward next year.

Two smaller schemes totalling 25,000 acres are now under actual construction. Government preliminary surveys have been made on all the remaining lands and the possibilities of irrigation actually established and detailed surveys are being rushed forward.

Lethbridge will have a total area of approximately 650,000 acres of irrigated land surrounding its municipal boundary. Irrigation triples the productive capacity of land and the principal crops in this district are grain, alfalfa and roots of all descriptions. Think of the steady increase of wealth the Lethbridge district is good for. Prosperous farmers mean steady business.

Lethbridge has seven coal mines almost touching her municipal boundary, one of which is the largest in Canada, outside of one in Nova Scotia. This city is a mining centre and is the warehouse centre, not only for the vast irrigated and dry farming district and numerous small towns, but also for the towns of the famous Crows Nest Pass coal field to the West. The average yearly export for the district of coal, live stock, wheat and wool for three years was $81,678,978.00. Increased business and steady growth is assured for Lethbridge with her irrigation and coal industry.

then at last be freed, so far as business matters were concerned, from the operation of the War Measures Act. Not being statesmen we had the idea that if the government needed exceptional powers for protecting the trade of this country, which might well be the case, the government could have secured these powers at the last session of parliament. We are probably biased, but we prefer acts of parliament to orders-in-council, for the former are at least public. However, on July 31st the government issued an order-in-council under the War Measures Act providing for the marketing of the wheat crop during the coming twelve months. The Canadian Wheat Board has come into operation, and the system of marketing adopted by the government is now assuming shape and form. It presents features which will be very carefully studied by the grain trade, and which are worth very careful study.

The system of marketing represented by the grain exchanges was not created by governments. It is the result of commercial experience, and it is the result of commercial experience in every country where wheat enters international trade. It has always been subject to criticism. It has often been investigated. In various countries, and among these the most highly developed commercial countries, legislators have attempted to find substitutes for it. So far it has stood every test, and I am repeating a commonplace remark when I say that no more efficient and no more economical method of marketing grain has yet been devised.

It is true that the system was disturbed during the war. Ocean tonnage and freight rates, international exchange, finance, prices, all were profoundly disturbed, and wheat like other things had to be dealt with by war methods.

The method adopted in Canada was practically that of fixing a price which should be paid to the producer for his wheat and a price at which the wheat should be delivered to the buyer. The wheat crop was virtually commandeered by the Dominion government, but it was commandeered at a definite price to the producer on the one hand, and to the miller or the British Commission on the other. The price set was generous and it was constant. It did not vary during the twelve-month period and both producer and buyer knew where they stood.

The cost of administration of the system was small, and while certain sections of the trade were placed at a serious disadvantage, still it is recognized even by them that international trading in a commercial sense was impossible during the war.

Minimum Price Guaranteed

The system adopted by the government for this year is somewhat different. The government commandeers the wheat after it is shipped from the farm and taken to the elevator or railway—then having commandeered the wheat, the government acts as agent or commission merchant for the producer. It gives the producer of the grain an advance and a promise of a balance at the end of the year. The advance which has been set at $2.15 per bushel amounts in reality to a fixed minimum price, but as the price of wheat in the international market may vary during the year, the government will not pay each farmer the full price of his wheat, as based on the international price, at the time he delivers his wheat, or at the time the government can sell his wheat in the international market. What the government receives over $2.15 per bushel is to be divided at the end of the year amongst the farmers according to the grade and weight of their wheat. An interesting question may occur to your minds here. Suppose the price of wheat in the international market begins at about $2.24 a bushel Fort William and that a few months later it falls to $2.00 or $1.80 per bushel. The farmer who ships his wheat in time to have it sold at $2.24 will receive an advance of $2.15 and a promise of his share in the pool. The farmer who ships his wheat at a time when the price at Fort William based on international values is $1.80 also receives the minimum advance of $2.15 with a promise of his share in the pool. This pool may be called a fund which is not created out of the general revenue of the country, but is the amount left after the advance of $2.15 has been paid and the expenses of administration have been met.

The farmer who has sold his wheat when it was worth $2.24 a bushel at Fort William may feel that he is entitled to that $2.24. He may feel that he is entitled to the full price of his property, that it is not fair that part of the price of his wheat should be taken and given to another farmer who chose to keep his wheat until the price had declined, that the government has no right to take part of his property or money and give it to somebody else, and that if the government desired to set a minimum price for wheat that minimum price should be guaranteed by the general revenue of the country and not by what may appear to him as a confiscation of part of his property for the benefit of other farmers.

Farmer Was Paid at Once

The plan pursued during the last two years, that is to say, the plan of a definite fixed price at Fort William, had at all events these advantages, namely, that the farmer received the full price of his wheat, and that he was paid immediately, and did not have to wait twelve months for any part of it. In the United States the minimum price will be paid to the farmer during the whole of the year, no matter how the international price varies, and if any loss is incurred the government of the United States will meet it. In Canada the guarantee of the minimum price is levied upon those farmers who are fortunate enough to sell when the international price is high. It is true enough that there are certain co-operative societies that handle produce in this way, but they do so voluntarily and without compulsion, while the new method of handling wheat does not give the producer any choice in the matter.

This is a novel feature in the handling of grain, and one wonders how far it could be applied to other products, and other forms of property. Grain men are not very familiar with law as a rule, but it is of interest to us, and to every citizen, to be brought somewhat suddenly to realize that the government claims the power to take part of our property, not for the revenue of the country, but to give to other persons. We are familiar with the power of the government to impose taxes, we are also fairly familiar with the power to expropriate for public purposes, but to most of us I imagine it is rather a surprise to learn that the government can take our money and give it to other individuals in this way.

Authority has been embodied in the order-in-council creating the wheat board, enabling the board to utilize the ordinary channels of trade as far as possible and to pay them a reasaonable remuneration for their services.

In keeping with this the wheat board is making arrangements whereby the ordinary channels of trade will be utilized. The wheat board does not propose to handle the grain at country points without the services of the country elevators, and arrangements have been made by the board in regard to street prices, storage and handling at country points similar to those put into effect by the Board of Grain Supervisors last year. The country elevators will be utilized by the wheat board, and their owners will be reasonably compensated.

Dealings on the Exchange

The commission rule of the exchange is protected, so that commission merchants may handle such grain as is consigned to them as before. A rate of brokerage has been fixed payable by the seller of the grain, so that cash brokers will be able to do business at that rate. The wheat board also proposes to utilize the trade for the purpose of selling wheat to flour mills in eastern Canada and for the purpose of delivering wheat to the board at the Atlantic seaboard. Negotiations between the trade and the board on some points involved in these arrrangements are still proceeding, and it is hoped and expected that the board will be able to utilize the ordinary trade channels, and pay them a fair rate for their services.

The most outstanding feature of the new method of handling wheat is that the government of Canada becomes directly responsible for the price of wheat, becomes responsible not only because it buys the wheat, but also because it

Canadian Pacific Railway Directorate

Thoroughly Representative of Financial and Commercial Interests of Dominion—Includes Leaders in the World of Industry, Shipping, Milling, Mining, Etc.—Drawn from all Sections of Canada, also Great Britain.

THE recent election of Sir John Eaton as a director of the Canadian Pacific Railway emphasizes once again the composite character of the board of the great transportation system, and indicates the ramifications of the interests which are allied to it. Its directors are all powerful also in the world of banking, public utilities, milling, the paper industry, steel, textiles, shipping, mining and insurance. Although Montreal is the headquarters of the Canadian Pacific system, its directors are representative also of Toronto, Winnipeg, the West, and Great Britain, as well as of both the British and French-Canadian elements.

Sir John Eaton

Three of the directors are executive railway men—Lord Shaughnessy, K.C.V.O., chairman of the board and formerly president of the company; Mr. E. W. Beatty, the president, and Mr. Grant Hall, vice-president. Some of the other directors, such as Mr. C. R. Hosmer and Sir Herbert Holt, while now identified with other interests, were formerly connected with the construction or management of phases of the C.P.R. activities.

Sir Herbert Holt is the moving spirit behind some of the most important power development schemes in Canada. Identified with the early construction of the Canadian Pacific as far back as 1883, he is now the president of the Montreal Light, Heat and Power Co., one of the greatest utilities of its kind in Canada. He is also president of the Royal Bank of Canada.

Mr. C. R. Hosmer began life as a telegraph operator, and was at one time manager of the C.P.R. telegraphs. He still is closely connected with several telegraph and cable companies, but twenty years ago extended his interests so that he is now president of the Ogilvie Flour Mills, a director of the Bank of Montreal, the Royal Trust Co., the Sun Life Assurance Co., the Laurentide Paper Co., and many other representative Canadian undertakings.

Another miller is included in Brigadier-General F. S. Meighen, president of the Lake of the Woods Milling Co. As commander of the 14th Battalion he went through several of the most important engagements on the Western Front. In addition to being a C.P.R. director, he is director of the Bank of Toronto, president of the New Brunswick Railway Co., director of the North-West Land Co., etc.

Mr. R. B. Angus is the doyen of the directors, but in spite of his years (he is now 88), he is one of the most active brains controlling the destinies of the C.P.R., and his is generally the most regular attendance at board meetings. The great Angus Shops at Montreal are named after him, and the present outstanding position of the Bank of Montreal in the world's finance is due in no small degree to his foresight and ability.

Sir Thomas Skinner, of London, England, is the publisher of a large number of well-known publications and reference-books such as the weekly Anglo-Canadian journal, "The Canadian Gazette," and "The Stock Exchange Year Book." He is also a director of the Bank of Montreal, and of the Commercial Cable Co.

The Hon. Senator F. L. Beique is a well-known French-Canadian lawyer, who is also vice-president of the Banque d'Hochelaga, and a director of the Canadian Cottons, Ltd. Another lawyer on the board is Captain the Hon. W. J. Shaughnessy, son of Lord Shaughnessy, who saw three years active service overseas. He is one of the two new directors elected this past year.

Sir Edmund Osler, a resident of Toronto, is president of the Dominion Bank, and of the Canadian North-West Land Co., and head of one of the most powerful brokerage firms of Canada. Sir Augustus Nanton, of Winnipeg, is the leading financial authority in the west. He is closely connected with many large western development enterprises, and is chairman of the Canadian Committee of the Hudson's Bay Co.

Sir Vincent Meredith is the president of the Bank of Montreal, and of the Royal Trust Co. Commander J. K. L. Ross has been engaged in running street-railways and in coal-mining; but he is now connected with numerous corporations, including the Dominion Bridge Co., the Canadian General Electric Co., etc.

Captain the Honorable W. J. Shaughnessy

Sir John Eaton, the new director, is the president of the T. Eaton Co. of Toronto, which operates two of the largest departmental stores in the world, connected with which are great factories employing thousands of workers. By virtue of this Sir John is probably the biggest merchant of Canada.

assumes the responsibility of selling the wheat, and the object of the method adopted is to give the farmer a price as closely approximating to what is called the "world" price as is possible. The world price during the year may vary very considerably. It is the claim of the grain exchanges on this continent that their prices from moment to moment are the immediate reflection of world prices. Under the new scheme the government undertakes to sell wheat in the international market, to obtain the highest possible price, and to pay the farmer accordingly.

Some enthusiastic admirers of this plan seem to think that it is so good that it should be made permanent. We in the grain trade may be somewhat prejudiced in the matter, but we cannot help feeling that any government that undertakes to handle Canadian wheat in this way permanently will very soon tire of it. We cannot help thinking that while so long as what is called the world price is high, and so long as the government can secure a high price, and therefore pay a high price to the farmer, it will be fairly easy going, but that when the price of wheat falls—as fall it will—a different sentiment will soon prevail. Suppose, for example, the government within a year or two offered 80 or 90 cents to the farmer for his wheat—one wonders what would happen to that government at the next election. We cannot help feeling that so long as a government takes upon itself direct responsibility for the price of wheat in times of peace, it will make the whole matter a political issue of the worst kind.

Imperial Sentiment

Then we wonder what would happen should the Canadian and British governments find themselves on the opposite side of the wheat market, one trying to buy as cheaply as possible, and the other, let us assume, trying to sell as high as possible. It is not easy to believe that the British government would agree to give a relatively higher price for Canadian wheat than, say, for Australian wheat, or wheat from any other part of the Empire, or for that matter, from the United States. Possibly in these days of imperialistic sentiment the British government would back that sentiment by a special bonus to her Dominions, and on the other hand the Canadian government would show its loyalty to the flag by offering Canadian wheat to the mother country at a few cents a bushel less than the market price.

Of course these are considerations of high Empire policy, and are far beyond the reach of grain merchants. We are on more familiar ground when we consider what the position of the Canadian government will be if it continues to sell our wheat in the international markets in competition with exporting countries where commercial methods have been reinstated. Let us suppose, for example, that the grain markets of the United States had been opened once more, that the government restrictions had been abolished and that the great exporting houses of the United States had resumed business. The Canadian government would then have to enter into competition with those firms, and with firms in other exporting countries. The successful exporting of wheat means more than buying wheat, for example, at Winnipeg, and selling it at Liverpood. In peace times there are few days in the year when one can buy at Winnipeg and sell on the Winnipeg price at Liverpool. The successful exporter requires to be as expert in regard to ocean freight rates and international exchange as in regard to cash wheat. He also needs to be able to utilize the markets for future delivery as the only means of reducing the risk of price variations.

It goes without saying that if the Canadian government abolished the grain exchange system of international trading in Canada, it could not and would not iself patronize the condemned methods. In exporting wheat in competition with the great firms of the United States, or of the United Kingdom, or of France, it would be like a boxer entering a ring with his right hand tied to his back. We in the trade know what would happen to any company or any government that tried to do business this way. We know that such a company or government would fail to secure the "world" price. We know that it would incur grave risks.

CANADIAN RAILWAYS WILL ACT IN UNISON

Railway Association of Canada Will Continue Work of Canadian Railway War Board—Corresponds to National Management in Great Britain and United States

THE position of the rail transportation machine of Canada at the opening of the new year is, viewed from an operating and efficiency standpoint, a cause for congratulation to the business interests of the Dominion. The disturbed conditions in the American and the British transportation circles are not known in the Dominion. Having come through the extra strain of the war without any operating breakdown, and without having had to be taken over by the government in order to effect proper co-ordination, the Canadian roads are in a position to meet any transportation development, either of internal or export traffic without embarrassment. The situation as regards motive power, car, roadbed and terminal facilities is, on the whole, satisfactory. The advent of winter, while it has brought extreme low temperatures, which operate against motive power efficiency, has so far included only moderate snowfall. The United States coal strike has postponed the delivery of coal to Canadian roads, and this burden will develop in the least favorable months for handling same, i.e., January and February, but no unusual difficulties are anticipated.

Railway Association Now Permanent Body

The most important item of recent railway news, from the standpoint of the shipper, is the announcement that the work of the Canadian Railway War Board will not be dropped, but that, in place of that board, the Railway Association of Canada came into existence on the first of December last.

The Canadian Railway War Board was to the Dominion what so-called national management was in Great Britain and the United States. It was, however, a purely voluntary body formed among the railways themselves, and depending for its success upon the mutual desire of the managements to uphold Canada's now famous record for efficient railway transportation. The board acted as a clearing house for information and opinion and the exchange of material assistance between the roads. While the evils of the car-pooling system, which allows bad-order cars to accumulate rapidly, were avoided in Canada, the benefits of co-operation were secured. One of the especial triumphs of the War Board was its successful and fair handling of the labor situation.

Its Functions

The Railway Association of Canada is intended to carry on the same kind of work which the War Board undertook. "It is not to be regarded as a railway protective association," declared one of the officials, a former War Board officer. "The best description of it is the term, 'Clearing House.' It provides a convenient meeting ground for the thrashing out of railway difficulties. As such it is of vital importance to the public and may be expected to render excellent results."

The honorary chairman of the board is Lord Shaughnessy. Its president is Howard G. Kelley, president of the Grand Trunk Railway. The executive committee consist of Lord Shaughnessy (honorary chairman), Mr. Kelley, D. B. Hanna, president of the Canadian National Railways; E. W. Peatty,. president of the Canadian Pacific Railway; A. H. Smith, president Ottawa and New York Railway, and J. W. Beckley, president of the Toronto, Hamilton and Buffalo Railway. The other committees are as follows:—

Operating Committee—Grant Hall, vice-president, Canadian Pacific Railway; W. D. Robb, vice-president, Grand Trunk Railway System; M. H. McLeod, vice-president, Canadian National Railways; F. F. Backus, general manager, Toronto, Hamilton and Buffalo Railway, and J. H. Walsh, general manager, Quebec Central Railway.

Traffic Committee—C. A. Hayes, vice-president, Cana-

ONTARIO

Populous, Prosperous and Progressive

INDUSTRIALLY PRE-EMINENT

RICH IN AGRICULTURE AND MINERAL WEALTH

The Development of Ontario began with the influx of the United Empire Loyalists. Since then it has assumed an ever-growing importance in the national life and work of the Dominion and there is every indication that it will continue to enjoy the reputation it now possesses—that of being the leading agricultural and industrial province in Canada.

Ontario is ideally situated for commercial expansion. Contiguous to some of the most important States in the American Union with its boundaries touching the waters of Lakes Superior, Erie and Ontario, the Ottawa and St. Lawrence Rivers, as well as Hudson's Bay, this Province of Ontario is, so to speak, on the highway of Prosperity. Her climate is attractive and she enjoys every facility for transporting her products, at little cost, to the markets of the world.

In area Ontario is the second largest province in the Dominion. A territory of 407,262 square miles, with a population in 1911 of 2,523,274 people. Recent estimates place the population of Ontario at 2,750,000. There are more than 20,000,000 acres of arable land in the province still awaiting the plough.

A FEW SIGNIFICANT FACTS

Rural Area Assessed	25,000,000 acres
Area cleared	15,000,000 "
Under cultivation	14,000,000 "
Area of Forest Territory	150,000 sq. miles
Steam Railways in Ontario have a total length of	11,057 miles
Electric Railways	767 "

One-half the cheese produced in Canada is made in Ontario.

Ontario furnishes 45% of the mineral production of Canada.

The most valuable nickel mines in the world are in Ontario.

Estimated undeveloped water power	6,000,000 h.p.
Developed water power	985,000 h.p.

Ontario's Hydro-Electric Power Commission has constructed and operates 2,533 miles of high and low transmission lines.

Ontario has 23 cities, 139 towns, 150 villages and 553 townships.

Taxable Property in Ontario Actually Assessed by Municipalities, over $2,054,212,000.

In Manufactures Ontario produces more than half of all the manufactured products of Canada, the figures being: Ontario, $715,000,000; Canada, $1,390,000,000.

Assessed Value	$2,054,000,000
Annual Production	1,152,000,000
Uncultivated Farm Land	20,000,000 acres
Available Timber	19,000,000,000 feet
Available Pulp Wood	300,000,000 cords
Undeveloped Water Powers	6,000,000 h.p.

VALUE OF ONTARIO PRODUCTS

	Ontario.	All Canada.
Value of Farm Products	$ 450,000,000	$1,100,000,000
Value of Mineral Output	52,000,000	138,500,000
Value of Timber Output	50,000,000	172,500,000
Value of Manufactured Products.	715,000,000	1,390,000,000
Total	$1,267,000,000	$2,801,000,000

The ANNUAL PRODUCT of Ontario's farms, mines, forests, industries, etc. (which under the tax power of the Province secures all Ontario Government bonds), would pay off the entire direct bonded debt of the Province over 22 times—and do it each year.

Extensive forests of pine and other woods are yet untouched. Practically all minerals excepting coal are found in Ontario, and there are 6,000,000 h.p. in "white coal" still undeveloped. The value of farms in Ontario, including lands, buildings, implements and live stock, is estimated at $1,480,000,000, yielding an annual gross return of at least 23 per cent. of their value.

With Water Power abundant and cheap and easily accessible to its railways, Ontario is primarily an industrial province. And the products of Ontario's industries enjoy a widespread reputation for workmanship, material, design and price.

Agriculturally Ontario is second to none of the other Canadian Provinces. The nearness of Metropolitan centres in practically every point of the province has popularized mixed farming to a very great extent. But in the famous Northern Clay Belt, Wheat, the equal of Western Canada's best, has been successfully produced. In this particular section of Ontario, which is sparsely populated, there are millions of acres of very fine farming land, as well as forest and mineral areas.

THE GOVERNMENT

Lieut.-Governor: His Honor Lionel H. Clarke

Prime Minister and President of Council: HON. E. C. DRURY

Attorney-General..Hon. W. E. Raney

Treasurer........Hon. Peter Smith

Secretary and Registrar, ...Hon. H. C. Nixon

Minister of Education, ...Hon. R. H. Grant

Min. of Public Works.Hon. F. C. Biggs

Minister of Lands, Forests and Mines, ...Hon. Beniah Bowman

Minister of Agriculture, ...Hon. M. W. Doherty

Minister of Labor and Health, ...Hon. W. R. Rollo

Minister of Mines.....Hon. H. Mills

Without Portfolio.Hon. D. Carmichael

dian National Railways; J. E. Dalrymple, vice-president, Grand Trunk Railway System; W. R. MacInnes, vice-president, Canadian Pacific Railway; G. C. Martin, general traffic manager, Toronto, Hamilton and Buffalo Railway, and Carl Howe, traffic manager, Canada Southern Railway.

Legal Committee—W. C. Chisholm, general solicitor, Grand Trunk Railway System; W. H. Curle, general solicitor, Canadian Pacific Railway; G. Ruel, counsel, Canadian National Railways; F. E. Robson, general solicitor, Canada Southern Railway, and E. D. Cahill, general solicitor, Toronto, Hamilton and Buffalo Railway.

Financial Committee—I. G. Ogden, vice-president, Canadian Pacific Railway; Frank Scott, vice-president, Grand Trunk Railway System; A. J. Mitchell, vice-president, Canadian National Railways; W. H. Maund, secretary-treasurer, Temiskaming and Northern Ontario Railway, and E. B. Barber, comptroller, Algoma Central and Hudson Bay Railway.

Acreages Increased But Yield is Less

Larger Areas of Most Grains Were Sown in 1919 than in 1918—Yield Per Acre Less in Most Cases, But Wheat Production Slightly Greater—Number of Live Stock in Canada Shows Substantial Increase—Figures By Provinces.

FIGURES of areas sown to crops, and provisional estimates of the yield for all provinces, in 1919, as compared with 1918, have been compiled by the Dominion Bureau of Statistics, as given below. While increases in acreages sown are found in most cases, lower yields reduce the production to about the same as 1918.

The figures are as follows:—

Field crops.	1918, acres.	1919, acres.	1918, bush. per acre.	1919, bush. per acre.	1918, bush.	1919, bush.

PROVINCE OF ALBERTA

ALBERTA FLAX

ALBERTA EXCELS

In the moderate quality of its climate; In its possibilities for northward development; In the amount of free land still open; In the richness of its resources.

The Province produces Fish, Furs, Timber, Minerals and Coal but is

PRE-EMINENT IN AGRICULTURE

It produces heavy yields and a superior quality of grain; Bountiful fodder and roots; is admirably suited to all kinds of Live Stock and is ideal for Dairying.

ESTIMATED YIELD AND VALUE OF AGRICULTURAL PRODUCTS AND LIVE STOCK, 1918

	Acres	Bushels	Yield per Acre	Price	Revenue

Ontario and Quebec Lead in Manufacturing

Feature for Year Has Been Large Amount of American Capital Invested in Industry—British Interests Also Represented—Ontario Makes Record in Establishing Branch Plants—Shipbuilding on the Great Lakes—Pulp and Paper Trades Expanding.

IN spite of the fact that a thorough investigation of the Canadian tariff may be made in 1920, and the increasing power of the farmers as a political party threatens a reduction in import duties, foreign capital has this year displayed confidence in the stability of Canadian industry by establishing new branches here, and by extending plants already operating. The principal source of this capital has, of course, been the United States. Ontario and Quebec, as the two greatest manufacturing provinces of the Dominion, took the greater part of this capital, besides participating largely in the expansion of Canadian industries. The shipbuilding and pulp and paper trades made good progress during the year, and they are rapidly advancing as Canada's leading industries.

Montreal and Toronto, and the other large cities, have continued to secure their share of the new business. Labor difficulties, and the higher cost of living in the larger cities have, however, caused prospective industries to examine carefully the smaller manufacturing centres which have a fair supply of skilled labor, and where the cost of houses is not so high. As a consequence, many of them have decided to locate in these smaller centres, which have competed eagerly for the business; in many cases the competition has been too keen, concessions outweighing natural advantages.

The summaries below are from representative centres in Ontario and Quebec, and are supplied by officers of local boards of trade, or based upon information of this kind received during the year.

Port Arthur, Ont.

The Port Arthur Shipbuilding Plant, employing about 1,400 men, and with an average monthly payroll of $140,000, is one of the largest, most efficient shipbuilding companies in Canada. Since 1916, besides a large amount of repair work, they have turned out 14 ocean-going freighters for the Imperial Munitions Board, 14 trawlers for the Department of Naval Service of Canada, 14 ocean tugs, keels laid for two large ocean freighters (to be cut in two for the passing of the lower locks). When the deep waterway to the sea is completed, full-sized ocean-going vessels can be built at the head of the lakes without this necessity of cutting in order to reach the sea.

The Port Arthur Pulp and Paper Mill is turning out fifty tons of book sulphite pulp per day of a very superior grade, and have plans completed for the paper mill to be built in connection with the pulp mill.

The Great Lakes Paper Co. is about to begin construction just outside the city limits. This pulp and paper plant will manufacture about 100 tons of pulp a day and will have a paper mill of proportionate size. They have contracted for 12,000 h.p. at $17.50 per h.p. from the Hydro Commission, and will get a reduction on this rate on a greater consumption of power on the Nipigon, which is capable of a 200,000-h.p.

development. This mill is in connection with the Pic and Black Sturgeon limits, one of the finest in Canada.

The Government Fish Hatcheries have distributed more fry than any other hatcheries on the continent.

Grain elevators. In 1900 Port Arthur had only 5 per cent. of the elevator storage capacity at the Canadian head of the lakes. Now it is close to 50 per cent. of that capacity, and still increasing. Her grain terminals are the greatest and most modern in the world. All the largest grain terminals constructed during the past eight years at the Canadian head of the Great Lakes have been built at Port Arthur owing to its open seaway to all sites, magnificent harbor foundation, great dock and storage facilities on its frontage. Total elevator capacity of Port Arthur with the additions now being made, is 25,000,000 bushels, including the Port Arthur elevator, government elevator and nine private elevators.

Other industries being carried on successfully are: Fox farming, at Silver Islet; tent and awning manufacture, brass foundry, and wire manufacture.—Secretary, Port Arthur Board of Trade.

Fort William, Ont.

Industrially, the past year has been a very prosperous one for Fort William. While there were no sensational demands for local products, all industries were kept fully engaged and activities well balanced. One of the features worthy of comment is that while the present year has witnessed almost universal unrest throughout the Dominion, Fort William industries were not affected, all industrial disputes were amicably adjusted as they arose and the van of production kept moving steadily.

The plant of the Canada Starch Co. has just completed one of the best years of its history, the increasing demand for their product necessitating large additions to the plant during the past year. The Ogilvie Flour Milling Co. has just completed extensive additions to its plant and has also added a unit for the manufacture of stock foods. The Canada Car and Foundry Co. have had a very good year, the car department being fully engaged in the building of new freight cars and the repairing of used cars. Their shipbuilding department has been greatly developed. Originally designed for the execution of war orders, it will remain as a permanent unit of the plant. The latest product of the plant, the S.S. "E. D. Kingsley," an oil-burning freighter destined for the West Indies trade, is rated one of the most modern freight boats built upon the Great Lakes. Further ship orders have been booked and the company contemplates the erection of additional shipbuilding facilities at once.

All iron foundries and engineering plants have been running to capacity and future prospects are of the best. The Plymouth Cordage Co. are erecting a five-story fireproof warehouse on the harbor front for the storage and distribution of binder twine for the western trade. Wholesale and retail business has been very good, the volume being as great as in any pre-war year. In spite of high building costs, the building trades have been quite active, $500,000 being expended in school buildings alone, additions have been made to several of the grain elevators, a $50,000 skating rink has also been erected, a number of residences were built under the provisions of the federal housing scheme and several higher class residences were erected. There is still a brisk demand for housing accommodation, and additional homes must be erected next spring.

The relatively high prices obtained for farm produce has given quite an impetus to the business of agriculture, and agricultural lands are in good demand. The spring of 1920 will undoubtedly see an influx of settlers to the agricultural lands of this district which is especially adapted to mixed farming, abounding in wood, good water and fertile soil. Since the completion of the Scott Highway connecting Fort William with Duluth and other American cities by automobile route, summer tourist traffic has grown to be quite a feature in the commercial life of the city. Labor conditions have been remarkably well balanced, there being absolutely no unemployment and on the other hand there has been no curtailment of industrial operations due to labor shortage.—Secretary, Fort William Board of Trade.

Border Cities

During the first nine months of the present year, no fewer than forty-three new concerns established at the border municipalities of Ford, Walkerville, Windsor and Sandwich. Since that time this record has been more than maintained; and it involves fully one new concern per week!

As is natural, most of such development represents American capital and enterprise. This seems to be the logical location for the establishment of United States branch factories. We are merely eight hundred yards from the city of Detroit; only the river flows between. In addition, we are so conveniently close to a large number of exceedingly important industrial centres in the United States. American manufacturers can much more quickly and conveniently travel from their United States headquarters to their branches at these border cities than would be possible were they located further east.

We have here the Canadian centre of the motor vehicle industry; and, if there were any doubt as to this, it will shortly be placed beyond all peradventure by the operation of the immense new plant of the General Motors Corporation at Walkerville. In all, we have now over thirty concerns manufacturing automobiles, parts and accessories. In addition, we are the Canadian centre of the salt and heavy drug and chemical industry, and for pharmaceutical preparations of every kind.

However, notwithstanding the above outstanding lines, our industrial life is exceedingly varied, and we are striving to maintain it so, while at the same time doing all we can to develop our main lines. For instance, in the comparatively near future we shall have here the only factory in the British Empire that is manufacturing blue denim for overalls from the raw cotton. I refer to the Peabody Sales Corporation.

The future for us is very bright indeed, and it seems quite safe to predict that within the next few years we shall have here a city of which all Canadians may feel justly proud. The completion and operation of the huge plant of the Canadian Steel Corporation at Ojibway will mean very big things for us, and might easily double our population within a couple of years of its actual start. And, there are other large and important propositions now looming up most hopefully upon our horizon.—Commissioner, Border Chamber of Commerce.

New Industries for Stratford

The year 1919 closes with Stratford in a very prosperous position industrially. The city is pre-eminently a woodworking centre and the furniture factories are taxed to capacity in an endeavor to meet the unprecedented demand for their output. Numerous inquiries from overseas have been received, but the Canadian demand has been such that little foreign business could be considered save a few shipments to Great Britain and South Africa.

A large plant with 120,000 feet of floor space, formerly occupied by the Mooney Biscuit and Candy Co., but idle for the past three years, has been acquired by the Canadian Edison Electric Appliance Co., Ltd., who will manufacture electric household appliances of all kinds. The idle plant of the Stratford Desk Co. has been purchased by a felt shoe company who will begin operations early in January. Like the furniture men, manufacturers in other lines are also taxed to capacity, this being particularly true of the knitting companies, harness and saddlery, woollens and brass goods. The year has been a prosperous one, we have no idle factories and the output for 1920 is promising.

The men as they returned have been assimilated by the local industries and there is no unemployment in the city. Ninety-nine per cent. of our labor is British and seventy-five per cent. of our families are home owners, giving a degree of stability to the labor supply not often found. There is no labor unrest in the city and a very friendly spirit prevails between employer and employee. There is no surplus of houses and on the other hand no acute shortage. With the growth incident to the new industries acquired, there will be need of considerable building in the spring and arrangements are now being made to meet this need.

The growth of Stratford as an industrial centre has been steady and substantial and the prospects for the coming year are particularly bright.—Secretary, Stratford Board of Trade.

London, Ont.

The city of London has experienced the biggest building year in its history. At the beginning of the eleventh month, permits have been issued for the erection of buildings valued at over two million dollars and the Dominion government are erecting a military hospital just outside the city which will cost some three million dollars. This is built on a free site furnished by the city and has a spur track from city owned and operated electric railway to London's harbor on Lake Erie, Port Stanley.

Six hundred thousand dollars has been expended in the erection of industrial buildings and additions and well over five hundred thousand for new residences. Two large theatres are nearing completion and the building program of the future includes the replacement of practically every public building, including post office, customs house, city hall, Grand Trunk Railway depot and registry office. A war memorial building calling for an expenditure of $100,000 will probably be built and new buildings for the Y.M.C.A. and Y.W.C.A., are possibilities for the near future. The Western University have plans to erect modern educational buildings on a fine site just outside the city and very large expense is needed to take care of the increase in school population. The Holeproof Hosiery Co. expect to complete their new building early in the spring and McClary's and many other factories are completing extensive additions.

The Republic Co., of Alma, Michigan, the largest of its kind in the world, has decided to build a Canadian plant in London, and this will be proceeded with almost immediately. Several other large concerns including one which has decided to build a $100,000 factory at this point have selected London as the most desirable spot for their Canadian plants. The city has shown interest in the possibilities of industrial development by purchasing land to be held for industries on which the taxes are merely nominal and a public-spirited incorporated association has been formed to assist development by building factories to rent to approved industries.—Secretary, London Chamber of Commerce.

Kitchener, Ont.

The year 1919 has been to Kitchener one of substantial industrial and commerical progress—not a boom, but a healthy, permanent and gratifying growth. The population of the city increased by 1,285, and now stands at 21,052. Assessment increased by $2,201,136, and is now $14,807,202. Commercial progress of the city is shown in a marked degree by the clearing house returns. For the period, January—October, 1918, the clearings were $26,088,175, and for the corresponding period 1919, $37,275,574, an increase of $11,187,399—40 per cent.

Industry has been exceedingly active and prosperous. Two new industries of magnitude have located in Kitchener since January 1st, viz., the Four Wheel Drive Auto Co. This is the Canadian branch of the parent company at Clintonville, Wis., and is backed and largely managed by local capital. A factory is being erected at the eastern end of the city and the sales organization has been perfected and a large and prosperous industry is indicated. The Ames-Holden Tire Co. is erecting a million-dollar plant for the manufacture of automobile tires and expects to be turning out finished product early in the new year. The Ames-Holden System are also erecting a factory for the manufacture of felt footwear, of which line of industry Kitchener is the Canadian centre. The Dominion Tire Co. is spending about half a million dollars in doubling the capacity of their plant and have, as well, erected this year a large building for office and administrative purposes. The Merchants Rubber Co. and the Lang Tanning Co. have built large additions to their plants, the latter firm now making sole leather as well as being the largest manufacturers of harness leather in the British Empire.—Secretary, Kitchener Board of Trade.

EDMONTON

CAPITAL CITY OF ALBERTA

EDMONTON, the Great Western Metropolis is situated on the Saskatchewan River, 793 miles west of Winnipeg, 774 miles from Vancouver, 946 miles east of Prince Rupert.

Gateway to the Peace River country and Mackenzie Basin, with vast grazing and agricultural areas, Natural Gas, Oil, Salt, Tar Deposits and other Minerals.

EDMONTON is an important Industrial, Agricultural, Railway and Distributing point, with three Transcontinental Railway lines: C. P. R., C. N. R. and G. T. P. and branches, besides the Edmonton Dunvegan and B. C. and Alberta and Great Waterways Railways. Educational Centre: is the seat of University of Alberta; has exceptionally fine Public and High Schools and Colleges. Municipally owned and operated Electric Light and Power, Street Railway, Telephone and Waterworks Utilities. Handsome Legislative Buildings and Government Administration Headquarters. Municipal Golf Links. Exhibition Grounds and Buildings largest in Western Canada.

Manufactures of every description. City underlaid with unlimited supply of lignite Coal. Surrounding district includes some of the most productive mixed farming lands in the West—no crop failures. Important Live Stock Yards and Packing Plant Industries. Population 60,000 - 70,000.

EDMONTON'S Civic owned utilities offer special inducements to large users and yet operate at a profit. Results of operation:

Ten months, 1st Jan. to 31st Oct.	1918	1919
Gross earnings, all Utilities	$1,409,739.53	$1,690,763.69
Operation, Maintenance, Capital and Depreciation Charges	1,401,114.58	1,570,065.85
Net Surplus	$ 8,624.95	$ 120,697.84

Edmonton offers unrivalled opportunities to all classes.

INSERTED BY AUTHORITY OF CITY COMMISSIONERS.

Chatham, Ont.

The Board of Trade has been succeeded by the Chamber of Commerce. As to industrial conditions, Chatham is experiencing an excellent situation at the present time. There is no unemployment, and in fact just at the present there is a considerable unfilled demand for labor. Labor is being paid from forty to fifty-five cents per hour, and mechanics as high as eighty cents in various lines of trade.

During this year, the Wilson Company, Ltd., has located a large plant in Chatham, and plans are under way to practically double the output by enlarging buildings; the Gray-Dort Motors have taken over the large plant of the Wm. Gray-Sons-Campbell Company, and their plans for the coming season call for more than double the output of last season; the Denby Motor Truck Company has made designs for a pleasure car and expect to place it on the market shortly; the Hayes Wheel Company has added a large department for the manufacture of rear axles; the Dowsley Spring and Axle Co. suffered a loss by fire, but they rebuilt for their spring department a larger and absolutely fireproof building; the Canadian Des Moines Steel Company has plans out for the construction of an addition to their plant which will give considerable increase in capacity. Every factory in the city is running full blast, and proprietors declare that they consider the outlook very bright. Chatham did not have any large amount of war-time contracts, but the factories were kept going on regular lines. There have been no slack periods and general conditions would seem to be more favorable than at some times in the past.—Manager, Chatham Chamber of Commerce.

Hamilton, Ont.

Hamilton has enjoyed a year of unprecedented success in the securing of new industries, and may well look forward with confidence to the future prosperity of the city. Since the beginning of 1919 no fewer than thirty industrial concerns have decided to locate their plants here, and while a few of the smaller ones are already in operation, the larger ones have not yet had time to complete their building operations, so that it will be realized that the city has not yet begun to experience the fruits of a year of marked industrial growth.

For the most part the new industries are Canadian branches of American concerns which are coming to Canada, not only to care for and develop the Canadian market, but also with a view to looking after their export trade from within the Empire, there being a widespread feeling among the manufacturers of the United States that a high preferential tariff within the Empire is sure to come in the immediate future, and that they will then not be in a position to compete with Canadian manufacturers for the coveted British trade unless they have had the foresight to establish Canadian branches. While many American manufacturers have already made the plunge, there is no doubt but that scores of others are deterred only by unsettled labor and other conditions from doing likewise. This condition applies not only to Canada, but to the entire continent, if not the whole world. It is not at all surprising that the manufacturer should adopt this attitude, more particularly when it is a case of making an investment in what is, to him, a foreign field, but there are indications that he is preparing for quick action when conditions generally become more settled. This optimistic prediction is borne out by the fact that never in the history of the city's industrial department have inquiries from American manufacturers been more numerous than during the year 1919, while the number of inquiries from Britain and other overseas countries also shows a considerable increase over preceding years.

Among the larger industries that located in Hamilton during the year, but of which the city is not yet feeling the benefit, are: Firestone Tire and Rubber Co., Akron, Ohio; Hoover Suction Sweeper Co., Canton, Ohio; Quaker City Chemical Co., Philadelphia, Pa.; Gerrard Wire Tire Co., New York; Carr Fastener Co., Cambridge, Mass.; Canadian Carbonate Co., Montreal, Que.; Norton Co., Worcester, Mass., and Porritts and Spencer, Bury, England. When the plants of these companies are completed they will represent an invested capital running into millions, and will give employment to upwards of 4,000 people, so that unless something unforeseen happens there is no cause to worry about Hamilton's prosperity for some time to come.—Industrial Commissioner, Hamilton.

St. Catharines, Ont.

The industrial growth of the city of St. Catharines and surrounding district during the past year has been, considering the conditions that have existed, very encouraging. Two new industries have been located here, and while operations are being confined to a few lines at present, it is the intention of these concerns to gradually add other lines to their product, and there is every prospect that they will very rapidly develop into industries of considerable magnitude.

The principal industrial development, however, that has taken place in this district during the past year, is the large increase in the capacity of the majority of the well-established industries. One of the largest concerns has added many new lines to their product which will practically double their capacity. Another company has purchased a site for the erection of a new factory which will enable them to triple their output, while several others are building additions to their plants in order to take care of the increased demand in their different lines.

In so far as the industrial future of St. Catharines is concerned, with its many natural advantages such as an abundance of cheap electric power, rail and water transportation facilities, high-grade labor market, close proximity to large centres, etc., together with the added advantages of being located adjacent to the new Welland Ship Canal now under construction, and within a few miles of the 300,000-h.p. Electrical Development at Queenston, there is every prospect that this city will eventually become the centre of one of the largest industrial sections in the Dominion.—Secretary, St. Catharines Board of Trade.

Guelph, Ont.

There has been great industrial expansion in Guelph during the year 1919. Several local companies are building large additions to their already extensive plants and several new companies are establishing themselves in Guelph. The new companies to come are the Northern Rubber Co., who are now building a large steel and concrete building for making rubber footwear. This company will employ 500 hands as soon as it is in operation. The Dominion Food Products Co. have purchased a four-story red brick building on Paisley St., and have established themselves therein. They are enlarging their output every week and will shortly employ 75 hands. The Lang Mfg. Co. have just finished their St. Patrick's ward factory, which they now occupy. These people make a line of special machinery. The Sherer-Gillett Co., of Chicago, have purchased from the city of Guelph the Suffolk St. property and are to enter into possession at once; also it is expected that they will build, in the spring of 1920, a modern food factory adjoining their new factory building. The Shinn Mfg. Co. are now established in their Woolwich St. factory where they manufacture lightning rods and wire for automobile tires. The Live Wire Co., Ltd., is the latest factory to come, and they are making insulated rubber wire.

The large additions being made to existing factories are a $200,000 addition to the Partridge Rubber Co., makers of automobile tires. A $400,000 addition to the Guelph Carpet and Spinning Mills property, and a large addition to the International Malleable Iron Co. for making iron fittings of all kinds. Also the Sterling Rubber Co. have erected an entirely new factory building adjoining their old premises, and the Taylor-Forbes Co. are about to build large extensions to their radiator works. The Dominion Linens, Ltd., have now under construction additions to their already extensive plant here. These additions and improvements have brought about a situation that will need to be remedied in the spring of 1920, when the erection of 500 new houses will need to be started, if we are to properly house the additional workmen and families expected in the city.

ST. BONIFACE, Manitoba (Canada)

(The Industrial City adjoining Winnipeg)

HAS: The largest Flour Mills in Canada; the largest Stock Yards; several Abattoirs, Sash and Door Factories; Sheet Metal Works; Brick Plants; Dye Works; Foundries, etc.

HAS: The Cheapest Electric Power in America. An unlimited supply of Pure Soft Water. Trackage facilities on five Railroad Systems reaching all points in Canada and the United States.

OFFERS: Special Inducements to Manufacturers. Opportunities for Tanneries, Soap Factories, Glue Factories and other industries incidental to the Live Stock Trade and other lines.

Manufacturers are invited

Enquire: Secretary St. Boniface Board of Trade

"Conservation of Commerce" in Canada

This is a Company with a Dominion of Canada Charter, the Home Office in Canada, and an Agency Organization in Canada and the United States, and correspondents in Great Britain.

All premiums and income received in Canada and profits made in Canada are invested and disbursed in Canada.

The business of the Employer in Canada is solicited.

The Board of Directors:

HENRY E. RAWLINGS, Esq., President and Managing Director
WILLIAM McMASTER, Esq., Vice-President.

SIR VINCENT MEREDITH, Bart.
FRANK SCOTT, Esq.
JAMES B. FORGAN, Esq.
THOS. DE WITT CUYLER, Esq.

HON. E. C. SMITH
PHILIP STOCKTON, Esq.
JOHN MACDONALD, Esq.
SIR AUGUSTUS NANTON

At the Agricultural College several large buildings are now in course of erection, and the city of Guelph is now constructing a $100,000 school house to take care of the growing needs in this line. The year has been one of great prosperity for the city of Guelph, and the outlook for 1920 is exceedingly favorable.—Secretary, Guelph Chamber of Commerce.

Brantford, Ont.

Brantford has been fortunate in coming through a very trying period rather better than most industrial centres. The reason for this is largely due to the nature of the manufacturing establishments of this city, they being for the most part those which produce agricultural implements and accessories for the farm, for which there is a steady demand at all times, but just now an unusual one, owing to the enormous demand for the foodstuffs and dairy products of this country by the war-stricken countries of Europe. While some of the Brantford factories were manufacturing munitions of war, the great majority of them continued during the last four years to make their regular lines. Consequently, there has not been any considerable disturbance due to the adjustment of conditions to a peace footing. Following the cessation of hostilities in Europe, orders for agricultural implements have been pouring into this country, and as a result the present outlook industrially in Brantford is exceedingly bright.

While all Brantford's old-established industries continue to be in a healthy and prosperous condition, this city has been fortunate in adding during the last few months a couple of large new industries which promise to become a decided acquisition. The principal among these is the Robbins and Myers Co., of Springfield, Ohio, which is constructing a monster plant in which 1,500 hands are to be employed. They manufacture electric motors and electrical appliances of all kinds. The Dominion Steel Products Co., which is a new industry, created to manufacture war munitions, has one of the most modern plants in Ontario, and has completed arrangements to manufacture some electrical lines and has orders in prospect which will keep this company very busy for a long time to come. In addition, Cash and Co., a large English embroidery firm, has decided to establish in Brantford, and has secured temporary quarters with a view to building a plant in a couple of years. There are two other large buildings constructed to manufacture American munitions, and which are modern plants of the most approved type, at present idle owing to the delay in settlement with the American government. This settlement has now been reached and it is known that these plants will be taken over by American firms establishing Canadian branches, and they will probably be running full-swing in a few months' time.—Secretary, Brantford Board of Trade.

Oshawa an Automobile Centre

The year 1919 has been one of great expansion in the town of Oshawa, Two new industries, the Oldsmobile Co. of Canada Ltd., and the Central Spring and Axle Co., Ltd., have been established here, while practically all the other industries have built additions.

This industrial expansion has led to a large increase in population, and a consequent shortage of houses. The town has taken advantage of the provisions of the Ontario Housing Act, and a great many houses have been built by the manufacturers and private parties. The total building permits for the year aggregated $2,250,000. Labor has been fully employed, and there have been no disputes.—Secretary, Oshawa Board of Trade.

Peterborough, Ont.

The industrial development of Peterborough is steady and reports from the numerous industries already established in the city denote thorough satisfaction in location and general facilities for the ever increasing business. The year of 1919 has particularly been one of marked progress; present established concerns in almost every case have enlarged their productive floor space and local new industries have been incorporated and report remarkable development; two American concerns have established Canadian branches in Peterborough, viz., the Western Clock Co., of Illinois, makers of the "Big Ben" and "Westclox"; and the Nashua Gummed and Coated Paper Co., of Nashua, N.H.

The export trade of Peterborough has developed considerably since the closing of the war and at present the articles include: Dairy machinery from the De Laval Separator Co.; cereals from the Quaker Oats Co., and the Peterborough Cereal Co.; electrical machinery from the Canadian General Electric Co.; woollen goods from the Canadian Woollens Co.; clocks from the Western Clock Co., and coated and gummed paper from the Nashua Gummed and Coated Paper Co.—Secretary, Peterborough Board of Trade.

Belleville, Ont.

We have undoubtedly made substantial progress. Our building permits are quite up to expectation and about the average of cities of our size excepting those that have taken advantage of the Provincial Housing Scheme. At least four new industries have been added to our list, largely through the efforts of the Grahams, Limited, and our new industrial commissioner. We need a reliable government survey and report on our rich mineral resources, especially iron (the basis of all) and fluorspar and talc, of which we have inexhaustible quantities in Hastings. The Tivani Steel Company has great expectations in its electric process.—Secretary, Belleville Board of Trade.

Sherbrooke, Que.

This year, 1919, has been satisfactorily fruitful for the city of Sherbrooke, Quebec. The Connecticut Cotton Mills, who have a very large plant here, will double very shortly their factory. The Julius Kayser Co. are erecting a five-story building which will more than double their capacity. The Cluett and Peabody Co. of Canada are also to establish a plant in a few weeks.

The ratepayers have voted half a million for the paving of our main thoroughfares, and the street railway company is building presently a considerable extension to its line. Sherbrooke will also have a model city for the laboring class; a company capitalized to $500,000, acting under the recent legislation to that effect, is now in operation.—Secretary, Sherbrooke Board of Trade.

FIFTY MILLIONS ADVANCED TO SOLDIERS

The Soldier Settlement Board has gone over the fifty million mark in loans to returned soldiers settling on the land. The returns are completed to November 15th, and show a grand total of $50,699,003. The number of loans approved is 16,175, and the average loan $3,134. Advances were made for the following purposes:—

Land purchase—		
Amount for purchase	$28,125,250	
Improvements	3,528,325	
Stock and equipment	10,336,537	
		$41,990,112
On Dominion lands—		
Improvements	$ 1,375,173	
Stock and equipment	3,882,627	
		5,257,800
On land owned by settlers—		
Encumbrances	$ 1,726,279	
Improvements	583,294	
Stock and equipment	1,141,518	
		3,451,091
		$50,699,003

The board also reports a total of 5,433 soldier grant entries completed up to the 22nd of November.

The Agricultural Branch has received 41,875 applications for certificates, and of these 31,807 have been approved from the following provinces: British Columbia, 3,989; Alberta, 8,827; Saskatchewan, 7,982; Manitoba, 5,342; Ontario, 2,906; Quebec, 925; New Brunswick, 809; Nova Scotia, 644; Prince Edward Island, 383. Total, 31,807.

WINNIPEG

THE GATEWAY CITY TO THE WEST

With Its Municipally Owned Power Plant Affords The Cheapest Light and Power on the American Continent

THE Hydro-Electric System owned and controlled by the City of Winnipeg is recognized throughout the whole American Continent as an outstanding example of successful Municipal Ownership.

The exceedingly low rates for power have been a determining factor in influencing many industries in locating sites in the City.

Back in 1905 it was fully appreciated that the rates charged for power at that time by the Winnipeg Electric Railway Company, who controlled a monopoly, were excessive and prohibitive, proving a detriment to the City and retarding industrial growth.

Power Station, Point du Bois

The rate per k.w.h. at this time was 20 cents for lighting purposes, with power in like proportion.

In establishing its own municipal plant Winnipeg had to contend with many difficulties, which had to be overcome. Under its charter the City had no legal authority to expend money for a purpose of this kind outside the boundary of the City, nor could the City, due to existing statutes at this time, sell electrical energy within the City in opposition to the Winnipeg Electric Railway Company, an established company.

It must be borne in mind Winnipeg was literally forced into establishing an electrical power plant of its own by a combination of circumstances. Bidding against other cities in the rapidly expanding West for the stability resulting from industries located in their midst, the chances for preferment were futile, unless the important and lacking requirement, cheap power, was provided.

Some cities offered gas free or at very low rates, others free sites, exemption from taxation or a bonus. The latter being of temporary benefit could not balance permanently high-priced power, and natural gas was not available.

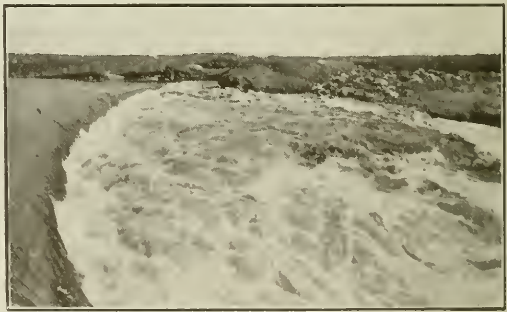
The growth of the City—the Gateway of the West—was being retarded for the want of lower-priced power.

Negotiations with the Winnipeg Electric Railway Company for lower rates were unsuccessful, many plans were suggested and considered, aiming to provide electrical energy for the people at more reasonable rates. Many companies offered to supply the City's electrical requirements at rates varying downwards from existing rates, but each required certain franchise or other rights which Winnipeg was not prepared to grant or consider.

The result of investigation by civic and public bodies contemporaneously with these offers was the creation of a strong public opinion favoring municipal ownership and the operation of an electric utility.

It was generally agreed that the City Council could not afford to await the expiration of existing franchise (in 1927) to obtain control of the properties then in existence, and it was futile to attempt to control the rates by agreement with the existing company.

At this time the Public Utilities Act had not been passed and there was not, as now, an official investigating complaints, compiling statistics, ascertaining costs and regulating the operation and charges of public utilities.



Overflow Channel, Point du Bois.

For these reasons, principally, the City Council decided to enter into competition with the established power company by building a municipally owned hydro-electric plant.

The City approached the Legislature in 1906 and were granted the necessary powers to submit a by-law to the ratepayers to raise $3,250,000 for the construction and operation of a municipal power plant. This was voted on and successfully carried.

The only feasible water-power sites of sufficient capacity within economical transmission distance of Winnipeg are located on the Winnipeg River. Contour surveys were made of the various power sites, the engineers finally recommending the establishing of the plant at Point du Bois.

Actual design was commenced in 1906, and it was originally planned to complete the work in 1909, but unforeseen difficulties were encountered, and the impossibility of marketing bonds in 1907, the year of the financial depression, caused over a year's delay in the completing of Winnipeg's own power plant.

It was in October, 1911, that the plant was sufficiently completed to supply Winnipeg with current generated eighty miles away on the City's own plant.

In the first year approximately 14,600 consumers availed themselves of the extremely low rates and were connected with the system, and it is conservatively estimated that over $800,000.00 less was paid for electrical energy by consumers in that year than would have been paid under the rates existing in 1911 just prior to the commencement of the City's plant.

The second year's results of operation showed a net gain of 11,000 consumers, making approximately 26,000 active consumers patronizing the system on its second anniversary. Since this time the undertaking has enjoyed a record of continual progress and success. The lighting rate which had been reduced in 1907 from 20 cents to 10 cents per k.w.h. was further reduced to 3⅓ per k.w.h., which over 38,000 consumers now enjoy.

The rate to manufacturers is as low as half a cent per k.w.h., the lowest rate in North America.

The plant is now developing 47,000 h.p., with an ultimate capacity of 100,000 h.p.

That the municipal electricity undertaking is a plant of vigorous growth may be gathered from the recent annual report for the year ending last April.

The balance sheet shows assets of ten million dollars while the properties account indicates an investment of over eight million dollars, this amount being six hundred thousand dollars greater than the debenture debt.

This means, of course, that the profits earned by the plant are being invested in capital extensions. The significant feature of the balance sheet is the large accumulation of reserves which now approximate two million dollars, being three times the amount required for Sinking Fund Levies, which take care of the redemption of the debenture debt.

For the last fiscal year the earnings totalled $1,097,196.99, while the total expenses were $1,044,315.99, leaving a surplus for the year of $52,881.00.

Two-thirds of the total expenses are accounted for by fixed charges.

The surplus carried forward to the next year totalled $104,262.00.

Terminal Station, Winnipeg

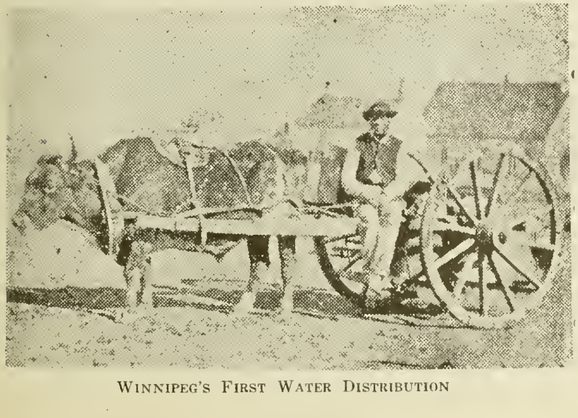
It is interesting to note in connection with this surplus that two years ago the plant appropriated a quarter of a million dollars from this revenue surplus and applied it to the reduction of the capital debt.

The undertaking, it will be seen, enjoys a healthy financial position.

These are the outstanding features in the administration of Winnipeg Municipal Power Plant which distinguishes it from many other publicly owned commercial undertakings, namely, the entire absence of political influence and interference and the efficient accounting system in operation. Being operated entirely on a business basis, its accounts kept in a scientific and comprehensive manner, Winnipeg Municipal hydro-electric system is of special interest to the citizens throughout the whole of North America.

The Greater Winnipeg Water District

WITH the official opening by His Royal Highness, the Prince of Wales, of Winnipeg's new soft water system September 19th, 1919, Winnipeg steps anew into world's history—for there are only four other communities in the world who have gone a greater distance for their water supply than has Winnipeg. The work of building its new gigantic water carrier was commenced in 1913 and, in face of the world war, 1914-1918, while the resources of mankind were being tapped to the last degree, Winnipeg continued her ardent task of providing an unlimited supply of pure soft water.



Winnipeg's First Water Distribution

The evolution in a few years of Winnipeg's water supply system from a few wells whose combined capacity was measured by barrels, to the very best and most modern system available, capable of delivering 100,000,000 gallons per day of the finest soft water, is another indication of the rapid growth of the City of Winnipeg and district, and an evidence of the faith which our people have in the future.

In the early days in Winnipeg (1878) the citizens obtained water from men who made deliveries from square tanks mounted on wheels, or in the winter season from large barrels drawn on sleighs. The water was taken from wells.

Winnipeg Water Works Co.

The first supply system was installed by a private corporation known as the Winnipeg Water Works Company. In 1880 they were given an exclusive franchise for the supply of water, covering a twenty-year period, but did not commence commercial operations until 1882. The Assiniboine River was the source of supply. Operation of this system remained in the hands of the Water Company until April, 1899, when the City purchased their plant and distributing system for the sum of $237,650.00.

Immediately upon taking over this system the City decided to change the source of supply, and the now discarded artesian well system was placed in operation in October, 1900.

This system was gradually developed as necessity required until the pumping capacity is about 14,000,000 gallons in 24 hours, and the combined capacity of the three reservoirs about 24,000,000 gallons.

The average daily consumption of water at the present time is about 12,000,000 gallons.

Winnipeg's New Soft Water Supply

The source of Winnipeg's new water supply is Shoal Lake, Ontario, which is an arm of the Lake of the Woods, and has also its own drainage area of 360 square miles, and a water surface of 107 square miles. The Lake of the Woods constitutes an enormous reservoir of pure soft water, and is situated within one hundred miles of the City. The Greater Winnipeg Water Aqueduct is one of the world's major undertakings as the following statistics will show:—

Source of supply	Shoal Lake, Ont.
Area of. Shoal Lake	107 square miles.
Area of Lake of the Woods, including Shoal Lake	1,500 square miles.
Drainage basin of Shoal Lake	360 square miles.
Drainage basin of Lake of the Woods	27,700 square miles.
Total length of conduit	96.5 miles.
Difference in elevation between Shoal Lake and the city of Winnipeg's reservoir surface....	294 feet.
Method of delivering supply	Gravity.
Area of Greater Winnipeg Water District	92.03 square miles.
Population of Greater Winnipeg Water District..	250,000 inhabitants.
Length of cut-and-cover concrete aqueduct with capacity of 85,000,000 Imperial gallons per day	77.5 miles.
Length of river siphons and pressure section of concrete aqueduct with capacity of 85,000,000 Imperial gallons per day	7.1 miles.
Length of reinforced concrete pressure pipe (lock joint type) with capacity of 50,000,000 Imperial gallons per day	9.4 miles.
Length of 48-inch concrete pipe, through streets of Winnipeg	2.3 miles.
Date work commenced on undertaking	October 1st, 1913.
Date of completion	October 31st, 1918.
Maximum size of concrete cut-and-cover aqueduct.	10′ 9″ x 9′.

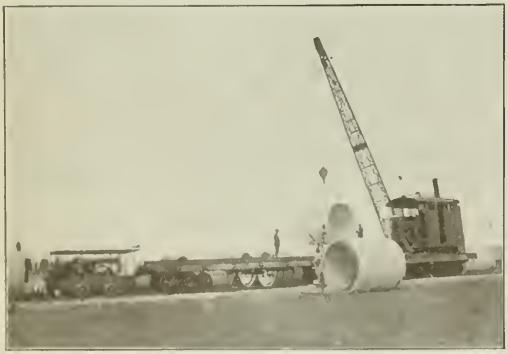
The quantities of earth handled by the contractors and paid for by the District during the three seasons of aqueduct construction work would be sufficient to fill the Red River to the top of the banks for one and a third miles.

The quantities of concrete poured in the aqueduct structure and its appurtenances during the same period would provide 24 feet of pavement six inches thick over 134 miles of streets, or would provide a concrete walk six feet wide wherever there is now in Winnipeg a sidewalk of plank or of concrete.

The reinforcing steel used in the construction of aqueduct to date, if all rolled into rods five-eighths of an inch in diameter, would stretch from Montreal to Regina, a distance of 1,768 miles.

The Portland cement consumed during the same period would fill a train of freight cars 18½ miles long, and would weigh 4½ times as much as the entire population of the Water District.

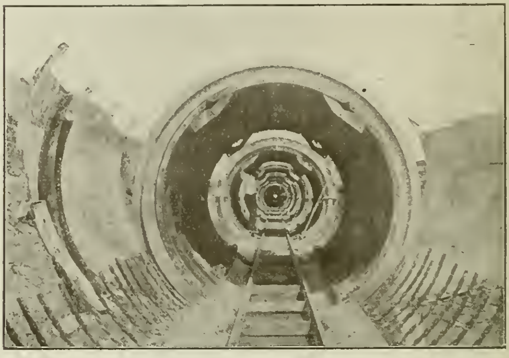
The main engineering features of the system, which is some 97 miles in length, comprise a construction railway, with 111 miles of track, including nine sidings, spurs to gravel pits, yards, etc.; a dyke and channel at Indian Bay for the diversion of the Falcon River into Snowshoe Bay; a concrete cut-and-cover gravity aqueduct with appurtenant works 85 miles in length from the intake at Indian Bay to a future 250,000,000-gallon reservoir at Deacon, southeast of Transcona; 10 miles of 5 feet 6 inches diameter reinforced concrete pipe from the reservoir at Deacon to the Red River, and 2.3 miles of 48-inch cast-iron pipe from the Red River to the McPhillips Street reservoir in Winnipeg. The difference in elevation between Shoal Lake and Winnipeg is approximately 300 feet. The conduit west of Deacon has a capacity of 60,000,000 gallons per day.



LOADING 66-INCH REINFORCED CONCRETE PIPE FOR CONTRACT 55

The pipe is constructed at manufacturing yards, located in the town of Transcona and is made in sections 8 feet long, each section weighing approximately 8 tons.

In the fall of 1913 active work was begun and survey parties were put into the field to locate the most economical line; at the same time the designing of the aqueduct was in progress to find the class of construction most suitable for the conditions of the country through which the line passes. In the spring of 1914 the final location was established over a right-of-way owned by the Water District, which varies from 300 to 500 feet in width. A large part of this right-of-way was obtained by grants from the Dominion Government.



SHOWING THE CONSTRUCTION OF THE CIRCULAR REINFORCED CONCRETE DEPRESSED SECTION, WHERE THE AQUEDUCT APPROACHES THE RESERVOIR SITE AT DEACON

The year 1914 was spent in clearing the right-of-way and in building the railroad between Shoal Lake and Winnipeg as well as a dyke across Indian Bay. This dyke is approximately 7,000 feet long, and contains about 230,000 yards of material, all of which was obtained from a borrow pit and a quarry located at the north end of the dyke. A large number of drainage and offtake ditches were necessary in order to drain the country properly before actual construction of the aqueduct was commenced. Railway water tanks, miscellaneous railway buildings and engineers' quarters were built. Contracts for 85 miles of the aqueduct proper were let during the year 1914. Contracts for the westerly 12 miles were let in 1916 and 1917.

In the spring of 1915 aqueduct construction was commenced, and during that season 12.3 miles was built, or 12.8%; during the 1916 season 23 miles was built, making 36.5%; during the 1917 season 38.7 miles was built, or 76.77% to date; and the works as planned were completed during 1918, at the expiry of the period originally anticipated as necessary for the work.

The originally estimated cost of the work was $13,500,000 exclusive of interest during construction and purchase price of necessary lands, for a supply of 85,000,000 gallons daily. The total cost on completion was $15,500,000 for all items. The proven capacity of the completed structure is 100,000,000 gallons per day and it is practically watertight, delivering at Winnipeg 99.7% of the water passing through the intake. The water is supplied by the District to all of the included municipalities at a uniform price, the basis of the price being the cost of maintenance, operation and management of the undertaking. Each municipality provides for the distribution of the water within its own limits. The fixed charges for interest and bond sinking fund are levied against the lands within the District. Greater Winnipeg, with a population of 270,000, uses at the present time about 12,000,000 gallons of water per day. Glasgow, Scotland, with a population of one million (four times that of Winnipeg), and world-famed for its industries, has a water supply about equal in quantity to that of Greater Winnipeg.

Professor Chas. S. Slichter, of Wisconsin University, the eminent authority on water supply, says:—

"That great pure supply of yours from those old Laurentian granite rocks around the beautiful lake is something worth boasting about. You need not fear comparison with any supply of any place on earth."

WINNIPEG OFFERS

The Cheapest Power On the Continent

Winnipeg supplies power for manufacturing purposes at as low a rate as one-half cent per k.w.h. Winnipeg has, in the water powers of the Winnipeg River, potential assurance and guarantee of future industrial, commercial and municipal growth. It is feasible to develop more than 400,000 continuous 24-hour h.p. along the Winnipeg River, within a hundred miles of the City.

The Cheapest Electric Light in America

Winnipeg's rate for residence lighting is 3 1/3 cents per k.w.h. The Hydro-electric Power Plant of the City at present develops 47,000 h.p., with an ultimate capacity of 100,000 h.p.

An Inexhaustible Supply of Pure Water

brought to every citizen's door.

The source of Winnipeg's new water supply is Shoal Lake, in the north-west angle of the Lake of the Woods, within one hundred miles of Winnipeg. The aqueduct is capable of delivering to Winnipeg One Hundred Million gallons of soft water each twenty-four hours; or three barrels to each man, woman and child when Winnipeg reaches the million mark.

For further particulars regarding Winnipeg write to City Light & Power or Board of Trade, WINNIPEG.

CITY LIGHT & POWER

WINNIPEG, MANITOBA

Industrial Survey of the West

General Conditions Satisfactory—Lumber Trade in British Columbia Good—Average Crop in Saskatchewan and Alberta — Scarcity of Money for Public Purposes — Best Future Appears to Rest in More Intensive Agricultural Development and Increase of Population in Farm Territory.

GENERAL conditions in the west appear to be satisfactory and encouraging, according to reports received from the boards of trade. The ordinary crop in Saskatchewan and Alberta this year has had its effect in discouraging investments which might otherwise have been made, and there seems to be a scarcity of money everywhere for public purposes.

A greater development of flour milling, creamery products, live-stock products, and other manufacturing based upon local raw materials, is expected. Good increases were recorded in the building trade, and all provinces participated amply in the distribution of new branch plants. The lumber and shipbuilding trades in the province of British Columbia made great strides, and a larger development in this business is expected.

In the prairie centres the best future appears to rest in more intensive agricultural development and increase of population in the surrounding farm territory. The summaries following are from representative centres in all western provinces.

Victoria, B.C.

When we speak of Victoria it must be understood that we include the municipalities of Oak Bay and Esquimalt, the latter Canada's naval base on the Pacific. Now the twin harbors of Victoria and Esquimalt open upon a wide expanse of water, clean from any shoal or impediment, which stretches from the south shore of Vancouver Island 17 miles across to the mainland of the state of Washington. From the open ocean to the docks at Victoria, a distance of 70 miles, only one change in a ship's course is necessary and that is made in this wide water area referred to above. When a mariner has once made his way into the straits of Juan de Fuca he needs no other guide than his chart to bring him safely to the ocean docks at Victoria. And this holds good for every day in the year.

Vancouver Island, with its immense resources in lumber, coal, iron and other minerals, is ready to supply the markets of the world, through its ocean port of Victoria. Vancouver Island's fisheries have become famous. The value of the fish products of the Island this year will reach five million and a half dollars. The Vancouver Island whaling industry, with headquarters at Victoria, is the largest concern of its kind on the Pacific Coast. Other exports from Victoria include: cement, iron ore, copper ore, pulp and paper, frozen fish, smoked fish, grain and products, rubber manufactures, soap and paint, apples and small fruits.

There are approximately one million acres of agricultural land on Vancouver Island. This is rapidly being taken up, and laid out in farms, large and small. The southern portion of the Island is particularly well adapted to small fruits, but the cultivable land all over the Island is wonderfully rich. The products of the various farms, fruit, vegetables, dairy products and meats and poultry, find a market in Victoria, or by way of the port of Victoria to the prairie cities.

Now that the Victory loan has been so largely oversubscribed, Victoria is beginning to feel the benefit in greater industrial development. It is expected that the shipyards lately utilized for war contracts will be turned over to the building of a merchant marine to operate from this coast to Australia, New Zealand, Japan, China and other Pacific Coast ports, and by way of the Panama Canal to Atlantic Coast cities. In this way we shall work up a large export trade. Victoria is the first and last port of call for all ships sailing in and out of the Straits of Juan de Fuca. This means that we come in personal contact here with representatives from every country on the Pacific Ocean, we discuss with them at first hand all problems directly concerning our mutual interests.—Publicity Writer for Victoria and Island Development Association.

New Westminster, B.C

Business in the city has been very good during the current year; the lumber trade especially being busy. The bank returns show a large increase month by month over those of last year. The following industries have been established in this city this year:—

1. Timberland Lumber Co., employing 150 men with an annual payroll of $200,000; annual cut, 30 million feet.
2. Lumber Products Co., Ltd., employing 100 men with an annual payroll of $120,000, manufacturing boxes, wheelbarrows, etc.

The Canada Western Cordage Co. has awarded a contract for erection of buildings for the sum of $78,000. This company has a capital of $300,000, and the shareholders are exclusively returned soldiers.—Secretary, New Westminster Board of Trade.

Average Crops in Edmonton District

The year 1919 has proved to be one of Edmonton's most successful since 1912. Starting as it did with a general depression in retail trade and no building program in sight, and followed by an exceptionally dry summer, with prospects of crop shortage, something unheard of before in the Edmonton district through drought, it soon became apparent that the apprehension in this respect was more or less unwarranted; with the final result that the Edmonton district harvested a good average crop, with exceptionally large returns in some places. This, together with the fact that crop failures elsewhere brought large shipments of live stock into this district and the Peace River country, and orders for hay and straw to be shipped to the dry belts, has put Edmonton's wholesale and retail trade far beyond the most optimistic expectations.

A fair amount of building has been undertaken during the year, and new industries opened up; the high cost of material only being responsible for delays in construction. The 1920 building program is already fairly large, and when the spring opens up Edmonton will be a hive of activity in the construction of office buildings, warehouses and residences. The Canadian National Railways contemplate building a large new union station and large shops.

Lethbridge Crops and Mining

The year 1919 has been a testing and trying time for Lethbridge and district. The growing season was about as dry as has ever been experienced; and there was but little carry over of moisture in the ground from 1918. But the country had gradually been building up its resources from the time the farmers were firmly established on their feet by the big crop of 1915. Live stock had increased to an extent that was not appreciated by even the closest observers; and the numbers of cattle in the country have been proving rather an embarrassment during the closing months of 1919, owing to the shortage of feed. On the other hand, large amounts are being realized now from the enforced sales of these herds, the natural increase of which during the past few years has been so great. As to the future, there were good rains in the fall, and these were supplemented by heavy snowfall in October, all of which melted slowly and was absorbed in the ground; so that the provision of moisture for the 1920 crop is better than it has been for some years past. Coal production from the large mines close to the city of Lethbridge will show tonnage as high as 1918. The production of this high grade domestic coal,

20,000,000 acres of the Finest Agricultural Land in Canada waiting for you in the Northern part of Ontario

THINK OF IT! Homesteads available at 50 cents per acre—close to railroads—close to markets—close to civilization and attending advantages.

Land of opportunity—you can make yourself a home within a short day's journey of Toronto.

Land lies in one of the best belts of Canada along the TEMISKAMING AND NORTHERN ONTARIO RAILWAY, which has connections with the G.T.R., C.P.R., C.N.R. and C.G Railways, thus bringing the settlers within easy reach of the profitable market of the Continent and Europe.

Prosperous towns, growing into cities; in this way local markets available to the settler for buying and selling.

You may have a happy home and a fertile farm at 50 cents per acre in your own home Province of Ontario—why, then, go far afield for these ideal conditions?

Exhibits of the products and of the possibilities of production of New Ontario's land have been shown at Canada's National and other Expositions, so that it is now known as Canada's land of production.

Not only land of agriculture, but embraces large and rich mineral belts, from which, annually, millions of dollars of gold and silver are mined.

Learn more of this land of plenty by sending for free booklets to Geo. W. Lee, Commissioner and General Agent, North Bay, Ont.

VICTORIA
NEW WESTMINSTER

which finds a market as far east as Winnipeg, was 857,092 tons in 1918, and the miners employed ran from 1,300 to 1,593 daily. The district also shares in the business brought by coal exports from Taber and vicinity, and also from the bituminous coal mines in the Crow's Nest Pass in Alberta.

The crops from the 120,000 acres of irrigated land around Lethbridge, Magrath, Raymond and Coaldale were excellent in 1919, and high prices have been realized for such of the alfalfa and timothy as was available for shipment after provision had been made by the irrigation farmers for feed for their own live stock. The old established irrigation tract is now being extended by the addition of 17,000 acres. A new irrigation district, the Lethbridge Northern, has been formed, and it is confidently expected that construction work on the canals to bring water to this further 100,000 acres will be started in 1920.—Secretary, Lethbridge Board of Trade.

Prince Albert, Sask.

During 1918 the city defaulted on its debentures, population had diminished to a point where the city was in an apparently moribund condition, and those who for one reason or another were compelled to reside here were depressed at the outlook for the future. Business is flourishing, big development is in sight and optimism is rampant.

Early in 1919 a meeting of the business men was held and it was decided to reorganize the Board of Trade. A campaign fund was subscribed and a small grant—one-tenth of what was granted in the good old boom years—was made by the city. A paid secretary was appointed in the person of Capt. J. S. Woodward, who had held the position previous to his going overseas. The first efforts of the board were put forward to help to land the provincial government stockyards for Prince Albert. In this, after a strenuous fight in which questionable tactics had to be overcome, the city was successful. As a result Prince Albert is now a busy livestock centre with buyers represented from all over the continent. A delegation was sent down east to see about branch railroad construction in the big territory tributary to the city and which was in need of railroad facilities in the worst way. As a result two or three location surveys have been made this summer and the companies have promised grading for next year.

The settlement of the difficulties in connection with the city finances resulted in a great increase in optimism in civic circles. Taxes have been pouring in and the city has made the record of not having had to borrow one cent from the bank this year for current expenditure.—Secretary, Prince Albert Board of Trade.

Regina, Sask.

It is very gratifying to note the sturdy progress that Regina, the capital city of Saskatchewan, has made continuously since it was incorporated as a city in 1903, although during the war period owing to lack of material and help and to the fact that the mind of the people was directed in other channels, development was not so rapid as it probably would have been under different circumstances. Notwithstanding this it is a fairly correct estimate that places the value of goods shipped from this city during the year at fifty million dollars.

During the war period the following large establishments established themselves in the city: Robert Simpson Western Ltd., with an investment of half a million and an employment list of seven hundred and a turnover, we understand, of about three millions per annum; the Imperial Oil Refinery Co., with a capital investment of one and a half million and a plant covering fifty acres of land, employing a staff of upwards of one thousand. In addition to the large refinery which is in constant operation this company purchased other lands and erected thereon homes for the employees—a very respectable little village; the Prairie Biscuit Co., organized to introduce biscuits, with a staff of something like fifty to one hundred; T. Eaton Co., who purchased property on Broad Street in this city, paying $100,000 cash for same, have erected a portion of their contemplated distributing house, the portion erected being 500 feet long by 125 feet in depth, costing approximately $500,000.

The city has completed a contract with McCaws, Robinson and MacKenzie Co., for an ample supply of gas to be installed within two years.—Secretary, Regina Board of Trade.

Saskatoon, Sask.

General conditions in the city of Saskatoon as compared with last year are satisfactory and encouraging. Regardless of what may be happening in other parts of the country, while the price of wheat remains fixed and the steady increase in population continues the present outlook remains decidedly bright. It seems to be fashionable in these post-war times to be a little pessimistic about the future, but this is rather hard to do with an increased turnover in practically every line of business. How much the actual tonnage shipments from Saskatoon (and that is how we can best judge our business growth) have actually increased within the past year it is hard to say, although there has been some increase; but rising prices have healed many a scar here as elsewhere, and any immediate danger of being obliged to unload stocks at a loss appears to have passed.

The very ordinary crop which was garnered in Saskatchewan this year has had its effect in discouraging investments which might otherwise have been made, and there appears to be a scarcity of money everywhere for public purposes. There is a great necessity for erection of hospital and high school accommodation to take care of the increased resident population, and these matters are receiving the interested consideration, not only of the city administration but of private citizens generally. Public demand for a spacious auditorium for public meetings has also been evident, but no solution of the difficulty has yet been found. Application was made to the local government board for approval for the expenditure of $50,000 in this connection, but such approval was refused.

Citizens here look principally to greater development of flour milling, creamery products, live stock products, and other manufacturing based upon local raw materials. The manufacturing of certain patented thrashing machines and sheaf-loaders appears to be making rapid progress. An important industry which has moved into the city is the A. Stanley Jones firm, manufacturers of thrashing machines, formerly at North Battleford. The Goodyear Tire Co. have opened on a wholesale scale, and some other smaller concerns. The Quaker Oats Co., which has its sole western plant for the production of flour and breakfast foods here, never did better. They are continually expanding. The best future of the city appears to rest in more intensive agricultural development and increase of population in the vast surrounding farm territory.—Commissioner, Saskatoon Board of Trade.

Winnipeg Recovering From Strike

Building in Winnipeg was hampered to a great extent on account of the general strike, covering a period of nearly seven weeks. Many contemplated additions to industrial plants have, as a result, been held over until the beginning of 1920. Indications are that the new year will see a resumption of building in this city on a very large scale. New banks have been erected at the following cost: Bank of Commerce, $68,000; Merchants Bank, $29,500; Union Bank of Canada, $37,000.—Secretary, Board of Trade.

St. Boniface, Man.

St. Boniface, the industrial city adjoining the city of Winnipeg, has shown great activity in its industries during the past year, a number of prominent Canadian firms having located there. Because of its adequate transportation facilities and well laid out streets and homes, this city lends itself to industrial promoters who look with favor on its splendid location on the Red River.

Foresighted policy on the part of the city's administrators has given St. Boniface the cheapest electric power on the continent and an unlimited supply of pure soft water. Located in St. Boniface are the largest stockyards in Canada, and the cheap electric power and soft water available opens

THE CONSUMERS' GAS CO.

OF TORONTO

The Consumers' Gas Company has a perpetual charter for the manufacture and sale of gas in the City of Toronto, Townships of York, Etobicoke, Vaughan, Markham and Scarboro.

The dividend is limited by statute to 10% on the paid-up Capital. After this dividend has been earned, and provision made for repairs and renewals, the Company must reduce the price of gas. The prices have gradually and voluntarily been reduced, during the seventy years of the Company's history, from five dollars per thousand cubic feet to one dollar. Moreover, the Company has acquired one of the finest and most up-to-date plants obtainable.

The output of gas for the year ended September 30, 1919, was nearly 4,700,000 thousand cubic feet, being approximately equal to the combined output of all the other gas companies in Canada. In addition, nearly $450,000 worth of merchandise was sold, and over $1,000,000 worth of residual products.

The present capital of the Company is $5,360,700. There is a reserve fund of $3,119,668.95, and a plant renewal fund of $1,769,577.45. Assets total $11,944,208.60. Profits for the past fiscal year were $965,917.77, after providing for all expenses of management and operation.

The reserve and plant renewal funds together equal 91% of the Company's capital, which funds are invested principally in the Company's business, with no interest charges against them. This means that the Company need earn only about 5% on the money invested in order to meet its dividend requirement of 10% on the capital stock. The Company has steadily maintained its 10% dividend for forty-five years.

The Directors are, Messrs. A. W. Austin, President; Wellington Francis, K.C., Vice-President; A. H. Campbell; F. Le M. Grasett, M.D.; John Hoskin, K.C., LL.D., D.C.L.; Herbert Langlois; Thomas Long; Lieut-Col. J. F. Michie; Sir Edmund Osler. The General Manager is Mr. Arthur Hewitt; the Secretary Mr. John J. Armstrong.

Table Showing Increase of Company's Business

Year	Gas Output M. cu. feet	Increase per cent	No. of Meters in use	Population	Increase per cent.	Cons. per Capital cu. feet	Pop. per Meter	Miles of Main	Price of Gas
1868	38,596		1,254	50,000		478	40	42	$3.00
1878	124,118	221.58	3,285	70,867	41.73	1,227	22	85	2.00
1888	414,672	234.10	10,020	126,169	78.04	2,368	13	163	1.10
1898	707,211	70.55	24,257	190,000	50.59	3,303	8	242	.90
1908	2,006,804	183.76	53,368	320,000	68.42	5,900	6	361	.75
1919	4,686,515	133.53	117,033	520,000	62.5	8,046	4.4	591	.90

opportunities for the establishment of tanneries, soap and glue factories, and other industries connected with the livestock trade.

Trackage facilities on five railroad systems reaching all points in Canada and the United States are available, and industrial sites for large and small manufactures can be secured. The policy of the city administration is to give the utmost support towards the establishment of factories, while the population is an industrious one and well adapted to factory work.—Secretary, Board of Trade.

Portage la Prairie, Man.

Realizing the absolute necessity of cheap power and light, the city of Portage la Prairie in 1914 took steps to secure data for the building of a hydro-electric transmission line from Winnipeg. By the time the necessary data were secured and plans and specifications submitted the great European war so clouded the horizon that it was thought wise to leave the building of hydro-electric in abeyance until after the war.

Last summer the project was again taken up, and has been followed with such vigor that the Provincial government is now actually constructing the power line, and the citizens are assured, by the Provincial government engineer, that power will be delivered here by January 1st, 1920. The introduction of the power and light from Winnipeg will revolutionize this city, and already manufacturers are favorably considering moving their plants, or a portion of them, to Portage la Prairie. The city will control and operate the current, distribution will be made through the present system, and rates will be gradually cut down until a rate for power will be available which will compare very favorably with any point in Canada.—Secretary, Portage la Prairie Board of Trade.

Industrial Progress in the Maritime Provinces

General Business Conditions Very Favorable — Harbor Facilities in Nova Scotia and New Brunswick Being Brought Up to High Standard—Steel Industry Advancing—Busy Year for Coal Mines—Valuable Furs Obtainable From Prince Edward Island.

REPORTS from the more important centres of the maritime provinces indicate that industry during 1919 made great progress, and speak of a bright outlook. In New Brunswick it seems that a new day is dawning for shipbuilding, coal mining and other industries, while the harbor facilities in both New Brunswick and Nova Scotia are being brought up to a very high standard. Coal resources of Nova Scotia have been taxed to the limit. A big development in the steel rolling industry is foreshadowed by the plans of the Dominion Iron and Steel Company. It appears that Prince Edward Island has passed through the crucial first period of reconstruction most successfully, and faces a bright outlook. One of the most important industries, the fur industry, is making great headway, which is due chiefly to the white and silver fox pelts which are obtainable there.

The following summaries are from boards of trade in the principal centres of the maritimes:—

P.E.I. Had Good Crops

Charlottetown, the capital of the province of Prince Edward Island, has during the past year passed through the crucial first period of reconstruction most successfully. Business has been exceptionally good. Crops in surrounding district above the average, and as a consequence, the financial state of the community is in an excellent position. During the year now drawing to a close, we have been fortunate in being at last linked up with the standard gauge of the Canadian National Railways. The steamship communication with St. John's, Newfoundland, interrupted by the war, has been resuscitated, and all things give promise of bright prospects for the ensuing year.—Secretary, Charlottetown Board of Trade.

St. John, N.B.

No industrial survey of St. John for 1919 would be complete without a reference to the great work that is being carried on by the St. John Dry Dock and Shipbuilding Co. at East St. John, or Courtenay Bay, as it is locally termed. This work, begun in 1912, by the Norton Griffiths Co., was turned over by the government a year ago to the company now carrying on the operations. Under the direction of Mr. A. R. Dufresne, engineer, excavation for the dry dock site has made rapid progress. This feature of the undertaking calls for the construction of a dock 1,150 feet long and 125 feet wide, with a low-water depth on the sill of 40 feet. This will be as large as the largest in the world, and will be made to accommodate two or more ships. It is expected that with the rate of progress now being made the dock will be completed early in 1921. The completion of a breakwater 7,070 feet long is another feature of the enterprise that is nearing its end. A basin, 22 feet deep at low tide, is being dredged. A large portion of this is now finished. It is proposed to erect three large piers in the eastern harbor. Two of these piers will be on the opposite side of the harbor from the dry dock, and will have direct connection with the rails of the Canadaian National Railways. A spur line of track, now under way, will connect the dry dock site with the main line of the C.N.R. A ship repair plant and a ship-construction yard for steel ships are also features of the contract.

Messrs. T. McAvity and Sons, Ltd., have completed the erection of an immense fonudry plant in the eastern suburbs of the city. A portion of this plant was employed in the production of shells during the war. It is the intention of the firm to concentrate their various city plants at the new works.

A proposal to place the port of St. John in the control of a federal harbor commission, similar to that which is in force in Montreal, has been under consideration this year. Parliament has passed an Act authorizing the commission and agreeing to take over the city's interest in the harbor for two million dollars. The plan is to become effective when the people have voted favorably thereon. The passage of a needed amendment to the original bill to cover the city's operation of the harbor ferry has delayed the holding of the plebiscite.

The city of St. John has entered upon a housing plan which involves the erection of a series of dwellings at three points in the city. A start has been made at Lancaster where homes to the value of about $50,000 will be erected. Many private firms and individuals have also begun construction or are making arrangements therefor. The lime industry, located in and about this city, is prospering. There are now seven lime-kilns in operation here, all of them busy, turning out a total of about 500 casks per day.

Throughout the province, notable progress in industrial and other lines is being made at Moncton, Fredericton, Bathurst, Newcastle, Chatham, Campbellton, Edmundston, Sackville, St. Stephen, Woodstock, and other towns. This year Woodstock adopted the town manager system, being the first town in the maritime provinces to adopt this method of civic management. A young engineer, who recently returned from "doing his bit" in France and Belgium, has been appointed to the office. Very favorable reports from the new system have been received. St. Stephen is now giving consideration to the town manager plan and will likely adopt it.

The coal mining industry in the Grand Lake area of this province, though affected by strikes, has made excellent pro-

QUEBEC

A Province of Notable Resources

THE Province of Quebec offers many attractions to the investor, manufacturer, merchant, homeseeker and the tourist. Quebec is Canada's largest province—703,653 square miles—18 per cent. of the whole Dominion.

Canada's history of four centuries is centred in the Province of Quebec. The provincial Capital, Quebec, is the mother-town of the Dominion and the portal to the Canada that occupies a most important place in the world's affairs.

Quebec—and Water Power

NATURE has proved most generous in the way of hydraulic resources in the Province of Quebec. So far, only 875,000 horse power has been developed, but it is estimated that the province has much more than 6,850,000 h.p. scattered over the different parts of its vast territory. The Gouin dam at the head of the St. Maurice constitutes what is probably the *largest artificial reservoir in the world*, its capacity when full being 160,000,000,000 cubic feet, and the water area, 300 square miles.

Quebec—and Farming

THE Province of Quebec is above all an agricultural country, and farming is the occupation of the majority of its inhabitants. The population of the province is slightly over 50 per cent. rural. The value of field crops in 1918 totalled $271,750,900—from an acreage of 8,201,362. In 1917 there were 598 butter factories, 895 cheese factories, 482 combined butter and cheese factories. The value of the products of these factories was $27,851,253. The total dairy products of the Province approximated $50,000,000. The Provincial Government does everything within reason to develop agriculture.

Quebec for Tourists

THE Province of Quebec is alive with tradition and points of historic interest. The wonderful St. Lawrence, the quaint streets of Quebec City; the Shrines of St. Anne de Beaupre; the Plains of Abraham; the wonderful rivers and capes—the River Saguenay and Cape Trinity, for instance; the resorts at Murray Bay, Ha! Ha! Bay, Chicoutimi; the inviting camping and fishing grounds, the city of Montreal, once the city of Hochelaga visited by Jacques Cartier in 1535,—where Champlain established a trading post in 1611. And an abundance of game for the hunter. These are a few of the innumerable attractions for the tourist.

Quebec for Homeseekers

THE Province of Quebec offers many inducements to homeseekers. It is extremely sound financially, the province is increasingly active industrially; the Provincial Government is encouraging agricultural production and aiding producers, and municipalities are in a flourishing condition. Climatic conditions of the province are suitable to mixed farming, and marketing conditions are ideal. That centres of population are increasing is evidenced by population statistics, and building activities. Educational institutions receive a substantial subsidy every year, and schools are being opened everywhere.

Quebec is a province of tremendous possibilities. Anybody interested in conditions and prospects may write for full particulars to the Government Offices at Quebec City.

Hon. SIR LOMER GOUIN, Premier. **Hon. WALTER MITCHELL, Provincial Treasurer.**
Hon. L. A. DAVID, Provincial Secretary.

gress, and there is a promising outlook for the future. Lumbering is very active, and more men will enter the woods the approaching winter than for five years past. The fishing industry has not been up to the mark this year, owing partly to unfavorable weather conditions along the coast, and partly to the fact that the signing of the armistice found many of the fish-packing concerns with large stocks on their hands, which have not yet been worked off. This is particularly true of the sardine industry. Research, with profitable results, is being pushed in oil shales in the eastern section of the province. In addition to the oil wells that have been in operation near Moncton, several additional wells of a promising nature have recently been sunk near Kent Junction, and oil finds have also been reported in the eastern section of St. John County.

On the whole, there is a well-founded feeling that a new day is dawning for the maritime provinces, and that New Brunswick, with its open ports, fertile fields, varied natural resources, and outstanding scenic beauties, will share in their triumphs.—Secretary, St. John Board of Trade.

Fredericton, N.B.

Business conditions in Fredericton during the year 1919 have been generally satisfactory. Signs of industrial expansion, both in the city and surrounding districts, are encouraging. A leading provision firm of the city will erect a canning factory, thus providing a market for farm produce. The machinery has been purchased and is on the way. This firm is also manufacturing sausages and bologna with modern machinery.

One of our foot-wear manufacturing firms has lately added to the output of ladies' fine boots and shoes; formerly only men's foot-wear of fine grade were marketed. Another factory in the foot-wear business is arranging for necessary additions to buildings to accommodate expanding trade. The manufacture of hardwood last blocks will soon be under way at Mullin's Brook, about 28 miles distant. The manufacture of furniture by this firm is being considered. Arrangements are now being made to free the antimony mines at Lake George, of water, when mining will be resumed on a large scale. A smelter will also be erected, either at the mines or some shipping port. A pulp and paper company is now erecting a concrete dam at Marysville, three miles from the city, on the Nashwaak River, to supply electric power for a mill to be erected at the mouth of that river.

All these undertakings are located on railways, so there is no question of transportation to be arranged. Comparing 1919 with other years, it may be said that Fredericton being surrounded by a large mixed farming community, there are no marked ups and downs in business conditions to be reported. Increase in population keeps pace with industrial expansion.—Publicity Commissioner.

Sydney, C.B.

The past year, industrially speaking, has been a quiet and uneventful one. It has, however, been marked by the erection by the Dominion Iron and Steel Co. of their large ship-plate rolling mill. This mill, which is 1,100 by 350 feet in size, will be in operation in the spring, and its erection points to the likelihood, amounting almost to a certainty, of shipbuilding being actively embarked upon in the near future and in this vicinity. The Sydney Dry Dock and Engineering Co. has been incorporated, and has made application to the government for the subsidy voted by the federal parliament to assist in the construction of dry docks in Canada. This company is backed by ample financial resources, and their dry docking and ship repairing business would no doubt be supplemented by shipbuilding. Although the port of Sydney has not witnessed the activity which marked the years 1917 and 1918, when it was the assembling and sailing port for the large squadrons of store ships which were convoyed across the Atlantic, the present season has been a fairly busy one, and the Dominion Coal Co. has had its resources taxed beyond the limit in supplying bunker coal to the large number of steamers calling for it.—Secretary, Sydney Board of Trade.

Truro, N.S.

The year which is now closing has been an active year in business circles in Truro. Sales have been good and collections prompt. Custom receipts at the port of Truro have been the largest in our history. The railway traffic through Truro has exceeded that of any previous year. Some eighty trains or more pass through daily. The double-tracking of the C.G. Ry. from Truro to Moncton which became necessary on account of the rapidly growing traffic on that road gave rise to considerable work in and around Truro, and thus increased business to some extent. Owing to the high cost of materials coupled with the uncertain conditions of labor very little building was undertaken in the early part of the year. The demand for houses, however, led to considerable building activity later in the year.

No new industries were opened during the year, but all those in operation were kept busy throughout the year. In order to take care of the growing business of the town and county a fourth bank was opened in Truro, and two branches in the county. The farming and lumbering industries throughout the county, and on which the prosperity of Colchester so largely depends were never more prosperous. Shipments of lumber were large despite the fact that shippers were badly hampered by the rate of exchange.—Secretary, Truro Board of Trade.

Building Boom in Halifax

Since the explosion of the ammunition-laden ship, "Mont Blanc," which occurred in December, 1917, destroying, in round numbers, a thousand dwellings, killing practically two thousand persons and injuring scores of others, Halifax has had a building boom probably unprecedented in Canada, and were it not for the terrible loss of life which cannot be replaced, the city, as far as improvement is concerned, gained much by the terrible experience. The building up of the devastated area—comprising about a sixth of the area of the city—has been in the hands of experts, and the new houses going up, constructed of Hydro-stone (compressed concrete blocks) with overhanging roofs of slate, with parked sidewalks and permanent paved streets, give quite an English appearance to this section. In new buildings, repairs to old and payment for damages, etc., some $15,000,000 has already been spent.

The explosion, however, is not altogether accountable for the new building now going on here. It must be remembered that the building of the Halifax Ocean Terminals, under construction since 1913 and still being carried on, removed a number of dwellings and the tenants who occupied same had to be rehabilitated.

Besides the great number of dwellings and business blocks now under erection, there is also the immense plant of the Halifax Shipyards—involving in buildings, plant, etc., an outlay of $10,000,000, and the huge plant of the Imperial Oil Co.—occupying over a hundred acres on the eastern shore of the harbor, which, when completed, will, it is said, be the largest oil refining plant in Canada. The latter will also involve an expenditure of $10,000,000 it is contemplated. The Robert Simpson Co., of Toronto, are also erecting a large warehouse at a cost of upwards of $200,000; this is to accommodate their increasing business in this section. Three large warehouses are to be constructed in the near future by firms from abroad establishing branch businesses in this city, and large additions are being planned for at least two of our largest industries.

Probably the greatest increase has been in shipping tonnage through this port, although, since the cessation of hostilities, same has fallen off considerably. Tonnage was at its peak in 1917, when the total through this port, seagoing only, amounted to 17,092,911 tons; it must be remembered, however, that probably 40 per cent. of this tonnage was made up of ships that came here for examination before proceeding on their transatlantic voyages. The year previous to the war the tonnage of the port amounted to 3,182,000 tons, while for the ten months of the present year it is getting back to normal and amounted to 3,706,400 tons.—Secretary, Halifax Board of Trade.

Investments Maintain Adverse Balance

Flow of Capital Into Canada From The United States Must be Accompanied by Imports—Exchange Rates Not Only Factor in Controlling Trade—Enormous Balance Against Canada Almost Entirely Offset by Investments—Must Ultimately be Repaid by Exports,

By "STATISTICIAN."

THE influence of the rapidly increasing investments of American capital in Canada in swelling imports from the United States is almost entirely overlooked in the voluminous discussion on the balance of trade and the rate of exchange between the two countries. On every hand the advice is "Cut down imports from the United States"; but those who recommend this as a general specific seem to forget that the financial relations that have been established between the two countries are powerfully stimulating imports from the south. The strong inflow of American capital is rightly viewed with satisfaction; but the accompaniment of this is high imports, since a portion of this new capital must enter in the form of commodities. This explains the puzzling situation presented by continued high imports from the United States in spite of the fact that the demand for much that was imported during the war has fallen off.

Imports Must Accompany Investments

It is quite believable that many things are being imported from the United States which Canadians could very well do without, and it is in the public interest that these importations should be reduced as much as possible. But with the growing dependence of Canada on the republic for fresh capital, which, just now, is this country's life blood, and which if denied her would retard her development,—it now seems to be quite out of the question to expect for a while imports to undergo a marked reduction. For while, on the one hand, there is a slackening in the demand for some products, there is, on the other hand, a growing demand for American capital. Of course not all of this enters in the form of products, but a portion of it must.

The huge trade balances that the United States has been piling up against this country have been one of the most striking features of the Canadian trade situation during the last decade. It is true that with overseas commerce very much interrupted during the war period Canada was compelled to buy from the United States many things that she had formerly drawn from across the seas. It is also true that the imperative necessity of drawing from the republic huge quantities of raw materials to be used in the manufacture of munitions did much to increase greatly imports therefrom. But it is also to be observed that, since 1913, when these imports began to increase rapidly, the total investment of American capital has, according to the best estimates, been increased by over 250 per cent., going from $600,000,000 to $1,600,000,000.

Investments Nearly Equal Trade Balance

In this connection it will be of interest to note that covering the period of the last five fiscal years, the aggregate of United States' trade balances against Canada is $1,257,464,903; and that during this time the investments of American capital in this country have been increased by approximately $1,000,000,000. It is not contended that the new investments during the period mentioned account for four-fifths of the foregoing aggregate trade balances against this country; but the conclusion is that the whole of this total has not been due entirely to the mere increased demand for commodities resulting from greater prosperity and expressing itself in increased purchasing power.

One of the most surprising features of the trade of the two countries since the signing of the armistice has been the extent to which imports from the United States have held their own. It is true that during the fiscal year 1919 they declined $45,000,000; but when it is recalled that the value of articles for the army and navy alone dropped to the extent of $82,000,000 within the year, the wonder is that the decline in the aggregate imports was so slight.

Coming to the present fiscal year it is found that during the first eight months imports from the United States decreased by $23,361,105; but on importations for the army and navy, as compared with those for the same period of the preceding year, there was a falling off of no less than $37,000,000. So that during the last twenty months the decline in the value of American imports from the highest point in the history of trade between the two countries has been equal to no more than two-thirds of that represented alone by the falling off of importations for the army and navy. How is it that with greatly reduced imports of supplies of a military and naval nature and of other supplies required for the manufacture of munitions, imports have been so buoyant? Higher prices do not supply the explanation. The undoubted truth is that the high level has been maintained through the strength imparted by the rapid inflow of capital from the United States.

Not Reduced by Exchange Rates

The movement may be tested in another way, and that by the effect of the adverse rate of exchange on imports from the United States. For seven or eight months this factor has been strongly manifesting itself, and, under ordinary conditions, should have materially checked the importation of goods from the south. Has it done so? The trade returns do not show it; for, as has already been pointed out, the decline in the value of imports during the eight months ending November 30th was not equal to more than two-thirds of the decline in the value of imports of articles for the army and navy. Save in this one line, Canada is undoubtedly importing more to-day from the United States than she did during the height of the war period, when raw and semi-manufactured materials were pouring in to be, in turn, worked up into war materials. Upon this tide of imports the adverse rate of exchange has, apparently, had no appreciable effect. Undoubtedly the combined influences of a reduced demand for materials required in the production of munitions and the adverse rate of exchange would have reduced imports very considerably, had it not been for the stronger contrary influence set in operation by the rising stream of American capital flowing into the Dominion, a portion of which comes in products.

It is erroneous to conclude that the rate of exchange running against a country will, in every case, check imports to it from another country in which its money is at a discount. Under ordinary conditions this result would follow; but if the country against which the rate of exchange is running must buy certain commodities, and can get them only from the one in which its money is at a discount, it must have them, even at greatly enhanced prices. To some extent Canada occupies this position towards the United States just the same as do the states of Europe. In addition to being compelled to buy certain products in the republic, because they cannot very well be had from other countries, she is compelled to go there at present for practically all her new capital, and that at a time when she needs it just as much as she ever needed it in the past.

Stimulus from Both Sides

Canadians are doing their utmost to attract American capital, which is a strong inducement for it to come; but, in addition, influences in the United States are operating to send it to Canada as they never operated before. In that country capital is accumulating rapidly. A considerable portion of it must find an outlet abroad, and this country is a much more attractive field for it than most other countries. No wonder then that over $300,000,000 was invested in Canada and Canadian enterprises last year. The combined strength of these influences can hardly be estimated.

This movement will continue. Canada must have much fresh capital to sustain the new period of expansion on which she seems to be entering. Indeed, the expansion cannot be experienced unless capital makes it possible. As long as the present exchange situation continues new money can come from no other source than the United States, and its coming is facilitated because of the new and extensive connections that have been established by Canadian and American financial houses on both sides of the boundary line. All this new money will not come in the form of products; indeed considerable of it may be but the investment of balances in this country; but a portion of it will enter in the form of commodities and help to swell the trade returns.

In these days when conditions are so unsettled it is impossible to express positive opinions on trade subjects; but it does look as though Canada, for the present, can do very little to control the tide of imports from the United States. Something might be done through the refusal on the part of the public generally to import any but absolute necessities; but anything that might be saved by this means would very likely be much more than offset by other influences. Some products, such as certain kinds of tropical fruits, could, perhaps, be more advantageously imported direct from other countries than from the United States; but it would take time to establish the new trade connections.

Debt Must be Repaid by Exports

Paradoxical as the statement may seem to be, the influences operating to increase imports from the United States through the bringing in of new capital will, in turn, operate to increase exports to that country. The larger the investment of American money, the larger will be the annual return that must be made on it. Naturally this will be made in the form of exports. It is probable that this year nearly $80,000,000 in interest and profits will go south, and the amount will soon be $100,000,000. Six years ago it was hardly above $30,000,000. As this country could not, even if it wanted to do so, borrow in Britain to pay this sum (this is the way that Canada in pre-war days used to settle her trade balance with the United States), the payment will have to be made in products. This of itself, in time, will tend to force down the American tariff against Canadian products, with a resulting stimulus to exports.

In finance and industry it will take us some time to find out what actually happened during the war. It was imagined that with the cessation of hostilities the world would soon return to its old methods of business and that trade would quickly find its way back to former channels. But aside from the handicaps imposed through economic exhaustion and huge debt, a relatively new factor, in the form of international exchange, is upsetting the calculations of even the wisest. Canadian trade is a striking example of the changes that have taken place, and, for some time, in trade, she seems likely to be dominated by the only country that for the present can finance her.

LOAN COMPANY BRANCH IN CHATHAM

The Huron and Erie Mortgage Corporation have just completed the purchase of the building formerly occupied by the Standard Reliance Mortgage Corporation on King Street in Chatham, Ont. The price paid was $18,000. A branch will be opened there shortly under the management of Austin A. McLeish, who has been with the Huron and Erie for twelve years.

CANADA LIFE ASSURANCE COMPANY

At the annual meeting of the Canada Life Assurance Co., held on January 8th, in Toronto, a statement for the year ended 31st December, 1919, was presented. The company has shared fully in the unprecedented expansion that has taken place in the life insurance business. Policies issued during the year, including revivals, amounted to $46,380,774, the greatest volume of new business ever issued by the company in any year and exceeding the business of the previous year by $20,608,026. The new policies paid for, exclusive of dividend additions, totalled $41,641,877, an increase over 1918 of $17,750,209. The total assurances in force now amount to $229,794,267, showing an increase of $33,813,716 over 1918, after meeting death losses maturing endowments and other terminations of the year.

The total income was $12,012,381, representing premium income of $8,046,634 (not including payments made to other companies for reassurances); considerations for annuities $274,517; interest income including profits from sale of securities, $3,618,797 and income from other sources, $72,432. Payments of $6,347,925 were made during the year to policyholders and their representatives, and to annuitants. These payments were made in settlement of death claims, matured endowments, dividends, cash values for policies surrendered, and as annuities.

The assets now amount to $69,352,268, an increase during the year of $3,404,693. In the past year another substantial investment was made by the company in the Victory loan of the Dominion of Canada The policy reserves, under the same method of valuation as in past years, amounted at the 31st December to $58,066,273, an increase of $3,050,319 over the corresponding reserves of 1918.

After allotting $1,587,731 to those entitled to share in dividends during 1919, the surplus amounted to $8,187,736, out of which $2,515,000 will be paid in dividends to policyholders in 1920. In addition, the contingent reserve of $500,000 has also been maintained. The net surplus earned in 1919 was $1,877,160, which is the largest in the history of the company. Notwithstanding the influenza claims during the early part of the year, the mortality experience of the company was favorable.

The board of directors were re-elected without change.

In his address to shareholders the president, H. C. Cox, referred at length to developments of the year in life insurances and in conditions affecting life insurance. The greatly increased volume of business, he said, corresponded to some extent to the rise in prices. The volume of business has in fact been so large that anxiety has sometimes been expressed as to the effect on the companies' surpluses. Mr. Cox also referred to group insurance, and to efforts which were being made to work out a plan for the insurance of disabled soldiers.

CAUTIONS BANK CLERKS TO GO SLOWLY

Union Bank Points to Some Overlooked Advantages of Service with Banks, as Compared with Position of Wage Workers

FOLLOWING public meetings in Montreal and Toronto it is reported that the bank clerks will form an association to be known as The Bank Employees' Association, in affiliation with the American Federation of Labor. A preliminary meeting was held in the Labor Temple, Toronto, on December 16th, and attended by approximately 600 individuals, of whom fully 98 per cent. voted in favor of the proposal to form a union, accepting the invitation of the representatives of the American Federation of Labor to become an affiliated unit. Previously a meeting had been held in the city of Montreal and it was stated at the Toronto meeting that a similar organization had been asked for by a delegation representing the bank clerks, or bank employees of Hamilton, Ont.

Referring to this movement, an article in the Union Bank Monthly for January, signed by the Editor, says:—

"So far as I am aware, it seems unlikely that any attempt will be taken officially to coerce the staff if any in our service wish to join the proposed Bank Employees' Association. Personally, I have no wish to interfere with the personal liberties of the individual, but as a member of the staff who through the issuance of our own bank magazine comes in wide contact with those in the Union Bank of Canada's service, I feel that it will not be amiss for me to contribute a personal comment.

Banks Taken to Task

"I am convinced that the employees of the Union Bank of Canada have no need for a union to obtain fair treatment. I was present at the preliminary meeting in Toronto when the proposed union was mooted, and cannot but regret that there was no one in the assembly to sponsor the case from the viewpoint of the banks. However, it has been gratifying to find a lack of interest so far, among members of our own bank staff. It evidences the spirit of loyalty which exists in the Union's service, and shows at once a recognition on the part of the staff of our institution's good intentions where the staff is vitally concerned.

"However, that no member of our staff may make a rash or hasty decision, careful consideration should be given to many factors that might otherwise be overlooked. In weighing the situation as regards our salary basis, important allied factors must not be disregarded. It has been said that the bricklayer is getting a higher wage scale per working hour than the average bank employee. But this statement has not been qualified—as it should be if fair consideration is given to the question—by the equally true and important statement that if the bricklayer becomes ill and lays off work for one day, his wage ceases immediately until he returns to his task.

"If a man or woman in the service of the Union Bank of Canada becomes ill and stops work, his or her salary continues to be paid—for one day, for one week, for one month, for six months. It could almost be said indefinitely. Nor does length of service count.

"When the bricklayer takes a holiday, does his erstwhile employer continue to pay his wages? No. Because he with his fellow workmen, who labor by the day, work upon the day labourer's wage scale.

"Every member of the Union Bank staff is entitled to annual holidays, with full pay. After 10 years' service our men are entitled to three months' vacation, with pay. Under the daily wage system this privilege is not granted; 'time' is 'docked' for statutory holidays and casual abstentions from duty. Does the man in the service of the Union Bank of Canada prefer that he should be placed on a time clock basis?

Labor Status Not Desirable

"If the bank employees desire to organize and affiliate with labour, they should do so with a full recognition of the fact that they are putting themselves on a definite wage scale. They will be subjected to the sternest economic law, the law of supply and demand. Labour to-day finds itself in a favoured position due to economic conditions that are world-wide. Consideration should be given to the question, whether an affiliation with organized labour is to bring greater efficiency in the individual; whether or not individual initiative—by which alone actual success is obtained—is further to be developed.

"'We cannot all be bank presidents,' was a statement at the Toronto meeting. Quite true, but by adopting the labour basis of wage will we not put a premium on slothfulness and kill individual initiative, energy and inherent ability? Our own general manager started as a junior clerk in the service of the Union Bank of Canada; indeed all our executive officers started at the lowest rung of the ladder—and only by the exercise of personal initiative have they attained their present positions. If there had been bank clerks' unions when they were juniors they would not have risen above their particular wage plane, except by graduated intervals, as worked out under the union's system of wages and stipulated progress.

Banker's Connection With Bank

"One has no wish to question the wage and hour improvements which unionism, as represented by organized labor, has brought to the worker-by-the-day. Unquestionably, the lot of the labourer has been made immeasurably more happy. But it will be immediately clear to the men in the service of the Union Bank of Canada that the same conditions do not apply to the man presently working in our bank as applied to the average workman. He shifts from one employer to another, solely dependent upon the duration of the job in hand. The interest of his erstwhile employer is a transitory thing. Not so with the man who has identified himself with the bank.

"We all know that a bank employee's job is not a 'get-rich-quick' opportunity. Our general manager made this very clear at the branch managers' conventions held throughout Canada last July and August. Mr. Shaw remarked that anyone who thought he was going to get rich quick through his position in the bank was acting upon a fallacy; it was impossible. 'The best we can offer the man who enters the bank's service is a comfortable position; a position as comfortable as it is possible for us to make it,' were Mr. Shaw's words in effect. We in the service of the Union Bank of Canada have had tangible recognition of this policy in our latest generous staff bonus, and general increase in salaries.

Depression Brings Reductions

"To-day we have virtually reached the climax of an overwhelming prosperity. But what of days of depression, days of industrial crisis, days of 'hard times'? It would be fallacy to say we shall know these no more. For just so certain as the inevitable cycle—often referred to as the seven year cycle—we shall see periods of famine following periods of plenty. A set-back industrially brings into operation the age-old law of supply and demand,—and inevitably a lower wage scale. Recalling the 1913 depression and the industrially uncertain first months of the war period, the famine in jobs immediately comes to mind. Salary reductions were put into effect by practically every mercantile enterprise on the continent in the first few months following August, 1914. Thousands, too, were thrown out of positions.

"But the bank clerks of Canada were not let out, and their salaries were not reduced as in the instance of clerks in every other departmment of business endeavour. Salaries were not increased, it is true, but they were not reduced as elsewhere. Men in the service of our banking institutions did not lose their positions, and, speaking for our own institution at least, I know that every man who enlisted had his job held for his return. Many men who previously had resigned from the bank to accept temporarily more remunerative positions, and who lost these positions when the war broke, gladly re-entered the bank's service."

LISTS CLOSED FOR CUBAN-CANADIAN ISSUE

Subscription lists for Royal Securities Corporation's offering of $4,000,000 of 8 per cent. preferred shares of the Cuban-Canadian Sugar Co. closed some days before January 10th, the date fixed beforehand for their closing.

BANK BRANCH NOTES

Numerous Branches Already Opened This Year, and Plans Made for New Buildings—Personal Transfers

The following is a list of branches of Canadian banks recently opened:—

Smithville, Ont.	Royal Bank of Canada
Hubbard, Sask. (sub-agency to Ituna branch)	Bank of Montreal
Windsor, Ont. (temporary premises)	Bank of Hamilton
Anyox, B.C.	Canadian Bank of Commerce
Cedar Springs, Ont. (sub-agency to Blenheim)	Canadian Bank of Commerce
Walkerville, Ont.	Imperial Bank of Canada
Tofield, Alta.	Dominion Bank
Thorburn, N.S.	Royal Bank of Canada
Havana and Jiguani, Cuba	Royal Bank of Canada

The Canadian Bank of Commerce plans erection of a new building next spring at Powell River, B.C.

The Merchants Bank plans erection of a new building on Water St., Galt, Ontario. Local manager, Mr. Lewis.

The Bank of Montreal plans erection of a building at the corner of Main and Dufferin Streets, Granby, Quebec. Head office, Montreal.

The Bank of Hamilton opened for business last week in its temporary quarters at the corner of London and Pelissier Streets, Windsor, Ont. Work on the bank's new building at the corner of Chatham Street and Ouellette Avenue will be commenced this spring. The company will also build in Walkerville, Ont.

The offices at 72 James Street, Hamilton, Ont., formerly occupied by the Sun Life, have been remodelled and will shortly be occupied by the Home Bank.

Personal Appointments

Mr. E. A. Fox, manager of the Bank of Commerce at Prince Albert, Sask., has been transferred to the branch at St. Catharines, Ont.

Mr. A. G. Ross, formerly manager of Boissevain, Man., has been appointed assistant inspector of Manitoba branches of the Union Bank of Canada.

Mr. J. S. Bancroft, formerly accountant in the main office, of the Merchants Bank of Canada, Vancouver, has been appointed to the position of assistant manager in succession to Mr. N. S. Mackenzie, who has been promoted to the management of the Collingwood, Ontario, branch of the bank. Mr. S. E. James, of Edmonton, has been appointed manager of the Hastings Street branch, in succession to Mr. W. O. Joy, who joins the inspection branch of the service.

Mr. Roland H. Cardy, manager of the Bank of Toronto, Toronto, Ont., has been appointed manager of the branch at Sarnia, Ont. Mr. Cardy succeeds Mr. H. S. Holland who recently resigned.

Mr. Charles I. Ewing, manager of the Dominion Bank, Huntsville, Ont., died suddenly on Monday from an attack of heart failure.

GUARANTY TRUST STATEMENT

Deposits of $673,844,807, and resources of $959,550,667 are shown in the statement of the Guaranty Trust Company of New York as at December 31st, 1919, which was issued January 7th, 1920. Deposits on December 31st, 1918, amounted to $583,786,091 and increased $90,058,715 during the last year. Resources on the same date totalled $775,493,531 and increased $184,057,136 during 1919. After making deduction for distribution to the employees under the profit-sharing plan inaugurated by the Guaranty a year ago and for all other charges, approximately $3,000,000 was added to the company's undivided profits account for the year 1919.

INDUSTRIAL HAZARDS TO LIFE

"Some Occupational Hazards," was the subject of an address given by J. M. Laing, A.I.A., F.A.S., assistant actuary of the Mutual Life Assurance Co. of Canada, before the Insurance Institute of Toronto, on Thursday, January 15. Mr. Laing dealt with the rubber industry, smelting, coal mining and pulp and paper and his remarks were illustrated by charts showing the relation between mortality and the nature of the work. His address was based on a report submitted to the Actuaries' Club by Mr. M. P. Langstaff, actuary of the Dominion Life Assurance Co., and himself.

Mr. Laing described in detail the various processes in the rubber industry, and said, in summarizing: "I think an important point to remember in connection with applications for insurance is to know definitely in what department the applicant is employed; also whether he has been obliged to change from some other department on account of health conditions, and finally, whether the plant is well ventilated and under strict supervision." Many of the employees, he had noticed, had a peculiar bluish color, due no doubt to lead poisoning.

The speaker dealt with the other industries in a similar way. Concluding, he mentioned the fact that the information available is very incomplete, and suggested that improvements might be made in the reports published by the government and by the workmen's compensation boards.

WEEKLY BANK CLEARINGS

The following are the Bank Clearings for the week ended January 15, 1920, compared with the corresponding week last year:—

	Week ended Jan. 15, '20.	Week ended Jan. 16, '19.		Changes.
Montreal	$132,797,650	$100,326,850	+	$32,470,800
Toronto	91,891,147	64,078,478	+	27,812,669
Winnipeg	47,435,383	40,653,052	+	6,782,331
Vancouver	13,794,414	10,320,048	+	3,474,366
Calgary	8,680,222	5,387,100	+	3,293,122
Ottawa	8,348,960	6,618,408	+	1,730,552
Hamilton	6,891,572	4,711,400	+	2,180,172
Quebec	6,614,523	4,394,549	+	2,219,974
Edmonton	5,558,987	3,745,185	+	1,813,802
Halifax	4,926,890	4,391,255	+	535,635
London	4,839,871	2,552,194	+	2,287,677
Regina	4,150,425	3,366,314	+	784,111
St. John	3,364,901	2,562,611	+	802,290
Victoria	2,792,945	....		......
Saskatoon	2,094,893	1,798,329	+	296,564
Moose Jaw	1,573,203	1,751,654	—	178,451
Brantford	1,290,578	807,612	+	482,966
Fort William	702,657	659,086	+	43,571
Lethbridge	744,829	670,165	+	74,664
Peterboro	845,298	....		......
Medicine Hat	539,246	384,701	+	154,545
Wew Westminster	592,848	496,423	+	96,425
Sherbrooke	1,024,329	665,090	+	359,239
Kitchener	1,106,217	602,413	+	503,804
Windsor	2,224,483	1,197,934	+	1,026,549
Prince Albert	531,648	345,734	+	185,914
Totals	$355,358,119	$262,486,585	+	$89,233,291

The new Dominion Bankruptcy Act will go into force on July 1, 1920, according to an order-in-council which has just been passed.

Douglas, Mackay and Co., Vancouver, B.C., have moved to larger offices in the Board of Trade Building. The local office of the Western Assurance Co., of which R. W. Douglas is manager, is located in the same building.

LIMITATIONS TO GROUP INSURANCE

When the Insurance Department last fall agreed to issue licenses for the writing of group insurance, the move was looked upon with favor by insurance companies and by manufacturers, both of which had in various ways urged upon the department the desirability of the step. The promptness with which some of the companies solicited business, and the numerous contracts which have already been put into force, indicate the interest and knowledge which had accumulated, and the extent to which the companies had prepared. It is well to consider, however, some factors which prevent group insurance from being a certain remedy for industrial problems, or perhaps even a remedy at all.

Organized labor has continually been hostile to group insurance, regarding it as a further bond between employer and employee, and therefore an influence which weakens the power of the union, which aims to solidify the workers in a trade against the employers as a whole. Apart from this, however, and provided that other conditions of work are the same, the protection afforded by a group contract is clear gain to the employee, the arrangement being such that it costs him nothing, gives him something which has a definite and considerable money value, and does not prevent him in any way from leaving his employer when he desires to do so.

The advantages to the employer, upon whom falls the entire cost under the practice adopted in Canada, is not so certain. Like all other "welfare" arrangements adopted for the betterment of industrial relations, it is at the least doubtful if the employee fully appreciates the value of the benefits extended. Anything which savors of charity is not in accord with the stand taken by labor organizations, which seek to elevate the position of the worker by their own bargaining power. So long as only a small proportion of firms protect their employees in this way, they will, of course, gain by a reduction in the cost of labor turnover. But a wholesale adoption of group insurance would probably reduce still further the profits of manufacturing in Canada; the outlook for these profits is not good, in view of the decline in prices which is certain to come, the high costs of production, and the probability that tariff protection will to some extent be removed by the political developments which are now anticipated.

From the public point of view, again, group insurance can be looked upon only as a step in the direction of state insurance, an institution which has many elements of evil, though some benefits are apparent from a casual consideration. Life insurance protection enjoyed by employees of a few concerns, will be demanded by those who are not so benefited, and the no-cost feature established by precedent of private firms has substantial political possibilities, such as have been effective in bringing provincial workmen's compensation acts into effect.

Even to insurance companies this class of business is not entirely satisfactory, for experience in the United States was not profitable. It is only the largest companies which have felt sufficiently strong to accept group insurance contracts. The disadvantages have been well stated by the North American Life Assurance Co., in a circular addressed to their agents, as follows:—

"It is just as well to point out that both from a company and an agency point of view there are two sides to this question. From the company's point of view there is the consideration that the premiums charged, if made competitive, are so low as to reduce the margin of prespective profit to a minimum. As a matter of fact, while the comparatively few American companies transacting this business had up until last year claimed a slight profit, the influenza epidemic entirely wiped that out, so that the business as a whole must up to the present time have netted a loss. One has to consider, too, that a company is compelled to assume a tremendous obligation and to build up a liability without the creation of any reserve fund. It is indeed a matter for the most serious consideration, whether our Canadian companies are large enough to accept the liability involved in the transaction of group insurance on any scale. Nor should we overlook the fact that the overhead charges necessitated through the appointment of inspectors and men in the field and at home office competent to look after the business makes the cost alone prohibitive unless a very considerable business is done. In brief, the chances of a substantial loss to the company are great, while the margin of prospective profit is extremely small. Furthermore, it should be remembered that in the United States where group insurance was initiated only a few companies have up to the present time considered it wise to venture into the field. At the present time only the very largest and a very few of them are engaged in it. Ordinary business prudence demands on our part extreme caution and further light before we undertake it.

"Moreover it is not clear that this class of business will result very profitably to the agents. The commissions are small and unless the premiums charged are equal to the lowest, the agent has little likelihood of success in his canvass. The company's officials are alive to the situation, though not at the present time prepared to make a definite announcement."

ADJUSTMENTS IN MUNICIPAL FINANCE

GROWING tax arrears, and other financial difficulties resulting from too much capital expenditure during the years preceding 1913, have brought several western municipalities to such a state that it seemed scarcely possible to meet their financial obligations. Much pressure has in consequence been brought to bear upon the provinces, both the municipalities on the one hand and the creditors on the other, endeavoring to have the provinces assume the responsibility and act as guarantor for their municipalities. The three western provinces at least have had experience of this kind. Prince Albert, Sask., recently made an adjustment of its finances after consulting the bond-holders, similar negotiations are now under way in respect to several towns in Alberta, and the statistics of British Columbia municipalities, summarized elsewhere in this issue, reveal a state of affairs which is far from satisfactory.

Fortunately the provinces have thus far resisted this pressure, and are going only so far as to advise and mediate between a municipality and its creditors, and to consider such legislation as would seem desirable. Because a province incorporates municipalities, and enacts the legislation under which they operate, is no reason why it should be responsible for their debts. The Imperial government enacted a constitution for Canada, but liability for the debts of the Dominion or of the provinces has never been suggested. The relation between bond-holder and municipality is entirely direct, and the former may foreclose on or assist a municipality in difficulties according as they see fit. In recognition of this, it is interesting to note that the new municipal act introduced at the present session of the Saskatchewan legislature contains provisions for the liquidation of the assets of a municipality. Bondholders naturally have difficulty in working together, because they are located in so many cases, but the Bond Dealers' Association has represented them in most cases of this kind, and deserves credit for the trouble and expense which it has incurred in protecting the interests of its members' clients. Particulars of the adjustments made in connection with the Alberta municipalities last week will be found elsewhere in this issue.

PROMOTING CANADIAN TRADE

SEVERAL departments of the Dominion government will, it is understood, be reorganized in the near future, and among these is to be the Department of Trade and Commerce. The extent to which the government can and should assist in the development of trade is a subject about which there is much uncertainty and disagreement at present. To meet the exigencies of war-time a number of special bodies were created, including the War Trade Board at Ottawa, the Canadian Trade Commission at Ottawa, the Canadian Trade Mission in London, England, and the Trade Commission at Washington. The Department of Trade and Commerce is itself represented by trade commissioners in the principal countries of the world, whose duty it is to assist exporters in securing orders, making shipments, etc., and generally to disseminate information regarding Canadian products.

It is obvious that such complicated arrangements will not be suitable as a permanent plan. The retention of some of these organizations, especially of the Trade Mission in London, is being strongly urged, and one of the arguments advanced is that, being independent of the Civil Service Commission, they have been able to show much better results than are usually expected from government bodies. If this is the case then the work of the Civil Service Commission should be so adjusted that other departments may be able to make similar arrangements. Some parties with whom the government has discussed this matter, including Lloyd Harris, who was head of the Trade Mission in London, are in favor of an aggressive policy abroad.

While most countries have taken active steps to secure trade for their industries, during the past few years, by sending government officials abroad, the success of these experiments is not assured, and it is at least recognized that the work which can be accomplished by a bureaucracy of this kind is limited. The officials can act as sources of information, to advise the exporters at home as to the kind of goods wanted, methods of shipment, customs, and financing; they can bring their countries' products to the attention of buyers in an indirect way. But orders can be obtained only by representatives or agents of the firms, and the government departments cannot do away with the necessity for direct solicitation. These and numerous other limits to the effectiveness of government work in this field should be carefully borne in mind when new arrangements are being considered.

ASSOCIATION OF SHIPBUILDERS AND ENGINEERS

A Canadian Association of Shipbuilders and Engineers has been formed to standardize prices and rates, and generally speaking to protect the interests of shipbuilders and engineers. Commenting upon its objects, the secretary, W. J. Gerrard, said a few days ago:—

"It is absolutely essential for the welfare of the shipbuilding industry that there should be an organization of this nature, so that those engaged in the industry may be in a position to show the minister of labor that they are in a position to collectively deal with their employees from coast to coast. It is generally recognized now that the time for individual bargaining is gone and that the only way to promote and maintain industrial peace is for organizations representing employer and employed to come together for conference."

From what Capt. Gerrard said, it appeared that at first the association which was launched some months back—had gone ahead, but that a little later there had been a cleavage, which resulted in the withdrawal of some of the larger firms. The association has been studying the bonus and subsidy question and has lately waited upon the Minister of Marine and Fisheries to place their views before him. In fact, it is claimed by its members that the recent conference which took place at Ottawa was due to the efforts of the association.

BOND PRICES ARE LOW

In presenting a January list of government and municipal bond offerings, Wood, Gundy and Co. say:—

"The prices of Canadian high-grade securities, such as provincial government and municipal bonds, are influenced by the yield obtainable from Dominion bonds. The necessity for issuing the enormous amounts of the various war and Victory loans on a high interest basis has resulted in low prices for Canadian provincial and municipal bonds during each Victory or war loan campaign. Immediately after each loan the tendency has been for all high-grade securities to increase gradually in price until the arrival of another government loan again caused a depression.

"The probability that there will be no necessity for another government loan on the scale and plan of the last Victory loan means that in the future no such check to the upward movement of the prices of high-grade securities will be in operation. There is no question but that bonds of Canadian govrnments and municipalities are much below the average prices of pre-war years, which may be regarded as more nearly representing their intrinsic values."

Trade with the Orient

With correspondents of the highest standing in China, Japan, India and other countries of the Orient, and branches in all the principal ports on the Pacific coast of North America, namely:

Prince Rupert	Portland, Ore.
Victoria	Seattle
Vancouver	San Francisco

this Bank is excellently equipped to serve the interests of Canada's growing trade with the Orient.

J. P. BELL - - General Manager

RURAL CREDIT SOCIETIES' CONVENTION

Banking System Is Praised, But Regarded as Inadequate—Unit Banking System, Suggested in Saskatchewan and Alberta, Condemned

(Special to *The Monetary Times.*)

RURAL credit societies of Manitoba held their first annual convention in Winnipeg, January 13th, 14th and 15th. Geo. W. Prout, M.L.A., who was largely responsible for the passing of the Rural Credits Act in 1917, and who has taken an active part in extending the movement, organized the convention. Only one society was organized in 1917. In 1918 there were 10, and before the end of 1919 there were 38 active societies, although 60 had been chartered. Each society has nine directors, and these were well represented at the meeting. In addition, there were some invited guests, the total attendance being about 400.

On Tuesday afternoon the convention opened with an address of welcome from Hon. Edward Brown, provincial treasurer, in which he praised the rural credit system highly, condemned the unit banking system which has been proposed in Saskatchewan and Alberta, and gave his assurance that the provincial government would always stand by the farmers, whatever should be the relationship between the rural credit societies and the banks. This relationship is, fortunately, very satisfactory at present.

Farmers Neglected by Banks

With respect to the Act itself, Mr. Brown said that, like all sound legislation, it was inspired by the need that existed. It might be asked why, considering the fine banking system in Canada, it was necessary to organize rural credit societies for the purpose of lending money to farmers. He was second to no one in his admiration for the Canadian banking system, which was probably the finest in the world, but, while it has worked out in a very successful way so far as the commercial life of Canada was concerned, it never was conceived for the purposes of farmers or agricultural districts. Having explained this statement, Mr. Brown said this was why it was necessary to supplement the banking system by adopting a rural credit society system to give financial assistance to farmers.

"Manitoba is receiving publicity at every farmers' meeting and convention in the United States because of her rural credits law," Dr. G. F. Warren, professor of farm management in Cornell University, said. "It is recognized as the most successful legislation of its kind ever enacted." The subject of Dr. Warren's address was, "Important Factors for Success in Farming."

Helps Agricultural Development

Nearly 2,500,000 acres of fertile land within two hours by railway from Winnipeg is undeveloped because of the lack of a suitable system in the past, George W. Prout, M.L.A., told the convention on January 14th. Ten thousand farmers, who would have been able to produce 50,000,000 bushels of wheat, could have been settled in the territory if there had been a rural credits system such as is in force in the province to-day, Mr. Prout argued. "If we set our minds on the development of the Winnipeg district only, it would just mean an addition to our annual wealth of $100,000,000," he said. The subject of Mr. Prout's address was, "The Growth, Service and Possibilities of Rural Credit Societies to the Farmer, to the Banker and to the Community."

Many Subjects Discussed

Other addresses were:—

"The Place of Live Stock in Well-balanced Agriculture," by G. H. Hutton, B.S.A., Superintendent of Agriculture and Animal Industry, Department of Natural Resources, Canadian Pacific Railway, Calgary; president Western Canada Live Stock Union.

"The Rural Credits Act in Operation," by E. A. Weir, B.S.A., agricultural director, and Chas. H. Gifford, secretary Rural Credit Societies.

"Personal Experiences of Board in Dealing with Practical Credit Problems," by directors and secretaries.

"The Protection Afforded Borrowers and Lenders Under the Rural Credits Act; Legal Aspects of the Act," by R. F. McWilliams, B.A., LL.B.

"The Problem of Profitable Crop Production," by John Bracken, B.S.A., professor of field husbandry, University of Saskatchewan, Saskatoon.

"Prices of Farm Products and Probable Future Prices," by G. F. Warren, Ph.D.

"How Life Insurance Strengthens a Farmer's Credit," by C. C. Ferguson, general manager, Great West Life Insurance Company, Winnipeg.

"What the Rural Credits Act Has Accomplished in Manitoba," by directors and secretaries of societies.

"The Value of Farm Records and Accounts," by A. H. Benton, B.S.A., M.S., professor of farm management and rural economics, Manitoba Agricultural College.

"Live Stock, Markets and Marketing," by D. M. Johnson, B.S.A., supervisor of stock yards for Canada.

"The Importance of the Community Spirit in Rural Development."

FAILURES AND BANK CLEARINGS

A comparison of bank clearings with commercial failures shows in an interesting way that an expansion in business, accompanied by rising prices, as reflected by increased clearings, is accompanied by a reduction in a number of failures. The clearings for the Dominion for the past nine years are given below, together with the number of commercial failures, as compiled by R. G. Dun and Co., and it will be noticed that in 1914 and 1915, the only two years in which the clearings decreased, there was an unusually large number of failures:—

Year.	Bank clearings.	Commercial failures.
1910	$ 6,154,701,015	2,524
1911	7,391,368,207	2,644
1912	9,155,881,412	2,714
1913	9,275,139,154	3,438
1914	8,087,728,595	5,796
1915	7,805,888,010	5,322
1916	10,509,496,068	3,370
1917	12,564,633,205	2,194
1918	13,776,332,726	1,746

IMPERIAL LIFE ASSURANCE CO.

The annual report of the Imperial Life Assurance Co. was presented at the meeting held on January 14. New assurances issued and revived during the year ended December 31, 1919, amounted to $25,892,034, establishing a new high record, and exceeding the previous best record, that of 1918, by no less than $10,898,517, and a gain during the year ,after deducting all terminations, of $19,892,576, which is equal to 78 per cent. of the new business written. The total assurances in force now are $92,634,158, as compared with $72,741,000 the previous year. Thus the total business in force increased by 27 per cent. Cash income from premiums and interest was $4,171,609, an increase of $649,221 over the previous year. Assets increased by $1,535,080 to $16,983,112. The average interest yield on investments was reported at the high figure of 6.35 per cent.

President G. A. Morrow, addressing the shareholders, said the crux of the present situation in Canada lies in the crying world need for every commodity Canada can produce. There is an almost insatiable demand for our goods. Europe is starving, and we cannot begin to find enough grain, minerals and timber to satisfy her. Vice-president E. T. Malone, K.C., said the favorable mortality during the last eight months of the year had been phenomenal in that it had been sufficient to cut down the abnormally heavy mortality of the first four months to a total amount of claims of only 50 per cent. of those which might be expected.

INVESTMENTS AND THE MARKET

Laurentide Company Liquidates Bond Obligations—Brompton Pulp and Paper Finances in Good Shape—Wayagamack Position

Holt, Renfrew and Co., Ltd.—The preferred and common stock of the company will shortly be listed on the Montreal Stock Exchange, following application. The preferred and common stock outstanding amounts to $1,000,000 par value in each case.

Northern Canada Power Co., Ltd.—The company, which generates electric energy for the mines of Porcupine district, is planning a reorganization in which the one word "company" will be dropped, thus changing the name to Northern Canada Power, Ltd., and also plans to increase the capitalization from $3,000,000 to $6,000,000.

Prince's, Ltd.—Four of the directors who will be on the board of the company which will shortly open a high-class restaurant on Yonge Street, Toronto, have been named. They are all Toronto men as follows: L. Solman, R. R. Bongard, Victor Cawthra and James Scott. It is stated that permission to use the name of Prince, along with the Prince's crest of feathers, was secured by the company.

Twin City Rapid Transit Co.—Gross revenues for the month of November, 1919, amounted to $1,005,154. After deducting operating expenses of $728,883, the net revenue amounted to $276,270. The sum of $216,062 was spent for fixed charges and taxes, leaving a net income of $601,208, compared with $23,661 in 1918.

For the eleven months ended November 30th net income totalled $919,610, compared with $671,775 for the same period in 1918.

Porto Rico Railways Co., Ltd.—The follcwing is a comparative statement of earnings of the company for the month of November, 1919:—

	1918.	1919.	Increase.
Cross	$ 82,389	$ 94,887	$ 12,488
Net	35,250	35,431	180
For eleven months:—			
Gross	947,603	1,030,364	82,761
Net	397,783	401,244	3,460

Dominion Steel Corporation.—At a meeting of the board of directors last week the appointment of the following to the newly constituted London advisory committee was given: Viscount Furness, Sir Wm. Beardmore, Gen. the Hon. Sir Newton Moore, Henry Steele, Benjamin Talbot and Col. W. Grant Morden, all of whom are associated with the English interests, which some weeks ago acquired 50,000 shares of the company's common stock. The resignation of Mr. J. K. L. Ross as director of the corporation was tendered, but the vacancy was not filled.

Montreal Telegraph Co.—The annual financial report of the company shows that on the asset side of the balance sheet there is only a small change, this being in cash, accounts receivable, bonds and other securities, these being higher at $163,483, against $162,598 in the previous year.

The only changes on the liabilities' side is an increase in contingent fund from $121,029 a year ago to $122,586, while unclaimed dividends are lower at $896, against $1,569. Total assets are now $2,315,307, against $2,314,422 in 1918. The usual dividends, amounting to $160,000, were disbursed during the year.

Ritz-Carlton Hotel Co.—The proposal of the directors of the company has been ratified by the first and second mortgage bondholders. By this proposal bond interest arrears on the first mortgage issue are to be funded, holders to receive a cash payment of a full year's interest and the balance in second mortgage bonds, while the old second mortgage bondholders, having agreed to forego their interest claims, are given assurance of interest payments from the first quarter of the current year. It is stated that earnings, owing to the good increase in the company's business, will be more than sufficient to pay interest charges on both issues of bonds from this time forward.

Canadian Car and Foundry Co.—A large portion of the outstanding common and preferred stock of the company has passed over to the ownership of an influential group in the United States.

W. W. Butler, the president of the Car concern, Senator Curry, the chairman of the board, and other interests associated with them, still retain a very substantial interest in the company, and will continue, as heretofore, to control the operations of the enterprise. The change, it is stated, will chiefly affect the export business of Canadian Car, and this will be financed from New York. It is expected as a result of the changes that the company will now be in a better position to undertake the execution of the large volume of foreign export business offering.

Apart from export business, it is stated that Canada will need from $50,000,000 to $60,000,000 worth of cars in the next five years, of which business the Canadian Car concern will probably get its full share.

Laurentide Co.—Notice of future plans of the company will be submitted to shareholders at a special meeting this month. The capitalization of the company is to be increased from the present amount of $10,000,000 to $30,000,000, three shares of new stock to be issued for each one of the old secuirties held. What the dividend basis of the new shares will be is as yet officially undisclosed.

Outstanding at the present time is a par value of $9,600,000 stock of the Laurentide company, the balance of $400,000 being unissued, so that on the three-for-one basis it will be necessary to issue $28,800,000 of the new shares, leaving $1,200,000 to provide for any moderate financing in the future. As already pointed out, shareholders of Laurentide now possess the full equity in the extensive assets of the company, there being no bonds or preferred stock whatever outstanding as obligations against these.

Plans have been made to have the new securities listed on the Montreal Stock Exchange without delay as soon as the shareholders give their formal approval to the recommendations of the directors of the company. These will constitute the business for which the special meeting will be called. The date of the meeting has, it is understood, been set in the last week of the current month.

The Laurentide Company has liquidated its last outstanding bond obligations, the 6 per cent. 20-year issue. The transaction involved payment of $550,000. The original issue was for $1,200,000. The company enters the year 1920 free of bonded debt, the only outstanding capital obligations being the $9,600,000 common stock, behind which there are heavy investments, timber holdings, plans, water-powers, etc.

Brompton Pulp and Paper Co., Ltd.—The statement of the company for the twelve months ended October 31st last shows that earnings amounted to $1,098,337, an increase of $47,063 over the 1918 exhibit and $24,775 in excess of that for the preceding year. After allowance is made for the usual charges, including $188,499 for depreciation, compared with some $1,600 less in the last annual report, the balance available for distribution among holders of the company's common shares amounted to $687,383, equal to 9.8 per cent. as against 9.1 per cent. in the 1918 showing and 9.6 per cent. in the previous year.

After deducting the sum of $350,000, representing the usual dividends at the rate of 5 per cent. paid during the year, the surplus of $337,383 remained to be added to the balance carried into the 1919 accounts from the preceding year, bringing the profit and loss balance up to $967,693.

The balance sheet discloses little change in the working caiptal position of the company as compared with a year ago,

PERSONAL NOTES

Mr. A. S. Mitchell, collector of customs for the port of Halifax, has retired from office after 15 years' service.

Mr. Hermes Oakes, Toronto, has been appointed adjuster of the Travelers' Insurance Company, with office at Winnipeg.

Mr. John R. MacLeod, a partner of F. B. McCurdy and Company, stock brokers, Halifax, N.S., has voluntarily retired from that firm.

Mr. Justice Britton, of the Supreme Court of Ontario, has forwarded his resignation to Ottawa, on account of ill-health. He is 86 years old.

Mr. A. E. Ames, Toronto, has been elected to the directorate of the Willys-Overland, Limited. Mr. Lloyd Harris has been elected one of the vice-presidents.

Mr. Lorne C. Webster, president of the Webster Steamship Company, and active in many other commercial concerns has been appointed senator for Stadacona district, Quebec.

Mr. Stephen Haas, of Toronto, has been elected a vice-president of the Union Bank of Canada. Mr. Haas came to this country about 1886, prior to which date he received a banking training in Antwerp and Paris. He was closely associated with the late Mr. George Hees in establishing the firm of George H. Hees, Son and Company in 1887 and during his career has been entirely engaged in the management of that concern, having held the office of vice-president and general manager since the company's incorporation in 1903. On the death of Mr. George H. Hees, Mr. Haas became president of the company which position he now holds. He is also a director of the Columbia Mills Incorporated, which is the largest manufacturer in the United States of window shades, spring rollers and goods of kindred character. Mr. Haas is also a director of the New York Power Corporation, the Canadian General Electric Company and the Park-Union Foreign Banking Corporation. Mr. Haas was first appointed a director of the Union Bank of Canada in 1911.

Mr. J. J. Carment who for many years has been a municipal official has retired as city manager of the city of Kamloops, B.C., being superanuated on account of prolonged ill-health.

Mr. A. G. Beck, of the staff of the Standard Bank of Canada, and Mr. A. B. D. Bruce, of the Bank of Nova Scotia, have joined the financial firm of Housser, Wood and Company.

Lieut.-Col. Carson McCormack, who was one of the original officers of the 3rd, Toronto battalion, has become a member of the firm of T. O. Anderson and Co., stock and investment brokers, Toronto.

Mr. George A. Declercq has been appointed chief agent in Canada of the Fidelity and Casualty Company of New York, succeeding Paul H. Borning, who has been transferred to Pittsburgh, Pa., as resident manager.

Mr. Joseph Rowat, who represents the Union Insurance Society of Canton and the British Crown Assurance Company, in Canada, has been appointed chief agent for Montreal of the General Fire Insurance Company of Paris.

Mr. Robert G. Macpherson, formerly representative of Vancouver in the House of Commons, and late postmaster, has been appointed as provincial manager for the province of British Columbia, of the National Life Assurance Company, with headquarters at 211-113 Rogers Building, Vancouver.

Mr. F. J. Crawford, who was formerly the floor membeh of the firm of J. P. Bickell and Company, has formed the brokerage firm of F. J. Crawford and Company. The new firm will occupy offices in the McKinnon Building, Toronto, where they will carry on a general stock and bond business.

Mr. C. J. Yorath, commissioner of the city of Saskatoon, has been named to succeed J. Gordon Steele as the Comptroller-General of Manitoba. Mr. Yorath was appointed commissioner of Saskatoon in 1913, and in the six years of his incumbency rendered service which has been highly appreciated.

Mr. Frederick H. Johnston was elected third vice-president of the Prudential Insurance Company, at the annual meeting in Newark, N.J., this week. Mr. Johnston formerly lived in Montreal, being a son of H. J. Johnston, formerly manager of the Confederation Life Insurance Company.

Sir William Hearst has been appointed to the Canadian section of the International Joint Commission. He succeeds Mr. P. B. Migneault who was appointed some months ago to the Supreme Court. The other members of the Canadian section are C. A. Magrath, Ottawa, chairman, and H. A. Powell, St. John, N.B.

Mr. Eustace George Ahern, of Toronto, has been appointed secretary of the board of pension commissioners, Ottawa, by the Civil Service Commission. Mr. Ahern has been for a year and a half on the staff of the district office of the pensions board, Toronto, and since April 1st last has been manager of the Toronto office.

Mr. William J. Logan, auditor of disbursements in the department of the Comptroller-General of Manitoba, is resigning his position under the government with a view to taking service in the accounting department of the Manitoba Bridge and Iron Works. Hon. Edward Brown, provincial treasurer, stated that in all probability the office to be vacated by Mr. Logan will be dispensed with in future, and that Mr. Duncan Cameron, who has been assistant to Mr. Logan, will be made chief clerk in the comptroller-general's office.

Mr. Thos. Grills has been admitted to partnership with Messrs. Morrow and Jellett, bond and stock brokers, Toronto. Mr. Grills has been in the financial business for a number of years, having been associated with Messrs. Brouse, Mitchell and Company, stock brokers, from 1911 to 1914, and with Messrs. Æmilius Jarvis and Company, bond department from 1914 to 1917, part of which time he was manager of their New York office. Mr. Grills served with the Royal Canadian Dragoons until the end of 1918 when he joined the staff of Messrs. Morrow and Jellett, as manager of their bond department.

OBITUARIES

Mr. William H. Weswell, who was for nearly forty years county clerk and treasurer for the municipality of Halifax, died at his home there recently, aged 89 years.

Mr. Charles I. Ewing, manager of the Dominion Bank at Huntsville ,Ont., for the past year, died recently from an attack of heart failure. He was formerly in the head office of the bank in Toronto.

Mr. John Phillips, a member of the Toronto Board of Trade, and for thirty years connected with the firm of L. Coffee and Company, grain merchants, Toronto, died this week in his fifty-fourth year.

Mr. John Sime, assistant general manager of the Western Assurance Company, and the British-American Assurance Company, died in Toronto recently after three months' illness. He had been connected with leading British Assurance Companies until he came from Scotland to Toronto in 1907.

Government Passenger Service Being Considered

Minister of Marine Intimates Program May Be Extended—Growth of Merchant Fleet Described—Under Direction of National Railway Head, and Independent of Government Influence — Policy of Department of Railways and Canals.

PASSENGER ships with a gross tonnage of 15,000 tons may be built and put into operation by the Dominion Government. Hon. C. C. Ballantyne, minister of marine, speaking at the annual meeting of the Dominion Marine Association in Montreal on January 9th, stated that such a program was at least being considered by the government.

The following officers were elected for the coming year: A. E. Mathews, president; H. W. Cowan, vice-president; A. A. Larocque, 2nd vice-president; Committee: W. E. Burke, L. Henderson, T. Enderby, A. A. Wright, Lorne C. Webster, W. Waller, J. F. Sowards, W. J. McCormack, W. H. Smith, J. F. M. Stewart, E. W. Oliver, J. Wilkie, J. Beasley, Francis King, general counsel.

Merchant Fleet Built Up

Describing what had been done already, Hon. Mr. Ballantyne said that while it did not compare in size with the work of the United States Emergency Shipping Corporation, yet the government believed it would be of service in building up export trade. There are sixty ships under construction, so that by next year there should be 360,000 tonnage constructed. There are now 23 vessels in commission ranging from ships of 3,750 tons to 10,500 tons being built at the Halifax shipyards. While these ships are to be owned by the Dominion government, they are not to be operated or managed by the government. The Canadian Government Merchant Marine is a subsidiary company of the Canadian National Railways, and D. B. Hanna and his board of directors have an absolutely free hand. "As minister of marine," said the speaker, "I have never attempted to dictate in any way at all, neither has any member of the government. The responsibility for the success of the government mercantile marine rests entirely on the shoulders of D. B. Hanna and his board of directors as to what rates shall be laid down and what cargo shall be carried. As a business proposition we know that the ships will be better managed and operated if they are left entirely free of political influence."

The minister added that the capital invested in shipyards amounted to $47,000,000 and the number of men engaged is 23,500, and of these not less than twenty-five per cent. have served overseas. In addition there are 25,000 men engaged in ships furnishings and repairing. Another important feature is that all the labour and material entering into these workshops is produced in this country. Moreover, Canada is able to produce these ships at as low a cost as any other nation, and in other cases at even less cost. Now the government is able to close contracts at twenty-five dollars a ton less than during the war. As to the earnings of the government ships, five had made but one trip, and the remaining twelve had been operating only during a portion of the year; but the net profit of these ships is a very handsome one indeed.

Canadian Work Only

"Our Canadian shipbuilders having demonstrated that they can build freight ships, I am happy to tell you," continued Hon. Mr. Ballantyne, "that on the representations that have been made to Dr. Reid by Mr. Hanna for passenger ships of a one-class type, that is, a passenger ship of 15,000 gross tons, with speed of 18 knots, and carrying both passengers and freight, the government has under consideration the building of such a type of steel vessel. The government has no intention of ordering one outside of Canada, but it is the intention of the government to have these passenger ships built in this country by our Canadian workmen and to use Canadian materials."

The minister of marine also referred to the contract entered into with the Dominion Steel Corporation for 50,000 tons of steel, saying at one time he was anxious as to whether the government would be able to take that amount, but he was now satisfied, owing to the energy of Canadian shipyards in securing orders from France and Norway, that there would be no difficulty in this respect, so long as the contract lasted. It was very pleasing to know that within the last few months, in competition with other lands, several of our eastern yards had been successful in securing orders for twelve steel ships for France and three for Norway, so that Canada has been put as a shipbuilding nation on the map.

"If ever the time comes—and I do not know what the government's naval policy will be, as this is a matter that has not yet been discussed by the government—that Canada finds it necessary to build ships of war in this country, I am satisfied that Canadian shipbuilders will be able to build any war craft that may be required by this country." The minister alluded to the deputation that had waited upon him this week in relation to proposed protection for shipbuilding and expressed his hope that before the House meets they will know whether they are going to have their request granted. He also expressed his belief that quite a few shipbuilders in England would be coming here before long to erect plants.

Enlargement of Canals

The government's work in the development of inland transportation was described to the meeting by Hon. J. D. Reid, minister of railways and canals. The Welland Canal, which originally admitted vessels of 2,500 tons, was now being enlarged so as to accommodate vessels of between 8,000 and 10,000 tons. He stated that when it was first decided to bring vessels from Port Arthur to Kingston, they had in mind the canalization of the St. Lawrence so that they could proceed to Montreal. If it had not been for the war years, these ships would now have been coming down not only to Kingston, but to Prescott and Montreal. To the visitors from the United States he said that the Canadian government is now taking the question up with their government with a view to getting all ready for that work as soon as financial conditions would allow. Dr. Reid pointed out that not only Montreal, but Halifax and St. John, had been fortunate in being provided with adequate terminal facilities.

Publicly Owned Railways

Coming to the matter of railways, Hon. Mr. Reid said when he first entered parliament there were 16,000 miles of Canadian owned railways. To-day they have 40,000, of which 16,000 are owned, controlled and operated by the Dominion government, and within a short time they would have 22,000 miles with the taking over of the Grand Trunk. Thus there would be practically two great systems, and it would be the duty of the Government to see that there was no unfair play. In other words, the management of the Canadian National Railways had instructions to operate as a private railway; they must go out into the open market and compete with the Canadian Pacific Railway on a fair and equal basis.

WANT DECIMAL SYSTEM FOR UNITED KINGDOM

An article, "The Weights and Measures of Latin America," in the December number of "The Decimal Educator," issued by the Decimal Association, includes a number of letters from consular representatives of Brazil, Argentina, Bolivia, Chile, Colombia, Cuba, Ecuador, Mexico, Nicaragua, Paraguay, Peru, Uruguay and Venezuela, all testifying to the success of the metric system in their respective countries. Those interested in British export trade will find this of interest.

Finances of B.C. Municipalities

Arrears of Taxes and Sinking Fund Shortages Increased in 1918 — Public Utility Operations Show Large Deficits—Municipal Debts Total Over Hundred Million—Tax Levies Greatly Increased in Last Two Years — Expenditures Exceeded Receipts.

DURING the year ended December 31st, 1918, according to statistics just now made public, the municipalities of British Columbia increased their arrears of taxes from $13,680,127 to $14,631,216, and shortages in sinking funds increased from $3,641,769 to $5,206,093. In the year 1917 the receipts from all sources, including public utilities, were $13,116,716, and the expenditures were $15,001,191, showing a shortage of $1,884,475. In 1918 the receipts were $14,734,800 and the expenditures $15,566,697, showing a shortage of $831,896. All the municipalities of the province are of two classes, the rural ones being called districts, and the remainder cities.

Tax Arrears

At the end of 1917 the condition of the outstanding arrears of taxes as compared with liabilities other than debenture issues, was as follows:—

Arrears of taxes		$13,680,127
Sundry debts, exclusive of debenture issues	$12,054,633	
Less amounts repayable by sale of debentures	3,699,573	
	$8,355,059	
Sinking Fund shortage	3,641,769	
		$11,996,828
Surplus		$1,683,298

At the end of 1918 they were as follows:—

Arrears of taxes		$14,631,216
Sundry debts, exclusive of debenture issues	$11,280,348	
Less amounts repayable by sale of debentures	3,247,857	
	$8,632,491	
Sinking Fund shortage	5,206,093	
		$13,238,584
Surplus		$1,392,631

Assessments and Exemptions

A statement of assessments shows that the value of taxable land in the thirty-five cities totalled $246,335,573; taxable improvements, $130,272,220; a total of $376,607,793 of taxable property. Land and improvements exempt from taxes amounted to $30,653,809. The area of the thirty-five cities was 56,470 acres and the population 251,320. The corresponding figures for the twenty-eight districts in the province were: value of taxable land, $119,668,798; value of taxable improvements, $51,086,005; total taxable property, $170,754,803; land and improvements exempt from taxation, $8,841,363; population, 123,660; area, 888,738 acres.

The debts of the cities on December 31st, 1918, totalled $82,388,002, of which debenture debt comprised $73,164,612. The districts had a debenture debt of $21,855,497, and total liabilities of $23,912,456.

Sinking Funds

The conditions of the sinking funds is shown by the following figures:—

	Cities.	Districts.	Totals.
Cash	$ 1,742,222	$ 182.685	$ 1,921,907
Invested	8,108.420	1,471,916	9,580,337
Total	9,850.642	1,654,601	11.505,244
Sinking Fund required	14.557.982	2,111.564	16,669,546
Shortage	4,712,929	493.163	5,206,093
Surplus	5,590	36,200	41,791

Some Poor Investments

The sinking fund investments are distributed as follows:—

Dominion of Canada bonds	$4,977,209
Mortgages	273,320
Debentures of the municipality	4,329,807

In commenting on these figures, R. Baird, the inspector of municipalities, says: "I would point out the desirability of some action being taken to clear up the condition of the mortgage investments. These mortgages were all taken prior to 1914 and are past due. In many cases no interest has been paid for a considerable time and to a large extent they are a doubtful asset to the sinking funds." Referring to the purchase by a municipality of its own debentures, he says: "In view of the fact that the Municipal Act, which governs all municipalities except the city of Vancouver, does not permit of the investment by a municipality of its sinking funds in its own debentures, it must be noted that, of the amount of this class of investment as here shown, the sum of $3,458,680 is invested by the city of Vancouver."

Tax Arrears Have Grown Rapidly

The totals of tax arrears for five years past have been as follows:—

	Cities.	Districts.	Totals.
1914	$ 3,879,775	$2,114,454	$ 5,994,230
1915	6,845,741	2,520,634	9,366,375
1916	8,964,834	2,890,942	11,855,777
1917	10,642,651	3,037,476	13,680,127
1918	11,551,567	3,009,648	14,631,216

Receipts and Expenditures

Receipts for the year were as follows:—

	Cities.	Districts.	Totals.
Land taxes received	$ 7,803,987	$2,789,190	$10,593,177
Trade licenses	141,401	12,048	153,450
Road taxes	22,010	15,168	37,178
Dog taxes	14,424	7,059	21,483
Fines	145,758	15,126	160,885
Govt. grant for schools	547,781	344,328	892,109
Rec. from public utilities	769,735	321,215	2,090,968
Sundry receipts	610,613	174,945	785,548
Totals	11,055,718	3,679,081	14,734,800

Expenditures of the cities totalled $11,733,635, and those of the districts $3,833,062, exceeding the revenue in both cases. An examination of the revenue over a five-year period shows that liquor license revenue has ceased, and revenue from trade licenses has fallen off, while taxes and government grants for schools have increased.

LOGAN AND BRYAN OPEN IN MONTREAL

Logan and Bryan's Montreal office was opened on January 5th in the Canadian Pacific Railway Telegraph Building. The branch will be conducted under the joint management of Harry B. Cassils, formerly associate manager of E. and C. Randolph, Montreal, and Paul Dow, both of whom were widely known in financial and commercial circles. The wire facilities of the firm are extensive, consisting of some 50,000 miles of leased wires extending to all parts of the continent, and include besides principal trading centres, many prominent holiday and health resorts.

Quebec Legislative Program

New Companies Act—General Accountants Association of Quebec—Two New Railways Projected — Private Bills Relating to Trust Companies

SITTINGS of the Quebec Legislature were resumed on January 7th, but before adjourning for the Christmas holidays many new bills had been introduced. They were nearly all private bills, however.

One of the private bills proposes to incorporate the Quebec and Chibougamau Railway, with a capital stock of $2,000,000, to construct a steam and electric railway from Quebec to Chicoutimi on the Saguenay River, and from the latter to Lake Chibougamau. Another bill is for the incorporation of the Bagotville Railway Co., with capital of $500,000, to build a line from Nairn Falls on the Saguenay to Chicoutimi.

Insurance and Trust Companies

"The Guarantee Title Bond and Trust Corporation of Canada" is the name of a concern for the incorporation of which a bill has been introduced. The capital is to be $1,000,000, and general trustee powers are requested. Another bill is to amend the act to incorporate the Crown Trust Company.

General Accountants Association

Efforts have been made for some time past to form an association of accountants in the province, and a bill to this effect was introduced, and passed through the committee stage on January 7th. This sessions bill differs from the one introduced at the 1918-19 session, which aimed to form a closed corporation, and for this reason the committee regarded it with more favour. There are already two associations of accountants in the province. A committee of chartered accountants, and representatives from McGill University, opposed the bill. The name proposed for the new organization is "The General Accountants Association of the Province of Quebec." The following are to be eligible for membership:—

"(a) All persons who at the date of the sanction of this act are certificated members in good standing of the General Accountants Association, a corporation existing under the Federal Statute 3-4 George V, 1913, chapter 116;

"(b) The professors of accountancy of *'l'Ecole des Hautes Etudes Commerciales de Montreal'* and of 'McGill University' acting as such at the date of the sanction of this act;

"(c) Accountants who have acted as auditors of outside firms for the Income Tax Department of the Government of Canada for the Province of Quebec during not less than two months immediately preceding the sanction of this act;

"(d) Accountants who have acted in the capacity of auditors for the Government of the Province of Quebec during not less than two months immediately preceding the sanction of this act;

"Provided that within three months after the sanction of this act an application for membership in writing is made to the secretary of the association, and the admission fee provided by the by-laws is paid."

Objects of the Association

In explanation of the purposes of the association, the bill says:—

"3. The objects of the corporation are: to elevate the status and the dignity of the profession of public accountants, and to that end to do all that is necessary to augment their competence and efficiency, by facilitating and encouraging their study; by providing opportunities of discussing all matters of interest, and of acquiring such knowledge as is useful to the exercise of their profession; by defining in a more precise manner the qualifications required to become a public accountant, and also the obligations and responsibilities of that profession, and to render generally to its members all useful services.

"4. The corporation shall enact by-laws respecting the admission, the qualification, the classification, the conduct, the suspension and expulsion of its members; the granting of titles, degrees, certificates, diplomas, and licenses; the contributions, charges, entrance and annual fees; the election of officers; the holding and procedure of meetings; and generally for all its purposes; but such by-laws or amendments thereto shall come into force and effect only when approved by the Lieutenant-Governor in Council.

"5. The corporation may accept as the equivalent of its own examinations for admission to membership, subject to such conditions that it may prescribe as to practice of the profession in the Province of Quebec or otherwise, the examinations of the General Accountants Association mentioned in paragraph 'a' of section 2 of this act."

Companies' Act

The most important bill introduced is "The Quebec Companies' Act, 1920," to replace the present legislation regulating the incorporation and management of companies with provincial objects.

Public Utilities Commission

A wider scope for the Quebec Public Utilities Commission, of which Colonel Hibbard is chairman, Sir George Garneau and C. E. Laberge are members, is one of the objects of a bill which Hon. L. A. Taschereau, Attorney-General, will introduce this session. The bill is a complete revision of the present act creating the commission. The changes were indicated in the speech from the throne. The commission is to be given powers whereby it will handle all expropriation cases, study them and fix the indemnity. At present when the city of Montreal wishes to expropriate property it appoints experts, the landowner does the same, and third parties are appointed, and this constitutes a board of arbitration. The result is a lengthy and expensive arbitration proceeding. Mr. Taschereau proposes to eliminate such expense and loss of time in his new bill. Another important change affects lumber mills. When there are two or more lumber companies operating on the same river, there is often difficulty as to when logs of one company are to be floated down. The Utilities Commission's powers are extended to provide that it shall arbitrate such difficulties. There are resolutions accompanying this bill, which mean that the members of the commission will receive larger salaries.

Other Legislation to Come

A private member is bringing in a bill to give wider powers to municipalities in tax exemptions. At present people who live in certain municipalities, summer resorts in particular, for a few months only, have to pay taxes for a whole year, including water taxes. It is now proposed to allow the municipalities to charge for the time of residence only.

Adolph Stein, of Kamouraska, is bringing in a bill amending the cities and towns act so as to permit towns and cities to charge 7 per cent. interest on arrears of taxes. The rate is now 5 per cent. Montreal is not affected, since its own charter allows it to charge 7 per cent. on arrears after 60 days, and 6 per cent. during the 60 days. Mr. Stein is also asking to have struck from the statutes clauses 7613 to 7629, which deal with conciliation in rural districts in amounts involved under $25. This law has never been put into effect, though on the statute books for 15 years, and now that the revision of the revised statutes is in hand, Mr. Stein thinks it advisable to authorize the commissioners to strike the clauses out altogether.

Grants to Colleges

In answer to a question a few days ago as to how much had been given by the provincial government to each faculty of McGill and each faculty of the University of Montreal from 1898 to 1919 inclusive, and how much had been given

to the polytechnic school during the same period, Hon. Mr. David said that McGill got in that period a total of $237,825; McGill Normal School got $145,000, an additional $6,000, and the departmment of pharmacy got $500, making a total for McGill and its affiliations of $390,125. Laval at Montreal, of the University of Montreal, got in the same period $247,000, and the polytechnic school which is affiilated with the University of Montreal got $504,000, making a total for the University of Montreal and its affiliations of $751,000.

Insurance Amendments

Two private bills are introduced to amend acts incorporating insurance companies. One provides that "La Prevoyance" (the Provident), incorporated in 1906, "may lawfully enter into and effect contracts of insurance and reinsurance against fire and the consequences thereof and insure and re-insure all kinds of property, rights and interests against fire and its consequences and, to that end, it may at any time, and in any place, make out and issue policies and enter into contracts, agreements or engagements, written or printed, or partly written, and partly printed, according to the requirements of each case, and generally do all matters and things in connection with such purposes and calculated to accomplish the same."

The other relates to the Industrial Life Insurance Co., also incorporated in 1906, but the charter of which did not specify how the company's policies should be valued, and imposed too much limitation on investments. The bill now introduced provides that "As regards the investment of its money the company shall be governed by article 6970 of the Revised Statutes and its amendments." Regarding valuation, it says, "Once every five years, or oftener at the discretion of the Provincial Treasurer, the insurance inspector shall himself value or cause to be valued under his supervision all the company's life insurance policies, and such valuation shall be based on the American mortality table and at a rate of interest of three and a half per cent. per annum."

DECEMBER FIRE LOSSES

Many Large Fires Last Month—Loss Lighter Than in November, However—More Fatalities

According to *The Monetary Times'* record, fire losses in December, 1919, amount to $2,047,496, as compared with $2,339,870 in November, and $1,733,917 in December a year ago. The following is the December estimate:—

Fires exceeding $10,000	$1,781,950
Small fires reported	84,569
Estimate of unreported fires	180,977
Total	$2,047,496

Many Large Fires

The following is a list of fires where the loss was $10,000 or over:—

Quebec, Que., Dec. 1, municipal building	$ 15,000
Quebec, Que., Dec. 2, Quebec and Levis Ferry building	13,000
Toronto, Ont., Dec. 3, business building	14,000
Vancouver, B.C., Dec. 1, Stirling Hotel	40,000
New Glasgow, N.S., Dec. 2, Norfolk Hotel	40,000
Kitchener, Ont., Dec. 2, A. Lockhart's garage	25,000

Ponteix, Sask., Dec. 6, business section	75,000
Toronto, Ont., Dec. 6, building of A. W. Carrick	15,000
Sandwich, Twp., E. Ont., Dec. 10, Lakeview Hotel	20,000
Verigin, Sask., Dec. 4, building occupied by two families	40,000
Cambray, Ont., Dec. 9, barn of Wm. Marsh	15,000
Cranbrook, B.C., Dec. 10, slaughter house of P. Burns	15,000
Halifax, N.S., Dec. 10, Brister's garage	35,000
Outremont, Que., Dec. 10, Joffre Apartments	11,600
Moose Jaw, Sask., Dec. 2, Robin Hood Mills	12.000
Timmins, Ont., Dec. 2, business block	18,050
Toronto, Ont., Dec. 16, warehouse of the Dominion Glass Co.	100,000
Woodville, Ont., Dec. 17	25,000
Chicoutimi, Que., Dec. 20, three business blocks	100,000
St. Malachie, Que., Dec. 4, flour mill and elevator of the Dorchester Co., Ltd	113,000
Woodstock, Ont., Dec. 9, Oxford garage and barn	21,300
Edmonton, Alta., Dec. 21, All Saints' Cathedral	60,000
Edmonton, Alta., Dec. 22, two elevators of Western Canada Flour Mills	150,000
Fredericton, N.B., Dec. 17, Old Kirk Apartments	25,000
Fredericton, N.B., Dec. 21, Gem Theatre	10,000
Grande Prairie, Alta., Dec. 15, Salmond's Hotel	10,000
Halifax, N.S., Dec. 21, warehouse Maritime Telephone Company	150,000
Krydor, Sask., Dec. 4, business sectcion	25,000
St. Catharines, Ont., Dec. 22, factory of Dominion Electric Co.	15,000
St. John, N.B., Dec. 18, block of wooden buildings	50,000
Summerland, B.C., Dec. 14, Hospital	12,000
Toronto, Ont., Dec. 21, garage at 1585 Yonge St.	41,000
Victoria, B.C., Dec. 10, lumber mill of Moore and Whottington	45,000
Sarnia, Ont., Dec. 15, building of Asbestos Covered Metal Corporation	21,000
Beamsville, Ont., Dec. 29, Hamilton, Grey and Bruce Railway barns	40,000
Chambly Canton, Que., Dec. 24, two buildings of Bennett Co.	100,000
Fairview, N.S., Dec. 24, warehouses of Canadian Oil Co.	100,000
Moncton, N.B., Dec. 25, Moncton, T. E. & G. Co.'s barns, etc.	50,000
St. John, N.B., Dec. 30, building of Marcus & Sons	50,000
Woodstock, Ont., Dec. 27, mill of McKinney Lumber Co.	25,000

More Fatalities

The following is a list of fires at which fatalities occurred last month:—

Halifax, N.S., Dec. 4, trapped in burning shed	1
Montreal, Que., Dec. 4, trapped in burning building	1
Montreal, Que., Dec. 5, trapped in burning house	1
Dubuque, Sask., Dec. 9, trapped in burning house	5
Hamilton, Ont., Dec. 9, clothing caught fire	1
Dundas, Ont., Dec. 11, trapped in burning house	1
St. John, N.B., Dec. 11, trapped in burning house	1
Vancouver, B.C., Dec. 12, gasoline explosion	1
Sydney, N.S., Dec. 11, trapped in burning store	1
Brockville, Ont., Dec. 16, clothing ignited	1
Owen Sound, Ont., Dec. 20, trapped in burning house	2
Canmore, Alta., Dec. 17, clothing ignited from lamp	1
Moncton, N.B., Dec. 25, trapped in burning building	1
Kitchener, Ont., Dec. 26, shoveling coal in furnace	1
Total	19

TRADE FOR YEAR 1919

Trade figures for the Dominion for the year ended December 31st, 1919, when fully available, will show a total trade of approximately $2,350,000,000. The figures, it is expected, will not differ materially from those of 1918, because for the first eight months of the fiscal year ending with November our trade was less this year than for the same period last year by only about sixteen million dollars.

For the eleven months of the calendar year, for which definite statistics are now available, the total trade was well over the two billion dollar mark. During that period merchandise was exported to the value of $1,251,094,840 as compared with $1,300,761,035 for the same months in 1918. Total imports of merchandise to November 30th, 1919, was to the value of $920,077,014 as against $898,211,913 during the eleven corresponding months in the previous year.

Dutiable goods brought into Canada for the period under review were to the value of $585,907,143 as against $508,203,512 for the corresponding period in 1918, while in 1919 free goods worth $334,169,871 crossed Canadian borders as compared with $390,008,401 in 1918.

This Company, through its various departments, offers the facilities and services of a commercial bank, a foreign exchange bank, a fiduciary, and an investment institution.

ROYAL BANK OF CANADA

At the annual meeting of the Royal Bank, held in Montreal on January 8th, emphasis was laid upon the showing made by the annual statement, which was unusually favourable, and upon the further extension of the bank's business in the West Indies, Central and South America. The figures have already been reviewed in these columns. During the year a large number of branches were opened, including new branches in the West Indies and South America. In June a French auxiliary, the Royal Bank of Canada (France), was formed, and an office has been opened in Paris. A working arrangement was also made with the London County, Westminster and Parrs Bank, Ltd.

In his address the president, Sir Herbert S. Holt, referred to the fact that this was the bank's fiftieth statement, during which time the paid-up capital has increased $300,000 to $17,000,000, and assets from less than $1,000,000 to over half a billion dollars. He also referred to financial developments during the year and to the important part which had been played by banks in financing the government and industry.

The vice-president and managing director, E. L. Pease, gave some statistics illustrating the prosperity of the Dominion during the year. The exchange problem is, he said, increasing in complexity. Referring to the Excess Profits Tax, its effects on industry were prejudicial, he said.

The board of directors, including T. Sherman Rogers, K.C., who recently joined it, was re-elected, and at a subsequent meeting of the directors Sir Herbert Holt was re-elected president, and E. L. Pease was re-elected vic-president and managing director.

NON-TARIFF COMPANIES GET SHARE

As previously mentioned in these columns, efforts were made by non-tariff insurance companies to secure part of the city of Edmonton's business. D. Mitchell, city comptroller, now advises *The Monetary Times* that 25 per cent. of the 1920 business will be allocated to non-tariff agencies, leaving 75 per cent. to be distributed among the tariff agencies. The average tariff rate, according to the schedule for 1920, is 1.904 as compared with 1.865 last year, while the non-tariff average rate is 1.609.

The firms sharing in the Edmonton business for 1920, with the per cent. of the business obtained by each, are:—

Two per cent. each to Allan, Killam, McKay, Ltd., Blackett, Henderson, Anderson, Ltd., Jellett and Slessor, Kirkpatrick and Scarth, Northern Investment Co., Ltd., A. Tod Agencies (J. R. McIntosh). Total, 12 per cent.

One and one-half per cent. each to Alberta Canadian Investment Co., Ltd., Evans, H. M. E., Mays, R., Martin, H. M., McManus Brothers, Sheppard, Clibborn and Hill, Ltd., Underwriters, Ltd., Hooson Co. Total, 12 per cent.

One per cent. each to Crafts, Lee and Gallinger, Garrett, Julian, General Adminstration Society, Pardee, E. C., Tipton Investment Agency, Watson and Co., North West Financial Co., Ross Co., Muir and Martin, Weber Brothers, Barry C. E., Bowden, T. N., Brine, C. A., and Co., Dovnos, Geo. F., Hyndman, C. A., McGeorge Insurance Agencies, Ltd., Whyte and Co., Mathews, F. B., and Co., Chapman, C. H., Hewgill, Ltd., McKinnon, J. A., Wilkin, Hunt and Kilburn, Ltd. Total, 22 per cent.

One-half per cent. each to Dunlop, R. A., and Co., Gilmurray, D. J., Hulbert, R. A., and Co., Killen and Gilbert, McLean, H. A., Richardson, W. J., Sutcliffe, J. S., Thibaudeau Agencies De Blois, Tufford, C. R., Ltd., McCaig, J., and Co., Metropolitan Realty Co., Ltd., Carnes, Geo. A., Sameth, Jas. E., Duggan, J. J., and Co., Ltd., Brown Investment Co., Ltd., Smith Brothers, Alberta Trusts Co., Ltd., Duggan Building and Investment, Ltd. Total, 9 per cent.

The following agents for non-tariff companies received the proportions indicated: Independent Insurance Exchange, 11 per cent.; T. Dace, 3 per cent.; Fire Insurance Agency, Ltd. (A. O. Davis), 11 per cent. Brokers received the remaining 20 per cent. Total, 45 per cent.

COBALT ORE SHIPMENTS

The following were the shipments of ore, in pounds, from Cobalt Station for the week ended January 3rd, 1920:—

Hudson Bay, 63,595; Northern Customs Con.; 90,795; Temiskaming, 60,000; Trethewey, 60,000; McKinley-Darragh, 215,965. Total, 490,355.

For the week ended January 10th, 1920, the shipments were: Trethewey, 82,064; O'Brien, 64,000; La Rose, 69,795. Total, 215,859. The total since January 1st is 706,214 pounds, or 353.10 tons.

CANADIAN CONNECTICUT COTTON STOCK

An issue of $3,000,000 8 per cent. cumulative participating preferred shares of the Canadian Connecticut Cotton Mills, Ltd., will be offered next week by the Royal Securities Corporation, Ltd., at a price of 100 and accrued dividends, yielding 8 per cent. The preferred shares are a senior security. The company has no bonded debt. Assets securing them are valued at $181 for each $100 of preferred shares outstanding. Earnings for past year from the company's present plant were three times preferred dividend requirements. Earnings for the current year are conservatively estimated at more than five times total preferred dividends, without taking into account increased earnings from doubling of present plant capacity provided by the new financing.

The company has operated successfully for the past six years at Sherbrooke, Que, a large mill for the manufacture of square and cord fabric for automobile tires, and is the largest manufacturer of these goods in Canada. A large portion of the above issue will be applied toward the construction during 1920 of an additional mill of 30,000 spindles, practically doubling the company's output.

UNION BANK ANNUAL MEETING

In his address to the shareholders of the Union Bank at the annual meeting, held on January 7th in Winnipeg, H. B. Shaw, general manager, said:—

"No permanent relief can be expected until the nations of the world get together, without greed or selfish motives, and in a frank and fearless manner face existing conditions. The United States might very properly be expected to take the lead. As far as we in Canada are concerned, time, production and thrift are the only possible solvents. Exporters and importers should not open credits or engage in contracts without exercising the utmost caution. Inflation of the various currencies has caused exchange to become a most important question. An erroneous idea prevails that the banks are responsible for and making large profits out of the present situation. This is, indeed, incorrect; the banks derive no extra profits as the result of the heavy fluctuations in exchange. We shall, indeed, welcome a return to normal conditions."

Referring to Canada's financial position, the president, John Galt, said:—

"We, in Canada, have much cause for thankfulness. It is true that our national debt has increased during the past year by a large amount, but our country is a storehouse of natural resources, and there is no doubt about our ability to pay our obligations. A determined effort should be made at once to develop these resources and do our full share towards supplying the world with our products, which are so urgently needed. It is a time when we should put forth every effort to increase production and build up reserves against the lean years that are sure to come. The war is not paid for; part of the price will be hard times, though they may not yet be in sight, and if we are wise we will be prepared for them."

R. T. Riley, of Winnipeg, will probably retire from the board of directors because of ill-health. Mr. Riley has been a vice-president for fourteen years. Stephen Haas, of Toronto, who has been on the board since 1911, was elected a vice-president. Otherwise the new directorate is the same.

CANADA LIFE

ASSURANCE COMPANY

Above, *in brief, are the results for 1919 as shown by the Financial Statement.*

Below *are a few other important accomplishments during the year.*

THE CANADA LIFE IN 1919:—

1. Placed more additional insurance with existing policyholders than ever before.
2. Succeeded in showing a substantial increase in the amount of the average policy.
3. Greatly extended the sale of Monthly Income and Business Insurance during the year.
4. Carried out the year's operations with an important decrease in the ratio of expenditure.
5. Increased the interest rate to 6.06%, notwithstanding large purchases of 5½% Victory Bonds.
6. Issued nearly twice as many new policies as in 1918.

The Canadian Bank of Commerce

Annual Meeting of Shareholders

The Fifty-third Annual Meeting of the Shareholders of The Canadian Bank of Commerce was held at its banking house on 13th January. The President, Sir Edmund Walker, took the chair and after the usual organization proceedings the following Profit and Loss statement for the year ending 30th November last was submitted:—

The balance at credit of Profit and Loss Account, brought forward from last year, was		$ 1,444,842.68
The net profits for the year ending 29th November, after providing for all bad and doubtful debts, were		3,074,892.72
		$ 4,519,735.50
This has been appropriated as follows:—		
Dividends Nos. 128, 129, 130 and 131, at twelve per cent. per annum		$ 1,800,000.00
War tax on bank-note circulation to 29th November		150,000.00
Written off Bank Premises		250,000.00
Transferred to Pension Fund		120,000.00
To adjust British and Foreign investments on existing exchange rates, not otherwise provided		750,000.00
Subscriptions:—		
Salvation Army	$ 5,000.00	
University of Toronto Memorial Fund	2,500.00	
Soldiers' Emergency Fund Repatriation Campaign	10,000.00	
Navy League of Canada	2,500.00	
Sundry subscriptions	2,000.00	
		22,000.00
Balance carried forward		1,427,735.40
		$ 4,519,735.40

Before moving the adoption of the Report, the President requested the General Manager to address the meeting. The General Manager then said:—

General Manager's Address.

Contrary to the view expressed last year, that it was unlikely that we should again show such large figures for some years to come, the unexpected has happened, and we have made a new record in both profits and total assets. Undoubtedly the continued high level of prices for commodities of all kinds has left its mark upon the balance sheets of financial institutions, and while this condition continues it will be reflected in the figures of our own annual statement.

Increased Earnings.

The net profits have amounted to $3,074,000 after a most careful provision for all the doubtful items among the Bank's assets. These earnings exceed those of last year by $224,000, a satisfactory increase of 7.9 per cent., but which compares with an increase of 8.9 per cent. in assets. The figures show that the forces which have been steadily reducing the rate of earnings on the services performed by Canadian banks for the public, to which I referred last year, are still actively at work, and it is fervently to be hoped that the keen spirit of competition, so strenuously active in many directions, will not blind Canadian bankers to this tendency of the times. When it is considered that the three million odd dollars that we show as our net profits represent the combined earnings of over 500 offices, and the result of the efforts of a staff of over 4,000 employees, it will be more clearly recognized how meagre is the showing in comparison with the vast amount of hard labor and heavy responsibility involved.

The Pension Fund.

We have paid during the year four quarterly dividends of 3 per cent., or 12 per cent. in all, and now that the war is over and we find it necessary to take up our building program again, we have resumed our former practice and have written the sum of $250,000 off Bank Premises Account. This is perhaps more necessary now than ever, owing to the extremely high cost of all building operations which has naturally caused us to limit our program to only the most necessary work. The release of large numbers of our men from military service, and their return into the service of the Bank, has rendered a large increase necessary in the Bank's contribution to the Pension Fund. This is caused by many of these returned men having, during their absence of military service reached or passed the ago of 25, at which the Bank's contribution to the Pension Fund on their behalf begins. When all arrangements are completed and the question of their back payments to the Fund is settled, a further large sum will no doubt be required to adjust the Bank's contribution for the period of their absence. It is our intention in the very near future to have the Fund again actuarially examined with a view to increasing the limit of the pensions awarded. We have also thought it wise, in view of the unsettled condition of the principal foreign exchanges, to set aside the sum of $750,000 as an appropriation for the continuous decrease in the value of our funds and investments abroad. We could, of course, offset this shrinkage by writing up the value of our investments in the United States, but as to realize the increased value we should have to liquidate our business in that country, we have not attempted to adopt such a short-sighted policy. We have also to consider that the exchange situation between Canada and the United States will right itself automatically when the European exchanges become more normal, and we think that the policy we have followed is one that should commend itself to every conservatively-managed institution.

Patriotic Subscriptions.

As usual we ask you to confirm the larger subscriptions we have been called on to make during the year, amounting to the sum of $22,000, almost all on behalf of objects of a patriotic character connected with the war.

There has been a decrease in our note circulation for the first time since the commencement of the war. The decrease is only $1,536,000, but if it is one of the first signs of a check to the inflation of prices, it is not unwelcome. The increase in deposits of $40,446,000 is the striking item of our statement, and it has taken place almost entirely in the more stable item of deposits bearing interest. The decreases in balances due to foreign banks and in bills payable are almost offset by the increase in acceptances under letters of credit, and none of these changes possess any special significance, save only that the increase in the use of letters of credit indicates a revival of foreign trade as a result of the ending of the war.

Increased Cash Assets.

Of the assets side of the statement we show an increase of $1,390,000 in cash on hand. The change is more than accounted for by the increase in Dominion notes held, there having been a slight decrease in our holdings of coin. Dominion notes in the Central Gold Reserves are $1,000,000 lower, corresponding to the decrease in our note circulation. There is a decrease of about $1,400,000 in the item of cheques on other banks, which may indicate a slight lessening in the activity of general business, but an increase in bank balances, which leaves the combined total of notes and cheques and bank balances $1,133,000 greater than the figures of last year. There has been an increase in our call and short loans in Canada and a decrease in those elsewhere, the combined effect of all these changes in assets being that our quick or easily realizable assets have increased by $16,892,000, and stand at 49.11 per cent. of our liabilities to the public. Our holdings of Dominion and Provincial Goverment securities have increased $10,700,000 during the year, largely represented by our share of advances to the Dominion Government which are being repaid out of the proceeds of the last Victory Loan. Current commercial loans, that is, those current loans not classified as "call and short loans," both in Canada and elsewhere, show considerable increases, amounting to $20,837,000 in all, which may be considered as another welcome indication of reviving commercial activity. We have disposed of the Eastern Townships Bank building in Montreal during the year, and this accounts for the reduction in Real Estate other than Bank Premises. The increase in Bank Premises Account is due principally to the acquirement of sites for a number of our newer branches, in pursuance of our general policy in this respect. The total of our assets has grown during the year by $39,333,000, or 8.9 per cent., which under the circumstances we consider satisfactory.

New Branches.

Throughout the war the Canadian banks abstained, by common consent, from the opening of new branches. Not only was this justified by the uncertainty of the outlook, but the drain upon the manhood of the country for military service was so great that it was only with difficulty that those members of our staff who were left behind were able to cope with the work thrust upon them, even with the assistance of the temporary staff. Accordingly, while the conflict lasted, we could do no more than to keep a record of those places which seemed to offer a promising field, with a view to occupying them when the general situation justified such a step. The program thus laid down has fully employed our energies during the past year, but is fairly well completed, and now that we have occupied most of the promising new fields in Canada that have been brought to our attention, and have protected our business at those points where such action seemed necessary, we purpose turning our attention to foreign fields. In the meantime the new branches we have opened are, most of them, progressing satisfactorily, and although the initial expenses connected with them are heavy, we look to see them become before long a source of strength and profit.

The Bank's Taxes.

Some years ago, the year after the outbreak of war, we took occasion to refer to the subject of taxes paid by the Bank and advised you that the total was about $650,000. It will no doubt be of interest to you to know that the sum taken out of the profits of the Bank during the past year, and applied to the payment of taxes, was nearly double that amount, or over $1,200,000. We have thought it well to speak thus frankly because the opinion seems to be more or less widely held that banks do not bear their fair share of the burdens of general taxation.

Out of the total of 1,704 officers of this Bank who volunteered for the defence of the Empire, either in the army or navy, we have reinstated during the course of the year 996, and have still to hear from 253 of them. We have been glad to welcome these officers back to our service and will do all in our power to assist them to become re-established in civil life. It is our hope that in the course of a reasonably short time they will find themselves at no disadvantage as a result of the loss in banking experience which naturally resulted from their absence. The opening of new branches and the expansion of our business have made it possible to take on the staff again all those who apply for reinstatement.

Employer and Employee.

An unlooked for consequence of the war has been the unsettlement of the relations between employer and employed in every walk of life. One of the primary causes of this has been the extraordinary increase in the cost of living, but any one who is forced to grapple with the problems before the employer knows that this can be the cause of only a small part of his difficulties. The deeper and more complex part of them, no doubt, had their origin in that phase of the war, when it took on the aspect of a life and death struggle between the opposing forces. For a time everything had to be subordinated to the turning out of men, munitions and material for use in the war. The Government became, practically, almost the sole employer, the erstwhile employer acting as its manager or agent to secure the necessary production. Under these conditions the usual balance-weights and counterpoises of business enterprise were lacking. To secure the necessary production was the only thing that mattered; the cost of doing so was a secondary consideration, and any demands made by employees were granted almost before they were asked. Thus new conditions arose, some showing marked improvement over those existing before the war, but others such as are foredoomed to failure if put into practice under the usual conditions of peace. It is, perhaps, too much to ask of either employees or employers that they should at once grasp with a clear mental vision all the far-reaching consequences of these changes. Suffice it to say that the adjustments necessary, now that business conditions have become more normal, are many and difficult, and involve to the utmost a spirit of fairness and a willingness to compromise opposing points of view on both sides. Speaking for our own staff, both permanent and temporary, they have rendered us loyal service in difficult days, and we have sought to give generous and sympathetic consideration to the difficulties which have been particularly their lot, as salaried men and women, during an extraordinary rise in the cost of living.

The 1919 Victory Loan.

In November last the Canadian Government issued its sixth War Loan, the money being required for purposes connected with the transition from war to peace. The Minister of Finance, Sir Henry Drayton, again asked for a minimum of $300,000,000, and the total subscriptions received were $676,242,790, almost as much as subscribed to the previous loan. The Minister of Finance, and the country itself, are to be congratulated most heartily upon this new demonstration of the financial strength of Canada. There was a large reduction in the number of subscribers, the total number being 789,532, as compared with 1,140,057 in the case of the 1918 loan, so that the average amount subscribed was considerably larger, being $857, as against $610. It is interesting to note, as showing the popularity of the Victory Loans among small subscribers, that in the case of the 1917 loan $100,300,000, and in the case of the 1918 loan $104,500,000, was issued in $50 and $100 bonds. The corresponding figures for the 1919 loan are not yet available, and owing to the reduction in the number of subscribers the total will probably not be so great, but it is evident that about $300,000,000 of the last three loans has been obtained in this way.

Encourage Exploration.

When addressing you last year I ventured to express the opinion that the Government could afford to grant a small bounty on the production of the gold mines in Canada, with a view to increasing the available supply of the precious metal. This opinion has met with disapproval in some quarters, but I still think that the Government should do something in the matter, perhaps, not so much by way of offering a bounty on the gold itself, as to encourage the exploration and development of what are supposed to be gold-bearing areas. Were the same course to be followed in the case of silver, it is possible that the discovery of new fields and the opening of new mines might exercise a very beneficial steadying effect on the price of that metal. The extension of the output of the present mines is, of course, encouraged by the material enhancement in price which has taken place. According to figures made public some time ago, the price per ounce rose during last year from an average of $1.01.12 during the first four months to $1.27.92 in November.

Depreciated Exchange.

The condition of the foreign exchanges is one of the problems with which we have had to deal during the past year, and it is one in which the people of Canada are deeply concerned, as it has a very direct effect upon their economic life. Canada is not alone in suffering from the effect of a depreciated exchange, in fact, it is a condition now familiar to almost every country in the world. The artificial expedients which have been resorted to in order to correct the situation, such as the shipping of gold, the sale of securities and an attempt at fixing exchange rates, are inadequate and may even prove dangerous. The rehabilitation of our dollar can only be accomplished by saving, economy and greater production. It has perhaps become fairly generally known among those who take an interest in the matter that our imports from the United States greatly exceed our exports to that country, and that in the case of Great Britain the reverse is true our exports greatly exceeding our imports. Therefore in the case of our trade with the United States there is a scarcity of bills receivable which we can set off against our bills payable to that country; while in the case of our trade with Great Britain the reverse is true, and the bills receivable exceed the bills payable to such an extent that she has been forced to obtain credit from us for many of her purchases of foodstuffs produced in Canada.

Foreign Credits.

There is much more, however, in the situation than this. We have been selling on credit to France, Belgium, Greece, Rumania, and to some extent to Great Britain, manufactured goods, the raw materials of which are largely imported from the United States, and we are called upon to pay for for these raw materials in cash. In addition to this, the interest payments on our debt abroad have increased, as well as the heavy shipping charges which have to be paid on waterborne goods. In paying for the raw materials referred to we are forced to use up a large part of those funds ordinarily available to defray the cost of our normal imports from the United States. The scarcity of United States funds has thus been accentuated by the increased demand, while the source from which we have been wont in the past to make up any deficiencies, that is, the balance due to us by merchants and others in Great Britain, is not now available for this purpose for two reasons: first, that Great Britain is not settling in cash as in the past; second, that such part of this indebtedness as might be made available for the purpose is not now acceptable to the United States as payment, because tha country has already a surplus of British debts which she is anxious to realize. If to these factors in the problem be added the effect of increased purchases of luxuries imported from the United States in the present era of free and easy spending, an idea will be obtained of at least some of the main reasons for the present situation.

British Imports.

It should not be forgotten in any discussion of the position of the foreign exchanges as affecting Canada, that so far as imports to this country are concerned the position of the British and Continental exchanges is just as favorable as United States exchange is unfavorable. The difficulty in this case is one of supply. Judging by recent accounts, however, Great Britain is bending all her energies, in spite of labor troubles and other adverse circumstances, to resuming her place as an exporting nation, and now that the difficulty of securing vessel space is decreasing, we shall hope to see a decided increase, in the near future, in imports from the mother country of those goods of which we stand in need, and which cannot be produced at home.

Buy in Canada.

On the other hand, in our relations with the United States we should aim to decrease our imports, especially of those articles which are merely luxuries, or which can be produced equally well at home. The position of exchange at this moment is a lesson that our dollars can be more advantageously expended for a home-made article than for one manufactured in the United States, and it is to be hoped that this practical lesson will not be lost upon our people. Its influence should be strengthened by merchants and importers discontinuing to import for consumption in Canada such unnecessary articles as we have referred to.

To sum up, then, there is no royal road to the rectification of the foreign exchanges. Hard work and self-denial such as will increase our income as a nation, and decrease our expenditure, are the only sovereign remedies for the disease. Harder work and greater diligence are needed to increase production, and self-denial implies the cessation of purchases of imported articles which are only luxuries or can be produced at home. We doubt, however, whether ought, save stern necessity, can enforce these conditions upon our people.

The President then spoke as follows:—

PRESIDENT'S ADDRESS.

We have passed through a year in which the daily surprises have been as perplexing as during the war, and in which the anxieties have been as great, except that sometimes they affected rather the mere happiness of the world than human life itself. War, however, still continues in many countries, and there and elsewhere many have died from lack of food. The war has been won by the most superb co-operation in the attainment of one ideal—the winning of the war. We may lose all that victory seemed to secure by indulgence in countless theories, many of them aiming at the disintegration of society, instead of again co-operating in one ideal—the restoration of order and the improvement of social conditions, so that the happiness of the greatest number may be secured. It is not by standing idle while we discuss methods that we can get out of our present troubles. It the call is to "man the life boat" we do not wait for academic discussion before the boat is launched on its life-saving mission, and too much argument between capital and labor, just now, is madness in view of what we seek to save. The rising curve of prices cannot be made to turn downward without an increase of production, nor can we face the heavy obligations left by the war except by greatly increasing production. The man who does not do his best at his particular job is not merely helping to barricade the only pathway that will lead us out of our troubles, but he is helping to raise, or to maintain, the cost of the necessities of life for his own family. I may be called a friend of capital for saying this, but I am on record elsewhere as an advocate of many changes in the present relations of the employee and employer, all of them in favor of the employee.

Insufficient Production.

While we and the rest of the world are failing to produce on a sufficient scale to provide for human comforts, and to pay our debts, the price of everything has so increased, that although all clearing-house and trade returns show higher figures in money, these generally represent transactions based on smaller quantities of merchandise, and because we think in terms of dollars and not of merchandise, we are living in a fool's paradise. The imperious demands of war rapidly raised all prices, and payment was only possible by inflating the currency; unfortunately inflated currency sustains and further increases prices. If with our own currency we bought only goods made in our own country, the minimum of harm would be done, but possessing more currency and fewer commodities than usual, we are acting like the drunken sailor newly come ashore, and buying everything that fancy suggests, whether necessary or not, without regard to whether it is made in Canada or abroad. For every purchase of goods made abroad, whether in Great Britain or China, or anywhere else, we settle through New York, and the rise or fall of the rate of exchange, about which we are so much concerned, is the expression of our failure, or the reverse, to pay cash or its equivalent. In this connection the speaker has for many years, at these annual meetings, presented the facts of our foreign trade, the peculiarities of our relations with the United States, the sales of our securities abroad to pay for the excess of our imports and the danger of mortgaging the future of our country, and has given frequent warnings as to the character of many of our imports.

Our Exports.

The excess of our exports over imports for year ending 31st March was $343,491,000, as compared with $623,647,000 for the previous year. Although so much smaller than for 1918, the excess was larger than in any previous year. The difference of $280,156,000 is more than accounted for by a falling off of $320,874,000 in our exports to Great Britain, and this again is due to a decrease of $297,893,000 in exports of agricultural products and of $87,318,000 in manufactured articles. For the six months ending in September the exports for the two half years are almost equal, while the imports were $33,571,000 less. It is gratifying to notice that, apart from the derecase in agricultural production, our figures have not been much altered by the cessation of the manufacture of munitions. Food is in greater demand than ever and our factories are behind in the production of almost every line of manufacture, while nearly every form of raw material is difficult to obtain. Our total foreign trade for the fiscal year was $2,176,378,000, as compared with $2,548,691,000 in 1918.

It is clear that, if our foreign trade were on a cash basis, we could pay the interest on our foreign debt and settle for our excess purchases from the United States without difficulty, but Europe cannot pay just now, and we must therefore limit our purchases from the United States wherever that is possible. Doubtless the markets for our securities in the United States will gradually widen, and it will become easier to adjust our accounts, but this will be a poor remedy. We cannot afford to increase our debts to foreign investors in view of the taxation we shall have to bear.

Curtail Imports.

Let us consider a few items in our imports which at least suggest great possibilities of curtailment, if we are prepared to restrict our pleasures for the common good. Under the head of apparel we bought abroad to the extent of $8,500,000, including headgear alone for over $5,000,000; under fancy goods, $4,000,000; fruits and nuts, $25,000,000; furs, $4,500,000; gramophones, over $2,000,000; silk in various forms, $21,000,000; tobacco, nearly $12,000,000; in all, $77,000,000, mostly luxuries. Then we are yearly face to face with enormous imports of material, part of our requirements of which we already produce, or which it would be natural for us to produce. It is obvious that our national finances would benefit if we could either produce the following items ourselves, or avoid in any way their importation; bricks, clays and tiles, over $4,000,000; coal, coke and charcoal, $79,000,000; breadstuffs, $26,000,000; all foodstuffs, $121,000,000—much of this is doubtless absolutely necessary, but surely there is room for a large reduction; iron and steel in all forms, $161,000,000, including machinery $45,000,000; textiles in all forms, $168,000,000; motors, railway cars and other vehicles, $18,000,000. We have repeatedly drawn attention to items of this character in past years but, we fear, without much effect. At present, however, the people of Canada are feeling rather keenly the result of their indifference to their own affairs, and it seems worth while to press these facts once more on their attention.

Imports from U.S.

There is one comforting feature about our trade with the United States. While in 1913 we bought $2.70, last year we bought only about $1.50 of goods for every dollar's worth bought by the United States from Canada. While our purchases have increased in value by 65 per cent., theirs have increased by 180 per cent. Comparing the totals, the imports for 1919 are less by $46,000,000 than in 1918, but as in the item referred to in past years, military stores, there is a decline of $80,000,000 and another decline of $17,000,000 in pork, both due to the cessation of the war, the imports for ordinary purposes are much larger than ever before. The most notable increases are in traction engines, mainly for farming, about $10,000,000, and in raw cotton about $13,000,000.

Reduced Wheat Export.

There are many handsome increases in exports to counterbalance increased imports, but the outstanding feature is the enormous decrease of $295,000,000 in the value of exports of grain, of which $270,000,000 is due to a decrease in exports of wheat. There is a reduction in quantity of 150,000,000 bushels, from 215,000,000 bushels of all grains in 1918, to about 65,000,000 bushels in the year ending March, 1919. In the item, "cartridges—gun, rifle and pistol," which has figured so largely in our exports during the war, there is a decline of $139,098,000. There is also a decline of $12,000,000 in exports of flax seed. Against the decline in imports of pork there is a corresponding one in exports of bacon, but there is an increase of about $28,000,000 in exports of meats and butter. There is an increase of $14,000,000 in the item of ships sold to other countries. In our imports the totals of increases and decreases are not very far apart, but in exports we have the extraordinary condition of increases amounting to $110,000,000 and decreases amounting to $443,000,000. Had we been as fortunate in the quantity of merchandise we had to export in the fiscal year ending March, 1919, as we were in the previous year, our financial position would have been very different.

Field Crops.

The preliminary estimate of the value of our field crops for the year 1919 is $1,452,787,000, as compared with $1,367,909,000 in 1918, the actual figures for which fell slightly short of the estimate. There was a decline in the value of grain crops, but a large increase in fodder crops and potatoes. Except in swine there is a slight increase in the numbers of all live stock on our farms. It is difficult as yet to obtain accurate figures as to the production of our mines for the year just closed. We estimated that of 1918 at $220,000,000, and the actual figures were $211,301,000. For 1919 the best estimate we can obtain is $167,000,000, showing a falling off of nearly $45,000,000, which is almost entirely in metals. Because of the ending of the war we produced only about half the quantity of nickel produced in 1918; about the same quantity of lead and zinc, all at lower prices; less copper, also at lower prices; and less silver, but at higher prices.

Canada's Debt.

The statement of the public debt of the Dominion of Canada at the end of November shows a net total of $1,817,839,000, and we are informed that at the end of the fiscal year, March 31st, it will be $1,950,000,000. The estimated net amount due by Great Britain to the Dominion at the end of November is $181,000,000. There is also due by the governments of four other countries about $20,000,000. These assets are taken into account in stating our net debt. In addition to the debt due by Great Britain to the Government of Canada, there is a debt of $200,000,000 due by Great Britain to the Canadian banks, on which, however, since the close of the year partial payments have been made. The war expenditure of our Government has fallen from a million dollars daily to half a million, but we are still far from normal in this respect. The expenditure for pensions has now reached $3,000,000 monthly.

Canadian Securities.

The sales of Canadian securities for 1919 are much larger than in 1918, and there is an important difference in their distribution.

Security.	Total Sold.	In Canada.	In United States.	In Great Britain.
Government	$781,812,000	$629,662,000	$162,250,000	....
Municipal	27,166,393	18,333,893	8,832,500	....
Railway	35,355,133	5,700,000	24,550,000	$6,105,133
Public Service Corporation	20,950,000	11,100,000	9,850,000	....
Miscellaneous	44,100,202	34,595,202	9,505,000	....
Total 1919	$909,383,728	$699,291,095	$204,987,500	$6,105,133
	100 p.c.	76.89 p.c.	22.54 p.c.	.57 p.c.

There is an increase of about $145,000,000 in the total, but the increase in the amount sold in the United States is over $170,000,000. Had it not been for these sales the difficulties in connection with New York exchange would have been much greater.

The Process of Adjustment.

The difficulties of reconstruction after the great war are even greater than we feared. The whole world is feeling the effect of four years in which the ordinary work and economics of life were not merely neglected, but the basis thereof was almost swept away. We are short of almost every commodity, the strongest evidence of this being the fact that millions of people in Europe face actual starvation. We cannot re-establish the normal supply of commodities except by working harder than usual, and we cannot lessen the terrible strain of high prices without doing the extra work which will put an end to the lack of commodities. We cannot adjust prices without also bringing about a contraction in the volume of paper money and other instruments of credit, and so far as it is possible to enforce contraction without interfering with the production of what is really necessary, the reduction of prices will be facilitated. In a word, bankers should not aid speculation, or assist ventures which do not directly lead to production. We are still building ships with feverish haste throughout the world, and we ought to be spending large sums on railroads in order that commodities may be freely distributed. The present cost of ocean transportation, quite as much as the cost of goods at the primary markets stands like a huge barrier across the pathway of return to normal conditions. What is worse, however, is that even present prices, in the natural order of things, will go on rising until the lack in the world's supply of commodities has been filled, and there has been a large contraction in the volume of paper money now in existence.

Wages and Prices.

In the case of many classes of wage-earners there has been an adjustment of pay against this increased cost of living, but there are many instances in which there has been either no adjustment or one quite inadequate. There are, however, some classes of earners who are so highly paid, in comparison with the past, that they have unusual spending power, and, along with all the others who have profited unduly by the war, they are spending their money in such a manner as to increase still further the troubles of the less well-off. Apart from this, after the gigantic struggle of the war, the world has slackened its energies and is filled with argument and unrest. All these elements move along an ascending spiral which clearly ends in ruin if we cannot arrest their course.

Prices will be higher than before the war for many years to come, but a readjustment to tolerable conditions is absolutely necessary if we are to enjoy the peace bought at such a cost. Governments must cease borrowing and keep their expenditures within their powers of taxation; both individuals and governments must spend less on things not absolutely necessary, and we must all work harder to produce the normal supply of all the commodities useful in life.

Co-operation Essential.

Canada, as I have already said, won its high place in the world's regard by superb co-operation in the one ideal of winning the war. Can we not compromise for the moment the differences between capital and labor, between farmer and manufacturer, between the various interests that are risking our future for the sake of their own particular grievances, and co-operate in another ideal equally great, the restoration of peace and the return of prosperity on a better foundation? With this accomplished the separate ideals of the industrial divisions of our society can be discussed with far more chance of fair adjustment than is possible in these difficult times.

Must Increase Exports.

We know now roughly the cost of the war as represented by our public debt. This debt is held mostly at home but partly abroad. In addition, there were issues of securities made before and during the war by governments, municipalities and private companies, and sold abroad. On the whole of this debt, so held abroad, the annual charge is about $190,000,000 per annum. Of this roughly about $65,000,000 is due to holders of our securities in the United States, and about $125,000,000 to holders in Great Britain and Europe. This debt we can pay only by an excess of exports over imports or by new borrowings. The debt at home is our own domestic affair. Certain citizens have advanced the cost of the war to the nation, and we now have to distribute this cost by taxation over all the citizens of Canada (except those who escape taxation), so as to meet the annual amortization payments. If the annual payments are obtained by reasonably fair taxation, so levied that the taxes do not become a cause of restraining our industries, we shall not fail to win through, but to accomplish this, much study of the subject is necessary.

Taxation.

Many forms of taxation not yet in use in Canada will doubtless be employed, in addition to those now in force, but the whole question should be approached without that class feeling which often causes taxes to be so apportioned that bitterness and a sense of injustice are felt by many who do not object to being heavily taxed so long as those who really can afford to pay their share do not escape. The income tax should be paid by a much larger number of citizens. The tax on surplus profits needs much study; there is all the difference in the world, both in justice and in the interest of the community, between a large aggregate of profit made by a small margin on each transaction and a similar sum made by an unfairly large margin of profit on each transaction. The community may be deeply interested for its own advantage in securing the extension of the first kind of transaction, while no one is interested in the success of the other class except the taxpayer himself. The tax in the end must be borne by our industrial activities, and we are foolish if, in our eagerness to escape our own share, we make such burdens so heavy on others that many of these activities must cease, and commodities that under fair conditions might be produced at home are replaced by imports from abroad.

Little Unemployment.

The usual review of business conditions presented at our annual meetings is of marked interest this year. The unemployment which it was feared a year ago would be widespread, even if only temporary, did not occur except in a few centres of industry. Industrial plants were quickly readjusted to peace time industries and orders for many kinds of commodities poured in beyond the capacity to fill them, not so much, however, beyond the capacity of the plants as beyond that of the men to work them; and, therefore, as we are not satisfying the demand, prices must go on rising. At the same time the demand for housing accommodation and for many other public and private building requirements is greater than the world has ever known before. Surely this all sounds like the prosperity we so often sigh for, and, indeed, to many it is a time of large profits or high wages, but the pendulum can swing only a certain distance in one direction or the other. There is not much satisfaction in a prosperity which can only be sustained by borrowing more money, nor can our comfort be unalloyed if production is insufficient to keep a large part of the world from starvation.

A Review of Events.

When the future historian, however, looks back at the events of the past year, he will not see an irresolute world failing to take steps necessary to recover the road to happiness. He will applaud the efforts of society in Winnipeg, London, Boston and elsewhere, to defend itself against revolution; he will wonder at the activity in the shipyards of the world to supply the lack of transportation; he will see that capital and labor are not farther apart but much nearer to reasonable solution of their difficulties; he will, indeed, from his lengthened perspective, see that the chaos following the war is steadily yielding to that great quality of civilization on which the hope of the world rests—the love of order. We hear much about the decline in the exchange value of the pound sterling and more about Great Britain's loss of ascendency in the world of finance, but if you will read the report of our London manager you will find no trace of doubt, no murmur of complaint. Great Britain has accomplished the most stupendous things in history; the world owes her more in respect and admiration than it can ever pay; but she asks nothing from others—she is simply clear-sighted and aware of her enormous obligations, and of what they involve. No one who reads this statement will find cause for pitying her, she is so strong and self-reliant; on the contrary, there is abundant cause for pride that we are part of the great empire which in the supreme emergency saved the world.

One feature of the British financial situation which adds to our difficulties is the sale here of Canadian securities hitherto held in Great Britain. So long as the sale in Canadian dollars will produce so much more than usual in pounds, this return of our securities will go on, and each sale has the same effect on our international finance as the importation of merchandise of the same value.

Our Neighbor.

The report of our New York Agents is also worthy of careful study. The volume of business transactions in the United States is so large that the effect of legislation or of any new condition in commerce is apt to be seen more clearly and more quickly than in smaller countries. The effect of price-fixing, and of taxes on excess profits, is clearly apparent in a lessening of production. Whatever may be the right way in which to punish the profiteer, these two methods act as boomerangs. In the end it is the consuming public that is punished. In the United States the enormous profits made by supplying the allies have led to a post-war expansion on a vast scale. The formation of new companies exceeds all previous records, and the inflation in stock-exchange prices has made many enormous fortunes, the buying power of which is the same as that of money made in any other manner, but the basis of which, so far as the country as a whole is concerned, may be an idle dream. In marked contrast to this power to sell securities at inflated prices, is the perilous position of United States railroad securities. Because railroads are prevented by what is really price-fixing from securing a freight rate adequate to the cost of administering them and of keeping them in proper repair, the whole transportation system of the United States is not merely imperilled, but is evidently facing ruin if an entirely different policy is not adopted. But at a time when foreign and home trade, and almost every business except that of the railroads, is experiencing an expansion never equalled in the past, it is hard to get a hearing for any complaint.

Newfoundland Prosperous.

The business review of Newfoundland indicates unusual prosperity, larger markets, the building of ships with a view to increase the catch of fish, and better preparation of the product. In the Maritime Provinces there is general prosperity in all that depends on fishing and agriculture, but no increase in the output of coal, a great disappointment at this moment of scarcity. An even more disconcerting fact is that the cost of labor in the steel industry has gone beyond the point where sales can be readily and profitably made, and this must be adjusted before normal conditions are restored.

In Quebec as well as in the cities of the Maritime Provinces, Ontario and elsewhere, the need of greater housing accommodation is painfully apparent. The information regarding shipbuilding is most gratifying, and we hape that what is said regarding road building by both our Quebec and Ontario representatives will be carefully studied, and will have some effect in hastening the progress of the work on this very necessary aid to economical transportation.

The prairie provinces suffered from bad weather and produced only an ordinary harvest. This harvest, however, would have been very gratifying but for the terrible needs of Europe at the moment.

In almost all the reports there are statements of great importance in regard to mining. Our reports from British Columbia and the three Pacific States all exhibit marked prosperity, especially in view of the great variety of their products and markets.

Shipbuilding Program.

In the effort to conquer the difficulties of transport by sea, and for the further purpose of building up foreign trade with new countries, the Government of Canada has entered upon a relatively large program of shipbuilding. Contracts have been let for sixty vessels with a dead-weight tonnage of about 360,000 tons. Of these forty-five were contracted for before the Armistice at slightly under $200 per ton, while fifteen contracted for since the Armistice will cost less than $175 per ton. The total cost of the sixty vessels will be slightly under $70,000,000. To date twenty-three vessels have been completed and nineteen have been turned over to the Canadian National Railways and are in commission. These ships have been built in fourteen different shipyards in the following thirteen places; Halifax and New Glasgow in Nova Scotia; Levis, Three Rivers and Montreal in Quebec; Toronto, Welland, Midland, Collingwood and Port Arthur in Ontario; and Vancouver, Victoria and Prince Rupert in British Columbia. There can be no doubt that in opening up new routes between Canada and the West Indies and South America, where private enterprise could hardly be expected to bear the initial cost of the enterprise, these Government vessels have done excellent service. From the report on business conditions for Quebec it will be seen that considerable shipbuilding for other governments and individuals is also being done in Canada.

In the number of cargoes handled, Montreal has had the largest year in the history of the port. The transatlantic ships arriving in the port this year exceeded 700, against about 400 ten years ago.

Foreign Trade.

In a supplement to our August monthly letter we published some of the information gathered by representatives of the Bank who recently visited Australia, New Zealand, Japan, Korea, Manchuria, and China, in the interest of the foreign trade of Canada. While it is reasonably clear that our exports for some time to come will consist mainly of the products of the field, the forest, the mine and the sea, the great staples of our country, we must hope steadily to increase the export of commodities on which we have spent the maximum of labor rather than those on which we have spent the minimum, that is, manufactured goods rather than raw material. At present there is such an active market at home for the product of our manufacturers, that few Canadian firms seem to be trying to enter foreign markets. In the supplement referred to we tried to demonstrate how varied is the field for articles which we can make, and what have been the main hindrances to success thus far. As our supplement says: "undoubtedly a share of the trade can be secured if our manufacturers will go to the expense of sending a competent representative to study local requirements, select local representatives and co-operate with the latter in the sale of their goods. Immediate results should not be expected, and manufacturers should be prepared to bear at least a share of the cost of advertising for a few years until their goods are well established, and their reliability and durability proven.

Made in Canada.

"We can sell in another country only if the goods are at least equal to those of our competitors in price and quality, and we should aim to have the stamp "Made in Canada" represent absolutely undoubted quality, the best workmanship and the finest materials. It is only by producing a superior article that we can hope to make rapid progress in our foreign trade." Many manufacturers will urge at the moment that, if they cannot get raw material or labor sufficient to enable them to fill home orders, it is idle to talk of foreign trade, and it is hard to answer such a statement. Nevertheless, when the pendulum swings the other way, we shall need the foreign trade and, indeed, in the future we shall not readily be able to meet our indebtedness on securities held abroad unless we can greatly build up our exports. For this reason we feel that the spade work which must in any event be done should be begun now. We should be opening markets for Canadian goods in other countries for the purpose of building up a trade which we shall sadly feel the want of in a few years, if we ignore our present opportunities.

Solve Our Problems.

We have said before that Canada can solve its post-war problems more readily than almost any other country, but this of course means Canada at its best. We shall, I hope, settle our problems of taxation with reasonable fairness and common sense; so improve the relations between labor and capital that the country can do its very best in production; so direct the large immigration which is coming both from Europe and from the United States when transportation becomes less difficult and less costly, that it will greatly increase the numbers both of settlers on the land and of workers in factories; and thus enable our country to bear cheerfully the cost of the war and, better still, make every returned soldier think that such a country was worth fighting for.

The Report was then adopted unanimously. The by-laws of the Bank were amended, the number of Directors being increased. The retiring auditors were re-elected, and the usual vote of thanks to the Directors and Staff was passed. The Meeting then adjourned.

ALBERTA MUNICIPAL FINANCES ADJUSTED

Three Towns' Applications to Finance Commission Are Considered and Satisfactory Agreement Reached

THE finances of some Alberta municipalities were taken up last week by the Alberta Municipal Finance Commission, composed of Chief Justice Harvey, chairman; Justice Hyndman, Justice Beck, H. M. E. Evans, and A. E. Nash, secretary. E. G. Long, J. W. Mitchell and L. E. Winter were present from Toronto, representing the bondholders. The case of Wetaskiwin was considered on January 7th, the Imperial Bank, represented by H. T .Jaffray, being also a creditor of this town. The bank had priority in the matter of tax colections, and the Wetaskiwin officals sought some working arrangement by which both claims could be satisfied, largely by the receipts of tax arrears. The board adjourned to give the three parties opportunity to adjust their points of issue, and an agreement was reached and accepted by all parties, providing that the bank accept the liquidation of its credit in twenty half-yearly payments, the money to accrue from the collection of tax arrears or the foreclosure upon taxed property. The bank will accept this for their claim, without reference to the other taxes of the municipality, provided a requisite amount is obtained. On behalf of the debenture arrears, which include not only those of the city of Wetaskiwin, but those of the school district as well, the municipal authorities submitted terms for future assessment that are satisfactory to the debenture representatives. Increased rates on the water and light services and a reassessment to be made immediately with a view to a commensurate improvement tax are the proposals accepted. A copy of the city estimates of the ensuing year is filed with the commission as an exhibit. The plans as designated will clear the city of its indebtedness in ten years, as well as the increment of interest.

Tofield Adjustment

The case of Tofield was somewhat similar, and a tentative agreement was reached, involving new taxation upon the basis of improvement. This was to be a 50 per cent. assessment of value, and 60 mills on the dollar would be the annual levy until the arrears had been paid. In addition, the municipality agreed to pare its current budget to $3,500, thus reducing expenditures to the minimum until the claims of the debenture holders had been satisfied. This agreement, if satisfactory to the commission, will go into effect immediately.

Athabasca was in a more difficult position. The importance of the town as a distributing centre for the entire north was destroyed by the extension of one railway to the Peace River and the building of another to the far north. Property holders on the assessment rolls of the district number some 3,900, the property holders of the town are over 900, and exactly 38 residents of the town are liable for their taxable property. There is $320,000 in tax arrears, and a debenture indebtedness in full of $220,000. At the present time, however, the arrears on much of the land is considerably higher than the actual value of the land, and the tendency of many of the holders has been to distribute their holdings in some manner to avoid taxation. Only 4 per cent. of the tax-payers are now resident in the Athabasca district.

The Athabasca delegation consisted of Mayor F. R Falconer, City Treasurer J. T. Evans, and J. H. Taylor, representing the School Board, who are not petitioning the commission at present. Mr. Evans presented the case for the municipality in a well-reasoned appeal, pointing out the efforts that had been made to collect the arrears, and because of the wide distribution of the non-resident, the failure to achieve much in this respect. He showed that the larger taxpayers were relinquishing their property rather than be liable for excessive arrears, and pleaded for sufficient time to alow the municipality to get on its feet again. Any increased taxes, in his opinion, would merely be the signal for the final exit of those who still retained their property, and he asked that the municipality be allowed to carry on with the proceeds of their revenue, supplying their budget needs. It was pointed out by the debenture interests that the yearly indebtedness of the municipality was $33,000, and that their total possible revenue was $14,000. H. M. E. Evans, of the commission, suggested a radical reduction of municipal expenditure along the lines accepted by Tofield, an excision from the municipality of the outlying non-producing subdivisions as the first steps towards a settlement.

MONTREAL FIRE PREVENTION BUREAU

The following summary of the work performed during 1919 by the Bureau of Fire Prevention of Montreal was reported a few days ago to the head of the Fire Department, Chief J. Chevalier, by Chief Inspector Jean Naud: There were 103,673 visits made by the fire inspectors, to commercial and industrial, as well as to public buildings, including hospitals, churches, theatres, etc. Reported cases of violating fire prevention by-laws totalled 5,231; out of these 4,893 were remedied after notice, and 74 lawsuits recommended. The fines imposed amounted to $547. The violations most commonly reported were the careless handling of ashes in paper and wooden boxes, or barrels; accumulation of waste paper, excelsior, etc., and unprotected stoves and furnaces. Ashes, the chief states, should invariably be kept in metal containers. The fire inspectors have strict orders to enforce this practice.

THE ROYAL BANK OF CANADA

Annual Meeting Marks Close of Jubilee Year

SIR HERBERT HOLT, PRESIDENT, PAYS TRIBUTE TO THE EARLY ADMINISTRATORS WHO LAID SO SOLIDLY AND BROADLY THE FOUNDATION UPON WHICH THE BANK HAS BEEN BUILT.

Edson L. Pease, the Vice-President and Managing Director, Pointed Out the Service to the Country and Advantage to the Bank of the Branches in Foreign Fields.

C. E. Neill, the General Manager, in Reviewing Report, Stated That the Bank Had Enjoyed the Greatest Growth of Any Year Since Its Incorporation. Commends Staff of Bank.

The Annual General Meeting of the Shareholders was held at the Head Office of the Bank in Montreal, Sir Herbert S. Holt in the chair.

THE GENERAL MANAGER

The General Manager, Mr. C. E. Neill, then referred to the Annual Statement, as follows:—

The figures of the Balance Sheet submitted to you to-day record the greatest growth of any year since the bank was incorporated.

The total assets are $533,647,084.93, an increase of over $106,000,000 over the previous year, and it is of interest to know that no portion of this increase is due to the absorption of banks, as has been the case in some previous years.

Our deposits are $419,121,399.37, the growth for the year being approximately $87,000,000.

During the month of November there were large withdrawals from the Savings Department for investment in the last Dominion Government loan, but a substantial portion of this amount remained temporarily over the end of our year at the credit of the Government.

Our circulation is slightly higher than last year.

Current loans have increased $50,109,910.69, but it is satisfactory to note that the percentage to total assets is only 43.75 per cent.

The liquid position of the bank has been well maintained, the percentage of liquid assets to liabilities to the public being 55.03 per cent.

Further investments in Dominion and Provincial Government securities to the extent of nearly $9,000,000 have been made during the year.

The capital of the bank has been increased $3,000,000 since our last Annual Statement, through the sale of 20,000 new shares at $150 per share to our shareholders, and 10,000 shares at $200 per share to the London County, Westminster and Parr's Bank.

The Reserve Fund now stands at $17,000,000, as compared with $15,000,000 last year.

Our additional resources have enabled us to show a substantial increase in earnings. Net profits for the year were $3,423,264.34, being 10.81 per cent. on the average combined capital and reserve, as compared with $2,809,846.24, being 10.19 per cent. on capital and reserve the previous year.

The regular dividends of 12 per cent., with an additional bonus of 2 per cent., were paid during the year, and a balance of $1,096,418.74 is carried forward in Profit and Loss Account.

PRESIDENT'S ADDRESS

In moving the adoption of the Directors' Report, Sir Herbert S. Holt, President, said:—

The statement presented is the most satisfactory in our history and fittingly marks our Jubilee. In the fifty years since our incorporation we have grown from a local bank to an international institution with a steadily rising place among the great banks of the world. Our paid-up capital has increased from $300,000 to $17,000,000, our reserves from $20,000 to $18,000,000, and our assets from less than a million to over half a billion dollars.

Most of this phenomenal progress has been made in recent years, but tribute is due to the prudence and wide vision of those early administrators who laid so solidly and broadly the foundation upon which we have built. In all periods of grave depression we have never failed to pay a dividend and only once, and that 34 years ago, have we drawn on our reserve. Throughout our career advantage has been taken of every favourable opportunity both at home and abroad to extend our operations and to add to our resources. This expansion has proved beneficial, not only to the bank, but to the Dominion. In 1870 our profits were 4 per cent. on our working resources. Now, owing to the volume of business, we are affording increased facilities on a return of less than one per cent. on total assets.

CANADA MET EMERGENCY

During the year just passed Canada has again proved her ability to meet every emergency as it arises. Our soldiers have been absorbed into civil life without strain, our industries have been re-adjusted with little unemployment, and the unfailing response of our people to every patriotic call has been shown by the immense over-subscription to the last Victory Loan. Despite an unfavorable harvest in some parts of the West, the country is prosperous and the balance of trade continues largely in our favor.

Factors which have contributed to the prevailing high prices are being gradually eliminated. Ocean transportation service will soon far exceed that of the pre-war period and stores which have accumulated in distant lands will, as a result, become readily available. Industrial plants have multiplied and everywhere an army of women workers has been added to the ranks of labor. Moreover, Europe can only ultimately pay its huge debts by a corresponding output of goods. We shall then enter upon an era of greater supplies and keen competition. If prices fall in the future, as seems probable, each dollar made and saved to-day will then have greater purchasing power. We should therefore strive to produce to the limit of our capacity while markets are high, and exercise the most rigid economy in order that our gains may be conserved.

The Government is still discharging some of the heavy obligations arising out of the war and the net public debt now fast approaches two billion dollars. There are only two ways of meeting this responsibility—greater industry and less extravagance—prosperity is not unending or national borrowing power unlimited. It is an unvarying economic law of which we in Canada had a bitter experience following the Civil War; that all conflicts terminate in a period of prosperity and inflation during reconstruction which is succeeded by equal or greater depression. For this inevitable re-action in the future we should now be prepared, and it is the duty of the Government to set an example to the nation by abstaining from all unnecessary or wasteful expenditure. It cannot be too strongly urged or too often repeated that the greatest possible effort must be put forth in every direction if we are to meet the amount required for interest and the redemption of debt. It has been aptly said that Governments have no income outside that of the people, and that the wealth of a country, like that of an individual, can only be built up by spending less than is earned.

DOMINION HOLDS COMMANDING POSITION

In the difficult times ahead, the Dominion holds a commanding position owing to the abundance of its natural resources which need only the touch of energy and capital. The market for pulp and paper continues to expand, the demand for gold and silver adds to the value of our mines, and the soaring prices of coal will hasten the development of water powers. Above all, the expected influx of settlers to the West will further agricultural production, our main source of wealth, and extend our market for home manufactures.

Industrially our position is much less favorable. Capital, which is everywhere in demand, is not likely to be attracted to new enterprises, with their attendant risks, so long as it is called upon to bear all the loss in case of failure, and to share its profits with the Government in the event of success. The labor unrest, now almost universal, also acts as a brake upon industrial activity. No employer can profit from dissatisfied labor, and no employee from unreasonable demands.

Europe still affords by far the largest market for our exports, and we have greatly extended our overseas facilities by entering into a close working arrangement with one of England's foremost institutions, The London County Westminster & Parr's Bank, Limited, whereby each will act as agent for the other in those countries where one is established and the other is not. This association has been strengthened by the British bank's purchase, through our shareholders, of 10,000 new shares of stock issued at $200 per share on the 16th of April last. The 20,000 shares issued earlier in the year at $150 per share, as announced at our last meeting, were eagerly subscribed by our shareholders. These two new issues increased our paid-up capital by $3,000,000 and enabled us to add $2,000,000 to our reserve.

With continued prosperity in Canada and those countries to the south in which we have branches, our business has greatly expanded. A proportionate increase in earnings enabled us not only to declare our usual dividend of 12 per cent., but to announce a Fiftieth Anniversary Bonus of 2 per cent. on our stock. We realize that our success has been due in no small measure to the efforts of an efficient and loyal staff, keenly interested in our progress, and it is with pleasure that we have supplemented the sum granted in midsummer by a Jubilee bonus of 20 per cent. on the salaries of all employees. Between the executive and the staff there is a feeling of mutual confidence and reliancce. There is no position in our service to which the ambitious may not aspire, and the extension of our branches abroad opens still wider the door of opportunity.

THE VICE-PRESIDENT

In seconding the motion for the adoption of the Directors' Report, Mr. E. L. Pease, Vice-President and Managing Director, said:—

It is again our good fortune to lay before you a balance sheet which I feel confident you will consider highly satisfactory.

Trade conditions throughout the Dominion continue very prosperous.

The Western wheat crop was a disappointment, the yield being 167,000,000 bushels only. The value of the crop, however, between $400,000,000 and $425,000,000, was a record one on account of the high prices prevailing. By order of the Canadian Wheat Board the price of wheat was fixed at ths beginning of the season at $2.30 per bushel, and on December 27th last was advanced to $2.80 per bushel, as against $2.25 for the 1918 crop.

The large increase in the bank clearings indicates a material expansion in trade. The growth in deposits is remarkable, considering the heavy withdrawals from the banks in connection with the November, 1918, Victory Loan, and the first instalment of the 1919 Victory Loan. Of the latter loan, which amounted to $658,000,000, no less than 63 per cent. has already been paid.

The increase in commercial loans indicates no curtailment in this class. In fact there is keen competition for commercial accounts. The percentage of commercial loans to total deposits on November 30, 1919, was 53.85, as compared with 73.53 in November, 1914.

Munitions figured in the exports of 1919 to the extent of $44,000,000, while they amounted to $274,000,000 in 1918. The decrease, therefore, in exports of $49,000,000 last year is much smaller than was anticipated.

Of the total imports, $920,000,000, no less than $726,000,000 came from the United States, the principal items being iron and steel products, coal, cotton and sugar. We estimate the luxuries and dispensable articles at $88,000,000.

EXCHANGE SITUATION

The problem of exchange grows in perplexity. The prevailing rates give additional value to almost all our exports, but our immense imports from the United States are penalized. The return to parity may be a long and difficult process, depending in great measure upon European conditions, and the course of American action. The only effective means of checking the advancing rate upon remittances to the United States is to reduce to the lowest possible limit our imports from that country, remembering that the purchase of articles of luxury, or goods that can be manufactured in Canada, by increasing the adverse balance of trade, adds to the premium which we pay on iron, steel, coal, cotton, and other raw materials which are absolutely necessary for the maintenance of some of our industries. There are indications, however, that the present unfavorable position may be somewhat improved in the near future. The British Government has given notice of its intention to make a substantial payment on account of the indebtedness to the banks, and it is expected that within the next four months Canada will export to the United States a large amount of flour.

The President has referred to the prejudicial effect upon industry of the Excess Profits Tax, and I wish to emphasize his remarks. To keep production from falling off and to increase it, thus furnishing full employment for labor, is more essential now than ever. There is no encouragement to enlarge old industries and establish new ones when profits, if made, are to be specially taxed by the Government. The Secretary of the Treasury, in reporting upon the effect of a similar impost in the United States, says that "in many instances it acts as a consumption tax, is added to the cost of production upon which profits are figured in determining prices, and has been and will, so long as it is maintained upon the statute books, continue to be a material factor in the increased cost of living."

The year just concluded has given additional proof of the service to the country and advantage to the bank of our branches in foreign fields.

Prosperity throughout the West Indies and Central and South America is reflected in the growth of our deposits, which continue largely to exceed our commercial loans, the excess on November 29th last being $26,000,000. At a time when the Dominion can sell to the greater part of Europe only on long-term credit, with uncertain prospects of repayment in the case of some countries, the development of markets in these tropical countries, which have so greatly increased their purchasing power is of the utmost importance. We have therefore decided to extend our operations in this direction, and in addition to branches opened during the past year at Rio de Janeiro, Brazil, Buenos Aires in the Argentine, and Montevideo, Uruguay, we shall shortly be established at Sao Paulo and Santos in Brazil, and Bogota and Barranquilla, Colombia.

DEVELOPING FOREIGN TRADE

In order to cultivate our rich business possibilities in these foreign lands and to promote reciprocal trade with Canada, we are issuing pamphlets describing their economic resources and import needs, and a Monthly Letter will be circulated reviewing general trade conditions and opportunities. Our new Department of Commercial Intelligence will further provide enquirers with any special information desired, and its scope will be limited only by the demand for its service. Through this bureau, and the financial facilities offered by the bank, we hope to stimulate the interchange of commodities between these countries of vast potential resources and the Dominion, and enable each to share in the upbuilding and prosperity of the other.

We are also co-operating in the movement in favor of closer commercial relations between the Dominion and the British possessions on this continent. These colonies form one of our natural markets, selling the things we need and buying the staples we have for export. The lowering or removal of customs barriers, and the inauguration of direct steamship communication, would result in greatly increased trade and lead to the speedy development of the agricultural, forest and mineral wealth of these colonies.

The marked feature of British banking during 1919 has been the continuance of amalgamations. At the end of 1918 there were only 34 banking institutions in England, or about one to every 1,300,000 inhabitants, as compared with 19 in Canada, or one to every 450,000. In other words, if we were on a parity with England, we should have only seven parent banks in the Dominion. The British Government realizes that we have entered upon an era of great industrial combinations and that these can only be safely financed by like consolidations of banking interests. The United States Government, which has hitherto opposed all mergers, has awakened to the needs of the times. In addition to the creation of the Federal Reserve system, it is now encouraging its great banks to establish branches abroad and, through its State Department, Consuls, Trade oCmmissioners, and official publications, is affording them every assistance in its power.

In view of the unsettled conditions throughout Russia, and the withdrawal from the country of Canadian and British troops, we have closed our office at Vladivostok. This branch was opened to provide banking facilities for our merchants, and support the work of the Commission sent to promote Canadian export trade.

SUCCESS OF FOREIGN BRANCHES

The success following our establishment in Paris has exceeded all expectations. Through our connections, particularly in the West Indies and South America, business has been directed to the French branch in such volume that our present accommodation is already overtaxed. The position of our Spanish branch at Barcelona, fed from the same sources, is also most gratifying.

Our new branch at Rio de Janeiro was opened on October 1st last, and at Buenos Aires on December 1st. We were fortunate in securing very attractive premises in both cities in the business centre under long leases. We have efficient staffs in charge and business is developing to our satisfaction.

Our Jubilee Year marks also the twentieth anniversary of the bank's entry into Cuba. This event has been commemorated in the island by the opening of our new premises in Havana, a handsome seven-story structure. The first floor, 100 feet frontage by 150 feet in depth, is occupied by the bank, while the remainder of the building affords spacious office accommodation for the public, all of which is occupied. It gave me great pleasure to attend the inaugural ceremonies which occurred last month. Business in Cuba is very prosperous. Sugar prices are high, and the new crop promises to be one of the largest in its history.

The rapid increase of business at our New York Agency, due in large measure to the business generated by our branches, made it desirable to secure to our use for all time the premises occupied by the bank in William Street. We have, therefore, purchased the building and already four of its floors are required for our needs.

This being our Jubilee, the bank has prepared a brief history of the efforts made during the past fifty years to build up a sound and progressive institution, and to promote the commercial interests of the Dominion. A copy will be forwarded to each of the shareholders at an early date.

In entering upon our second half century, we are confronted with many problems, which we are confident can be successfully met. We have a notable record behind us, and I believe a still greater one lies before us.

THE STAFF.

A vote of thanks was passed to the President, Vice-President and Directors; also to the General Manager and staff. In replying to the latter, Mr. C. E. Neill, General Manager, said:—

On behalf of the officers of the Bank I thank you for this kind expression of appreciation. I have already spoken of the ability and loyalty of our staff, which cannot be too highly commended, and to which I attribute much of our success. The increased number of our branches, with the consequent expansion of business, has meant harder work and more responsibility for our officers, but all have cheerfully undertaken extra duties in the emergency.

We have fulfilled our promise to take back into the service all our men who have returned from overseas, and have, as far as possible, arranged the staff so that no returned man should suffer, either in the matter of position or salary, through having responded to the call of his country.

As for those who have not returned, we are having prepared for the Bank's records a history of the achievements of each of our men who gave his life in the great conflict, and our Directors have authorized an expenditure to provide a bronze memorial tablet to be placed in our branch in the home town of each of these heroes. We desire to do everything possible to keep green the memory of their brave deeds and glorious death.

At a subsequent meeting of the Directors, Sir Herbert S. Holt was unanimously re-elected President, and Mr. E. L. Pease, Vice-President and Managing Director.

BANK OF COMMERCE ANNUAL MEETING.

The importance of Canadians of all sorts and conditions bending their energies to the development of the industrial resources of the country with that same superb spirit of co-operation that they exercised in winning the war, was emphasized by Sir Edmund Walker, president of the Canadian Bank of Commerce, at the annual meeting held in Toronto on January 13. "We may," he said, "lose all that victory seemed to secure by indulgence in countless theories, many of them aiming at the disintegration of society, instead of co-operating in one ideal—the restoration of order and the improvement of social conditions, so that the happiness of the greatest number may be secured. . . . Too much argument between capital and labor, just now, is madness in view of what we seek to save."

Sir Edmund declared that "the rising curve of prices cannot be made to turn downward without an increase of production, nor can we face the heavy obligations left by the war except by greatly increasing production." That the obligations of the country are very great there can be no doubt. Our public debt, which was slightly less than $336,000,000 in 1914, will, he showed, be $1,950,000,000 by the close of the present fiscal year, while the annual interest charges on money borrowed abroad now amounts to $190,000,000, of which $125,000,000 is payable in the United Kingdom and $65,000,000 in the United States. This debt, he pointed out, can only be paid by an excess of exports over imports or by new borrowings. The latter, being tantamount to cutting a slice from the top of the blanket for the purpose of making an addition to the bottom, Sir Edmund did not, of course, advocate. But what he did advocate was the consumption of Canadian-made goods to the greatest possible extent in order that the import trade may be curtailed and the level of the favorable balance of exports over the latter maintained at the highest possible ratio.

Although Sir John Aird, the general manager, naturally devoted a considerable part of his address to matters relating to the bank, he also dwelt on financial and economic subjects in which Canadians are in these days particularly interested. To the unsettlement of the relations between employer and employee he ascribed in part "the extraordinary increase in the cost of living." At the same time, however, he recognized that the deeper and more complex part of the prevailing difficulties "had their origin in that phase of the war, when it took on the aspect of a life and death struggle between the opposing forces. For a time everything had to be subordinated to the turning out of men, munitions and material for use in the war. The government became practically almost the sole employer, the erstwhile employer acting as its manager or agent to secure the necessary production. Under these conditions the usual balance-weights and counterpoises of business enterprise were lacking. To secure the necessary production was the only thing that mattered; the cost of doing so was a secondary consideration, and any demands made by employees were granted almost before they were asked."

POST OFFICE SAVINGS BANKS

During September, 1919, withdrawals from the Post Office Savings Bank exceeded deposits by over $1,000,00. The balance at the credit of depositors at the end of the month was $37,315,508 as compared with $38,388,667 at the end of the previous month. The statement is as follows:—

NOTABLE FURTHER PROGRESS OF THE UNION BANK OF CANADA SHOWN AT ANNUAL MEETING

The fifty-fifth Annual General Meeting of the shareholders of the Union Bank of Canada was held at the Head Office, in Winnipeg, on Wednesday, January 7th, 1920.

The Chairman read the Annual Report of the Directors. as follows:—

The Directors have pleasure in presenting their report, showing the result of the business of the Bank for the year ended November 30th, 1919.

During the year 89 branches and agencies were opened as follows:—

In the Province of Prince Edward Island, 1—Charlottetown.

In the Province of Nova Scotia, 3—Berwick, Kentville and Truro.

In the Province of New Brunswick, 2—Moncton and Sussex.

In the Province of Quebec, 1—Kenogami.

In the Province of Ontario, 13—Blenheim, Burritt's Rapids, Caledon, Campbellford, Charlton, Easton's Corners, Indian River, Ridgetown, Rodney, Toledo, Toronto (Woodbine and Gerrard), Warsaw and Woodlawn.

In the Province of Manitoba, 28—Altamont, Angusville, Clanwilliam, Clearwater, Deepdale, Dropmore, Elm Creek, Elphinstone, Graysville, Homewood, Lowe Farm, Margaret, Morris, McAuley, Oakburn, Rosebank, Roseisle, Sandy Lake, Sanford, Solsgirth, Sperling, Winkler, Winnipeg (Corydon and Lilac), (Ellice Ave., Main and Lansdowne, Main and Mountain, Union Stock Yards and West Kildonan).

In the Province of Saskatchewan, 22—Alida, Carruthers, Coleville, Dewar Lake, Drake, Eaton, Govan, Guernsey, Jansen, Keystown, Kyleville, Limerick, La Porte, Major, Mantario, McNutt, Netherville, Palmer, Ruthilda, Salvador, Stewart, Strongfield.

In the Province of Alberta, 17—Acadia Valley, Alcomdale, Bentley, Black Diamond, Hillhurst, Calgary, Chauvin, Clive, Duchess, Leduc, Loyalist, Lundbreck, North Edmonton, Rimbey, Sedalia, Sexsmith, Sunnynook and Waterhole.

In the Province of British Columbia, 2—Vancouver (City Heights), and Ducks.

The number of branches and agencies in operation on November 30th, 1919, was 388.

The usual inspection of all branches and agencies has been made.

During the year Advisory Committees were appointed at Vancouver, B.C., and Montreal, Que., and London, Eng.

JOHN GALT, President.

Report of the Auditors to the Shareholders of the Union Bank of Canada:

In accordance with the provisions of sub-sections 19 and 20 of Section 56 of the Bank Act, we report to the Sbareholders as follows:—

We have audited the above Balance Sheet with the books and vouchers at Head Office and with certified returns from the Branches.

We have obtained all the information and explanations that we have required, and are of the opinion that the transactions of the Bank which have come under our notice have been within the powers of the Bank.

In addition to our verification at the 29th November, we have during the year checked the cash and verified the securities representing the investments of the Bank at its securities representing the investments of the Bank at its agreement with the entries in the books of the Bank relating thereto.

In our opinion the Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the affairs of the Bank, according to the best of our information and the explanations given to us, and as shown by the books of the Bank.

T. HARRY WEBB, E. S. READ,

H. B. SHAW, General Manager.

Bank's Position in Canada and Abroad

THE PRESIDENT'S ADDRESS.

Gentlemen: More than twelve months have passed since the Great War ended, and each month we have been more forcibly reminded of the heavy blows which have shaken the very foundation of our economic and social structure. Increasing disturbances in portions of Europe and Asia indicate that a genuine and abiding peace is not yet in sight. We should earnestly pray that the men into whose hands is entrusted the safety of the nations may be given the necessary patience, courage and wisdom to complete their stupendous task.

We who live in Canada have much cause for thankfulness. It is true that our national debt has increased during the past year by a very large amount, but our country is a vast storehouse of natural resources, and there is no doubt about our ability to meet our obligations. A determined effort should be made at once to develop these resources and do our full share towards supplying the world with our products, most of which are so urgently needed. Our Government has already shown its willingness to assist exporters in finding markets for their goods, and they will doubtless be willing to extend further assistance in this direction.

It is to be hoped that the Department of Immigration will actively engage in a campaign to secure a large number of a desirable class of immigrants. These are needed immediately if Canada is to supply her share of the world's requirements.

The world has suffered from an epidemic of strikes, and we in Canada have not been free in this respect. I am glad to say that in our country there is now in evidence a desire for better understanding between Capital and Labor. It is incumbent upon each one of us to furnish this desire and thus assist in bringing about industrial peace.

This is the fifty-fifth Annual Meeting of our Bank, and I am glad to submit a report which shows substantial progress.

New Stock Issue.

Realizing that our responsibilities to the public were rapidly increasing, your Directors last February decided to offer the shareholders the three million dollars of new stock which they were empowered to issue. A considerable amount was subscribed for in England, where we now have a very representative group of shareholders, from whom we may confidently expect active support.

Your General Manager and I recently visited London, where we have an admirable Advisory Committee, under the Chairmanship of Mr. Austin Harris, of Lloyds' Bank, the other members being Sir Keith Price, Mr. Blair, Mr. Small and Mr. Ashe. These gentlemen are devoting close attention to the affairs of the Bank, and under their prudent and able advice we are developing a satisfactory and profitable business.

Our New York office is proving an important factor in the business of the Bank, and the transactions originating in Canada, Great Britain and the United States, which pass through that channel, show a gratifying increase. The work of our Advisory Committee there is highly appreciated by us. Through all these troubled times we have felt no anxiety, as we knew our interests were safe in their hands.

Canada's Foreign Trade.

As was foreshadowed in our remarks last year, working in close co-operation with the National Park Bank of New York, we have opened up banking facilities for Canada's trade with foreign nations.

Agencies have been opened in France, Japan and China, as well as on the Pacific Coast of America, which should bring much business to this Bank and prove very helpful to the merchants and manufacturers of the Dominion.

We have kept our finances in such shape that we have been able to supply every legitimate demand from our customers, and our relations with them are most cordial.

Our business in Eastern Canada has become so important that we think it advisable that the Chairman of our Toronto Board should enjoy the distinction of being a Vice-President. We have great pleaslre in congratulating Mr. Stephen Haas upon his appointment to that position.

In British Columbia.

A committee of your Directors, with the General Manager, visited Vancouver last spring for the purpose of investigating conditions in the Province of British Columbia. We were greatly impressed with its natural resources and future possibilities. Our interests are steadily growing in this Province, and they are becoming so important that we feel they should be guided by men thoroughly conversant with conditions on the Pacific Coast. We have been most fortunate in obtaining the consent of Mr. George Kidd, General Manager of the British Columbia Electric Company, and Mr. Blake Wilson, General Manager of the P. Burns Company, Limited, to act on an Advisory Committee with Mr. Malkin, our British Columbia Director, as Chairman. We believe their experience and ability will prove of inestimable value in furthering the interests not only of this Bank, but of the Province of British Columbia.

We have strengthened our position in Montreal by appointing Mr. J. B. Waddell to our Advisory Committee there, under the Chairmanship of Major-General Sir John W. Carson. Mr. Waddell was for many years the Manager of our Montreal Branch, and recently resigned to take another important position. We are very pleased that he remains in close touch with the Bank, and that we shall retain the benefit of his experience and advice.

Farming Conditions.

We pointed out last year that the soil was in a very dry condition, and that a satisfactory crop in Western Canada could not be expected this year unless there was an abundant rainfall in the spring. Unfortunately there was very little moisture—in some districts there was none—with the result that the crop returns were not at all uniform. Owing to large yields in some districts and to high prices the value of the 1919 crop will exceed that of last year. Relief and extensions of credit will be necessary in some areas, but the Governments and the Banks are giving sympathetic consideration to all such cases.

We are justified in believing next year's crop will be sown under favorable conditions, as there is an abundance of moisture in the ground, due to the splendid rains which took place in the fall.

Cattle.

Scarcity of pasturage and hay, together with unfavorable weather conditions, has caused a heavy decline in prices and forced many farmers and ranchers to dispose of their stock in an unfinished condition. The early advent of winter caused anxiety to live stock owners, but, I am glad to say, as a result of milder weather, conditions have somewhat improved, and effective measures have been taken to prevent further losses by shipping feed into the needy districts. The efforts of the Provincial Governments to assist the ranchers and farmers in holding their stock can be warmly commended, and the Banks are co-operating in every possible way.

The detailed reports of our Provincial Superintendents from each Province are most interesting, and will be printed in our Annual Report.

Trade conditions in Canada are good. We are getting high prices for our products, and the demand for our wheat, lumber and pulp, etc., is greater than we can supply.

It is a time when we should put forth every effort to increase production, and build up reserves against the lean years that are sure to come.

The war is not yet paid for. Part of the price will be hard times, though they may not yet be in sight, and if we are wise we will be prepared for them.

I regret extremely that my warm friend, Mr. Riley, has asked me to announce that he desires to retire from his position as Vice-President and Director. Mr. Riley has served with the Bank for fourteen years, and has seen our resources grow from $28,000,000 to $175,000,000. He will tell you with what pride he reflects upon this wonderful development, and you all know the share he has taken in obtaining it.

Mr. Riley does not intend to resign at once, and I shall ask you to re-elect him to-day, but he feels that the time is drawing near when his own affairs will fully occupy him. He has kindly consented to continue to act until such time as we are able to replace him.

I cannot close my remarks without making special reference to the splendid work that is being done by the officers of the Bank. The spirit of loyalty which animates the whole staff is apparent to all. The results of their work are shown in the figures that are in your hands.

You are indeed fortunate in having a General Manager who has proved that he can produce results eminently satisfactory to the shareholders, and also build up an army of able and enthusiastic workers, who know that their efforts will be duly appreciated, and that their zeal will not be overlooked.

Bank's Notable Progress in Year

GENERAL MANAGER'S ADDRESS

Mr. Chairman and Gentlemen,—

It gives me pleasure to present to you a satisfactory report of the Bank's operations during the past year.

I reminded you a year ago that the period of readjustment upon which we were entering would, necessarily, create financial and economic problems, which must demand the serious consideration of every banker. This forecast has proved correct and we have been confronted by many complex questions. I am happy to say that we have been able to cope with them successfully and the Balance Sheet submitted to you reveals the Bank in the strongest position it has ever held.

The President has dealt with general conditions, and I will, therefore, only touch upon important changes in our Balance Sheet.

Capital Account.

Our increased activities warranted the Directors in authorizing the issue of the balance of our unsubscribed stock amounting to $3,000,000. This issue was made during the year, and you will be gratified to know that the amount was fully subscribed, with the result that our Paid-up Capital now stands at $7,979,840.

The balance between this amount and $8,000,000 represents unpaid subscriptions not yet due. These subscriptions mature within the next two months and our capital will then stand at $8,000,000 paid up. It is pleasing to note in this connection that we have added 1,425 new shareholders to our list, bringing the total up to 3,925.

Rest Account.

An addition of $2,000,000 has been made to the Bank's Rest Account during the year, of which sum $1,781,170 represents premium on new stock and $218,830 a transfer from Profit and Loss.

This addition to the Rest Account brings the total up to $6,600,000 or 70.28 per cent. of the capital.

Profit and Loss Account.

Net profits of $932,256.80, after deducting the usual expenses and provisions, show an increase over the previous year of $108,082.24. These net earnings are 9.70 per cent. on our Capital and Reserve and in this connection I would like to point out that our Net Profits do not reflect the earning power of our increased capital, as it was only available for a very short period.

Circulation.

The notes of the Bank in circulation compared with the figures of the previous year show an increase of $374,170 or 3.08 per cent.

Deposits.

The total Deposits of the Bank are this year $135,496,514.33, showing an increase over the previous year of $8,253,816, or 6.49 per cent.

You will note from the Statement that our interest-bearing Deposits show a very satisfactory increase of $15,939,219.32, or 23.29 per cent. while non-interest-bearing Deposits show a decrease of $7,685,403.32, being 13.07 per cent. I may say the decrease in the latter account was not unexpected as some of our customers were carrying large special balances at the close of 1918.

Total subscriptions to the Victory Loan of 1919, which passed through our Branches, amounted to the sum of $28,500,000, a great proportion of which has been withdrawn from our Deposits.

Cash Reserves.

Our holdings of gold and silver coin and Dominion notes amount to $14,678,725.93, being 9.11 per cent. of our liabilities to the public.

Quick Assets.

The percentage of Quick Assets to Total Liabilities to the public is 47.23 per cent. as compared with 50.14 per cent. last year.

Notes and Cheques of Other Banks.

The total this year is $9,085,682.41 compared with $4,581,185.16 last year.

Balances Due by Banks and Other Correspondents Elsewhere Than in Canada.

These amount to $3,569,800.66 and show an increase of $636,443.94 over the figures of the previous year.

Dominion and Provincial Government Securities.

The figures this year are $13,048,913.69 compared with $12,527,937.82 last year, or an increase of 4.15 per cent.

Canadian Municipal and British and Foreign Securities.

This year these total $15,818,016.79 compared with $15,720,338.76 last year, approximately the same.

Call and Short Loans in Canada.

The figures this year are $3,439,410.79 compared with $6,508,728.64 last year, a decrease of $3,069,317.85.

This decrease does not mean a curtailment of our loans to Brokers in Canada, but is the result of the repayment of a special loan during the year.

Call and Short Loans Elsewhere Than in Canada.

The figures this year are $7,956,854.74 compared with $3,389,150 last year, an increase of $4,567,704.74, or 134.77 per cent.

This increase is due entirely to the growing business of our London, England, and New York Agencies, and must not be taken as indicating a transfer of money from Canada.

Current Loans in Canada.

The total this year is $86,529,156.17 compared with $74,021,028.40 last year, an increase of $12,508,127.77 or 16.89 per cent.

This substantial sum will indicate to you that we are doing our part in meeting the increased demand for loans from the Canadian public. Our grain loans are included in these totals.

Liabilities of Customers Under Letters of Credit.

Amount this year to $7,186,940.91 compared with $2,706,467.06, an increase of $4,480,473.85.

This increase, like that in our Call and Short Loans Elsewhere than in Canada, is due to our Branches in London and New York.

Railway and Other Bonds, Debentures and Stocks.

These show a small decrease this year of $100,915.59.

Central Gold Reserves.

The figures this year show a reduction of $2,300,000 over the figures of the previous year, or 29.48 per cent.

This withdrawal from the Central Gold Reserves was made possible by our increased capital, which automatically increased the Bank's circulating powers by an equivalent amount.

Bank Premises.

The figures in this account show a reduction of $704,866.09, and now stand at $532,740.61. The decrease is due to the fact that we transferred a number of our smaller buildings to the Canadian Realty Corporation, whose bonds were disposed of at a satisfactory figure during the year.

Total Assets.

The total assets of the Bank now amount to $174,989,057.47, being an increase of $21,807,605.95, or 14.20 per cent. over last year.

A General Survey.

My recent trip to England and the continent was taken primarily to complete arrangements for the extension of our foreign business in connection with the Park-Union Foreign Banking Corporation. The arrangements concluded were, I believe, satisfactory, and we feel that conversations entered into will ultimately prove profitable to this Bank as well as to the Park Union.

Though conditions in Europe are in an unsettled state, it affords me satisfaction to advise you that the Bank's business at both our London and New York Agencies shows a steady and healthy growth. I can assure you that our interests are in very capable hands at both places.

Inflation of the various currencies has caused exchange to become a most important question at the moment. An erroneous idea prevails in some quarters that the Banks are responsible for and making large profits out of the present situation. This is altogether incorrect. The banks derive no extra profits as the result of heavy fluctuations in the exchanges. We shall indeed welcome a return to normal conditions.

Any effort to restore rates by artificial methods should be discouraged.

The vast debts of the war cannot be liquidated without the application of scientific methods, and it seems inevitable that readjustment must be made through a proper funding of the debts. No permanent relief can be expected until the nations of the world get together, without greed or selfish motives, and in a frank and fearless manner face existing conditions. The United States might very properly be expected to take the lead in this matter. In the meantime, as far as we are concerned in Canada, time, production and thrift are the only possible solvents. Exporters and importers should not open credits or engage in contracts without exercising the utmost caution. Their bankers can be of material assistance to them in this regard.

I am glad to be able to report the inauguration of our managerial conferences, which we had hoped to put into effect some years ago. These conferences were held at strategical points, and the proceedings at each place occupied two full days. Every meeting was attended by ten senior Executive officers, who delivered interesting papers dealing with matters relating not only to the welfare of the Staff, but to the betterment of the Bank's service.

The meeting took place at the following cities, and the attendance was as follows:—

	Managers.
Winnipeg, July 21st and 22nd	64
Regina, July 23rd and 24th	49
Saskatoon, July 25th and 26th	46
Edmonton, July 28th and 29th	24
Calgary, July 30th and 31st	49
Toronto, August 20th	47
Montreal, August 21st	27

Many important matters were dealt with, and I have every hope that one of the results of these meetings will be increased efficiency in our service to the public.

Branches.

Eighty-nine new branches have been opened during the year as follows:—Prince Edward Island, 1; Nova Scotia, 3; New Brunswick, 2; Quebec, 1; Ontario, 13; Manitoba, 28; Saskatchewan, 22; Alberta, 17, and British Columbia, 2.

We now have 388 branches in Canada, two in London, one agency in New York, and close affiliations in France, China, Japan and on the Pacific Coast of America.

We feel that we are now in a position materially to assist in the development of Canada's trade with these countries.

Staff.

Nine hundred and thirty-six of our original Staff were given leave of absence to enlist for active service overseas. Of this number, I regret to say that our records show that 123 have given up their lives for their country; 130 have not since reported, and I expect a large percentage of these have decided to engage in other pursuits. The balance, 683, have reported for duty and been absorbed into the establishment. Each of these Officers has been reinstated at an increased salary, the amount being the average increase he might have expected to receive had he been performing his usual duties at home. Our Staff now totals 2,115, of which 1,490 are males and 625 females.

I cannot speak too highly of the splendid work of these Officers. Their efficiency, zeal and loyalty is all that could be desired, and there is, at the moment, a most pleasing "esprit de corps," which I trust will always continue.

BANK OF TORONTO ANNUAL MEETING

The annual statement of the Bank of Toronto, which has already been reviewed in these columns, was presented at the annual meeting, held on January 14th. In his remarks to the shareholders the general manager, Thos. F. How, referred to the increase in current loans of $4,908,802, the amount now being $54,077,641. Mr. How said:—

"Only second to our desire to keep the bank in a strong position has been our desire to give our customers the greatest assistance in carrying on their business. The great function of a bank in Canada is to promote the trade of the country to the fullest legitmate extent, and we believe that during these years of expansion we have been able to give our customers a good service.

"It is at such times of prosperity that we must be most careful in our scrutiny of our loans, and we need to be well assured that our assets can stand the test when reverses come, and we, therefore, think it wiser to take a view of them that can be depended upon should there be a change in conditions, and, so far as is possible, to prepare for unfavorable changes."

The following extracts are taken from the speech of the president, W. G. Gooderham:—

"The indebtedness of the country has now reached an amount that will prove a heavy burden for our present population. So long as the war existed and such tremendous issues were at stake, no sacrifice was too great to be taken in supporting the government in their defence of the empire, but the time has come when the best energies of the administration must be directed towards reducing expenditure in every direction. No new indebtedness should be incurred excepting such as will have the direct effect of increasing production, or for such enterprises as will return sufficient revenue to fully justify the expenditure. Every new demand upon the treasury should be tested by these requirements, and every effort should be made to lessen in every way the country's expenditure."

"Upon the amount of our production depends the amount and value of our exports, and to the increase of our exports we must look for the means whereby we can comfortably carry the burden of interest on our national debt. There is no country that can look forward with greater hope and confidence than Canada. We have immense potential resources, and the development of them is certain to take place. It may take time—perhaps it is better that we should grow steadily rather than rapidly, but our future is certain to be a bright one."

CENTRAL CANADA LOAN AND SAVINGS

At the annual meeting of this company, held in Toronto, January 9th, the statement for the year ended December 31st, 1919, was presented. Referring to the financial results, the president, E. R. Wood, said: "Net earnings of $210,822 (or slightly over 12 per cent.), after payment of all interest on borrowed money, expenses of management, taxes, etc., and after providing for all losses, have enabled your directors to pay a dividend of 10 per cent. for the year, to contribute $3,693 to repatriation and sundry other funds, and to increase our open profit and loss account by $32,128, bringing the amount to be carried forward in this account into next year to the very substantial sum of $124,202. The company's reserve fund and undivided profits now amount to $1,874,202, or over 107 per cent. of our outstanding paid-up capital.

"During the year the demand for mortgage loans has not been as active as the increased activity in real estate and the great demand for house properties would have indicated. Payments on account of principal and interest have, however, been exceptionally well met, and the amount of interest owing by borrowers at the end of the year was less than for several years past.

"The demand for call loan money has, on the other hand, been very consistent, largely as a result of the great increase in all branches of financial activity since the end of the war, and this department of our business has been more active than for some years past. Great care has been exercised in selecting the collateral for these loans, and they are all well margined."

Mr. Wood also referred to the exceptionally prosperous year which had been enjoyed by the Dominion, and which is reflected in new records of bank deposits, bank clearings and other figures.

A pamphlet showing high and low quotations, over a period of four years, of the principal stocks listed on the Montreal and New York Stock Exchanges, has been issued by Oswald Bros., of Montreal.

ALLOTMENT OF 1919 LOAN

The basis of allotment of the 1919 Victory Loan was as follows: —

1. Up to and including $500,000 in full.
2. Over $500,000 and up to and including $1,000,000, $5,000 in full and 80 per cent. of the balance of $500,000.
3. Over $1,000,000, same as number 2, and 60 per cent. of the balance.

Under this arrangement a subscriber of, say, $10,000,000, would get $500,000 in full, $400,000 additional for the balance of the first $1,000,000, and $5,400,000 for the balance of the $9,000,000, making a total allotment of $6,300,000.

REAL ESTATE HOLDINGS LOWER

Apart from their own premises, the banks sometimes acquire real estate in collecting on loans, and other business transactions. The total acquired in this way is not large, amounting at present to about $5,500,000. Usually, the property is disposed of at the earliest possible moment. The aggregate holdings of the chartered banks, as reported in returns to the government, and not including bank premises, have been as follows over a period of three years:—

	1917.	1918.	1919.
January	$5,819,381	$5,620,190	$5,921,594
February	5,871,110	5,524,121	6,031,773
March	5,805,016	5,560,368	6,106,956
April	5,583,860	5,570,990	6,196,620
May	5,634,299	5,648,094	6,315,140
June	5,669,596	5,688,298	6,166,503
July	5,666,335	5,685,322	5,539,535
August	5,686,418	5,672,569	5,540,382
September	5,710,062	5,746,898	5,558,881
October	5,828,100	5,745,365	5,463,675
November	5,458,048	5,566,561	....
December	5,570,572	5,526,359	....

MOOSE JAW BOARD OF TRADE

At the annual meeting of the Moose Jaw Board of Trade, held on January 9th, the following officers were elected for the coming year: president, W. F. Thorn, manager of the Imperial Lumber Co.; vice-president, W. W. Shaw; councillors—L. A. Blackwood, S. D. McMicken, W. F. MacBean, R. H. Clark, H. Davidson, G. D. Whitlock, M. S. Burger, W. Grayson, A. Maybee, R. Loney, J. A. Caulder, George A. Maybee, L. Hilton, Walter Joyner, W. J. Binning, A. W. Jones, G. C. Ingram, W. A. Watson, F. B. Jones, Dr. S. Merkley.

After serving the board continuously since 1905 the secretary, Hugh McKellar, has retired and the board made him a suitable presentation, and also elected him honorary secretary. In an address of appreciation, much of the progress which had been made of the city of Moose Jaw was attributed to Mr. McKellar's efforts.

The annual report for the year referred particularly to the southern Saskatchewan co-operative stock yards, which provided a market for live stock in the district; to the general increase in business; to the decision reached in connection with the city's water supply. The retiring president, G. A. Maybee, also mentioned that efforts had been made to induce the Canadian Pacific Railway to erect a hotel in connection with its new depot in the city.

At the annual meeting of the Ottawa Clearing House, Edward S. Houston, manager of the Imperial Bank, was elected chairman, in succession to D. M. Finnie, retiring. H. V. McCann, of the Nova Scotia, was elected vice-chairman, and A. Simpson, secretary-treasurer and manager.

IMPERIAL OIL, LIMITED

NOTICE

Shareholders of Imperial Oil, Limited, of record at the close of business on Tuesday, January 20th, 1920, are entitled to subscribe for new shares of the Company at the uniform price of $75 per share in the proportion of one share of new stock for every six shares then held by them, respectively.

Holders of share warrants deposited on or before the 7th day of February, 1920 at the office of the Company, No. 56 Church Street, Toronto, or at the National City Bank, No. 55 Wall Street, New York City, are also entitled to subscribe for new shares at the uniform price of $75 per share in the same proportion as shareholders of record—that is to say, at the rate of one share of new stock for every six shares represented by share warrants so deposited. Receipts wil be issued to depositors, and upon surrender thereof after March 1st, 1920, share warrants will be returned.

The books of the Company will be closed from January 20th, 1920, until the close of business on February 7th, 1920.

The said new shares will be allotted by the Directors of the Company on or after March 1st, 1920, and certificates of subscription and allotment will be issued to shareholders who shall have subscribed therefor as above stated, subject to payment therefor as follows, that is to say:—

On or before the 1st day of March, 1920, 25% of the issue price..............	$18.75	per	share.
On the 1st day of June, 1920............	18.75	"	"
On the 1st day of September, 1920.......	18.75	"	"
On the 1st day of December, 1920......	18.75	"	"
	$75.00		

Shares may be paid for in full on March 1st, 1920, or on any date on which instalments are payable as above stated.

Upon payment in full at the rate of $75 per share, the owner thereof will be entitled to a fully paid share certificate.

Dividend

Shares subscribed for in accordance with this by-law will rank for dividend pro rata in the proportion which the amount paid up on such shares from time to time bears to the full price of $75 per share, but no dividends will be actually paid by the Company to subscribers until their shares shall have been fully paid for and share certificates issued as above stated.

Fractional Rights

No fractional shares will be allotted, but conditional certificates of fractional rights will be issued, which will lapse and be cancelled unless consolidated into full shares and paid up in full on or before March 1st, 1920, and thereafter no right to shares of the Company or to any fraction of a share will be recognized on the part of the holder of any such fractional certificate.

Subscription forms may be had at the office of the Company, 56 Church Street, or at the National City Bank of New York.

JAS. H. ARCHBOLD,
Assistant Secretary.

Toronto, January 12th, 1920. 60

F. B. McCurdy and Co., members of the Montreal Stock Exchange, have purchased the control of the Halifax Fire Insurance Co. Seventy-one dollars a share was paid for 3,400 of the 6,000 shares of the capital stock. The directors agreed to accept this price and all the shareholders who came within a specified time obtained the same figure. New control will begin a reorganization of the company. The capital of the company is $240,000, the shares having a par value of $40, and its reserve is $120,000. The total assets of the company are $420,000.

TWENTY-SECOND ANNUAL REPORT OF

The Merchants Fire Insurance Company

Head Office - Merchants Fire Building
No. 86 East Adelaide Street, TORONTO

N. H. STEVENS

ALBERT J. WALKER, C.A.   RUTHERFORD WILLIAMSON, C.A.
Auditors

REPORT OF DIRECTORS

To the Shareholders:—

Your Directors have much pleasure in presenting herewith the Twenty-second Annual Report covering the year ending December 31st, 1919, together with the usual Cash-Statement and Balance Sheet of Assets and Liabilities, duly certified to by the Auditors and passed for publication by the Superintendent of Insurance for the Province of Ontario. You will be pleased to note therefrom the continued growth and prosperity of the Company, and that the operations and results for the past year were the most successful ever reported to you.

The Premium Income, Interest Receipts, Building Rentals, Commission on Re-Insurance, Re-Insurance Claims and Endorsement Fees were respectively, $472,232.29, $24,206.24, $5,160.00, $1,404.29, $2,195.12 and $263.01, making a total Income of $505,460.95.

The Net Profit on the year's operations was $143,540.57. A dividend of ten per cent. (10%) on the paid Capital Stock was declared therefrom, and the balance carried to the credit of Profit and Loss Account.

The amount at Risk now stands at $69,899,767.00. The number of policies in force is 56,988, an increase of 7,341. The average risk per policy is $1,226.34.

The Expense Ratio for 1919 was 35.74% of the Net Premium Income. Included therewith was all Government Taxes, and special bonuses paid to members of the office staff who resumed duty after overseas service. The Fire Loss Ratio was 31.86%, and the Profits, 32.40% of the Net Premium Income.

The special fund deposited with the Ontario Insurance Department now stands at $111,568.68, and is the largest made by any Canadian Fire Insurance Company. Furthermore it is greatly in excess of the Statutory requirements.

The Books, Vouchers and Securities of the Company were continuously audited and checked during the year. The affairs of the Company are in a very healthy condition, and there is not a doubtful debt or Asset of any kind carried on the books.

All of which is respectfully submitted.

RALPH E. GIBSON, *President.*

CASH STATEMENT

For Year Ending December 31st, 1919

INCREASE IN BANK LOANS

The increase in business activity in the Dominion during the past nine years is indicated by the following record of loans of the chartered banks:—

Oct. 31.	Total loans in Canada.	Total loans elsewhere.
1910	$ 744,381,680	$ 144,548,900
1911	837,580,475	125,685,183
1912	853,636,521	141,487,571
1913	971,277,991	151,518,694
1914	886,825,791	123,242,387
1915	855,360,024	170,294,609
1916	865,340,245	268,805,837
1917	955,640,579	244,840,612
1918	1,077,278,739	269,910,257

HUBBARD FUR COMPANY'S STOCK ISSUE

An issue of 5,000 shares of Lamson and Hubbard Canadian Company's 8 per cent. cumulative convertible preferred stock has recently been placed in Canada, according to an announcement made by Thornton Davidson and Company, Limited. The latter firm announces that application will shortly be made to list the shares of the company on the Montreal Stock Exchange. The authorized preferred stock of the compnay is $1,000,000, of which all has been issued, and, in addition there are outstanding 15,000 shares of common stock, of no par value, out of an authorized issue of 25,000 shares.

The 1920 session of the Alberta Legislature will open on February 17. A short session is anticipated.

THE BANK OF TORONTO

Report of the

Sixty-Fourth Annual General Meeting

The Sixty-fourth Annual General Meeting of the stockholders of the Bank of Toronto was held at the Head Office in Toronto, on Wednesday, 14th January, 1920.

On motion the Chair was taken by the President, Mr. W. G. Gooderham, the Assistant General Manager, Mr. John R. Lamb, was requested to act as Secretary, and Messrs. A. E. Duncanson and C. H. Taylor were appointed Scrutineers.

The Secretary read the Annual Report as follows:—

The Directors of The Bank of Toronto beg to present their Report for the year ending 29th November, 1919, accompanied by the Statement of the Bank's affairs and the results of the operations for the year.

PROFIT AND LOSS ACCOUNT

The Balance at credit of Profit and Loss, on November 30th, 1918, was		$ 625,623 94
The Net Profits for the year, after making full provision for all bad and doubtful debts, and deducting expenses, interest accrued on deposits and rebate on current discounts, amounted to the sum of		1,011,359 09
		$1,636,983 03

This sum has been appropriated as follows:—

Dividends Nos. 150 to 153 at Twelve per cent. per annum		$ 600,000 00
Reserved for Federal Tax	$100,000 00	
Transferred to Officers' Pension Fund	25,000 00	
Y.M.C.A., Navy League and other subscriptions	18,000 00	
Written off Bank Premises	100,000 00	
		243,000 00
Carried forward to next year		793,983 03
		$1,636,983 03

The business of the country has again been of a satisfactory character; all our products have been in demand, the volume of exports has been large, domestic trade has been good, and the results have been encouraging.

The Bank has had another year of advance, and all departments of its business show increases.

The Head Office and Branches have been regularly inspected by the Inspection Staff, and at the Head Office the usual inspection of cash and securities has been made.

Mr. G. T. Clarkson, C.A., the Auditor appointed by the shareholder of the Bank, has made his usual thorough examination, and his report is appended to the General Statement presented herewith.

His name will be submitted for re-appointment.

During the year thirty-two new Branches were opened, making one hundred and fifty-six Branches of the Bank now in operation.

All of which is respectfully submitted.

W. G. GOODERHAM,
President.

GENERAL STATEMENT

29th November, 1919

General Manager.

Toronto, 29th November, 1919.

AUDITOR'S REPORT TO THE SHAREHOLDERS

To the Shareholders of The Bank of Toronto:

I have compared the above Balance Sheet with the books and accounts at the chief office of The Bank of Toronto, and certified returns received from its branches, and after checking the cash and verifying the securities at the chief office and certain of the principal branches on November 29th, 1919, I certify that in my opinion such Balance Sheet exhibits a true and correct view of the state of the Bank's affairs according to the best of my information, the explanations given to me, and as shown by the books of the Bank.

In addition to the examination mentioned, the cash and securities at the chief office and certain of the principal branches were checked and verified by me during the year, and found to be in accord with the books of the Bank.

All information and explanations required have been given to me, and all transactions of the Bank which have come under my notice have, in my opinion, been within the powers of the Bank.

G. T. CLARKSON,
Chartered Accountant.

Toronto, December 22nd, 1919.

The meeting was then addressed by the President, Vice-President and General Manager.

The Report of the Directors and accompanying Statement were adopted, resolutions were passed confirming the Y.M.C.A., Navy League and other subscriptions, and expressing the thanks of the Stockholders to the President, Vice-President and other Directors, and to the General Manager and Staff, for their services during the past year. Mr. G. T. Clarkson was re-appointed Auditor and the following Directors were elected: W. G. Gooderham, William Stone, John Macdonald, Lt.-Col. A. E. Gooderham, Joseph Henderson, Brig.-Gen. F. S. Meighen, J. L. Englehart, William I. Gear, Paul J. Myler, A. H. Campbell, W. R. Bawlf and John I. McFarland.

At a subsequent meeting of the Board Mr. W. G. Gooderham was re-elected President, and Mr. Joseph Henderson Vice-President.

MANUFACTURERS CONFER WITH ONTARIO GOVERNMENT

On January 7th a delegation from the Canadian Manufacturers' Association made representations to the Ontario government regarding fire insurance and workmen's compensation. The report of Justice Masten on fire insurance, made public early last year, was referred to. As the committee which was appointed by the last legislature was dissolved with the dissolution of the legislature, the association urged that a special committee be appointed for the purpose of taking action on the report. The association desired also an opportunity to present its views before the committee. Meantime the association wished to emphasize the importance of several points brought out in the report of Mr. Justice Masten. These were:—

That there should be some form of control by the province of all rate-making organizations, with power to the superintendent or a specially appointed tribunal to inquire, mediate and report in respect of charges against such rate-making organizations of unfairness or discrimination.

That insurance companies should be required to keep records in such a way as to classify all business transacted, so that the profit or loss on each class of risk may exercise an effect on the insurance rate of each class.

The association is opposed to any restriction being placed on the placing of insurance with unlicensed companies. It was also suggested that a suitable board be appointed to co-operate with the fire marshal.

Regarding the administration of the provincial Workmen's Compensation Act, several points were discussed. There is now a vacancy on the board, and the appointment of a neutral party was recommended. The practice of having large sums of money on hand was also criticized.

FUTURE OF PRICES

A meeting of the Bond Men's Club, of Montreal, on January 7th was addressed by Roger W. Babson, of Wellesley Hills, Mass. A composite chart, showing the rise and fall of commodity prices, stock market valuations, railway and industrial stocks and general prosperity and depression of trade from 1904 to 1919, was used by Mr. Babson. He said that the prices of commodities, such as leather, steel, lumber, furs and wheat, while not likely to go back to their old figures, would be very much lower in two or three years than at present; bonds, however, would be worth more, and the money derived from them would have a vastly increased purchasing power.

REPORT ON CONSERVATION WORK

Students of Canada's resources and of the problems associated with their efficient development will find a serviceable addition to the literature on this subject in the tenth annual report of the Commission of Conservation for 1918. A concise review of the year's work is furnished by Mr. James White, assistant to chairman. A series of unusually informative contributions includes "Housing, Town Planning and Municipal Government," by Mr. Thos. Adams; "Medicine in War," by Dr. C. A. Hodgetts; discussions of various phases of forest conservation, by Mr. Clyde Leavitt, Dr. C. D. Howe and Mr. Rolland D. Craig; and of agricultural investigations by Mr. F. C. Nunnick. Particularly timely studies of the water-power and fuel situations in Canada are presented by Messrs. Arthur V. White and Leo G. Denis.

CANADIAN TRADE OPPORTUNITIES IN THE CARIBBEAN

A booklet with the above title has just been issued by the Royal Bank, giving commercial information about the principal islands of the West Indies and about some of the countries of South and Central America. A foreword, referring to the economic struggle which has taken the place of the military struggle, says, in part:—

"In this great economic contest Canada is preparing to play a worthy part. If her heavy obligations are to be promptly met it is essential that the foreign trade of the Dominion should be increased, and among the fields available for commercial enterprise there are none more accessible and few more promising than the tropical islands and adjacent mainlands of the Caribbean Sea. Lying remote from the seat of war, the abnormal demand for their products, at high prices, has greatly increased their wealth and purchasing power. They constitute for us a chain of ideal markets, demanding commodities which we have to sell and supplying what we wish to purchase. Moreover, under the Canada West India Agreement of 1913, a tariff preference of 20 per cent. on most goods of Canadian origin is granted by Antigua, Barbados, British Guiana, Dominica, Grenada, Montserrat, St. Kitts-Nevis, St. Lucia, St. Vincent and Trinidad, affording Canadians a decided trade advantage. A yearly subsidy of $340,000 is also paid by the Dominion government to the Royal Mail Steam Packet Co. to insure a fortnightly steamship service from Canadian ports to the West Indies, and with the creation of our new merchant marine, present steamship facilities will be improved and increased. It is vitally necessary, however, for the Canadian merchant to enter upon his conquest of new markets with energy and enterprise, giving up old usages of trade wherever necessary. Travelling men or permanent agents of proved ability only should be appointed, and the smallest orders accepted in the hope of a future expansion of trade. Delivery should be made as promptly as possible and orders filled according to sample. It is important, above all, to make the purchaser acquainted with the superiority of the goods offered, either in price or quality, for the West Indian trader is conservative, and will not change his connection unless to do so is obviously to his advantage. If Canadian traders bear these points in mind and make eneregtic efforts to take advantage of the opportunities offered, a great increase in our trade with these markets should result."

President A. S. MacKenzie, of Dalhousie University announces, in the course of a special article in the end-of-the-year edition of the Halifax Herald, published on December 31, that a Faculty of Commerce will be established at the university during the coming year, and that a four years' course leading to the degree of Bachelor of Commerce will be instituted. At a meeting of the Board of Governors of the university, held on December 30, it was announced that Senator William Dennis and D. MacGillivray, superintendent of Maritime branches of the Canadian Bank of Commerce, had been elected governors.

GOVERNMENT BOND QUOTATIONS

The following quotations of active bonds are supplied by the National City Co., Ltd., and are in New York funds:—

	Bid.	Offered.
Anglo-French 5% (Oct. 15, 1920)......	96⅛	96⅜
United Kingdom 5½% (Nov. 1, 1921)..	95¾	96¼
United Kingdom 5½% (Nov. 1, 1922)..	95	95¼

Russian Govt. Ext. 5½% (Dec. 1, 1921)	25	30
Russian Govt. Ext. 6½% (July 10, 1919)	25	30
Swedish Govt. 6% (June 15, 1939)	93	95

An offering of $25,000,000 external gold bonds of the government of Belgium is being offered in New York by a syndicate comprising J. P. Morgan and Co., National City Co., and Guaranty Trust Co. Subscriptions are asked as follows: Five-year 6 per cent. gold notes due January 1st, 1925, price 95¾; one-year 6 per cent. gold notes due January 1st, 1921, price, 99.

VOLUME OF EXCHANGE TRADING

Total transactions on the Toronto Stock Exchange during 1919 were 766,572 shares, compared with 300,353 the previous year. Records were not broken, however, though the volume of bond trading amounted to $60,922,710, against $3,528,000 in 1918, and an average of around $1,000,000 other years, gave the exchange a fairly busy time.

By months for the year the record is:—

1919.	Stocks.	Bonds.	Mines.
January	45,773	$ 3,900,675	141,502
February	42,896	4,293,875	71,020
March	59,763	7,541,300	105,585
April	76,998	3,834,340	190,116
May	76,998	3,834,340	190,116
June	56,460	5,383,800	77,494
July	71,763	5,107,000	55,033
August	29,540	2,643,050	39,183
September	77,759	6,068,400	109,048
October	90,747	4,754,200	33,621
November	58,128	6,769,130	86,320
December	79,147	6,792,650	102,027
	766,572	$60,922,710	1,201,065

Comparative totals of stocks and bond trading for a series of years:—

Year.	Stocks.	Bonds.
1919	766,572	$60,922,710
1918	300,353	3,522,000
1917	484,013	5,425,600
1916	1,250,178	2,804,735
1915	592 024	160,300
1914	709,162	572,000
1913	935,962	1,001,700
1912	1,176,509	1,715,320
1911	914,553	1,998,230

W. Ross Alger and Co., of Edmonton, Alta., are opening an office in Calgary, Alta., under the management of Albert G. Hall. Mr. Hall was recently with Lougheed and Taylor, Calgary, previous to which he was for several years with Wood, Gundy and Co., in Toronto and Montreal.

British Columbia shipyards in 1919 exceeded the 1918 output by 14,900 deadweight tons, and have contracts for 65,600 tons, most of which is well on the way to completion. The total of steel and wooden ships built and launched at the British Columbia shipyards during 1919 was 10 steel and 46 wooden, tonnage 170,000.

RAILWAY TRANSPORTATION FREE OF CHARGE

Board of Railway Commissioners Defines Section 345 of New Railway Act—Who May Be Carried Free

LITTLE change in the railway regulations governing the issue of passes or reduced rates has been brought about by the new Railway Act, according to judgments of the Board of Railway Commissioners. After considering this question the following statement was issued on November 12th by the chief commissioner:—

"After having considered this section very carefully, I have come to the conclusion that the whole purport of the section was to give to the railway companies, within certain limits, the right to carry traffic at free or reduced rates; and to such classes of persons and, in some cases, individuals, as the companies may decide upon, subject in certain cases to the approval and permission of this board. The whole section is preceded by the following words: 'Nothing in this Act shall be construed to prevent.' It then refers to five specific classes of persons and a careful examination shows that there is no great change between the present Act and its predecessor, excepting that in subclauses (a) and (c) a limitation is placed upon the power of the railway companies and in subclauses (d) and (e) an extension is provided for.

Reduction in Fares

"Under clause (a) the most which the railway companies can do towards reduced fares for ministers of religion, etc., is to carry them at one-half the regular fare, and in clause (c) the most they can do for members of the provincial legislatures is to carry them free within points in the province to which they belong. It is not clear whether members of the press can be carried free beyond the province in which they reside, but, as there is no comma after the word legislatures, and nothing to designate a difference in the two classes, I am rather inclined to the opinion that the limiting words 'between points within the province' apply to the latter as well as the former. Clause (c) also extends the privilege to dependent members of the families of any persons who are entitled to free transportation under section 346 of this Act, and clauses (d) and (e) also extend the right to employees of the Department of Railways and Canals and to the governor-general and staff, etc.

"This narrows the question down to the interpretation of the last line of clause (c), viz., 'or to such other persons as the board may approve or permit' and to the proviso immediately following subsection (e), both of which are to be found in the previous Act. These words evidently mean something, and it is my opinion that a railway company may decide to grant the privilege of free or reduced transportation to any person, or class of persons, subject always to the approval or permission of the board, and also subject to the proviso herein referred to, which, in my opinion, is a regulating power rather than an enacting one.

Must Get Board's Permission

"To apply this opinion specially to the request made by the Canadian Railway War Board under date of October 16th last, it would seem to me that the railways would have a right, subject to our approval or permission, to grant free or reduced transportation to those parties mentioned in clauses (b), (d), and (e), as well as to all others. Thus, if the railway companies decide to grant free transportation to the Immigration and Customs Officials of the United States, to the families of former and deceased employees of the railways, and the families of former employees of transportation companies, then, if this board approves or permits, they will be within the law in granting such transportation.

"I am not so clear as to the real intention of parliament with reference to the proviso hereinbefore referred to because, taken in its general sense, we are given the right to extend, restrict, limit, or qualify the carriage of traffic by the companies as provided under this section, but I have come to the conclusion that this is only meant as a regulating clause and our powers are restricted to extending, restricting, limiting, or qualifying what the companies may propose to do and, therefore, gives us no originating jurisdiction; but when the railway companies come to us asking that certain persons or classes of persons be given the privilege of free transportation, we would have the right to extend, restrict, limit, or qualify the same. If I am right in my general interpretation of the clause, then I think we have the power either to approve or disapprove of all the requests made by the Canadian Railway War Board in their letter of the 16th of October hereinbefore referred to, and, as they seem to me to be proper requests, I am in favor of approving the same and permitting the issuing of transportation as requested."

Order Naming Classes

General order No. 274, issued by the board on November 20th, said:—

"In the matter of the application of the Canadian Railway Board, on behalf of railway companies subject to the jurisdiction of the board, for free transportation under section 345 of The Railway Act, 1919, file No. 496.26.

"Upon reading the application dated the 16th day of October, 1919, and considering what has been urged in support thereof, it is ordered that the railway companies of Canada subject to the jurisdiction of the board be permitted, until further order, to carry free of charge the following persons, viz.:—

"(a) Department of Immigration of Dominion of Canada: for such representatives of the department as may be required by the minister or deputy minister.

"(b) Departments of Immigrations and Customs of the United States: for such representatives of the departments as may be required by the commission or deputy commissioner of immigration or collector or deputy collector of customs in charge of the district.

"(c) Fire Rangers: fire rangers within their respective districts, employed or authorized by provincial governments.

"(d) Families of former and deceased employees of railways.

"(e) Former employees of transportation companies and their families.

"(f) Deputy ministers of departments of the federal government, and those having the rank of deputy ministers."

NORTH EMPIRE FIRE PLANS EXTENSIONS

The North Empire Fire Insurance Co. has recently passed under the control of the London Guarantee and Accident Co., Ltd., of London, England. Negotiations were carried on by J. E. Hounsom, fire manager of the London Guarantee, who has visited Winnipeg on several occasions in connection with the matter. The head office of the company will be continued at Winnipeg, but on January 1st, 1920, was moved to the Paris Building in that city. A Toronto office has been established in the Confederation Life Building, Toronto. J. A. Thompson, of Winnipeg, will continue to act as president and several of the former directors will continue on the board.

The management of the company will now be under the direction of J. E. Hounsom. Messrs. Fess and Smith, Ltd., Winnipeg, will act as western general agents for the field west of Port Arthur, Ont., and business in that field will be reported to them. The Toronto office will receive reports of business east of Port Arthur, and the company now anticipates entering the city of Montreal and the lower provinces to do fire business. Messrs. Thompson Dale and Power, Ltd., Toronto, have been appointed city representatives.

All policies of the company and interim certificates will be guaranteed by the London Guarantee and Accident Co., Ltd. H. B. Thompson is acting as secretary of the company, with his office in the Paris Building, Winnipeg. Further announcements will later be made in connection with the extensions of the company's business in the east.

CANADIAN TRADE STILL DECLINING

Increase in Imports Offset by Large Reduction in Exports—Trade With Colonies and Foreign Countries Making Rapid Strides

A COMPARATIVE statement of Canada's trade for the twelve months ending November, 1919, shows an increase in imports of over $20,000,000 as compared with the previous year. This amount, however, is offset by a large reduction in exports of nearly $50,000,000. Imports from the United States show a decrease as compared with last year, while on the other hand there is an increase in exports of over $11,000,000.

Exports to the United Kingdom are decreasing, while imports are increasing. Trade with the British colonies and foreign countries is, however, making rapid strides. The following are the twelve months' figures in detail:—

	Twelve Months ending November		
	1917 $	1918 $	1919 $
Imports for Consumption			
Dutiable Goods	559,450,591	508.203,512	585,907,143
Free Goods	452,901,905	390,008,401	334,169,871
Total imports (mdse.)	1,012,352,496	898,211,913	920,077,014
Duty collected	168,265 607	153,738,173	164,987,730
Exports			
Canadian	1,528,966,110	1,256,916,718	1,198,675,465
Foreign	46,176,896	43,844,317	52,419,375
Total exports (mdse.)	1,575,143,006	1,300,761,035	1,251,094,840
Imports by Countries			
United Kingdom	94,180,405	71,006,779	84,526,346
Australia	982,322	5,201,146	1,786,443

ONTARIO WORKMEN'S COMPENSATION IN 1919

The amount of compensation and medical aid awarded under the Ontario Workmen's Compensation Act during the year 1919 was $4,057,696 as compared with $3,883,994 during 1918, though the total number of accidents reported was only 44,260 in 1919 as against 47,848 in 1918. The increase in amount of awards is by reason of increased benefits under amendments to the Act and increase of wages.

The number of fatal accidents was 429 as against 440 in 1918. The number of accidents during the first nine months of 1919 was less, but during the last three months greater than in 1918, indicating recent increase in industrial activity.

NOVEMBER BUILDING PERMITS

Decrease in Value as Compared with Previous Month—Increase of 190.6 Per Cent., Compared with Last Year

EMPLOYMENT in the building trades, as indicated by the value of building permits in thirty-five cities, according to the Labour Gazette, showed a decrease during November as compared with the preceeding month, the total value of building permits falling from $9,469,567 in October to $6,936,438 in November, a decrease of $2,533,129, or 26.8 per cent. New Brunswick and British Columbia were the only provinces to record considerable increases in this comparison.

As compared with the corresponding month in 1918, there was an increase of 190.6 per cent., the value for November, 1918, being $2,387,045. In this comparison all the provinces, except Nova Scotia, recorded substantial increases. A substantial increase in employment in the building trades during 1919 as compared with 1918 is indicated by the large increase in the value of the building permits issued, the preliminary figures for eleven months in 1919 being $71,757,564 as against $35,192,012 in 1918.

Of the large cities, Toronto, Edmonton and Vancouver recorded increases in November, both as compared with October, 1919, and with November, 1918. Montreal and Winnipeg showed declines in comparison with October of 1919 and increases over November, 1918.

New Developments In Industrial Field

Further Advancement of Pulp and Paper Trade—American Concern Interested in Halifax as Possible Shipbuilding Site — Sarnia Will Soon Have $20,000,000 Steel Plant—More American Branches Announced

THE opening of the year was featured by the announcement of important developments in the pulp and paper field. C. Howard Smith, of Montreal, president of the Howard Smith Paper Mills Co. operating two mills in Quebec and one in Ontario, appeared before the New Brunswick government recently and placed before Premier Foster and his associates a proposition for the establishment of pulp and paper mills in New Brunswick by a new corporation. "It all depends upon our ability to secure the necessary timber limits," said Mr. Smith. "We would require some four or five hundred square miles, and I believe they should be available. The industrial development which would result from a proposition involving two million dollars or more, such as we plan, would be of much benefit to New Brunswick, which needs that kind of development. If the government goes through with the proposed hydro-electric development plans, we would be interested in getting power from that source."

Increase of Wayagamack Holdings

The Wayagamack Pulp and Paper Co., Ltd., following on the recent purchase of the extensive Breakey timber limits, on the south shore of the St. Lawrence, have now completed the purchase of the limits owned by the Portneuf Pulp and Lumber Co. of Albany, N.Y., in the Saguenay district. These new areas comprise 484 square miles, and are said to be among the best on the north shore. The purchase is regarded as a most important one, and brings the total limit holdings of the Wayagamack Co. above 2,000 square miles. When originally formed the company secured the Baptist limits, in the St. Maurice district, which have a total area of 1,121 square miles. Towards the end of 1919 they acquired the Breakey limits, with a total area of 451 square miles, and with the acquisition of the Portneuf Pulp and Lumber Co. limits of 484 square miles, they now have a total of 2,056 square miles. The limits are all situated in different territories, and will give the company holdings of standing timber far in excess of the requirements of their mills.

Possibility of Shipyard for Halifax

Chas. N. Delaite, assistant manager, of the Winnisimmet Shipyards of Chelsea, Mass., was in Halifax recently to look over the advantages of the city as a possible site for a branch of the Winnisimmet yards. From a shipbuilder's standpoint Mr. Delaite is pleased with the possibilities of Halifax Harbor. He has already paid a visit to St. John, but it is not probable that the shipyards will locate there. The restriction placed by the American government on wooden ships has forced the Winnisimmet Shipyards into steel shipbuilding. The plant, if located at Halifax, will construct wooden ships of all classes.

Developments in Ontario

It is stated that the Republican Truck Co. will open a branch factory in London early in the spring. For months negotiations have been carried on, and now the announcement is made that the work is completed and that the firm will open there shortly. Eventually the factory will employ more than 500 hands, and it is expected that approximately 200 will be employed at the commencement. The Republican Truck Co. is a large American firm that has lately reorganized. For many years it has had its head office in Cleveland, with thousands of employees. The Chamber of Commerce, assisted by prominent citizens, has been negotiating with several other large concerns with the view to having them locate at London. Vacant land has been purchased in the eastern section of the city that may be sold to prospective firms at cost to assist them in securing a plant.

During the final meeting of the 1919 Sarnia city council it was announced that New York, Detroit and Pittsburg capitalists had absorbed the Lake Huron Steel Corporation, which recently purchased a large tract of land on the local Indian reservation, and this company, under a Canadian charter, would shortly commence operations there in building the largest alloy steel plant in America, at an outlay of over $20,000,000. Solicitors of the Lake Huron Steel Corporation waiting on the council stated that the steel corporation under a new name and charter, with a capital of $20,000,000, would assume immediate control of the Lake Huron Steel Corporation and carry on the alloy steel business.

Inquiries have been received by the Border Chamber of Commerce from manufacturers regarding activities in the Border Cities, and some of them are expected to materialize into new border industries within a short time. Lack of available factory space and premises for small manufacturing concerns constitutes a serious obstacle to development along this line. There is apparently a tendency on the part of manufacturers to avoid building at present. This tendency is probably due, in a large measure, to the shortage of raw materials and the cost of labor and material.

The Gerlach-Barklow Co., of Joliet, Ill., have purchased the McCloy factory in Stratford, Ont., and will open a branch there on April 1st for the manufacture of calendars, lithographed advertising specialties, etc., moving their Canadian headquarters from Toronto to that city. The necessary alterations will be made at once. About 50 hands will be employed.

It is definitely known that the Armour meat packing firm of Chicago is looking for a site in Ottawa to establish a large warehouse. Representatives of the firm were in Ottawa recently, and spent a couple of days looking over prospective sites.

The Dominion Canners, Ltd., will erect large additions to their factories at Belle River and Dunnville this year.

Other Industrial Notes

Cluett, Peabody and Co. have taken over from the United States government its ordnance factory C, situated at Lachine, Que., and formerly used for the manufacture of munitions. It is stated that the price paid was $60,000. The company already has access to its new plant. Considerable alterations upon an extensive scale will soon be put into execution. The Cluett-Peabody Co.'s object is to secure facilities for building up export trade as they are at present unable to do more than keep up with the required home demand.

Plans for additions and improvements to the extent of about $1,000,000 have been decided upon by the Dominion Oil Cloth and Linoleum Co., Ltd., during the coming year at their factory premises in Montreal. The work will be commenced as soon as the weather makes active operations possible.

It is stated that Mr. Handley Page, president of the Handley Page, Ltd., airplane manufacturers of London, England, is on this side of the Atlantic to take up the matter of the firm's extensions in Canada and the United States. Since the company has been putting out its latest type machines numerous requests have reached the head office for the completed product, and it has been decided to manufacture in Canada. At what point the Handley Page, Ltd., intend to erect their large plant is not known, but advices indicate it will be some point in Canada.

Subject to certain stipulations made by the cabinet, a grant of $200,000 will be made by the Provincial Department of Industries to the Canada Western Cordage Co., of New Westminster, B.C.

THE FOUNDATION OF A GREAT SUCCESS

The world-famous merchant, John Wanamaker, attributes his phenomenal success to having carried Life Insurance on the endowment plan. This system encouraged him year by year to lay by a fixed amount of money. As means increased, additional policies were taken and as they matured the proceeds were invested in new departures in connection with the business. These endowment policies helped greatly in the accumulation of capital. Every young man should carry Endowment Insurance. It furnishes a motive for saving. Money that might otherwise be dissipated is accumulated—and at good interest. Many have laid the foundation of success, not so notable perhaps as that of the Philadelphia millionaire, through investing in Endowment Policies in the Mutual Life of Canada.

Do not spend your surplus, lay it by for a sunny day by means of a Mutual Life Endowment

Business in force is now over

Two Hundred and Eleven Millions

GOVERNMENT AND MUNICIPAL BONDS

Two Large Provincial Issues Sold Already This Year—Greater Winnipeg Water District Will Borrow—Several Other Issues Coming

THIS week was featured by the sale of an issue of $3,000,000 5½ per cent. ten year bonds of the province of Ontario, to A. Jarvis & Co., Toronto, at 90.41 and interest, payment to be made in New York funds. The bonds will, of course, be sold in the United States. As the transaction is not yet completed, it is not known just what premium the province would realize on the New York funds, but the present rate of around 8 per cent. would mean that the bonds were sold at 98.41 and interest, or a 5.70 per cent. basis. The money will, of course, be left in New York to meet the obligations falling due. Taking the New York price of 90.41, the interest basis is 6.75 per cent.

British Columbia negotiated a $2,500,000 loan last week on a more favorable basis than previously. The money will be used for railway purposes, and it is expected that more funds will be required later for the same purpose.

Included in the following offerings is the $1,000,000 issue of the Greater Winnipeg Water District, particulars of which are advertised elsewhere in this issue:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders Close.
Assiniboia, Man.	$ 161,506	5	Various	Jan. 21
Rivers, Man.	9,000	6	20-instal.	Jan. 21
Yorkton, Sask.	39,500	6	20-instal.	Jan. 27
Greater Winnipeg Water District	1,000,000	5½	20-years	Feb. 16
Dauphin, Man.	35,000	6	30-years	Feb. 20

Dauphin, Man.—Tenders will be received until February 20, 1920, for the purchase of $35,000 6 per cent. 30-year debentures. (See notice elsewhere in this issue.)

Winnipeg, Man.—Tenders will be received until February 16, 1920, for the purchase of $1,000,000 5½ per cent. 20-year debentures of the Greater Winnipeg Water District. (See advertisement elsewhere in this issue.)

Yorkton, Sask.—Tenders will be received until January 27, 1920, for the purchase of $39,500 6 per cent. 20-instalment debentures. The money will be used for electric light and waterworks purposes. (See advertisement elsewhere in this issue.)

Assiniboia R. M., Man.—The municipality is again calling for tenders on January 21, 1920, on various issues of bonds totalling $161,506.68, as follows: 5 years, wells, $4,663.04; 7 years, sidewalks, $538.64; 20 years, waterworks, $57,115; 20 years, sewers, $99,190. These debentures can be issued bearing either 5 per cent. or 6 per cent. interest, and persons tendering are required to state amount if 5 per cent. debentures are issued and amount if 6 per cent. debentures are issued.

Money By-laws Passed

Galt, Ont.—A by-law has been passed to raise $30,000 to install a central heating plant at the hospital.

Sarnia, Ont.—A by-law authorizing an expenditure of $35,000 on the Point Edward waterworks has been passed.

Guelph, Ont.—A by-law has been passed authorizing an expenditure of $75,000 for the construction of a new gas container.

Cornwallis, Man.—A by-law has been passed authorizing the expenditure of $200,000 on the construction of 92 miles of road within the next three years.

Prince Rupert, B.C.—The city council has passed a by-law to raise $10,000 for sewer improvements, and $50,000 for the erection of a municipal building.

Taber, Alta.—The provincial government has authorized the Taber Irrigation District to borrow $272,000 for the purpose of constructing irrigation works.

Lindsay, Ont.—Two money by-laws have been passed, as follows: To borrow money to meet expenditures of Board of Education, and to borrow money to the extent of $69,741, for debentures on construction of paved roadways.

Hamilton, Ont.—Electors have carried a $850,000 by-law for construction of a first unit of overflow sewer system.

London, Ont.—A by-law has been passed providing $20,000 for construction of playgrounds, and $100,000 for construction of a reservoir.

Debenture Notes

Levis, Que.—The city will borrow $80,000 for road construction purposes.

Sherbrooke, Que.—All tenders on the city issue of $342,000 bonds were rejected.

Oak Bay, B.C.—All tenders were rejected on the $68,000 5½ per cent. 20-year bond issue.

Moose Jaw, Sask.—The city council has authorized the city treasurer to borrow $625,000 from the Canadian Bank of Commerce for current expenses.

Saskatoon, Sask.—With the passing of the city's latest private bill by the legislature, Saskatoon gets three years more of grace on some $108,000 debentures which were authorized in 1913.

Edmonton, Alta.—That the city will make an effort to sell bonds to local citizens in order to finance the securing of a new unit for the power station, was the intimation given out by Mayor Clarke at a meeting of the commissioners recently. If this was done, the city would be able to avoid the unsatisfactory exchange rates.

Montreal, Que.—The Montreal Catholic School Commission, in its bill this session of the legislature, is asking for power to borrow $2,000,000. The reason for the loan is that it is necessary to acquire new school sites, to build new schools, to enlarge and improve existing schools, and to pay the debts of annexed municipalities, for which purpose $1,000,000 is needed alone.

Outremont, Que.—Notice is given that the school commissioners for the municipality of the city will present at the present session of the Quebec Legislature a petition to the effect, that notwithstanding the general school law, there be enacted a law authorizing them to borrow a sum of $400,000 for a period not exceeding forty years, and to levy and raise for the payment of capital and interests on the loans.

Toronto, Ont.—Tenders were called up till noon to-day, January 16, for the purchase of $2,000,000 4½ per cent. long term bonds, due September 1, 1953, of the Toronto Harbour Commission. Up to the time of going to press no information was received of the sale of the issue.

Manitoba.—Although the province successfully disposed of $4,000,000 6 per cent. bonds last month, the government has still to arrange for $2,548,000 in order to meet the payment which falls due on the 1st of February. It is proposed to issue short date treasury bills for this amount for two months, for the purpose of enabling the market to fully absorb the present issue before anything further is offered.

Calgary, Alta.—The plan of selling the city's bonds locally has been endorsed by ratepayers and civic officials. It is thought that the entire new issue of bonds for the $350,000 new sewage disposal plant, the $278,316 extension to the water works system, and the $350,000 of bonds unsold as yet for improvements on the exhibition grounds might well be offered locally in Calgary. All the issues voted for by the ratepayers at the last election are bonds bearing 5 per cent. interest. It is likely that they would be offered so that they would yield to the purchasers from 5½ to 6 per cent. interest, and this could be accomplished by selling them at a little under par.

Bond Sales

Brock Township, Ont.—An issue of $2,600 5½ per cent. 20-instalment debentures has been purchased by W. L. McKinnon & Co.

County of Wentworth, Ont.—Messrs. Morgan-Dean, Harris & Co. have purchased $23,134 5½ per cent. 10-instalment debentures.

Etobicoke Township, Ont.—Messrs. W. L. McKinnon and Co., have purchased an issue of $50,000 6 per cent., 20-instalment debentures at a price of 101.172.

Kitchener, Ont.—Messrs. C. H. Burgess and Co. have purchased two blocks of 6 per cent. bonds as follows:—$30,000, 20-instalments; $46,500, 30-instalments.

The Time to Buy

Government and Municipal Bonds is when the yield is unusually favorable. The following are selected from our list.

$38,000
City of Hamilton 4½% Bonds, due 1933
Yield 5¾%

$100,000
City of London 4½% Bonds, due 1943

Ground Floor, Lindsay Building
WINNIPEG - - MANITOBA

Township of East Flamboro, Ont.—An issue of $29,568 6 per cent. 20-instalment bonds has been purchased by Messrs. Morgan-Dean, Harris & Co.

North Vancouver, B.C.—The $225,000 three-year treasury notes which were purchased by the British American Bond Corporation, have all been sold to investors to yield 6½ per cent.

Verdun, Que.—*The Monetary Times* learns that the city has disposed of its issue of $225,000 5½ per cent. 20-year bonds, for which tenders were called three times, by private sale to Rene T. Leclerc. The price is not known.

La Tuque, Que.—An issue of $50,000 6 per cent. bonds, maturing September 1, 1943, has been purchased by the Provincial Securities, Limited, at 100 and accumulated interest. Other tenders were: Nap. G. Kirouac, 97.24; Credit Canadien, Inc., 96.06; Corp. des Obligations Municipales, 93.00.

Ontario.—The province has disposed of another bond issue of $3,000,000 to A. Jarvis & Co., at 90.41, New York funds. The bonds are for 10 years and bear interest at 5½ per cent. A few tenders were invited and were all submitted in New York funds, as follows: A. Jarvis & Co., 90.41; W. A. Mackenzie & Co. and the Continental Trust and Savings Bank, Chicago, 90.38; Wood, Gundy & Co., Dominion Securities Corp., and A. E. Ames & Co., 90.20; Harris, Forbes & Co. and the National City Company, 88.52.

Edmonton, Alta.—Twelve blocks of debentures were advertised last month by the debenture branch of the department of education for Alberta, totalling $23,000, but only six were sold. The buyers were the Canada Landed and National Investment Co., Winnipeg, and Wood, Gundy & Co., Toronto. It is the intention of the department to re-advertise the unsold debentures in the course of this month, when there are expected also to be some new blocks to add to the list. In the meantime the school districts will carry on with the assistance of their local banks.

British Columbia.—The $2,450,000 5 per cent. 5-year issue of bonds which was disposed of by private sale to a syndicate comprising the Dominion Securities Corp., Wood, Gundy & Co., and A. E. Ames & Co., at 97.84, was for the purpose of providing for the carrying on construction work on the Pacific Great Eastern Railway, the provincial government road, and was arranged through Pemberton & Sons, of Vancouver and Victoria, and H. A. Ross, of Victoria.

The loan is the last that can be made under the Loan Act passed at the 1916 session of the legislature, whereunder provision was made for borrowing ten millions, six of which were marked for P.G.E. purposes and four for provincial business. The full six millions for the railway have now been floated. Recently Hon. John Hart, Minister of Finance, announced it is the intention of the government to spend some four millions next year on construction work on the P.G.E. to complete the line from the present end of steel at Williams Lake to Prince George. As part of the loan just floated will be utilized in repaying loans made to the province by the Canadian Bank of Commerce, it would appear certain that to provide the funds required for the year's railway program will necessitate a subsequent flotation later in the year.

Saskatchewan.—The province has disposed of an issue of $3,500,000 6 per cent. 5-year bonds to A. Jarvis and Co., Toronto, at 102.03, which means that the province pays about 5.55 for its money. The proceeds of the issue will be used to cover the capital expenditures authorized at the last session of the legislature. Tenders were asked on 5 and 10-year bonds, and the following were submitted:—

	5 years.	10 years.
A. Jarvis and Co., Canada Bond Corp., Housser, Wood and Co., and R. C. Matthews and Co.	102.03	100.16
W. A. Mackenzie and Co., and Continental Trust and Savings Bank, Chicago	101.21	99.18
Dominion Securities Corp., Wood, Gundy and Co., and A. E. Ames and Co.	100.08	100.399
R. A. Daly and Co., and Brent, Noxon and Co.	......	99.63

Portage la Prairie, Man.—The rural municipality of Portage la Prairie invites tenders up till February 3rd, 1920, for an issue of debentures amounting to $79,610, bearing interest at six per cent., payable at the Merchants' Bank of Canada, in the city of Portage la Prairie or Toronto, in twenty equal yearly instalments, including principal and interest.

DRUMMOND APARTMENTS BOND ISSUE

The Royal Securities Corporation is offering $650,000 6½ per cent. first (closed) mortgage gold bonds of the Drummond Apartment Buildings, which bonds mature from 1920-1929. The Drummond Apartment Buildings, one of the most modern apartment properties in Montreal, which has just been completed at a cost of over $1,000,000, form the security behind the new issue of real estate bonds.

The bond issue is secured by first mortgage on land, buildings and equipment valued at $1,117,552, and by a further provision the property is insured for $750,000 in favor of the trustees for the bonds, the Montreal Trust Co.

CANADIAN NORTHERN TRUST CERTIFICATES

An offering of $7,500,000 Canadian Northern Railway equipment trust 6 per cent. gold certificates, series D, 1919, and due in semi-annual instalments of $375,000 each, June, 1920, to December 1, 1929, inclusive, was made in New York last week by Wm. A. Read and Co., at a price on a 6¼ per cent. basis for the 1920 to 1921 maturities, and 6½ per cent. for the 1922 to 1929 maturities, and *The Monetary Times* is informed that the entire issue has been disposed of.

The money is required to pay for equipment purchased last year by the Canadian National Railways, though under the original organization it goes out now under the name of Canadian Northern.

MERCHANTS FIRE INSURANCE CO.

Large increases in new business written, and in the volume of business in force, together with a favorable loss ratio, are the main features of the annual statement of the Merchants Fire Insurance Co. for the year ended December 31st, 1919 shown in detail elsewhere in this issue. The company does business throughout Ontario, under a provincial license. This is its twenty-second annual report, and since the present management took charge the position of the company has been greatly improved.

Income for the year totalled $505,460, and the net profit was $143,540. After paying a dividend of 10 per cent. on the capital stock of $150,000, the balance was carried to the credit of profit and loss. The expense ratio for the year was 35.74 per cent., in which are included payments to members of the staff who returned from overseas service. The fire loss ratio was 31.86 per cent., which is very favorable, and is accounted for in part by the fact that the company's risks are mostly on residential property in cities, towns and villages, and it has, therefore, escaped loss from most of the destruction of industrial plants. The average risk per policy is $1,226. The balance sheet shows that the funds are invested in an excellent selection of securities. There is a net surplus of $135,619, above all liabilities, including capital stock paid up.

From figures compiled by R. M. Winslow, secretary of the British Columbia Credits and Traffic Association, the fruit and vegetable crops of the Okanagan, including the Salmon Arm district, yielded a return of $5,504,250. In 1918 the valley's output was valued at about $4,000,000. With the exports of hay, grain, cattle, hogs and poultry added, the total of the valley's production will amount to well over $6,000,000.

NEWS OF MUNICIPAL FINANCE

Ottawa Defeats Single Tax Scheme—Moose Jaw and Saskatoon Tax Collections Good—Large Increase in Montreal Revenue.

Portage La Prairie, Man.—The total amount of taxes collected in 1919 was $209,393. Unpaid taxes at the end of the year totalled $73,545.

Sydney, N.S.—A statement issued by Mayor Fitzgerald shows that in 1919 $276,807 was collected in general taxes as against $227,382.49 for 1918. Assessment in 1919 was $326,730 against $276,807 in 1918.

Ottawa, Ont.—Ratepayers have defeated the tax reform issue, which provides for the exemption of buildings, improvements, business assessments and incomes from taxes, and with the exemption of water and school rates to gradually transfer the burden of taxation to land values.

Edmonton, Alta.—The city closed its 1919 banking business without an overdraft, according to a statement by the mayor. Although the bank return at the end of the year does not show this, the taxation payments which were in the mails will fully wipe out any overdraft against the city.

Saskatoon, Sask.—Total tax collections for 1919 amounted to $1,114,274, an increase over those for 1918, which were $961,225. The feature of the collections, stated Acting Commissioner Leslie, is that they exceeded by approximately $118,000 the total tax levy, which was $996,349. Outstanding tax arrears at December 31 were approximately $858,000.

Calgary, Alta.—According to compilations of City Comptroller Wood, for the eleven months of the year ending November 30 last, and estimates for the present month, the three utilities will show the following approximate surpluses for 1919: Street railway, estimated surplus, $25,000; Electric light and power department, estimated surplus, $15,000; Waterworks department, estimated surplus, $10,000.

Walkerville, Ont.—Taxes during the year 1919 amounted to $212,235, according to the financial statement just issued. Of this amount $199,552 has been paid to date. The amount of assessed values for the year is: Land and buildings, $6,035,779; business, $760,261 income, $389,582; total, $7,185,622. The amount of exemption is $631,538, which leaves the amount assessable $6,554,084. This is an increase over 1918 of $84,074.

Victoria, B.C.—The percentage of taxes paid into the city last year was greater than in any other year since the beginning of the war, Ald. W. J. Sargent, chairman of the Finance Committee of the City Council, stated recently. During 1917 and 1918 the tax collections were not sufficient to meet the current expenses of the corporation, and the city's expenditure ran $345,000 behind revenue receipts during those two years. Collections in 1919, however, have not only enabled the city to meet current expenses, but have also made it possible to pay $25,000 on account of the deficit of the two previous years.

Moose Jaw, Sask.—Figures issued by city treasurer Goudie indicate that the total of 1919 city taxes paid up to the 31st of December was $574,377, about 68½ per cent. of the total tax levy for the year, and the largest proportion of the current taxes paid in any year since the start of the war. This total exceeds by $66,254 the total current taxes paid up in 1918, when the current payments, $508,122, represented a total of 64 per cent. of the annual levy. The payment of arrears dropped below 1918, however; the arrears paid in 1919, $165,913, was $25,559, less than the arrears of $191,473 paid in 1918. The total for 1919, however, exceeds the 1918 total by $40,695, the figures for 1919 being $740,291, and for 1918, $699,595.

Vancouver, B.C.—The city's total expenditure in 1919, according to Mayor Gale, was $5,740,000, just $193,000 more than in 1917. Of this sum $4,223,000 was paid out in fixed charges, such as interest on sinking funds, payments on treasury notes and other charges that were incurred in previous years of civic financing, and regarding which the city council had no alternative now but to meet them. This left out of the city's total expenditure only $1,517,000 for the city to spend on its general maintenance. The fixed charges included, among other items, $1,016,000 for schools, and the police department cost $393,000. There was the city's share towards the Greater Vancouver joint sewerage board for the year, amounting to $70,000, and a large hospital account. All these had to be met, and the city financed on what was left.

Hull, Que.—The total assessable property of the city for 1919 amounts to $13,800,899, an increase of $430,996, according to the report of the treasurer, Joseph Raymond. Of this amount exemptions, including church property, civic buildings, etc., total $3,353,022. The value of the municipal assets is given at $2,678,340, and the debt is $2,557,742. The taxation rate per $100 is $1.25 and the population numbers 30,586, this being an increase of 10,657 since 1914. Principal sources of revenue during the past year were: Taxes, $172,716; recorder's court, $28,321, and other items, making a total of $220,248. Expenses include: Maintenance, $52,224; bonds, $182,690; investments, $26,580; Gatineau bridge, $28,000; current account, $15,000; totalling $320,463. Salaries total $65,017, and debenture interest $75,752.

Montreal, Que.—Since 1910 the city's realty values have more than doubled, the amount in 1910 being $428,585,356, and in 1919, $852,411,726. Revenue figures also show large increases. In 1910 the revenue amounted to $6,615,701, compared with $20,504,173 in 1919.

The sources of revenue on which the estimates for 1920 are based show that the city raises $1,719,000 from the water rates, from the business tax $1,351,000, about $9,000,000 from realty tax, $5,000,000 from school tax, and about $3,000,000 from other sources of revenue, including a contribution of $500,000 from the Montreal Tramways Company, in accordance with the new agreement between the city and the company. The grand total of revenue is $20,504,000. Over half of this amount is appropriated for the payment of the interest charges and the school tax. The interest charge amounts to $6,216,000 and the school tax to $4,552,278.

The following resolution has been adopted by the city council:—

"That this council requests the members of the provincial legislature not to grant to the different municipalities on the island of Montreal, except the city of Montreal, any borrowing power, seeing that these different municipalities may one day or another be annexed to Montreal, which would then have to support the burden of debts contracted by the said municipalities, in virtue of these new powers."

Toronto, Ont.—It is probable that Toronto will apply to the legislature for two amendments to the Assessment Act. The most important of these is to the clause which deals with one class of income from invested capital which at present escapes taxation, and which Assessment Commissioner Forman is anxious to secure permission of the legislature to assess. The other is in regard to the statement submitted by the person assessed.

Should these two amendments to the Assessment Act be passed by the provincial government, they will undoubtedly result in a further increase of the city's assessment on incomes. This class of assessment has already shown a rapid growth, and is this year $8,760,824 larger than it was last. A comparison of figures for the past four years illustrates the results which have been achieved. In 1917 Toronto's total assessment on incomes was $20,837,702; the following year, $25,684,967; in 1919, $33,611,090, and this year $42,371,914.

The annual report of the assessment commissioner shows that twelve public service corporations are assessed at $42,038,278 for 1920, an increase of $571,683, as compared with 1919.

Toronto's debt at the beginning of 1920 is $104,000,000—almost exactly what it was a year ago. The maturing of debentures has been offset by new issues. Debentures not sold at the year's end were practically confined to $450,000, of which $150,000 is for parks. There are considerable debts already incurred for which debentures will have to be issued during 1920. These include $3,000,000 for local improvements (such as roadways) authorized, and $1,000,000 for the Hydro, besides the cost of Royce avenue park, which has to be settled by arbitration, and of Scarboro Beach park, if the city finally decides to purchase. These sums, with the unnegotiated debentures, will run the total up towards $5,000,000.

$1,000,000

THE

King Edward Construction Company, Limited

Toronto - Ontario

(Subsidiary of United Hotels Company of America).

Guaranteed 7% Cumulative Redeemable Preference Shares

Par value $100 per share

Dividends payable half-yearly, May 1st and November 1st.
Payable in Toronto and to American holders in New York
Redeemable at option of the Company at 110 on any dividend date.

THE KING EDWARD CONSTRUCTION CO.—The King Edward Construction Company has been incorporated for the purpose of constructing an addition to the King Edward Hotel, of Toronto, now in the chain of United Hotels Company of America, and is acquiring the remainder of the block on King Street, Toronto, now occupied in part by The King Edward Hotel Company, Limited, covering in all approximately 16,000 square feet, on which it is proposed to erect a modern, fire-proof hotel building of seventeen stories, having 500 guest and 500 bathrooms.

The estimated cost of Land and Building is $2,350,000; of this $1,000,000 has been arranged for by a first mortgage, the balance to be provided from sale of the shares.

The King Edward Hotel Company has made an agreement by which it leases the new addition for a period of 30 years at a rental sufficient to create a sinking fund, the application of which will retire the first mortgage by the end of the lease and pay interest thereon, pay 7% dividend on the Cumulative Preference Stock, 10% on the Common Stock; all taxes, rates, insurance and repairs.

PARENT ORGANIZATION.—The United Hotels Company of America, guarantors, control sixteen modern, fire-proof hotels throughout the United States and Canada; the net earnings of which (after interest and depreciation) for the first six months of 1919 were $558,639.94. Three of these hotels are in course of construction. It is safe to say that no company operating hotels in North America was ever better organized or equipped than the United Hotels Company of America.

PREFERENCE STOCK GUARANTEES AND SAFEGUARDS.—The dividend on the Preference Stock is guaranteed unconditionally and irrevocably both by The King Edward Hotel Company and the United Hotels Company of America, by trust agreement with the Toronto General Trusts Corporation, Trustee.

The application of the Sinking Fund against the outstanding mortgage will wipe it out in thirty years, thereby leaving the entire property as security to the Preference Stock.

The terms of the lease make the dividends and sinking fund payments of The King Edward Construction Company, a direct obligation of The King Edward Hotel Company, and therefore payable in priority to dividends on that Company's stocks.

This stock is Preferred both as to Capital and Dividends, the latter being cumulative.

HOTEL ACCOMMODATION.—Toronto with a population exceeding half a million has less than 500 rooms in fire-proof hotels, over 400 of which are in the King Edward. On completion of the new addition there will still be only 1,000 rooms available. This is a smaller percentage than in any other city of its size in America.

Price: Par ($100) per share

carrying a bonus of thirty per cent. in Common Shares.

Payment may be made as follows:
25% on application; 25% on Feb. 1st, 1920;
25% on Jan. 1st, 1920; 25% on Mar. 1st, 1920.

Fractional shares of Common Stock will be adjusted, at $60 per share.

Dividends on amounts paid up on Preference Stock commence on date of payment.

We reserve the right to cancel all subscriptions and return the amounts paid by subscribers with interest at 7% at any time prior to the 1st day of April, 1920.

Application will be made to list the Preference and Common on the Toronto Stock Exchange.

Detailed statements of the Companies involved, agreements, guarantees and leases are on file at this office and open to inspection by purchasers of stock.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

INVESTMENTS AND THE MARKET

(Continued from page 14)

current assets exceeding liabilities of a similar character by $1,818,083 as compared with $1,813,794 in 1918 and $1,719,756 in the previous year.

Cash holdings at the end of the period under review declined by nearly $120,000 from the level of 1918, but accounts receivable were higher by some $150,000, while inventories were increased by $136,741 to $2,309,213. Investments of the company were augmented during the year by nearly $860,000, reflecting the purchase of the Odell Manufacturing Co. early in the Brompton 1919 fiscal year. To effect this the company offered an issue of $1,0000,000 20-year 6 per cent. general mortgage bonds offered to shareholders early in 1919 at a price of 80. The new issue brought the company's outstanding bonds up to a total at the end of October last of $2,375,000 as compared with $1,452,000 at the close of the previous year.

Dominion Bridge Co., Ltd.—Earnings of the company for 1919, before the usual reductions were made, amounted to $1,640,531, as compared with $2,477,009 in 1918, a decrease of $836,478, but $279,998 in excess of those in 1917. The year just ended witnessed the cancellation of munition orders and the resumption of more normal business. Improvement in the way of working capital is shown in the balance sheet, current assets exceeding current liabilities at the end of the company's last fiscal year by $3,867,406, as compared with $3,183,514 in 1918 and $1,797,449 in 1917.

After allowances were made for the usual charges and in addition a new item of $42,150 set aside as a reserve for investments, the amount available for application to the outstanding capital stock of the company was $1,343,305, representing earnings at the rate of 20.6 per cent. on the shares, as against $1,865,717, or 28.7 per cent., a year ago, and $1,186,436 in the preceding period. With the addition of the previous year's balance, the amount carried forward into the current year's account was $3,848,613, as compared with more than $800,000 less in 1918.

Wayagamack Pulp and Paper Co.—Total profits for the year ended November 30th last, after providing for war taxes, amounted to $1,103,687 as compared with $1,057,742 in the same period of 1918. After deducting bond interest, bond discount write-off, depreciation, etc., and stumpage write-off, net profits available on the $5,000,000 outstanding capital stock were $552,100 as compared with $513,706 a year ago. The net for the year under review is equivalent to 11.03 per cent. on the paid-up capital as compared with 10.88 per cent. in 1918. After adding in balance forward from the previous year and allowing for a write-off of $500,000 to general reserve, bringing this account up to $1,000,000, surplus for the year amounted to $959,648 as against $908,060 in 1918.

The working capital position of the company totalled $2,067,159 as compared with $1,230,650 in 1918. Current assets amounted to $2,652,254 and current liabilities $585,095. Apart from this, there was an increase in assets over last year of about $500,000, the total for 1919 being $11,989,382 as compared with $11,476,324.

In his remarks to shareholders, C. R. Whitehead, the president, says:—
